PROCEEDINGS AND DEBATES OF THE 83d CONGRESS, SECOND SESSION

SENATE

THURSDAY, JULY 8, 1954

(Legislative day of Friday, July 2, 1954)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our Father God, whose love passeth our understanding and whose mercy is wider than the sea, we turn to Thee realizing that Thy purpose for us is vaster than any possible prayer we may lift to Thee. We thank Thee for all the disciplines which have been shaping our lives across these pilgrim years—for the mingled loss and pain, the defeats and triumphs, the shadows and sunshine, which have combined to teach us that all is dross and vanity save faith and hope and love and the divine discontent which lures us on to beckoning ethical heights.

In all the plans here made for the governance of the Nation in these times that are trying our souls, may Thy wisdom prevail at last over all our fallible judgments; where there is anything corrupt, purify it; where there is error, correct it; where there is right, establish it; where there is division, unite it. And as Thy servants here in the ministry of public affairs wrestle with thorny problems that are pressing for solution, keep their hearts, we pray Thee, from all envy, hatred, and malice, so that in their thoughts and words and actions they may constantly reveal to each other only the spirit of courtesy and understanding kindness. We ask it all in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. KNOWLAND, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, July 7, 1954, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Hawks, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had passed a bill (H. R. 7486) to amend section 1071 of title 18, United States Code, relating to the concealing of persons from arrest, so as to increase the penalties therein provided, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 250) authorizing the printing of additional copies of the slip law for the Internal Revenue Code of 1954, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 6412. An act to preserve the eligibility of certain veterans to dental outpatient care and dental appliances;

H. R. 6893. An act to credit the Shoshone Irrigation District with a share of the net revenues from the Shoshone powerplant, and for other purposes;

H. R. 9008. An act to provide for the deposit of savings of enlisted members of the Army, Navy, Air Force, and Marine Corps, and for other purposes; and

H. R. 9232. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, to extend until June 30, 1955, the period during which disposals of surplus property may be made by negotiation.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that immediately following the quorum call there may be the customary morning hour for the transaction of routine business, under the usual 2-minute limitation on speeches.

The VICE PRESIDENT. Without objection, it is so ordered.

CALL OF THE ROLL

Mr. KNOWLAND. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Byrd	Dirksen
Anderson	Capehart	Douglas
Barrett	Carlson	Duff
Beall	Case	Dworshak
Bennett	Chavez	Eastland
Bowring	Clements	Ellender
Bricker	Cooper	Ervin
Bridges	Cordon	Flanders
Burke	Crippa	Ferguson
Butler	Daniel	Frear
Fulbright	Kuchel	Potter
George	Langer	Reynolds
Gillette	Lehman	Robertson
Green	Lennon	Russell
Hayden	Long	Saltonstall
Hendrickson	Magnuson	Schoeppel
Hickenlooper	Malone	Smathers
Hill	Mansfield	Smith, Maine
Holland	Martin	Smith, N. J.
Humphrey	Maybank	Sparkman
Ives	McCarran	Stennis
Jackson	Millikin	Symington
Jenner	Monroney	Thye
Johnson, Colo.	Morse	Upton
Johnson, Tex.	Mundt	Watkins
Johnston, S. C.	Murray	Welker
Kennedy	Neely	Young
Kilgore	Pastore	
Knowland	Payne	

Mr. SALTONSTALL. I announce that the junior Senator from Wisconsin [Mr. MCCARTHY] is absent on official business. The senior Senator from Connecticut [Mr. BUSH], the junior Senator from Connecticut [Mr. PURTELL], the senior Senator from Wisconsin [Mr. WILEY], and the Senator from Delaware [Mr. WILLIAMS] are necessarily absent.

Mr. CLEMENTS. I announce that the Senator from Tennessee [Mr. GORE], the Senator from Missouri [Mr. HENNINGS], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Oklahoma [Mr. KERR], and the Senator from Arkansas [Mr. MCCLELLAN] are absent on official business.

The VICE PRESIDENT. A quorum is present.

Morning business is in order.

REPORT ON INCLUSION OF ESCAPE CLAUSES IN EXISTING TRADE AGREEMENTS—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 470)

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with accompanying report, was referred to the Committee on Finance:

To the Congress of the United States:

Pursuant to the provisions of subsection (b) of section 6 of the Trade Agreements Extension Act of 1951 (65 Stat. 72, 73), I hereby submit to the Congress a report on the inclusion of escape clauses in existing trade agreements.

This report was prepared for me by the Interdepartmental Committee on Trade Agreements.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *July 8, 1954.*

(Enclosure: Report on trade agreement escape clauses.)

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

LAWS ENACTED BY MUNICIPAL COUNCIL OF ST. CROIX, V. I.

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, copies of laws enacted by the Municipal Council of St. Croix, V. I. (with accompanying papers); to the Committee on Interior and Insular Affairs.

REPORT OF FEDERAL MEDIATION AND CONCILIATION SERVICE

A letter from the Director, Federal Mediation and Conciliation Service, Washington, D. C., transmitting, pursuant to law, a report of that Service for the fiscal year ended June 30, 1953 (with an accompanying report); to the Committee on Labor and Public Welfare.

CIVIL DEFENSE COMPACT ENTERED INTO BY STATES OF IDAHO AND UTAH

A letter from the Administrator, Federal Civil Defense Administration, Washington, D. C., transmitting, for the consent of Congress, copies of a civil defense compact entered into between the States of Idaho and Utah (with accompanying papers); to the Committee on Armed Services.

APPROPRIATIONS FOR PURCHASE OF FIRE-FIGHTING EQUIPMENT—LETTER AND RESOLUTION

Mr. THYE. Mr. President, I present a letter from Col. E. B. Miller, Director, Civil Defense, State of Minnesota, transmitting a resolution adopted by the State Civil Defense Fire Defense Board, at St. Paul, Minn., relating to appropriations of Federal moneys for the purpose of matching local and State funds for the purchase of fire-fighting equipment. I ask unanimous consent that the letter and resolution be appropriately referred and printed in the RECORD.

There being no objection, the letter and resolution were referred to the Committee on Armed Services, and ordered to be printed in the RECORD, as follows:

STATE OF MINNESOTA,
DEPARTMENT OF CIVIL DEFENSE,
St. Paul, Minn., June 28, 1954.

Hon. EDWARD J. THYE,
United States Senate,
Washington, D. C.

DEAR SENATOR THYE: Enclosed herewith is copy of a resolution adopted by the Minnesota State Civil Defense Fire Board, as established under the Minnesota civil defense plan, unanimously passed at a fire conference on June 25, 1954.

It should be explained that the board is representing the entire State of Minnesota in fire matters pertaining to civil defense. The individuals noted as fire defense chiefs of the five mobile support units are themselves local fire chiefs who have been selected by all local fire chiefs in their particular areas of jurisdiction to represent those areas.

May I request that you give the matter your immediate and urgent personal attention.

Thanking you, I am,
Sincerely yours,
Col. E. B. MILLER,
Director, Civil Defense, State of Minnesota.

Whereas Public Law 920 and the Minnesota Civil Defense Act of 1951 have made civil defense a governmental responsibility; and

Whereas the degeneration of the international situation emphasizes the increasing need for preparedness; and

Whereas the development of destructive weapons the enemy is capable of delivering to American cities can cause conflagrations and fire storms far exceeding anything heretofore experienced in our history; and

Whereas a complete inventory and analysis of every piece of fire-fighting equipment, including State-owned equipment, operated by local fire departments in Minnesota has given only an inadequate amount of fire apparatus for the direct support of the critical target areas of St. Paul and Minneapolis and the target area of Duluth: Now, therefore, be it

Resolved, That we the undersigned, the State civil defense fire defense board, as established under the authority of the Minnesota civil defense plan, meeting in the State civil defense control center, 1643 Rice Street, St. Paul, Minn., on the 25th day of June, 1954, respectfully request congressional representatives of the people of Minnesota and other States to appropriate Federal moneys for the purpose of matching local and State funds for the purchase of fire-fighting equipment to strengthen the operational effectiveness of the fire-fighting services in Minnesota.

Frank Everett, Rochester, Fire Defense Chief, MSU I, 20 Counties Southeast Minnesota; Percy Burns, Keewatin, Fire Defense Chief, MSU II, 8 Counties Northeast Minnesota; William A. Herbert, Crookston, Fire Defense Chief, MSU III, 15 Counties Northwest Minnesota; Conrad Lund, Alexandria, Fire Defense Chief, MSU IV, 24 Counties Central Minnesota; Ben Bangerter, Mankato, Fire Defense Chief, MSU V, 20 Counties Southwest Minnesota; Leonard C. Lund, Deputy Commissioner, Fire Marshal Division, State of Minnesota; R. C. Malmquist, Fire Chief, City of Minneapolis; W. H. Mattocks, Fire Chief, City of St. Paul; A. E. Pimley, Fire Protection, Forestry Division, State Department of Conservation.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MILLIKIN, from the Committee on Interior and Insular Affairs:

S. 964. A bill to authorize the construction, operation, and maintenance by the Secretary of the Interior of the Fryingpan-Arkansas project, Colorado; with amendments (Rept. No. 1754).

By Mr. CARLSON, from the Committee on Post Office and Civil Service:

S. 2634. A bill for the relief of Mrs. William A. Curran; with amendments (Rept. No. 1755).

By Mr. AIKEN, from the Committee on Agriculture and Forestry:

S. 3697. A bill to amend the act of April 6, 1937, as amended, to include cooperation with the Governments of Canada or Mexico or local Canadian or Mexican authorities for the control of incipient or emergency outbreaks of insect pests or plant diseases; without amendment (Rept. No. 1756).

By Mr. SALTONSTALL, from the Committee on Armed Services, without amendment:

H. R. 6422. A bill to authorize the Secretary of the Army to convey to the Government's grantors certain lands erroneously conveyed by them to the United States (Rept. No. 1757); and

H. R. 9551. A bill to correct typographical errors in Public Law 363, Eighty-third Congress (Rept. No. 1758).

By Mr. SALTONSTALL, from the Committee on Armed Services, with amendments:

H. R. 9006. A bill to amend the act of May 22, 1896, as amended, concerning the loan or gift of works of art and other material (Rept. No. 1759).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POTTER:

S. 3715. A bill for the relief of Edward White; to the Committee on the Judiciary.

By Mr. FERGUSON:

S. 3716. A bill to amend the act of June 30, 1948, so as to extend for 5 additional years the authority of the Secretary of the Interior to issue patents for certain public lands in Monroe County, Mich., held under color of title; to the Committee on Interior and Insular Affairs.

S. 3717. A bill for the relief of George J. Athanassopoulos; to the Committee on the Judiciary.

By Mr. MARTIN (for himself, Mr. DUFF, Mr. SMITH of New Jersey, and Mr. HENDRICKSON):

S. 3718. A bill granting the consent of Congress to a supplemental compact or agreement between the Commonwealth of Pennsylvania and the State of New Jersey concerning the Delaware River Joint Toll Bridge Commission, and for other purposes; to the Committee on Public Works.

By Mr. COOPER (by request):

S. 3719. A bill to amend section 2 of the Missing Persons Act, so as to provide that benefits thereunder shall be available to certain members of the Philippine Scouts; to the Committee on Armed Services.

(See the remarks of Mr. COOPER when he introduced the above bill, which appear under a separate heading.)

By Mr. FERGUSON:

S. 3720. A bill to prohibit the payment of annuities, retired pay, and other benefits, to persons convicted of certain offenses, and for other purposes; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. FERGUSON when he introduced the above bill, which appear under a separate heading.)

AMENDMENT OF SECTION 2 OF THE MISSING PERSONS ACT TO INCLUDE CERTAIN MEMBERS OF THE PHILIPPINE SCOUTS

Mr. COOPER. Mr. President, by request, I introduce for appropriate reference a bill to amend section 2 of the Missing Persons Act, so as to provide that benefits thereunder shall be available to certain members of the Philippine Scouts. I ask unanimous consent to have printed in the RECORD an explanation of the bill prepared by the American Legion.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The bill (S. 3719) to amend section 2 of the Missing Persons Act, so as to provide that benefits thereunder shall be available to certain members of the Philippine Scouts, introduced by Mr. COOPER, by request, was received, read twice by its title, and referred to the Committee on Armed Services.

The statement in explanation of the bill prepared by the American Legion is as follows:

THE AMERICAN LEGION,
NATIONAL LEGISLATIVE COMMISSION,
Washington, D. C., June 8, 1954.

Hon. JOHN SHERMAN COOPER,
United States Senate,
Senate Office Building,
Washington, D. C.

DEAR SENATOR COOPER: As you know, one of the American Legion's tenets is mutual helpfulness among the discharged veterans of the wars of this country. On the basis of the above, the American Legion has rendered service to the veterans throughout the land, not only in presenting their claims before the Veterans' Administration, but in assisting veterans to obtain proper recognition by the Defense Department in such matters as review of military status, questionable discharges, etc.

Some years ago, we learned of a grave injustice perpetrated by the United States against our comrades-in-arms, the Philippine Scouts. The Scouts were a component of the regular Army of the United States, authorized by act of Congress, February 2, 1901, and paid, trained, and utilized by our military establishment.

The injustice arbitrarily imposed was the failure of the United States Army to pay these Philippine Scouts their regular pay and allowances during the time they were on parole from Japanese prisoner-of-war camps during World War II. Bear in mind that the Philippine Islands were circumscribed by force.

It is well established that parole of Filipinos by Japanese, both of the Philippine Army and the United States Regular Army Philippine Scouts, was effected for two purposes: (1), for propaganda purposes, and (2), to relieve the Japanese of the responsibility of caring for and feeding the sick, disabled, and other troops in their custody. The Filipinos, Philippine Army and United States Philippine Scouts alike, were paroled under the most rigid terms where violations meant death or brutal punishment to the violator and his family.

The commanding general of the Southwest Pacific Theater, Gen. Douglas MacArthur, stated officially that the United States would not recognize the parole because it was under duress, and he further stated that it would have no effect upon the military status of the persons involved. This, of course, is taken to mean that pay and allowances would continue just as if they were United States regular troops from any place in our own country, had the latter been captured and paroled under similar circumstances. We, to the best of our knowledge, did not fail to pay any of our own troops for the time they were held prisoners of war in any of the countries throughout the world.

The Defense Department itself recognizes that the parole meant nothing; that these people were virtually prisoners of war, and they so state on page 587 of the book entitled "United States Army in World War II—The Fall of the Philippines—written under the direction of the Chief of Military History, Department of the Army." We quote:

"With the capitulation of Corregidor and the islands to the south, all communication with the Philippines came to an end. The entire garrison, an army of 140,000 men, passed into captivity and except for a handful who escaped, no word of their fate reached the United States. Though most of the Filipinos were ultimately released from prison camp, there was no way by which they could communicate with the Allies except through the clandestine intelligence organization kept alive by funds and equipment from Australia. Nominally free, the former troops of MacArthur's and Wainwright's army were as effectively prisoners of the Japanese as if they had remained in prison camp."

During the course of the past 3 years the American Legion has tried to use its influence with the Department of Defense and the Department of the Army in an effort to bring about administrative relief to these four or five thousand remaining Philippine Scouts. We have met with failure in every instance, and we have not been told the reason why such payment was refused except the fallacious statement that they were not in casualty status. We have positive proof to refute such statement because many of these parolees in the alleged noncasualty status were taken by the Japanese and executed summarily for minor violations of parole; many were brutally and severely mistreated and their families were molested and maligned.

The Navy, on the other hand, chose to pay its military personnel as well as its civilian employees who were in exactly the same position. The Navy paid them for the full period of time between the fall of the Philippines and our recapture thereof, and the payments were made under the authority of the very act we now seek to amend for the purpose of paying the United States Regular Army Philippine Scouts.

A clear statement of the Navy's justification in doing so is set forth in the attached letter from Rear Adm. M. L. Royar, SC., USN., Chief of the Bureau of Supplies and Accounts, United States Navy, to the Honorable CARL VINSON under date of April 11, 1952.

Pertinent extracts from the above letter, which are quoted below fully reveal the inequity of the Army's arbitrary decision with reference to the Philippine Scouts:

"For assimilation purposes, the Comptroller General has recognized the Insular Force as the Navy counterpart of the Philippine Scouts of the Army.

"Enlisted men of the insular force of the Navy were not excluded by general or specific language from benefits of the Missing Persons Act. Consequently, those members in active service who were officially determined to be lawfully absent in a status of missing, missing in action, interned in a neutral country, captured by an enemy, beleaguered or besieged, were for the period officially determined to be in such status paid the pay and allowances to which otherwise entitled from date of commercement of absence until date of return to the controllable jurisdiction of the Navy Department. The mere fact that upon repatriation it was ascertained that a member of the insular force had been paroled, but was unable to return to naval jurisdiction or communicate that fact to the authorities would not be considered a basis for denying such member the active-duty pay and allowances to which otherwise entitled under the Missing Persons Act while so absent."

In opposing legislation to correct this complete breach of contract by the Department of the Army, the Defense Department has said that if we paid the Philippine Scouts we might also have to pay the soldiers of the Philippine Army who were likewise paroled. This, you realize, is a most unfair statement because if we were contractually obligated to them we certainly should pay our obligations. But that is not the intent of our proposed legislation; neither is it necessary because the Philippine Government has recognized the rights of its own soldiers who were similarly paroled, and by Republic Act No. 897, enacted in July 1953, the Philippine Government evolved a program for the payment of those claims over a period of time consistent with their economic ability to do so. Such argument, therefore, carries no weight whatsoever.

One of the discriminatory features of this whole sordid business is the fact that the Army selected a handful of high-ranking officers for full payment during the period of parole. This may have occurred because of the standing of these men, or because of the fact that they were economically able to press their claims before the United States Army. Some of them made personal appearances in this country. You realize, of course, that the $9-a-month private could not do this.

The Philippine Scouts bore their full share of the fighting and suffering leading up to the fall of the Philippines. Military history is replete with their splendid performance in the face of the enemy. There was no question about their loyalty.

Considering the situation in the Asiatic area today and the fact that the Filipinos are our friends, it would not only be honest and decent to recognize the contractual obligation the United States has toward these Philippine Scouts but it would do much to further cement the relationship with a new nation whose welfare is so vital to the United States at this time.

There have been several bills introduced in Congress to eradicate this cause for shame by paying our Philippine Scout soldiers (enlisted men for the most part whose pay as private was 18 pesos or $9 a month). Noncommissioned officers received proportionate increases. Officers were on the same pay status as our Regular officers.

The 1953 national convention of the American Legion, fully cognizant of the injustices, and of the fruitless efforts we have made in the past 3 years to correct same, restated its demand upon the Government of the United States to exercise belated fair play. The resolution is No. 597, copy of which is attached.

In view of the fact that you have expressed an interest in the Philippine Scouts, and in view of your knowledge of the situation, the American Legion would be very appreciative of your assistance in bringing this matter before the Senate of the United States. We would be very grateful to you if you will introduce a bill to amend section 2 of the Missing Persons Act to direct that these Philippine Scouts be paid their military pay and allowances in accordance with their enlistment or commission contracts.

The law authorizes the Secretary of the Army to make redeterminations which would apply in the case of the Philippine Scouts as well as other military personnel, and it is unfortunate that we have to resort to legislation to force them to take action which is only honorable and just. It appears that legislation is necessary, however, because of the continuing denials on the part of the Defense Department over the years and the opposition they have raised in Congress to such propositions.

We hope you will use the influence of your office to bring such a bill as you may introduce before the Senate Armed Services Committee for early hearings, at which time the American Legion will want to testify in support of the measure, as will others who are also interested in seeing that justice is brought to these men.

As recently as May 12, 1954, in a communication from the Secretary of the Army addressed to the Honorable WILLIAM LANGER, chairman of the Senate Committee on the Judiciary, in opposing legislation to extend the time for certain military-procurement claims against the United States in the Philippine Islands, it was stated:

"Almost immediately claims were asserted against the United States for pay and allowances and for compensation for services and supplies. These claims may be roughly divided into three categories: (1) Those concerned with members of the United States Armed Forces (including the Philippine Scouts), (2) those dealing with members of

the Philippine Army, and (3) those dealing with nonmilitary guerrillas.

"The Department of the Army does not question the liability of the United States with respect to claims falling within the first category where such claims are substantiated."

This in itself shows the inconsistency of the arbitrary action taken by the Department of the Army in denying pay to the Philippine Scouts whom they recognize as being authorized military agents of the United States in the above quotation.

Appreciating your interest in this matter, and expressing the hope of the American Legion that you will lend your leadership and support to the correction of the injustices involved, I am,

Sincerely yours,

MILES D. KENNEDY,
Director.

PROHIBITION OF PAYMENT OF ANNUITIES, RETIRED PAY, AND OTHER BENEFITS TO CERTAIN PERSONS

Mr. FERGUSON. Mr. President, I introduce for appropriate reference a bill to prohibit the payment of annuities, retired pay, and other benefits to persons convicted of certain offenses, and for other purposes. I ask unanimous consent that the bill be printed in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, will be printed in the RECORD.

The bill (S. 3720) to prohibit the payment of annuities, retired pay, and other benefits to persons convicted of certain offenses, and for other purposes, introduced by Mr. FERGUSON, was received, read twice by its title, referred to the Committee on Post Office and Civil Service, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That there shall not be paid or extended to any person heretofore or hereafter convicted of any of the following-described offenses, or to his survivor or beneficiary, for any period subsequent to the date of such conviction or the date of the enactment of this act, whichever is later, (1) any annuity or retired pay on the basis of the service of such person as an officer or employee of the Government, or (2) any benefit (other than those involving rights under insurance contracts) payable or extended under any law administered by the Veterans' Administration:

(a) Any offense defined in chapter 11 (relating to bribery or graft), chapter 15 (relating to claims and services in matters affecting the Government), chapter 23 (relating to contracts), chapter 37 (relating to espionage and censorship), chapter 105 (relating to sabotage), chapter 115 (relating to treason, sedition, and subversive activities), and sections 1700, 1702, 1703, 1708, 1709, 1710, and 1711 of chapter 83 (relating to crimes involving the postal service), title 18, and in sections 1810 and 1816, title 42, United States Code;

(b) Any offense declared to be a felony by Federal law committed in the exercise of authority, influence, power, or privileges as an officer or employee of the Government, or otherwise relating to service as such officer or employee;

(c) Perjury committed in falsely denying, or subornation of perjury in the denial by another of, the commission of an act constituting any offense described in paragraph (a), (b), or (e) hereof; committed in falsely testifying in a proceeding before a Federal grand jury or court of the United States with respect to any act or matter related to the performance of official duties as an officer or employee of the Government; or committed in falsely testifying before any congressional committee in connection with any matter under inquiry before such congressional committee;

(d) Any felony involving false, fictitious, or fraudulent statements or representations made in connection with an application for an office or position in or under the executive, judicial, or legislative branch of the Government of the United States or in the government of the District of Columbia; or

(e) Any offense defined in chapter 7 (Bribery-Obstructing Justice), section 22-1201 (Embezzlement of property of District of Columbia) of chapter 12, sections 22-1304 (Falsely impersonating public officer or minister) or 22-1308 (False certificate of acknowledgment) of chapter 13, or section 22-2602 (Misprisions by officers or employees of jail) of chapter 26, title 22, District of Columbia Code.

SEC. 2. There shall not be paid or extended to any person who heretofore or hereafter is convicted under section 102 of the Revised Statutes, as amended (2 U. S. C., sec. 192), for failure to appear or refusal to testify or produce any book, paper, record, or other document, in a proceeding before any Federal grand jury, court of the United States, or congressional committee, upon the ground of self-incrimination, or to his survivor or beneficiary, for any period subsequent to the date of such refusal or the date of the enactment of this act, whichever is later, any annuity, retired pay, or benefit, described in the first section of this act.

SEC. 3. In the case of any such person, any amounts contributed by him toward the annuity the benefits of which are denied under this act, less any sums previously refunded or paid as annuity benefits, shall be returned to such person, with interest to date of conviction or the date of enactment of this act, whichever is later, at such rates as may be provided in the case of refunds under the law, regulation, or agreement under which the annuity is payable, or if no such rates are so provided at the rate of 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter, compounded on December 31 of each year. In the event a person entitled to a refund under this section dies prior to the making of such refund, the refund shall be made to such person or persons as may be provided in the case of refunds under the law, regulation, or agreement under which the annuity the benefits of which are denied under this act is payable or, if no such provision is made, in the order of preference prescribed in section 12 (e) of the Civil Service Retirement Act of 1930, as amended.

SEC. 4. As used in this act—

(a) The term "officer or employee of the Government" includes an officer or employee under the legislative, executive, or judicial branch of the Government of the United States, a Member or Delegate to Congress, a Resident Commissioner, an officer or employee of the government of the District of Columbia, or any officer or member of the Armed Forces of the United States, the United States Coast Guard, the Coast and Geodetic Survey, or the Public Health Service.

(b) The term "annuity" means any retirement benefit payable by any department or agency of the United States or the District of Columbia upon the basis of service as a civilian officer or employee, except that such term does not include salary or compensation which may not be diminished under section 1 of article III of the Constitution or, in the case of a benefit payable under the Social Security Act as amended, any portion of such benefit not based upon service as an officer or employee of the United States or the District of Columbia.

(c) The term "retired pay" means retired pay or retirement pay payable under any law of the United States to members or former members of the Armed Forces of the United States, the United States Coast Guard, the Coast and Geodetic Survey, and the Public Health Service, retired or determined to be entitled to retirement pay.

SEC. 5. Nothing in this act shall be deemed to limit or restrict the power to deny the payment of annuities, retired pay, or any other benefit, payable or extended by or pursuant to any other provision of law, for any cause not specified herein.

SEC. 6. If any provision of this act, or the application of such provision to any person or circumstance, shall be held invalid, the remainder of this act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

AMENDMENT OF RENEGOTIATION ACT OF 1951—AMENDMENT

Mr. FLANDERS submitted an amendment intended to be proposed by him to the bill (H. R. 6287) to extend and amend the Renegotiation Act of 1951, which was ordered to lie on the table and to be printed.

CERTAIN CONSTRUCTION AT MILITARY AND NAVAL INSTALLATIONS—AMENDMENT

Mr. LONG submitted an amendment intended to be proposed by him to the bill (H. R. 9242) to authorize certain construction at military and naval installations and for the Alaska communications system, and for other purposes, which was ordered to lie on the table and to be printed.

HOUSE BILL REFERRED

The bill (H. R. 7486) to amend section 1071 of title 18, United States Code, relating to the concealing of persons from arrest, so as to increase the penalties therein provided, was read twice by its title, and referred to the Committee on the Judiciary.

HOUSE CONCURRENT RESOLUTION REFERRED

The concurrent resolution (H. Con. Res. 250) authorizing the printing of additional copies of the slip law for the Internal Revenue Code of 1954, was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 12,590 additional copies of the slip law for the Internal Revenue Code of 1954, of which 2,475 copies shall be for the use of the Senate, 500 copies for the use of the Committee on Finance, 6,615 copies for the use of the House of Representatives, and 3,000 copies for the use of the Committee on Ways and Means.

THE PRESIDENT'S STAND IN OPPOSITION TO ADMISSION OF RED CHINA TO UNITED NATIONS

Mr. SMITH of New Jersey. Mr. President, all of us are greatly concerned over the present discussion of possible attempts on the part of the Red influence to bring Red China into the United

Nations. I am trying to watch very carefully the press items on this matter. I myself feel very strongly on the subject.

Therefore, I ask unanimous consent to have printed at this point in the body of the RECORD, in connection with these few remarks of mine, an article entitled "Eisenhower Rallying World To Bar Peking From U. N.," written by David Lawrence, and published in the New York Herald Tribune of this morning. In the article, Mr. Lawrence highlights the splendid statement made yesterday by the President of the United States, in taking a very strong, unconditional, and unequivocal stand against the admission of Red China into the United Nations.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EISENHOWER RALLYING WORLD TO BAR PEIPING FROM U. N.

(By David Lawrence)

WASHINGTON, July 7.—President Eisenhower has undertaken to mobilize the moral force of the world to make sure that the aggressor government of Red China will not be admitted to the United Nations.

No longer is the issue one of domestic controversy here, since both the Republican and Democratic leaders in Congress have expressed themselves against the proposal. For the President now has wisely taken the case to the court of world opinion.

Mr. Eisenhower does not say what America's position will be if outvoted in the United Nations Assembly, but he does say that he hasn't reached a decision on it because he feels confident that the battle against admission of Red China can be won.

The President is right in exercising that caution and leaving the matter open. In this regard he differs from those who either want to serve warning now that the United States will withdraw or those who wish the United States to stay in the U. N. if outvoted.

If the United States were merely to give the impression that it would oppose Red China's entry and yet would accept the result without affecting its own relationship to the United Nations in the future, some governments abroad might think this is a tipoff to them to go ahead and vote for the admission of Red China anyhow because they would not thereby risk incurring America's disfavor.

The truth is that Senator KNOWLAND and Senator LYNDON JOHNSON, the Republican and Democratic leaders, speak for American public opinion when they not only oppose Red China's admission, but when they say Congress will then discuss, if the Peiping government is admitted, whether or not to continue financial support for the United Nations by this country and continuance of the U. N. treaty.

PRESIDENT BARS COERCION

But President Eisenhower has with characteristic fairness and calmness taken the issue out of the realm of coercion as it affects other governments by simply saying he doesn't know yet what American policy toward the U. N. would be if Red China gets in. He prefers to argue at present the merits of the admission issue itself. His words are of historic importance. He says:

"There is a moral question first of all that is involved. The United Nations was not established primarily as a supergovernment clothed with all the authority of supergovernment and of great power to do things. It was, among other things, an attempt to marshal the moral strength of the world to preserve peace, to make certain that quarrels were composed through a decent respect for justice and fairness and right, and to see whether we couldn't avoid resort to force.

"Now today we have Red China going to Geneva, and instead of taking a conciliatory attitude toward anything, it excoriated the United Nations. As a matter of fact, in Geneva, it demanded repudiation of the United Nations position. On top of that Red China is today at war with the United Nations. They were declared an aggressor by the United Nations in the Assembly and that situation has never been changed.

"They are occupying North Korea. They have supported this great effort at further enslavement of the peoples of Indochina. They have held certain of our prisoners unjustifiably, and they have been guilty of the worst possible diplomatic deportment in the international affairs of the world.

"Now how can the United States, as a self-respecting Nation, doing its best and in conformity with the moral standards as we understand them, how can we possibly say this government should be admitted to the United Nations?"

CRITICS ABROAD ANSWERED

Thus Mr. Eisenhower answers the critics abroad who have brushed aside all moral considerations. The London Times, for instance, has said that it is a question of law and not of morals.

The issue, moreover, isn't one of diplomatic recognition. Many governments which are members of the United Nations have already extended diplomatic recognition to the Red Chinese Communist government, but now oppose its admission to the United Nations on the ground that the Peiping regime is an aggressor and has not purged itself of aggression.

The President's forthright statement will ring around the world and will place the issue on the high moral plane where Americans have placed it before, only to have Europeans, influenced by expediency, try to rationalize an acceptance of the Communist regime in Peiping despite the record of dead and wounded for which the aggressor government of Red China is largely responsible. Certainly, the fathers and mothers of the 40,000 American dead and 100,000 American wounded would never understand acceptance of the aggressor government as worthy of admission to an international organization designed to be the principal vehicle for the exercise of moral force in the world.

THE LATE SENATOR BUTLER OF NEBRASKA

Mr. REYNOLDS. Mr. President, as the junior Senator from Nebraska rises for the first time, standing at the desk of the late senior Senator from Nebraska, Hugh Butler, a fine Christian gentleman, whose great, noble, and kindly soul has gone to its Maker, he knows of nothing more appropriate than to invite the attention of the Senate to an eloquent eulogy delivered by the Reverend Harold T. Janes, minister of the First Central Congregational Church in Omaha, on the occasion of the late Senator Butler's funeral.

I ask unanimous consent that it be printed in the Appendix of the RECORD.

Mr. MARTIN. Mr. President, because of the great importance of this eulogy in honor of one of the finest men who have ever sat in the United States Senate, I ask unanimous consent that the eulogy be printed in the body of the RECORD at this point.

There being no objection, the eulogy was ordered to be printed in the RECORD, as follows:

FUNERAL SERMON FOR THE HONORABLE HUGH A. BUTLER, UNITED STATES SENATOR

I

One of the commonly accepted traditions of America is that a man may be born in a log cabin and yet ultimately live in the White House. Although this was true of one President of the United States, many of those who occupy the seat of the scornful, think this tradition is a myth which has little basis in reality. When we are tempted to accept this cynical view of our society we suddenly become aware of the fact that there are many men in our time who are demonstrating the truth of this tradition. Again and again men and women who are born in lowly circumstances rise to positions of great influence and power in our free democratic society.

We are gathered together from grain fields and from the grain markets, from the plains and mountains of the West, and from the teeming cities of the East, members of many races and many faiths, to pay tribute to a man whose life was a demonstration of the fact that in America all caste systems are destroyed, and every individual, regardless of his place of birth, may rise to a position of high and respected leadership in his nation.

Accompanying his pioneering parents as a lad of six when they crossed Nebraska in a covered wagon and built a sod house on a homestead near Cambridge, by his own labor Hugh Butler earned his way through college. He followed three careers during his long life. At first he was a construction engineer on the Burlington Railroad, then an outstanding grain dealer, and finally he wes elected to three successive terms in the highest legislative body of our Nation, the United States Senate.

If you would inquire concerning the secret of such achievement you would have to ascribe a great deal to the influence of hard-working parents and the kindly interest of many friends. But most of all he found inspiration in a book. As we gather in tribute to our friend, I invite you to turn to a famous passage from that book:

"He has showed you, O man, what is good; and what does the Lord require of you, but to do justice, and to love kindness, and to walk humbly with your God?" (Micah 6: 8).

Hugh Butler was a man who believed in doing justice.

Impressed as a small boy with the difficulties which his father faced in earning a livelihood from the soil, and thrown throughout his boyhood and years of mature business life into association with people who depended upon the prosperity of the farms and ranches of the State, he was unusually sensitive to the disadvantageous position which the farmers and ranchers held in the national economy. When the drought years of the thirties came, searing the grazing lands until the cattle became barrels of bones, and dust clouds darkened the skies, he was impressed with the need of strengthening our rural economy.

When in later years he was sent to the United States Senate he continued to represent the interests of the people of the farms and ranches. As chairman of the important Interior and Insular Affairs Committee, he was able to do a great deal for the increase of irrigation and the reclamation of land. He was a kind of Nebraska Amos who would remind the Nation of the existence of the economic injustices and inequities saying: "You trample upon the poor, and take from him exactions of wheat."

As a poor boy who worked after school and Saturdays in order that he might receive an education, he was convinced that a free people must be an educated people. He took the lead in establishing an agricultural high

school in western Nebraska so that boys and girls from the far-separated ranches might have the advantages of an education.

In later life he gave nearly all of his fortune to Doane College so that succeeding generations of poor boys and girls might drink from the fountain of knowledge. He wanted all boys and girls to possess the liberty of which the Master spoke when He said: "You shall know the truth, and the truth shall make you free."

Because he knew as a boy how difficult it was to accumulate money, he proved to be an excellent guardian of the Federal Treasury. He remembered as a boy that he had found four silver dollars in the snow, and the lesson his father impressed upon him. Much to Hugh's reluctance, his father insisted they not return home until they had found the person who had lost the money and returned it to him. During his Senate days Hugh Butler was a joint sponsor of the Government corporation control law, one of the most important pieces of legislation in this generation, and was active as a member of the Senate Finance Committee in scrutinizing and working for the reduction of Federal expenditures.

The dominating passion of his life was to do justice. Like Amos, he could hear God saying: "Let justice roll down like waters, and righteousness like an ever-flowing stream."

II

"What does the Lord require of you, but to do justice, and to love kindness." Some men in their desire to do justice become vitriolic and embittered in nature, and engage in continual denunciation and vituperation. Such was not true of Hugh Butler. He wanted to do justice, but he also loved kindness.

Those who knew him in his younger days remember the enduring and deep affection which existed between him and his wife, and his sorrow over her tragic death just before he was to take his seat in the United States Senate. The loss of their first child shortly after birth, and the death of a second son at 12 years of age from pneumonia, were sorrows which they bore bravely during the rest of their married life together.

The affection which he might have given to his own children he bestowed upon others. "What Mrs. Butler and I wanted to do for our boy," he said, "we will do for other boys." And so he established scholarships at his beloved alma mater, Doane College, so that annually 30 boys and girls might be able to receive a college education.

His kindness carried over into his political career. He had his convictions. He voiced them freely, and defended them courageously. But he never tried to achieve political advantage by attacking his opponents. When he was asked why he was running against one of his fellow church members, Edward Burke, his reply was: "Ed Burke is a good friend of mine. Why don't you vote for him?"

Because in each election he faced and defeated a governor of the State of Nebraska, and was never defeated in any election when he sought public office, you would hear occasional discussion of the "Butler machine." If there was a machine, and there certainly was not in the traditional sense of the term, it was a machine built upon innumerable kindnesses.

When I think of his kindness I think of a little girl who with her parents was the guest of Senator Butler in the Senate restaurant. He might well have talked only with the adults who were present and ignored her, but in the midst of the luncheon he took a menu, got up from the table and went around to a number of the distinguished Senators eating lunch in the same room, and asked them to autograph the menu for the little girl who was his guest. She took it home with her, and had it framed along with Senator Butler's picture, and to this day considers it one of her choicest possessions.

"What does the Lord require of you, but to do justice, and to love kindness."

III

"What does the Lord require of you, but to do justice, and to love kindness, and to walk humbly with your God."

Hugh Butler did justice, and loved kindness, because he believed such was a requirement of the Lord. Like Amos he had heard God saying: "Let justice roll down like waters, and righteousness like an ever-flowing stream." He was kind to others because he had experienced the kindness of God, and knew as did the writer of the book of Jonah that He was a gracious God and merciful, slow to anger, and abounding in steadfast love.

From early boyhood he attended the Congregational Church in Cambridge. When he moved to Curtis he was superintendent of the church school. Later he became an active member of the First Central Congregational Church, of Omaha, serving at one time as a moderator of the Nebraska Congregational Conference. He was aware of the fact that his achievements were not entirely of his own making; they were the result of the guidance and beneficence of God. And so in later years when he was honored by his fellow citizens he did not permit the praise which he received to inflate him with pride. He remembered that he lived not only in the sight of his neighbors and friends; he lived also under the gaze of God. Because he was a truly religious man, he was always a humble man.

His philosophy could be summed up in these lines from Henry Van Dyke:

"Let me live my life from year to year
With forward face and unreluctant soul,
Not hastening to nor turning from the goal;
Not mourning for the things that disappear
In the dim past, nor holding back in fear
From what the future veils; but a whole
And happy heart, that pays its toll
To youth and age, and travels on with cheer.
I shall grow old, but never lose life's zest
Because the road's last turn will be the best."

And now he has found that the last turn of the road is the best. For around that turn of the road he has approached the gates of the Celestial City, and is now reunited with the loved ones who have been waiting for him. And if he wonders humbly if he should enter therein, I am sure that the guardian of the gates will say to him: "Well done, good and faithful servant, enter into the joy of your master."

"What does the Lord require of you, but to do justice, and to love kindness, and to walk humbly with your God."

TWO HUNDREDTH ANNIVERSARY OF BATTLE OF FORT NECESSITY

Mr. MARTIN. Mr. President, last Saturday and Sunday the 200th aniversary of Washington's first combat command was celebrated at Fort Necessity. Dr. William B. Hindman was in charge of the celebration. He is an authority on the early campaigns in southwestern Pennsylvania to establish whether the English or French would dominate on the North American Continent.

The program was very impressive. Troops representing both the Commonwealth of Virginia and the Commonwealth of Pennsylvania took part. The United States Military Band played for the various ceremonies. The British, French, and American flags were raised with proper ceremony.

Owing to the importance of this occasion, I ask unanimous consent to have printed in the body of the RECORD, as a part of my remarks, the addresses of Gen. George C. Marshall, Secretary of the Interior Douglas McKay, the Senator from Maryland, Mr. Beall, and myself.

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

ADDRESS OF GEN. GEORGE C. MARSHALL

Sixty-seven years ago, on a Sunday afternoon, my father took the family on a picnic. We ate our supper on the bank of this stream, probably in this immediate vicinity. He gave us a thrilling description of the battle Washington's small force fought against the French and Indians in this field—Great Meadows, as it was called. I pictured painted redskins behind every tree over there. I clearly recall his showing us the shallow outline of the trench that had been manned by the colonists.

He told us how Washington passed near this spot a year later, accompanying Braddock's famous Redcoats on their fatal march toward Fort Duquesne; that is, the Pittsburgh of today. He described the near massacre of most of Braddock's command, the retreat, and Braddock's death and burial on the hillside trail a short 2 miles from here.

That afternoon became a lasting memory. Young though I was, it aroused my deep interest in the history of that period, as it was outlined by great events in this region. Often I was to come in the evening to the site of Braddock's grave in company with my young friends on parties to the nearby mountainhouse with its chicken and waffle supper as the main event.

The bald knob in the mountain range 6 miles northwest of here, Dunbar's Camp, where Colonel Dunbar buried the reserve ammunition of Braddock's army and hastily retreated eastward toward Williamsburg is a familiar sight to many of you. Near its foot is the deep ravine where Washington surprised and almost wiped out Jumonville's small reconnoitering party, firing the opening shot in the war that was to rage in Europe for 7 long years. It became a familiar setting for my first troutfishing efforts.

Washington Springs, the site of Washington's meeting with the Half-King; the Washington farm in the fertile valley west of the mountain—all those localities were steeped in early American history, when this was the far frontier, and the struggle between England and France for control of America was a bitter contest.

Hunting the mountain grouse, or pheasant, as we called them, made me more and more familiar with these historic surroundings, especially as the birds favored the glades along the old Braddock Trail. But, very strange to say, practically none of this was touched on in our local schooling. Had it been, I am sure we would have acquired a taste for American history which would have been of great benefit to our opinions as citizens in later years. It would certainly have promoted an early knowledge of the world struggles which, for a time, were centered hereabouts.

Great things had their beginnings here. The man to lead the colonists in the revolutionary struggle had his start here, an unsuccessful one it must have seemed. His preparation for the long struggle ahead, with its many pitfalls and its awful discouragements, was initiated here.

Few young Americans realize how many powerful nations struggled for a place in this country. The Russians were established as far south as San Francisco Bay. The word "struggled" is hardly applicable to them, because they chose to sell out. New Orleans, with its strategical domination of the entire Mississippi Valley, and Florida, shuttled about between Spain and France, and New England and New York State were in an al-

most constant state of threat by the British out of Canada.

But there is quite another side to this phase of the development of America. We chose, ourselves, in the War of the Revolution, to make a bid for the control of Canada. Much later on, we fought the Mexicans and took from them much of the Southwest and all of California, and we crowded the Indians back all along our frontiers, frequently in violation of their treaty rights. But the start, in effect, was here in the small engagement in this field, with the prodigious results which followed.

So, when we assemble here to celebrate the 200th anniversary of the Battle of Fort Necessity, we are dealing with the early frontier of this country, the struggle between the French and British for control; actually the birth of American military power and leadership, a preliminary to the Revolutionary War and our march to the westward.

Since those days, there has been a tremendous shift in power and place, and in tempo. Our most pressing interests today are far remote from the mountains of western Pennsylvania. They concern the Far East, across the Pacific, Western Europe, northern Africa, and the Middle East. All of Latin America is much to our interest. But keep in mind one outstanding fact. Nowhere are we grasping for territory. We want peace and, what is far more important, we want a sound basis for an enduring peace.

Turning back again to the historic events of this region and their relation to the future, I think possibly the most telling result which followed the disaster of Braddock's defeat was the initiation of a feeling among the colonists that they were capable of themselves to fight for independence; that the famous soldiers who then dominated the battlefields of Europe could possibly be discounted. Bunker Hill 22 years later confirmed this point of view and awakened a strong determination to fight to a finish, with a Washington to lead them. Of course there was much to learn, mostly of discipline, of stability, of leadership—and the outrageous vagaries of the Continental Congress at times hopelessly confused matters. Only the firm, wise leadership and remarkable personality of Washington saved the situation.

Referring to Washington's leadership in the revolutionary struggle and his later title as the "Father of His Country," it is very interesting to trace the course of his development to his Revolutionary War status. Here at Fort Necessity, at the ambuscade of Jumonville, he was young, aggressive, and fearless—very young as a matter of fact. He goes back to Will's Creek—Cumberland, as we know it—and is given command of a small body of troops to guard the settlers against Indian forays. His forts marked the course of the Shenandoah Valley. He was refused reinforcements for his small command, despite frequent massacres of the families of the pioneers; he was denied many necessities to enable him to protect those pioneers. His letters addressed to the colonial government at Williamsburg are bitter in recrimination. He was completely outraged by the failure of that government to support him sufficiently to protect the frontier people against the Indian savagery.

Finally, he resigned and took up his life at Mount Vernon. For years he was not only a leading citizen, the head of a large and valuable plantation, but for 15 years he was a member of the House of Burgesses at the colonial capitol of Williamsburg. There, for the first time, he learned something of the difficulties surrounding action by a democratic assembly; he learned the difficulty of obtaining appropriations that involve expenditures for troops. So, when he finds himself at Valley Forge lacking virtually everything for his men—food, clothing, blankets, shoes—when he is beset with the struggle to maintain a dependable army despite short-term enlistments, along with the failure to provide pay, food, and clothing, then we find him persistent but patient, determined but respectful, seemingly humble with respect to the governing political body, whatever its action or lack of action may have been. And in that attitude we find the basis for general acceptance of the title of "Father of His Country," bestowed on him by grateful countrymen.

ADDRESS OF SECRETARY OF THE INTERIOR DOUGLAS McKAY

Those of us who have had the opportunity to participate in the dedication of this hallowed ground will leave with renewed faith in the greatness of our American heritage.

I am sure that all of you who have gathered here have been inspired, as I have been, with an earnest determination that the ideals of our Founding Fathers will be perpetuated.

These brief hours at Fort Necessity on this great national holiday, serve to remind us of the legacy of freedom which men such as Washington, Jefferson, Franklin, and Marshall have passed on to us.

This patriotic heritage which rests so close to our hearts is the strong bastion in an age when bitter and partisan rescrimination is the stock in trade of those who attack our institutions and our ideals of freedom and independence.

Our Nation and our philosophy of government have their firm foundations in decency, justice, and moderation.

These qualities and these patriotic attributes were exemplified here yesterday by one of the Nation's brilliant military leaders, a man of unimpeachable honesty and decency—George Catlett Marshall.

His service to the Nation and to humanity exemplifies the highest idealism of patriotism and love of country.

We are gathered on a spot which marks a turning point in the history of our Nation. The battle of Fort Necessity, seemingly a defeat, brought into world prominence for the first time the man who was to become the father of the United States—George Washington.

The National Park Service of the Department which I have the honor of serving, is dedicated to the work of preserving for the American people such historic places, mileposts in the history of our national development.

They are preserved so that we may pause, reflect deeply upon their meaning, and derive guidance to chart our course for the future. From them we receive a renewed sense of patriotism, spiritual satisfaction and confidence.

Fort Necessity is one of the four great historical areas in the National Park System in this Commonwealth. Each of them portrays a dramatic step in the development of the Republic.

Independence National Historical Park in Philadelphia, where the Declaration of Independence was signed on July 4, 1776, and where the Liberty Bell is sheltered is a symbol of freedom for all men wherever human rights have not been crushed by cruel dictatorships.

During the Revolution, the Congresses continued to meet in Independence Hall in Philadelphia except during brief interruptions occasioned by the military activities of the British.

Thus Philadelphia was the focal point in the winning of our independence and the formation of the Republic.

At Birdsboro, Pa., the National Park Service administers the Hopewell Village National Historic Site in which is depicted the story of the American iron-making industry.

A third great historical area administered by the Park Service is Gettysburg National Military Park, the scene of one of the world's greatest battles, and the turning point in the Civil War.

Fort Necessity marks another and earlier milestone in American history, linking us with the past, bringing with it a deeper understanding and appreciation of our history and the sacrifices that made possible our achievements as a Nation.

And as in colonial days, Pennsylvania today continues its important role in maintaining the prosperity and security of our Nation.

From the days of William Penn, this Commonwealth has been in the forefront of our history, setting an example of tolerance and wisdom for others to emulate.

These hills of western Pennsylvania, fought over in 1754, have yielded coal and other mineral resources that have had a far-reaching effect on our national economy.

The Forks of the Ohio as the junction of the Allegheny and Monongahela Rivers was known in 1754, a strategic point for both Washington and the French in that year, has grown to be the city of Pittsburgh, one of the great industrial sinews of the United States.

In a very real sense, though no one could have known it at the time, these great industrial resources were at stake in the issues that were drawn at Fort Necessity 200 years ago.

The rich coal of Fayette County, combined with iron ore from the Lake Superior ranges, have been a precious legacy to the American people. American inventive genius, business acumen, and good, hard work have done the rest.

In our search for material things we often forget the sacrifices of our forefathers that have made possible the opportunities we have today for achieving security.

Fort Necessity then will serve always as a symbol, not of the dead past, but a glowing beacon which will light the path toward greater days and greater national achievements.

A nation which forgets its heroes is a country without a soul. In our preoccupation with the development of our economy and with the necessity for keeping step with world competition in peace and war, we may have been inclined at various periods of history to forget the importance of the preservation and protection of our historic spots.

Fortunately, there has always been a catalytic force at work which has not permitted the National Government to lag unduly in recalling its debt to history.

Such a force has been at work here at Fort Necessity, and through the intelligent enterprise of local patriots this battleground will be preserved for posterity, not in a haphazard manner, but as a recognized and appreciated responsibility.

Here, too, we find the State joining with local citizens and the Federal Government in sharing in the task of preserving this historic shrine. As an important unit in the State system, Fort Necessity State Park adds to the beauty and historic significance of the restored fort.

This, in my opinion, is an ideal arrangement. It demonstrates a clear understanding of the necessity for the States and local communities to share with the Federal Government in the development of our national resources, whether the responsibility involves the construction of a giant power dam or the restoration and preservation of a historic area.

Too long—far too long—have the people looked to Washington for solutions to all their problems.

This attitude of letting Uncle Sam do it is often reflected in the demands that come to us from all sections of the country for financial assistance in the establishment of new national parks, new national monuments, and new historical areas.

Without deprecating the sincerity of the sponsors of these projects, nor in any way discounting the value of the projects themselves, practical business reasoning compels us to point out to most of these petitioners the irrefutable fact that the Federal Treasury is not inexhaustible.

The national park system each year draws increasing millions of visitors. Travel to the historical areas alone in the system has increased from around 5 million in 1945 to 16 million in 1953. This means that 1 person out of every 10 in the United States visited a historic area last year.

More than a million persons viewed Independence Hall last year; more than a half million walked through the portals of Fort McHenry, the siege of which inspired the writing of The Star-Spangled Banner; and more than 200,000 schoolchildren visited the Lincoln Memorial in Washington.

To provide proper safeguards for the safety and convenience of these millions of visitors requires great sums of money.

Another heavy financial burden is placed on the Federal Government in the discharge of its responsibility to handle the millions who visit the national parks.

In fact, there has always been difficulty in securing adequate appropriations to maintain properly the facilities already a part of the system.

I am reluctant, therefore, to support any request for additions to the system until the present facilities can be brought up to standard. This can only be done by bigger appropriations, and in view of the administration's determined effort to balance the budget, any expansions in the park system in the immediate future appear to be foreclosed.

In the meantime, however, the park system is prepared to make available its scientific and technical skills to local groups, to States, and cities to assist any worthwhile local effort to develop historic areas or to aid in the proper planning and operation of local park systems.

Frankly, that is the best way to encourage and to develop this movement. Local control, authority at home instead of from Washington, will insure the continued support and cooperation of local people.

INTRODUCTION OF SENATOR BEALL, OF MARYLAND, BY SENATOR MARTIN, OF PENNSYLVANIA

My fellow Americans, it now becomes my pleasant duty to present as our next speaker a distinguished colleague in the United States Senate.

He represents our neighboring State of Maryland with honor and distinction—and with complete loyalty to the highest ideals of patriotic Americanism.

When he took his seat in the United States Senate, he brought to that body the valuable experience gained in many years of public service and devotion to the public welfare.

He served in the ranks as a soldier in World War I.

He served as a Senator in the legislature of his native State.

In recognition of his outstanding ability and his constructive statesmanship the people of his congressional district elected him for five successive terms in the House of Representatives.

He is now serving his first term in the United States Senate—and it is one of my great privileges to be associated with him as fellow members of the Senate Committee on Public Works.

My fellow Americans, with extreme pleasure and sincere pride, I present a great American, my good friend and colleague, the distinguished Senator from Maryland, the Honorable J. GLENN BEALL.

ADDRESS OF SENATOR J. GLENN BEALL

Good afternoon, ladies and gentlemen, this 200th anniversary of the Battle of Fort Necessity is an inspiring occasion, and it is a fitting one to rekindle in our hearts the patriotism which ennobled George Washington and to rededicate ourselves to the basic beliefs and ideals on which this Nation was founded.

On July 4, 1754, when the youthful commander marched away from this fort, no one could possibly have imagined the momentous events which would follow.

Let us, then, endeavor to put this engagement in its proper historic perspective.

In 1754 the vastness of America was not even remotely appreciated. The colonists had partly penetrated the wilderness of America, and both England and France were rivaling for control of the seas, and the new land in America and India.

The French, moving in through Quebec, were building a defense line which reached to New Orleans. The English, acting primarily through their east-coast Colonies, were anxious to limit the advances of the French.

In Europe, the nations of Germany, Austria, Spain, and Russia, were gradually being drawn into the progressing conflict between France and England. The crowned heads of Europe were forming uneasy alliances, doomed not to succeed and which would bring to an end the reign of many an unhappy, incompetent, king and queen.

Here in America the colonists were looking with increasing concern over the string of small French forts established just beyond the Alleghenies. Small contingents were armed and sent out on scouting expeditions. When the colonists were sufficiently alarmed, troops were dispatched to warn the French out of the area.

On March 24, 1754, Governor James Glen, of South Carolina, in a message to the State Assembly made a significant statement. "Up to this time," he declared, "the Colonies have acted as entirely separate and independent States." Benjamin Franklin was impelled to utter his famous declaration "Unite or die."

In April 1754, a small force from Virginia and South Carolina, led by Col. Joshua Fry and assisted by the 22-year-old George Washington, was at Wills Creek. Near the end of May, Fry died, and Washington was left in command. He was soon commissioned a colonel.

By July 1 Washington was at Great Meadows, and shortly before noon on July 3, 1754, a force of about 600 French and Indians appeared against Washington, who had a troop half that number.

On July 4 a truce was negotiated and Washington withdrew, unaware of the great damage his men had inflicted on an enemy with superior forces. The Battle of Fort Necessity had been a brief, small skirmish in the wilderness of an unexplored land.

However, with the hindsight of history that event can now be fully appreciated, and what is even more rare there was one man who recognized its significance even then. That was the prince of literary men, Voltaire, who was moved to write, "A cannon shot fired in the woods of America was the signal that sent all Europe in a blaze."

Let us review what followed.

George Washington here at Fort Necessity was taking the first concerted action by the Colonies, which would ultimately culminate in the Revolutionary War for Independence.

The battle marked the beginning of the French and Indian War in America, destined to forever remove France as a power in the New World.

The 2-day conflict between English and French forces provoke their national rivalry so that they engaged in the Seven Years War, which brought chaos and disaster in Europe and changed the maps of three continents.

The Seven Years War was to reveal to the French people that they were victims of a system which had developed almost countless evils. It was to show that France was ruled by an absolute, divine right monarch; that monarch, Louis XV, was morally too slack to lead, and that whatever central control there was in France was exercised by the King's official mistress, Madame de Pompadour.

These events in France were leading inescapably to the Revolution of 1789, which changed the course of French history.

In England conditions were hardly better than in France, and the British effort was uncoordinated; but the English did produce—as the English seem to possess a rare ability to do—a capable leader by the name of William Pitt. We named what was to become one of the great industrial cities of the world here in western Pennsylvania after the Prime Minister who led his country's successful effort to end any French empire in America and started England off on its empire program. The British were obligated to organize that expanding empire—and the resulting problems were to be the primary concern of Great Britain from that day to this.

The Peace of Paris, ending the Seven Years War, was signed in 1763, and exactly 20 years later the British were to sign another Peace of Paris, this time relinquishing the American Colonies and recognizing the United States of America, which had been led to victory by Gen. George Washington.

The battle established Washington's reputation as a competent military commander, and brought him the prominence which was to influence his selection as General of the Continental Armies, and make him the unanimous choice as the first President of the United States.

Thus, we see that as a result of a small battle at an isolated outpost named "Fort Necessity," the history of the world was decisively changed.

In these tedious and perilous times we do not know just where a modern battle of Fort Necessity may occur. History may prove that it was in Korea, Indochina, or perhaps some other far-off, unknown spot where a single rifle shot may explode world war III.

We, and the nations of the free world, desire peace, frown on appeasement, and fear war. We are treading the dangerous, sinister path which can lead to a long period of uneasy peace or to the cataclysm of modern war.

On the National Archives Building in Washington there is inscribed "What Is Past, Is Prologue," and if there is any point in studying history it is to learn how to conduct our affairs in the future.

History quite often seems to repeat itself; the words of great men at times seem more descriptive of a particular situation than anything which might be said today. We can learn from the past, and a circular to the States which George Washington wrote in 1783 seems to me most applicable today.

Washington wrote as follows:

"The foundation of our empire was not laid in the gloomy age of ignorance and superstition, but at an epoch when the rights of mankind were better understood and more clearly defined, than at any former period, the researches of the human mind, after social happiness, have been carried to a great extent, the treasures of knowledge, acquired by the labors of philosophers, sages, and legislatures, through a long succession of years, are laid open for our use, and their collected wisdom may be happily applied in the establishment of our forms of government; the free cultivation of letters, the unbounded extension of commerce, the progressive refinement of manners, the growing liberalty of sentiment, and above all, the pure and benign light of revelation, have had a meliorating influence on mankind and increased the blessings of society. At this auspicious period, the United States came into existence as a nation, and if their

citizens should not be completely free and happy, the fault will be entirely their own.

"Such is our situation, and such are our prospects; but notwithstanding the cup of blessing is thus reached out to us, notwithstanding happiness is ours, if we have a disposition to seize the occasion and make it our own; yet, it appears to me there is an option still left to the United States of America, that it is in their choice, and depends upon their conduct whether they will be respectable and prosperous, or contemptable and miserable as a nation; this is the time of their political probation, this is the moment when the eyes of the whole world are turned upon them, this is the moment to establish or ruin their national character forever."

There is much wisdom in these words by Washington, especially in his description of the intellectual atmosphere which prevailed and made possible the establishment of a government dedicated to securing the rights of man.

That those citizens who have preceded us fufilled the desires and aspirations of Washington by securing and continuing the blessings of society can be evidenced by the high standard of living which this Nation has enjoyed, and the freedoms which are the rights of every person in the United States.

Washington, however, warned that there is another option, and I believe it is an option facing us today; that it is within the choice of the people of this country and depends upon their conduct, whether they will be respectable and prosperous, or contemptible and miserable as a nation.

More than at any other time in our history, I believe, that alternative exists today. The people of every other nation are watching the conduct of the United States. Some are watching our conduct in the hope that we can lead the nations of the world in establishing peace, however uneasy that peace might be. Others are watching us with the hope that we will fail in that goal. There are yet others, in nations maintaining a posture of neutrality, who are watching us suspiciously, unsure whether our leadership can succeed.

How we conduct our affairs in our contacts and relations with other nations, and even how we conduct our internal affairs here in the United States, can very well determine whether our future is to be blessed with an era of peace or the holocaust of atomic war.

There is no pat formula or slogan, there is no rigid inflexible policy, which, if accepted, can lead to the peace and prosperity which we seek.

I personally do not accept the appeasement, and nonaggression pact suggestions which have been made by some of the outstanding world statesmen. Neither do I accept the idea that we must meet our enemy in mortal conflict and hand over the spoils to the victor.

There must be found a middleway; there is surely some alternative to world war and complete appeasement of the Communists. I believe that under the leadership of President Eisenhower that this Nation can find respectable and honorable alternatives, thereby avoiding a recurrence of such events as those of 200 years ago which led to so many wars and social upheavals.

However, I believe that the United States of America cannot offer successful world leadership merely by defending the status quo. The rise of nationalism in many parts of the world, similar to that which occurred here in the United States 200 years ago, demands that we offer leadership which will permit these people—and particularly those in Asia—to gain the respectability of self-government and the blessings which modern society has to give.

Here in Fayette County there are a good many people of Polish, Czechoslovakian and Austrian descent, as well as from other small European nations. Today those countries are under Soviet oppression, and many of you have friends and relatives living behind the Communist Iron Curtain. You know better than I can tell you that communism means the revocation of all personal liberties and security.

I ask that you today join with me in rededicating ourselves to the honored traditions of the United States. A knowledge of our history can lead to a better understanding of world problems.

George Washington is reported to have once said, "With our fate will the destiny of unborn millions be involved." Our fate seems to be hanging suspended between war and peace and how we conduct ourselves in the immediate future will determine the destiny of all who follow us.

Our responsibility is great, let us pray that our conduct as a people and a nation is in the tradition of Washington, and that our descendants will respect and honor us as we do those great men who founded this Nation.

ADDRESS OF SENATOR MARTIN, OF PENNSYLVANIA

On this sacred soil, sanctified by the blood of patriots, we meet in humble and reverent acknowledgment of our everlasting debt to the sublime character and majestic greatness of George Washington.

We meet in commemoration of an event which had outstanding importance in the vast drama of human progress.

Here was enacted the first stirring scene in the glorious pageant of American liberty which culminated in the War for Independence and the birth of a new Nation, destined under God, to lead the world in material, cultural, and spiritual power.

For here, at Fort Necessity, George Washington was in command of Colonial troops engaged in the first united action on the part of the Colonies in defense of the western frontier against the hostile French and Indians.

For the youthful Colonel Washington, then at the age of 22, it was his first military combat and he emerged with the honors of war if not with victory.

In the language of this atomic age it might be said that it started a chain reaction which altered the course of world history and changed the map of three continents.

Historians have delved deeply into every phase of George Washington's illustrious career and his monumental achievements. His writings and his speeches have been studied with extreme care. The facts of his life as a planter, soldier, and statesman have been given the most exacting examination. Innumerable biographies of Washington have been published in almost every language of the globe.

But as we look back 200 years to his first combat engagement, we see a boy of 22, whose courage and character had been shaped by self-discipline, tireless energy, exposure to hardship and danger, devotion to duty, reverence for honor and truth, and a firm and abiding trust in God.

There can be no doubt that his contacts with the trappers, traders, and homesteaders of the western wilderness strengthened Washington's faith in his country and his fellowmen, his self-reliance, and his patriotism.

As a citizen, surveyor, and young soldier he saw the land he was to lead in battle against the mightiest military and naval power of his time.

Think of his dauntless courage as he set out on his first important mission—a journey of 1,000 miles through the snow-covered wilderness to deliver Governor Dinwiddie's ultimatum demanding that the French evacuate all the territory claimed by Virginia.

It was on this perilous journey that the youthful soldier, reaching the forks of the Ohio, recognized the strategic importance of the present site of the city of Pittsburgh. He noted his observations in his journal in these words and I quote:

"I spent some time viewing the rivers and the land in the fork, which I think extremely well situated for a fort as it has absolute control of both rivers."

Washington's suggestion was approved. The first attempt to build a fort at the point was defeated by the French. They strongly fortified the place, calling it Fort Duquesne.

The story of General Braddock's disastrous expedition against Fort Duquesne need not be repeated here, nor the march of General Forbes that raised the British flag over the ruins of Fort Duquesne after the French had set it afire and retreated.

The Forbes campaign of 1758 brought to a close one chapter of Washington's military career. The next chapter opened when the Second Continental Congress on June 15, 1775, unanimously elected him as commander in chief of its armies.

Earlier in the year he had been chosen by the Virginia Legislature as a delegate to the Continental Congress which was to meet in Philadelphia.

One biographer pictures Washington riding through the gateway of Mount Vernon on May 4, 1775, and states that when he turned his horse's head northward his career as a Virginian ended and his career as an American began.

It is not necessary to relate to this distinguished audience the trials and tribulations, the hardships and heartbreaks, of those dark days of gloom and discouragement that followed.

Truly they were times that tried men's souls. We can only marvel at the patience, perseverance, and self-control of the great military leader who never lost faith in the final outcome.

Washington did not despair. Defeats were merely temporary setbacks. Every new disaster was met with new and firmer conviction that freemen, fighting for liberty, could not be defeated.

Surely Washington's faith in God sustained him in those difficult times. In victory and defeat his orders called upon his troops to attend divine services whenever it was possible to do so.

In one such order, issued when the Declaration of Independence was read to his troops, General Washington revealed his belief that liberty and religious faith are interwoven.

He stated, and I quote:

"The blessing and protection of Heaven are at all times necessary but especially so in times of public distress and danger. The general hopes and trusts that every officer and man will endeavor so to live and act, as becomes a Christian soldier defending the dearest rights and liberties of his country."

The same spirit, linking religion and patriotism, was shown in a similar order issued at Valley Forge when General Washington received the welcome news that France had signed a treaty of alliance with the United States.

Washington's order directed the divine services be held each Sunday at 11 o'clock and then continued:

"While we are zealously performing the duties of good citizens and soldiers we ought not to be inattentive to the higher duties of religion. To the distinguished character of patriot it should be our highest glory to add the more distinguished character of Christian."

Two more references by George Washington to religion and morality are worth recalling on this occasion.

One was uttered when he was presiding over the Constitutional Convention in Independence Hall. It was suggested that some popular provisions be placed in the Constitution to please the people and to facilitate its adoption.

Washington rose. His voice was choked with emotion as he said:

"If to please the people we offer what we ourselves disapprove how can we afterwards defend our work?"

Then he added:

"Let us raise a standard to which the wise and honest can repair. The event is in the hands of God."

The other came when he prepared to put aside the cares and problems of the Presidential office.

In his famous Farewell Address Washington admonished his fellow citizens that religion and morality are the indispensable supports of political prosperity—the great pillars of human happiness. In that great American document Washington said:

"Let us with caution indulge the supposition that morality can be maintained without religion. * * * Reason and experience both forbid us to expect that national morality can prevail in exclusion of religious principle."

The career of George Washington places before us a never to be forgotten lesson in loyalty, patriotism, devotion to our country, and faith in its sacred ideals.

Washington lived those ideals.

His integrity, his supreme sense of honor, his spirit of justice, and his conception of a greater United States all combined to fashion his fame.

His statesmanship reached the highest level because he had the courage to direct a government based on the concept that freedom of the individual is God's greatest gift to mankind.

Under that plan, in less than 200 years, free Americans have built the richest, the soundest, and the strongest Nation of all history. It was built on the solid foundation of equal justice, equal opportunity, and equal right to live, work, and succeed.

We have learned in peace and war that each generation must buy its freedom with sacrifice, sweat, tears, and blood.

The principles for which we must work and fight are the same today as in Washington's time.

The same freedoms, the same independence, the same way of life; the pursuit of the same happiness, the same rights of property, the same freedom of speech, of press, of religion, and of assembly—yes; the same freedom of action and enterprise.

Washington hated tyranny. If he were alive today he would fight communism with all the strength and vigor at his command.

He hated disloyalty. He hated dishonesty.

Let us be inspired by his example to insist that everyone holding public office must be thoroughly honest—a true servant of the people, appreciating public office as a public trust.

Let us demand absolute loyalty from everyone in the Government service. Divided allegiance has no place in the American way of life.

Let us, like Washington, have the courage to be real Americans. We can pay no greater tribute to his immortal memory.

DISTRIBUTION OF TENNESSEE VALLEY AUTHORITY POWER

Mr. HILL. Mr. President, I ask unanimous consent to have printed in the RECORD the text of a letter which has been sent to President Eisenhower by the Tennessee Valley Public Power Association with reference to the proposed contract whereby the Atomic Energy Commission, under a directive of the President, would serve as a broker in the purchase of power for the Tennessee Valley Authority.

The municipally and cooperatively owned members of the power association are the major distributing agencies of TVA power. They have investments of some $400 million in this partnership with the Federal Government through its agency, the TVA. They have demonstrated most successfully how Federal, State, and local agencies can cooperate in the development of the Nation's power resources for the benefit of all the American people.

As the partner of the Government, they have a vital interest in the contract which AEC now is negotiating with the Dixon-Yates group and they are, in my opinion, quite properly protesting the signing of such a contract with a private utility combine.

So far the power distribution in the Tennessee Valley have been completely ignored in these negotiations. My colleagues and I are determined that their interests shall not be ignored.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JULY 6, 1954.

The PRESIDENT,
The White House, Washington, D. C.

MY DEAR MR. PRESIDENT: Please allow us to say in the very beginning that our organization is not concerned solely with a theory of government, but is very vitally concerned with what is going to happen to an investment of over $400 million that we have made in the distribution end of the Tennessee Valley power system. We became partners with the Federal Government a good many years ago. The Federal Government now has an investment of roughly $800 million in the power end of TVA and we, the people of the Tennessee Valley, have an investment of about $400 million. We believe this will explain to you our very keen interest in this subject.

In your recent press conference you stated that you wished to examine the Tennessee Valley power supply situation from every angle. At the same time you stated that you had instructed the Atomic Energy Commission to enter into an arrangement that would make such a study pointless. This arrangement, to buy power from the Mid-South-Southern Co. combine at Memphis, would be for a 25-year period and would cost the Federal Government a minimum of $90 million to $150 million in excess of other ways of securing the same block of power. The effect of the arrangement would be to weaken and ultimately to destroy the most efficient power supply system in the country. The Dixon-Yates arrangement would not facilitate a study; it would be choosing an answer before the study has been made. We respectfully urge that the Dixon-Yates proposal be rejected.

We have followed closely the developments in connection with the Dixon-Yates proposal, including the letters from the Director of the Bureau of the Budget which were read in the hearings of the Joint Committee on Atomic Energy on June 17, and the testimony of the AEC at that hearing. These trouble us greatly.

First, we are concerned, because it seems clear that the proposed arrangements will not provide an adequate supply of power for the region's growing needs. We know from experience that these requirements are growing at a normal rate of about 750,000 kilowatts a year. Therefore we were troubled when your budget message spoke in terms of 500,000 to 600,000 kilowatts as the amount by which TVA's supply for this area's loads might be increased by reducing its deliveries to AEC. Now we find that out of 600,000 kilowatts proposed to be obtained from Dixon-Yates, TVA is expected to find not only enough power for normal-load growth but some 135,000 to 175,000 kilowatts for new load at Oak Ridge. This is in spite of the fact that your budget message said that "in the event * * * new defense loads develop, the question of starting additional generating units by the Tennessee Valley Authority will be reconsidered."

Second, we are concerned about the prospects of unnecessary increased power costs. We had understood from your budget message that any arrangements for AEC to buy power from other sources would be a matter between AEC and the other supplier. However, the letters of Budget Director Hughes state that the power would not be bought by AEC for its own use, with a reduction in TVA's commitment to AEC. Instead the power would be bought by AEC for TVA's use, and the testimony before the joint committee indicates that AEC expects TVA to pay the bulk of the extra costs to the Government of the Dixon-Yates power—extra costs estimated at $90 million to $150 million over the life of the proposed contract. The only part of these costs that AEC expects to pay is the taxes which the Dixon-Yates group would pay in Arkansas and which would be a duplication of the payments in lieu of taxes that TVA will bear in Tennessee and other States upon its sale of this power. We know from experience that TVA can be depended upon to obtain its power at the lowest possible cost. We do not have the same confidence that our needs will be met by AEC and Dixon-Yates with power of the lowest possible cost.

Third, we are apprehensive about the continued operation at maximum efficiency of an integrated regional power system designed to meet the power needs of an integrated area. We see in the Dixon-Yates proposal the introduction of divided management and divided responsibility, with a portion of this power system having no franchise in the area and coming in under terms negotiated with an agency which also has no responsibility for the region's power supply. We cannot believe that you are knowingly and intentionally requiring us, without local determination, to place our power supply problems again in the hands of these power systems who have fought us so bitterly ever since we made the choice by popular vote in favor of service from TVA. It took a generation of effort to free this region from the holding companies of which the Dixon-Yates companies are the successors. The Dixon-Yates proposal is an effort to sell this area back to the power trust. It would be by Federal dictation, without the sort of local initiative and responsibility which we understand that you and the other leaders in your administration are anxious to encourage. Furthermore, the transfer of load would be made without a corresponding transfer of public utility responsibility to adjust the supply at all times to the growing power needs. For these reasons and those stated in the preceding paragraphs, we do not believe Dixon-Yates syndicate and AEC should determine the arrangements under which TVA is to furnish power for distribution by us to the 5 million people of this region.

In connection with our apprehension about the continued operation of a regional power system designed to serve the region, we also find it impossible to believe that you have been correctly informed about the power supply activities of TVA, in light of your press comments construing as a possible threat of TVA expansion into adjoining areas, the recommendation by TVA of a steam plant near the periphery of the area it serves. For practically a decade the area supplied by TVA power has not changed by as much as 1 percent. Memphis was one of TVA's first customers. It has been buying large amounts of power from TVA since 1938. The plant that TVA proposed to build at the Fulton site north of Memphis, like the Shawnee plant at Paducah, is smaller—not larger—than the known TVA loads in the

vicinity. TVA has a record of cooperative operating relationships with neighboring systems. In the light of all these facts, to interpret such TVA plants as a threat to expand into adjoining areas is to adopt a point of view heretofore suggested only in the wildest charges of spokesmen for the private power lobby.

Fourth, interested as we are in the welfare of the entire Nation, as well as our own region, we object to the wastefulness of an uneconomic investment. This scheme would place a plant at an uneconomical location; it would require an extra investment in transmission, extra cost of transportation of coal, and extra consumption of fuel, labor, and materials to offset the energy lost in unnecessary longer transmission. This scheme would require unnecessary duplication of State and local tax payments in two areas. It would involve unnecessarily high interest costs for money borrowed on the strength of the Government's credit. It was clear from the testimony before the joint committee that there is no doubt in the minds of anyone that these extra costs exist; the only question is whether they amount to as little as $3,685,000 a year (a large amount in itself) or to more than $5½ million a year.

For all these reasons, we are compelled to protest against the proposed Dixon-Yates contract.

In urging rejection of the Dixon-Yates proposal, we are only too well aware that the delays to date make it very late in this session of Congress to be expecting appropriation of funds for major expansion of TVA's generating capacity. We are also painfully aware of the grave effects on this region of further postponement of new power generating capacity. Instead of the capacity being provided in advance of load growth, as should always be done, the construction of new capacity in this area is already being allowed for a second year to lag behind demands. Nevertheless, even though in 1957 this entire region must stop its forward economic march for a period corresponding to any further delays in action now, we would rather bear that burden than to start down a road which, in our judgment, can only lead to mounting economic waste and multiplying obstacles to sound regional development.

In view of the many agencies of the Government that are concerned in this matter, as well as the great public interest in it, we are sending copies of this letter to the Director of the Bureau of the Budget, the AEC Commissioners, and TVA Directors, members of the Appropriations Committees, and the press.

Respectfully yours,
TENNESSEE VALLEY PUBLIC POWER ASSOCIATION,
By R. V. TAYLOR, *President*.

RELIEF FOR FLOOD VICTIMS ALONG THE RIO GRANDE

Mr. JOHNSON of Texas. Mr. President, on Thursday of last week I introduced for myself and my colleague, the junior Senator from Texas [Mr. DANIEL], a resolution expressing the desire of Congress that the United States offer any aid possible to victims in Texas and Mexico of the devastating floods along the Rio Grande. This resolution was promptly agreed to by the Senate.

I wish today to advise the Senators that much has been done. The Army and Air Force have been most cooperative in meeting Red Cross requests for medical supplies, transportation, personnel, and cooking equipment. The Civil Defense Administration, through its regional office, went promptly to work. The State Department acted with speed to help make possible the sending of food supplies to Mexican communities hit by the floods.

The work of the American Red Cross has been magnificent.

According to information furnished me by R. T. Schaeffer, National Director of Red Cross Disaster Services, approximately 2,000 families on the Texas side of the river have applied for assistance. They are being provided it. The cost will be in excess of $500,000.

The president of the American Red Cross, after conference with the Mexican Ambassador to the United States, offered the assistance of the American Red Cross to Mexico people affected. The American Ambassador to Mexico passed on to the Mexican Red Cross the information that the American Red Cross was prepared to assist to the extent of $50,000, either in cash or relief supplies. This offer of assistance was accepted. The relief is being extended in the form of food, clothing, and medical supplies.

The Fourth Army, which has headquarters in San Antonio, Tex., provided field kitchens and personnel to prepare food for flood victims on both sides of the river. Both the Army and the Air Force are to be commended in the highest terms for the outstanding service they rendered in this emergency.

A pontoon bridge went into operation between Laredo and Nuevo Laredo at 4:15 Tuesday afternoon, replacing the permanent structure swept away by the flood. A temporary bridge also has been established across the Rio Grande at Eagle Pass.

I am informed that, thanks to the prompt receipt of medical supplies, there appears to be no danger of an outbreak of either typhoid or malaria.

I have received a communication from His Excellency, Manuel Tello, Mexican Ambassador to the United States, expressing his personal appreciation and the gratitude of the Mexican Government for the passage last Thursday by the Senate of the concurrent resolution and for the emergency aid given Mexican people by agencies of our Government.

On behalf of the people of Texas, I express similar appreciation.

The cooperative effort between the United States and the Republic of Mexico has been most effective. It is my hope and belief that similar cooperation will mark accomplishment of the task which lies ahead—the permanent rehabilitation of the flood victims on both sides of the Rio Grande.

PROPOSAL TO FIX NUMBER OF JUSTICES OF THE SUPREME COURT

Mr. BUTLER. Mr. President, during the latter part of June I attended a luncheon at the Association of the Bar of the City of New York. It was my great privilege and pleasure on that occasion to sit next to Mr. John W. Davis, formerly Democratic nominee for President of the United States, and certainly one of the most outstanding constitutional lawyers of our time. During the course of the luncheon I had the opportunity to talk with Mr. Davis concerning constitutional questions in which we have a common interest, including Senate Joint Resolution 44, which I introduced on February 16, 1953, which overwhelmingly passed the Senate on May 11 last, and which I am most anxious be not now lost in these closing days of the 83d Congress.

Mr. Davis so completely answered the two principal objections made to the joint resolution during the course of the debate that I asked him if he would send a letter to the President of the United States and to the Democratic leadership of the House setting forth his views on the subject.

Senators will recall that during the debate the two principal objections made to the joint resolution were, first, that it had not been given sufficient study prior to passage by the Senate, and secondly, that it served no real purpose, and hence constituted but another "tinker" with the Constitution.

I asked Mr. Davis if I might deliver his letter to the President to which he agreed and which I did. Upon that occasion I asked the President if I might make the letter public, because I felt that it was of such great interest generally, and particularly to Members of Congress, that it should be made public. The President willingly agreed, subject to approval by Mr. Davis.

I then communicated with Mr. Davis, and he agreed that the letter might be made public. I also communicated with Mr. RAYBURN, the minority leader of the House of Representatives, and he agreed to permit the letter to him from Mr. Davis to be made public.

I therefore ask unanimous consent that there be printed in the body of the RECORD at this point as a part of my remarks the letter from Mr. Davis to the President of the United States and the letter from Mr. Davis to Hon. SAM RAYBURN.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NEW YORK, N. Y., *June 29, 1954*.

The PRESIDENT,
White House,
Washington, D. C.

MY DEAR MR. PRESIDENT: A resolution proposing an amendment to the Constitution, known as Senate Joint Resolution 44, having passed the Senate is now pending in the House. I venture to commend this proposal to your favorable consideration should any occasion offer for your attention to it.

In summary, the amendment proposes to fix at nine the number of Justices of the Supreme Court, to remove from Congress in constitutional cases the power to impair the appellate jurisdiction of the Supreme Court, and to require all Federal judges having appointments during good behavior to retire upon reaching the age of 75.

In general, I do not profess to be a friend of repeated amendments to the Federal Constitution. Especially do I deplore those amendments which are predicated on imaginary or hypothetical dangers or represent attempts to improve on the fundamental structure of our Government. Of these it can only be said that "Striving to better, oft we mar what's well."

This particular amendment, however, is designed to prevent the repetition of unfortunate incidents such as have already occurred. There have been attempts to control the decisions of the Supreme Court by increasing its membership. There is at least one historic case where Congress, to prevent decision on a constitutional question, withdrew the case from the Court's jurisdiction.

And there have been unhappy instances where judges failing to recognize their own infirmities due to age have outstayed their usefulness. The only safeguard against such occurrences in the future is by the amendment now proposed.

I trust it may be possible for Congress to pass the resolution during the present session.

I am,

Respectfully yours,

JOHN W. DAVIS,

NEW YORK, N. Y., *June 29, 1954.*

Hon. SAMUEL RAYBURN,
House Office Building,
Washington, D. C.

MY DEAR MR. RAYBURN: I venture to express the hope that despite the pressure of legislative business the House will find time before adjournment to give its approval to Senate Joint Resolution 44, the proposed constitutional amendment fixing at 9 the number of Justices of the Supreme Court, removing from Congress in constitutional cases the power to impair the appellate jurisdiction of the Supreme Court, and requiring all Federal judges with lifetime appointments to retire upon reaching 75.

In its editorial of May 19 the New York Times said: "This is a good time, when no such issue is before the country, to reinforce the inviolability and integrity of the Supreme Court."

The matter of forestalling future cyclical attacks upon the independence of the judiciary has been given intensive study for many years. As long ago as 1946 the Association of the Bar of the City of New York appointed a special committee to study the problem. In the following year it recommended a constitutional amendment including substantially the provisions that eventually became the proposed amendment now before the House. Thereafter similar approval was given by a committee of the New York State Bar Association, of which I was a member. The American Bar Association in 1950 added its endorsement after thorough study by distinguished committees and debates in its house of delegates at several annual meetings.

When the Senate voted it had before it the report of its Judiciary Committee, at whose hearing Justice Owen J. Roberts; Harrison Tweed, president of the American Law Institute; and several spokesmen of the American Bar Association from various parts of the country gave oral testimony.

In my opinion, Senate Joint Resolution 44 would plug up two dangerous loopholes in the judicial article of the Constitution, thereby safeguarding the separation of our Government into its legislative, executive, and judicial parts and as the Constitution contemplated.

Believe me, with warmest personal regards,

Sincerely yours,

JOHN W. DAVIS.

MANAGEMENT OF THE EXPORT-IMPORT BANK OF WASHINGTON

Mr. CAPEHART. Mr. President, has the morning hour been concluded?

The PRESIDING OFFICER (Mr. CARLSON in the chair). Is there any further morning business?

Mr. CAPEHART. I shall be glad to yield to the Senator from Montana [Mr. MANSFIELD], who I understand desires to speak.

Mr. KNOWLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from California will state it.

Mr. KNOWLAND. Has the unfinished business been laid before the Senate?

The PRESIDING OFFICER. The Chair is inquiring whether there is any further morning business. If not, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (S. 3589) to provide for the independent management of the Export-Import Bank of Washington under a Board of Directors, to provide for the representation of the bank on the National Advisory Council on International Monetary and Financial Problems and to increase the bank's lending authority.

Mr. MANSFIELD obtained the floor.

Mr. CAPEHART. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield for a question.

Mr. CAPEHART. I do not believe there is any opposition to the pending measure. It was reported unanimously by the Committee on Banking and Currency, and was discussed at some length the other day. Unless Senators have questions about the measure I should like to suggest that we could pass the bill. It has been reported without amendment.

The PRESIDING OFFICER. Does the Senator from Montana yield for that purpose?

Mr. MANSFIELD. I shall be glad to yield for that purpose for 2 or 3 minutes, provided I do not lose the floor.

Mr. CAPEHART. I ask unanimous consent that the Senator from Montana may yield for the purpose of passing the bill, without his losing the floor.

Mr. JOHNSON of Texas. Mr. President, I am forced to object. Several Members who are interested in the proposed legislation are not present. Therefore I object.

The PRESIDING OFFICER. Objection is heard.

COMMUNIST CHINA AND THE UNITED NATIONS

Mr. GILLETTE. Mr. President, I ask unanimous consent that the Senator from Montana, who I understand will speak at some length, may yield to me so that I may address the Senate for approximately 10 minutes, without the Senator from Montana losing the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Iowa may proceed.

Mr. GILLETTE. Mr. President, recently it has been urged by several important officials that if the Communist regime now controlling China should be admitted into the United Nations General Assembly, the United States should promptly withdraw entirely from the United Nations.

A resolution has been introduced which would bring about the automatic withdrawal of the United States from the United Nations, should the Chinese Communist regime be admitted.

Other legislative devices, including amendment of the foreign aid bill, are under discussion. There has been talk of forming a "bloc" in the Senate to demand adoption of some kind of restrictive legislation or resolution binding the United States in advance to take certain steps relative to the United Nations if certain circumstances prevail.

It has been further suggested that the American people would reject the United Nations and our continued participation therein if the General Assembly should approve the admission of Communist China by the necessary two-thirds vote.

From these above statements it is possible to draw the conclusion that a concerted and organized drive is underway to wreck the United Nations if that world body votes in opposition to a given policy of our Government. Should this drive succeed, the United States would be the first member of the United Nations ever to threaten to quit because the game is not being played to our liking on a particular matter. Many other member-nations have repeatedly suffered political defeats in the United Nations on matters of great importance to themselves; to date not one of them has handed in its resignation.

Mr. President, I stand second to no Member of the Senate in my opposition to the admission of Red China into the United Nations. I joined as one of the initial signers of the petition circulated by the "Committee for 1 Million Against the Admission of Communist China to the United Nations," which was formed last autumn under the honorary chairmanship of our former colleague, Ambassador Warren E. Austin, with a steering committee composed of such eminent men as the Hon. Joseph C. Grew, Representative Walter Judd, Representative John McCormack, the Senator from Alabama, Mr. Sparkman, and the Senator from New Jersey, Mr. Smith. This committee, of which I am proud to be a sponsor, has circulated this petition throughout the Nation, attracting hundreds of thousands of signatures. It clearly represents a formidable public opinion in this country, one which no foreign government should underestimate. At this very moment, while I am speaking on the floor of the Senate the news ticker carries the information that 1 million signatures have been obtained.

I have always opposed admitting Communist China to the United Nations. I am opposed to it now. I shall be opposed to it for as long as that regime fails to live up to the standards of international behavior laid down by the charter as qualifications for admission to membership.

I am opposed to admitting Red China not only because it is a government that has sent its troops into aggressive war against American soldiers and caused tragic losses of life and limb among our troops and those of other U. N. members associated with us in stopping Red aggression in Korea. If I were opposed to admitting Red China on the ground alone of waging aggressive war, I would have opposed a considerable number of other present members of the United Nations which, through our Nation's history, have made war on us. I would also, in all consistency, be opposed, which I am not, to admitting Germany, Japan, Italy, Spain, and other countries now seeking membership in the United Nations.

To oppose Red China's admission to the United Nations on the sole ground

that it has been at war—and, in effect, still is at war—with us, does not in my opinion go to the heart of the matter. I oppose its admission because it has violated the very fundamental principles on which the United Nations was founded. It has been found guilty of aggression by the United Nations General Assembly. It is today guilty of aiding and abetting aggression against Laos and Cambodia. Unless and until Communist China has given concrete evidence of its intention to behave in conformity with the principles of the United Nations Charter, and has given this evidence over a period of years, it most certainly should not be admitted to the United Nations, or any of its agencies.

All of us are agreed on this matter. But, Mr. President, in saying this I am not in the same breath saying that if our views are disregarded by two-thirds of the members of the General Assembly we must at once seek to destroy the United Nations itself.

Although the United Nations is by no means as perfect an instrument for world peace as we desire, if two-thirds of its members wish to take steps which we consider violative of the spirit of the charter, it is certainly not the fault of the charter or of the principles set forth therein. The principles and the charter were good enough to receive the overwhelming endorsement of the Senate of the United States in 1945. If those principles were good then, they are good today. They will be good tomorrow, even if other governments may act in such a way as to violate them. Why should the United States abandon those principles, and the organization which embodies them, simply because others are not, in our opinion, living up to them?

The failure of the United States to enter the League of Nations led ultimately to the downfall of that first international effort at world security against aggression. Do we now propose to assume responsibility before history and before our children and grandchildren for having scuttled the United Nations, the second attempt since the beginning of time to erect a structure for preservation of world peace and security?

Rarely, Mr. President, in all the years I have served in the Congress, have I heard a more unjustified, and at the same time a more dangerous proposition advanced by a Member of either House. It is tantamount to saying petulantly that if we cannot win a given game we will pick up our marbles and go home. It is dangerous because it not only lets the game be won by somebody else, but also permits all the succeeding games to be played without us and to be won without our opposition. It is almost puerile in its thoughtless petulance.

It is dangerous for other reasons, far more serious reasons. If the proposal contained even a single positive contribution to the welfare and security of the United States of America, it would have some merit. As it is, the proposal is one whose only possible effects would be harmful, probably disastrous, to the best interests of our own country.

In simplest terms, what this proposal means is the abandonment of the United Nations to the other great power belonging to it, the Soviet Union. It means the elimination of any American influence in the councils of the only existing world organization.

It provides the handiest possible means for the capture and domination of the United Nations by our Communist enemies. It closes off one of our best avenues to combating Communist influence throughout the world.

If I were in the Kremlin reading reports of this proposal, I would be rubbing my hands in gleeful anticipation. I would, if I were in that fortress of Soviet power, look out on the world with real gratitude for the errors of the other side. What mightier push to hesitant, neutralist-inclined nations toward the Soviet camp could the Communists themselves have devised?

Finally, beyond all these contributions to Soviet success, the proposal offers absolutely nothing of any advantage to the United States.

These are the short-range effects one can expect from such a fantastic proposition. I have not been able to conduct any scientific poll of public opinion, so I am unable to express with certainty precisely what the attitude of the American people would or would not be if Red China were admitted to the United Nations. All I can do as a Member of the Senate is to point out the probable consequences of adoption of any such rash proposal as one requiring withdrawal from the United Nations.

The longer range effect of its adoption would undoubtedly be the transformation of the United Nations—the United States no longer being there to defend its interests—into nothing but a Soviet-oriented instrumentality aimed at the United States, leading sooner or later to world war III with its possible total destruction of all human, animal, and even plant life on the face of this planet.

Those who favor this proposal either want an isolated America or they want war. They will have both if their proposal is accepted. If the views of this new Senate bloc should prevail in the United States, the Soviet bloc would be handed the means of prevailing in the world.

This Nation has had leadership thrust on it—world eminence and world responsibility it did not seek but cannot now escape. Let us grow up, let us become mature adults living in an adult world, let us put aside childish playthings, childish moods and tempers. Our enemies are playing for the highest stakes, control of the world. They are playing hard, ruthlessly, intelligently. They use every instrument available and invent new ones where needed. We cannot do less if we are to live up to our own beliefs, if, indeed, we are to survive. It would be madness, utter midsummer madness, to hand over the United Nations to the Communist bloc. Let us coolly and realistically determine to defend our Nation and our liberties wherever and whenever they are challenged. Let us not run away from the fight, just because it seems to be going against us at a given moment. The principles we stand for are eternal. They shall prevail, but not unless we are willing and able to defend them in the United Nations, outside the United Nations, or wherever the threat appears.

GENEVA: FAILURE OF A POLICY

Mr. MANSFIELD. Mr. President, the war in Indochina appears on the verge of ending in a truce. The bloodletting of the past 8 years will probably come to a close very shortly. There will be no more Dien Bien Phus, at least for the present. The danger of armed involvement of American forces in Indochina, once so close, has receded.

These are welcome byproducts of the Geneva Conference. There is little else. The situation in Korea, presumably the principal reason for our participation in the Conference, remains unchanged; thousands of American soldiers are still committed there on the mainland of Asia.

With respect to Indochina, a serious defeat has been inflicted on American diplomacy. And in the process vast new areas have been opened for potential conquest by Communist totalitarianism.

Last spring, Mr. President, in two speeches in the Senate, I expressed the view that our consent to participate in the Geneva proceedings was a mistake. I did so because it was clear at the time that the Communists would enter the Conference, for all practical purposes, as a bloc; that the Communists, whether from the Soviet Union, Korea, China, or Indochina would possess a singleness of outlook. It was not clear that the non-Communist nations shared any such unity of objective. The British wanted to stay out of Indochina; the French wanted to get out of Indochina, and for a while it seemed that we were on the verge of getting into Indochina.

In these circumstances, how could negotiations lead to anything but failure for the non-Communist powers?

These were the consequences which I felt might flow from a failure at Geneva, as I stated them last April 14 on the floor of the Senate. At that time I said:

> Patterns may be set which might influence the entire political fabric of the French Republic and touch on every aspect of Western European unity. Patterns may be set which will determine whether aggression shall again gather force on the shores of the south China seas to be hurled at this Nation from across the Pacific.

Certain of these results are already apparent. The Geneva Conference has served to increase vastly the stature of the Chinese Communists in Asia and throughout the world. Their influence now takes firm root in northern Indochina. All the rest of southeast Asia lies before this totalitarian wave which has spilled over the borders of south China. The path of advance to the west unfolds through small nations and points ultimately to India. Southward and eastward, over the intervening islands of the Pacific, the path stretches toward New Zealand, Australia, and the Americas.

These grim prospects are not likely to materialize tomorrow or next month. It may be years or decades before the full effects of the loss of Indochina will be fully felt or understood.

Political waves are pulsating forces, not unlike those of the sea. They change

shape and form, and their power ebbs and flows as they move through history.

This may be the case with the new totalitarian wave which has surged out of China to the south. It may undergo profound changes as it moves outward. It may lose or gather momentum as it mixes with the political crosscurrents of southeast Asia.

For the present, however, the inescapable fact is that totalitarianism and not freedom has emerged triumphant from the murky waters of the war of the deltas. Its triumph has been confirmed by Geneva and the pattern for a further advance in the Far East is set.

Nor are the consequences of Geneva confined to Asia and the Pacific area. Europe, too, will feel the impact of this conference. Until Geneva, there was a chance that the great peoples of Western Europe would continue to move their national heritages in the direction of a united Europe.

Thanks to the courage, and the wisdom of a sincere American and a great Secretary of State, George C. Marshall, and thanks to the financial sacrifices of the American people who bore the cost of the Marshall plan willingly and generously, Western Europe had been able to lift itself out of the mire of a disastrous war. It had begun the long slow ascent toward unity. It was on the verge of reaching the most elusive goal of all, the formation of a common European army. Had this goal been achieved France and Germany would have ceased to revolve in age-old, separate, and suicidal orbits. The intelligence, the skills, the strengths of these and other great nations of Europe would no longer have been pitted against each other in senseless destructive rivalry. They would have been united for mutual benefit and for the benefit of the entire world.

This was a dream worth having, and it was shared by great and small alike in Europe and in America. It was the hope of a century and it stood on the very edge of achievement in the proposed creation of the European Defense Community, the common European army. But now the dream is fading; the hope is dimming.

These results were not expected when the Secretary of State, at the Berlin Conference last February announced that this Nation had been committed to the Geneva meeting. I say this without reflecting on the intentions or the capacities of the Secretary of State. The Secretary is an able and devoted public servant. Some have even waxed lyrical in their appreciation of his exceptional qualities. It has been said, for example, that it is "wonderful" to have at last "a Secretary of State who is not taken in by the Communists, who stands up to them."

I cannot hope to match such eloquence in the expression of my regard for the Secretary. That he did stand up to the Communists, however, is beyond doubt. The Secretary refused to participate in the Geneva Conference unless Mr. Molotov agreed that the Conference would in no way constitute American recognition of Communist China. He refused quite correctly even to accept Mr. Molotov's word in this matter. He insisted that Mr. Molotov sign a piece of paper making clear that the Geneva meeting would in no way constitute recognition of Communist China. The Secretary fought Mr. Molotov day after day at Berlin on this issue of the piece of paper. And finally, because he had refused to be taken in by the Communists, because he had stood up to them, the Secretary triumphed. Mr. Molotov capitulated. And in a climax worthy of the best of our current television dramas, Mr. Molotov signed the piece of paper.

The Secretary is to be commended for not being taken in by the Communists, for standing up to them, for obtaining this piece of paper.

We still have the piece of paper in our archives, I presume, and meanwhile the Communists have obtained at Geneva all they set out to acquire at Berlin a few months ago.

The Secretary of State was hopeful of the possible results of Geneva when he returned from Berlin to prepare for the conference. "Berlin," the Secretary of State said on his return, "cleared the way for other things to happen."

These were prophetic words.

Berlin cleared the way for Geneva and a failure of American policy. At Geneva, international communism obtained by diplomacy what it had failed up to then to obtain by threats, bluster, propaganda, intimidation and aggression.

It obtained international stature for the Chinese Communist regime. It obtained a firm and perhaps decisive foothold in southeast Asia. It obtained the undermining of the cooperation of the free nations in Europe and the West. These are the visible consequences of Geneva. Beyond them are others, still only dimly seen. The repercussions of the Geneva Conference will echo throughout the world, in events in Germany, Japan, France, North Africa, and many other areas, in less-audible ways for years to come.

Geneva was a mistake; and the result is a failure of American policy. It is a profoundly humiliating result.

I do not call attention to the mistake without an appreciation of the many difficulties which confronted the Secretary of State at Berlin and Geneva. He had to deal with reluctant allies and obstinate enemies. He had to stand in the forefront and seek to negotiate a settlement for peace while others in this administration beat the drums for war behind his back.

The job of the Secretary of State is an extraordinarily difficult one at this time. It is not made easier by those in high official positions who, by offering public statements at inappropriate moments in effect tell him how it should be conducted. Nor is the job made easier by those who in contemplating his "wonderful" qualities—and he does have them—do so in a partisan framework which tends to encourage disunity on foreign policy at a time when the Secretary should have the widest possible support in Congress and the country.

Geneva is even now fast receding into history. Before it disappears and becomes a mere name, it is essential that we grasp the full implications of this conference because it leaves behind, in dangerous disorder, the foreign policy of the United States.

We cannot conceal this disturbing fact by a repetition of the clichés of past years. Even Yalta, which for so long has served as a substitute for facing living realities, cannot be stretched and pulled far enough out of the dim past to conceal the impact of Geneva. The attempt to do so—and such an attempt is being made today—if I may paraphrase a lucid expression from the rich anthology of the distinguished and able majority leader [Mr. KNOWLAND], is like "trying to cover an elephant with a donkey."

Even a visit from the Prime Minister of Britain and the issuance of cordial joint statements, and a later statement by Churchill that "the conference was not an utter failure," cannot conceal the fact that the policy of the United States has been gravely damaged by Geneva.

Much less can this fact be concealed by glib phrases. The dominoes are falling. The cork in the bottle has popped. The parlor-game era of foreign policy is over. Either we face this reality, or we risk the commission of other errors even graver than Geneva.

All that has been done at Geneva cannot be undone. We are not, however, even at this late date, without resources. We can still have a foreign policy that will keep this Nation safe and free and at peace. But we can have it only if we recognize the errors that have been made and act to correct them.

We can do nothing—and will do worse than nothing—if we cling to the illusion that television performances are a substitute for sound foreign policies; that 11th hour flights to foreign capitals are a substitute for carefully cultivated, carefully maintained cooperation with friendly nations; and that strong words, even massive words, equate with a strong policy, can take the place of genuine strength and conviction.

The Secretary of State used an eloquent phrase some time ago when he spoke of an "agonizing reappraisal." Reappraisals of foreign policy should go on continuously. The world changes, and policies must be adjusted to fit the changes. There can be only one fixed constellation in the foreign policy of the United States: The welfare of the Nation under God; the preservation of the free institutions which give us the promise of a meaningful life.

Beneath this constellation, it is entirely proper and necessary that reappraisals of foreign policy should go on continuously. This is a function which normally pertains to the executive branch of the Government. If, however, the time has come for something extraordinary, for an "agonizing reappraisal," then the Senate of the United States should participate fully in it. We have a sworn constitutional duty to do so. From this body can comes guides which may assist the President in extricating our policies from the bog of confusion in which they now flounder.

This "agonizing reappraisal" of policy seems already to have begun. In my opinion, it has begun on a note of irresponsible partisanship. A few weeks

ago, the Postmaster General of the United States, a member of the President's Cabinet, found time from his duties of delivering the mails to deliver some political remarks in Indiana on the subject of foreign policy. He began his reappraisal by going back a decade or more in search of the causes of the loss of Indochina. He discovered these causes, like long-lost letters, in such places as Yalta, Teheran, and Potsdam.

As I recall, resolutions were introduced in Congress last year to repudiate the Yalta and other wartime agreements. The administration, however, has never sought repudiation, only condemnation of the violations; nothing has ever come of these resolutions. Unless the administration has changed its position, unless it now proposes to seek repudiation of these agreements, I cannot see any value in beginning a reappraisal with them. If we are to have a meaningful review of the situation in which we now find ourselves it can hardly start in the remote past. Much less can it begin with place-names like Yalta, Teheran, and Potsdam, pulled out of a mailbag.

A few days ago, in a different vein, in a responsible vein, the able majority leader [Mr. KNOWLAND] raised the question of seating Communist China in the United Nations. He made clear his opposition to any such attempt with all the vehemence and eloquence of which he is capable. I have the highest regard for the sincerity and the consistency of the distinguished majority leader and I can appreciate his sentiments in this matter.

But, with all due respect to the distinguished majority leader, I do not believe that a reappraisal of policy ought to begin with an event that has not happened. The President has not indicated, so far as I am aware, that he is about to change the policy pursued by the previous administration, the policy of opposing the seating of Communist China in the United Nations. That policy has kept the Peking government of Communist China from gaining a seat in the United Nations.

Does the President plan to change this policy? Is the distinguished majority leader aware of such an intention? If so, it would be most helpful if he would enlighten the Senate on this matter.

It seems to me that this agonizing reappraisal, if it is to be useful to the Nation, can only begin, not in the past, not in the future, but in the present. To be sure, it may lead us step by step to events in the past and it may point the way into the future. We live, however, not in the world of yesterday or the world of tomorrow, but in the world of today. If we wish to survive in that world, we will do well to deal with its problems. In the realm of foreign policy, this can only mean that the "agonizing reappraisal" should begin with the failure of policy on Indochina and its implications.

We have got to find out what went wrong with this policy or its administration and determine the ways to prevent a repetition of the errors in the future. If we fail to do so, if we lose ourselves in the past or the future, we shall go on collecting pieces of paper signed by the Communists while they continue to fatten their influence throughout the world.

I should like to address myself first to the role of the Senate in the Indochinese situation. So far as I am aware, the Senate cooperated fully with the administration from the very beginning of the gathering crisis. Not a single request in connection with Indochina was made by the administration which was denied by this body or, for that matter, by the Congress.

The administration did make requests. It made repeated requests for military and economic assistance to Indochina. These were all honored by the Senate, perhaps more liberally and more promptly than they should have been. In fiscal 1954 alone, more than a billion dollars in aid was provided for Indochina on the plea of the administration that such assistance was vital to the interests of the United States.

It is true that some Members of the Senate differed on one point with the administration. They would have preferred that the United States avoid participation in the Geneva proceedings, and said so in debate. Those of us who took this position—and there were a number of Senators on both sides of the aisle who did so—were not necessarily opposed to negotiations as such. Some of us were aware, however, that the free nations were divided and confused on the issue of Indochina. Before the United States participated in a conference with the cohesive forces of communism, we wanted the division and the confusion on our side eliminated.

In the light of what has happened, was this preference unfounded? Is it not true that in the end the administration was forced to accept the validity of this position? Did we not, for all practical purposes, abandon the Conference long ago? Could the terms of the settlement which is about to be achieved have been any less favorable if we had not become involved in the first place? On the contrary, Mr. President, there is reason to believe that the terms are likely to be more unfavorable than they would otherwise have been, had this country steered clear of the entire business.

The Senate, however, was not consulted on the decision to participate in the Conference. We were not, again to borrow a lucid expression from the distinguished majority leader, "in on the takeoff," even though all of us and the entire Nation are inevitably "in on the crash landing." Had this body been properly consulted from the outset and not simply at the last moment, it is possible that the error of participation might never have occurred.

As it was, the debate in the Senate which preceded the Geneva Conference may have helped to prevent a compounding of the error. It may have helped to prevent what, in my opinion, would have been a far more serious mistake—armed involvement of the United States in Indochina.

Just prior to the opening of the Geneva Conference, it became apparent that persons close to the administration had forgotten what the President had said on February 10. On that date, he had told a conference of newsmen that—

> No one could be more bitterly opposed to ever getting the United States involved in a hot war in that region [meaning Indochina] than I am.

But a short time thereafter, some of the leading figures in the administration began to act as though they had not heard the President. It fell to Members of the Senate to inform them of what he had said. As I recall, there were many crosscurrents of opinion in the debate which took place in the Senate prior to the opening of the Geneva Conference. Almost all opinions, however, converged on one point: The United States should not become involved alone in a shooting war in Indochina.

Was that an erroneous position to take? Who would quarrel with it now? Should the Members of the Senate have urged the administration, instead, to add to the unsettled conflict in Korea still another in southeast Asia? Should the Senate have sat in silence while the administration stumbled into the war in Indochina—into a war without preparation, without popular support, without any concept of where it would take us or where it would end?

How many combat divisions would this Nation have had to use to carry an involvement in Indochina to a decisive conclusion, even assuming that it did not lead to the atomic holocaust of world war III? I have seen one estimate, which was published in U. S. News & World Report some weeks ago. It should be a reliable estimate since it is attributed to the Chief of Staff of the Army, Gen. Matthew B. Ridgway.

In this estimate, it is calculated that to have won the war in Indochina would have required from 5 to 10 American combat divisions at the outset, and more divisions had the French reduced their forces, or had the Chinese Communists entered the conflict in force.

Where would those divisions have come from? They were not available then; nor are they available now. We have a new look in the Armed Forces, but we do not have new divisions. We do not even have some of the old ones. To have obtained the necessary manpower for use in Indochina would have involved, according to the estimate I have just summarized, an increase in draft calls from 25,000 to 100,000 men a month, and these men would have been sent into a conflict for which even the French were not, and are not, drafting men.

I do not know whether the President himself ever seriously considered committing this Nation to an armed involvement in Indochina. Nevertheless, the air around him was full of military sound and fury just prior to Geneva. There was much talk of involvement, even though Indochina would have been in every sense a nibbling war.

The terrain of the Indochinese conflict—the flooded deltas, the thousands of scattered villages, the jungles—is made to order for the nibbling of mechanized forces. The French have been nibbled and chewed for 8 years.

Nibbling wars, however, we have been told, are worse than atomic wars. Yet

those who have laid down this principle carried this country to the brink of engagement in the nibbling war in Indochina.

It may be that those who were seriously considering this course and publicly hinting at its adoption had not seen the terrain in Indochina. Perhaps they believe that the United States could have easily obtained a victory in Indochina. Perhaps they felt that Indochina was a bargain-rate war and that the cost could be calculated, not in men's lives, but in painless-sounding abstractions like naval power and airpower.

But surely they must remember what happened in Korea. In Korea we were able to bring to bear the massive retaliation of naval and air power in circumstances far more favorable than those which exist in Indochina. Four years after, we have no victory in Korea. We have a tenuous temporary truce.

Even that truce was not achieved with the painless-sounding abstractions of naval and air power alone. Those forces played their part, but the enemy was convinced of the futility of his aggression only after hundreds of thousands of Americans and others had struggled back and forth in the mud, the snow, and the blood of a war-battered land.

The truce did not come until after a grueling, bitter conflict. It did not come until thousands—in the air and on the sea, as well as on the land—had given their lives.

I do not say the administration should refrain from considering the military aspects of any international crisis with which we are confronted. Such considerations are absolutely essential in a world from which war, unfortunately, has not been banished. The administration, however, ought not to pursue these considerations in public. We ought to be spared the ludicrous spectacle of this great Nation being led to the brink of war in public statements and actions on 1 day and backed away from it the next. If this diplomacy of bluster and retreat is designed to confuse the enemy, it succeeds only in confusing the American people. This country has not achieved greatness under the guidance of bluffers and blusterers. We can lose our supremacy if we cease to say what we mean and mean what we say in foreign policy.

In the debate on Indochina, the Senate thought through soberly and fully the implications of involvement in Indochina. If the debate helped to turn the administration from the course of involvement which at least at one time in the crisis, it appeared bent upon, then the debate, in my opinion, was a useful one.

Had the administration undertaken adequate, proper, and timely consultation with the Senate in this matter, it is entirely possible that a consistent American policy could have been obtained before the Indochinese situation reached the stage of crisis. In my remarks of April 14, however, a few days before the opening of the Geneva Conference, I found it necessary to call attention to the fact that—

> The administration has not yet seen fit to include the chairman and the ranking minority members of the House Foreign Affairs Committee and the Senate Foreign Relations Committee in its trust [on Indochina policy].

Other Members of Congress were consulted shortly before that time; but, for some unexplained reason, these distinguished Members were overlooked. Several days later the error was rectified, and, subsequently, consultation improved markedly. But by then, the damage had been done.

The administration, and presumably those who spoke for it, had already scattered to the four winds such diplomatic resources as we possessed to deal with the situation. They had spoken bold, but futile, words. The administration had already staked our diplomacy on the hasty creation of an ill-conceived alliance for southeast Asia which refused to be born. The Nation, in short, had already been gambled into an untenable position on Indochina. When the withdrawal from this position came, it left the Vietnamese and French resistance in Indochina exposed, undercut, and ready for the collapse.

The consequences were inevitable. A French Government which had staked its life on military aid from this country to rescue Dien Bien Phu, was forced to resign. The French began to draw in their forces in the northern delta. Vietnamese nationalist troops supplied with weapons and equipment paid for by the American people began to go over to the enemy in increasing numbers, taking their equipment with them. The truce which now is being negotiated is only the last act in this tragic drama.

How did this sequence of events develop? Why were the policies of this Nation gambled into virtual bankruptcy in Indochina? There is a background to this tragedy, and it began about a year ago in Indochina.

Mr. SALTONSTALL. Mr. President, will the Senator from Montana yield, or does he prefer not to be interrupted?

Mr. MANSFIELD. I yield for a question.

Mr. SALTONSTALL. I have listened with interest to the Senator's statement about promising military aid. On that point I had some information, and certainly everything the Secretary of Defense told me in my capacity as a member of the Armed Services Committee, and its present chairman, was that no military aid of a manpower nature was ever promised in the Indochina affair.

The Senator from Montana will recall that there was considerable discussion on the floor of the Senate regarding the number of men who would go to Indochina for the purpose of repairing airplanes; and at that time it was made clear that there were not to be more than 200 of our men at any time in Indochina; they might be changed, but there were not to be more than that number for that purpose. However, as I listened to the remarks of the Senator from Montana, for whom I have the utmost respect, that was not quite the impression I received from his statements.

Mr. MANSFIELD. Mr. President, I am delighted that the senior Senator from Massachusetts, the chairman of the Senate Armed Services Committee, has made that comment. I hope he will return to that subject when I conclude my speech, because I wish to remind him that the promise was made that the technicians and mechanics would be withdrawn from Indochina on June 12. However, to the best of my knowledge, a good many of them are still there.

Mr. SALTONSTALL. Mr. President, will the Senator from Montana yield further to me?

Mr. MANSFIELD. Certainly.

Mr. SALTONSTALL. The Senator from Montana is entirely correct in that respect. The statement has been made that not the same men will stay there, but that some men will stay there to repair airplanes, for otherwise we would lose a great deal of valuable property which we have sent there, inasmuch as an airplane that cannot leave the ground is of no use.

Mr. MANSFIELD. I thank the Senator from Massachusetts, and later we shall refer again to that matter.

Mr. President, a year ago the French devised a plan for a solution to the stalemated war of the deltas. This was the Navarre plan. It was designed to eliminate the Communist threat in Indochina and to insure the independence of the three Indochinese States of Laos, Cambodia, and Vietnam.

The Navarre plan involved certain changes in military strategy to make possible offensive action, rather than defensive action, against the Communist-led forces of the Viet Minh under Ho Chi Minh. It involved a massive training and equipment program for the local Nationalist armed forces, notably those of Vietnam. It involved a continued French military effort in Indochina until such time as the local Nationalists could themselves carry the burden of the conflict. It involved vastly expanded military and other aid for Indochina from this country.

Beyond these essential elements, the key to the plan lay in the political realm. The key upon which success or failure turned was the finalizing of the grant of independence from France to the three Indochinese States.

For years, the French who had gone a long way in granting independence, hesitated to turn this key. Last summer, in conjunction with the request for additional aid for Indochina, we were assured that the moment of full independence was at hand. If that had been the case, then the Navarre plan offered prospects for a successful solution to the Indochinese situation. However, as I pointed out in a report to the Foreign Relations Committee, on my return from Indochina, last fall, the plan could not succeed unless all parts were effectively carried out; and, further, I pointed out that lasting success depended on still another factor, which at that time had not been noted in official statements. It seemed to me that the nationalist governments of the 3 Indochinese states, and especially that of Vietnam, had to put down firm roots in their own peoples. Only by so doing could they expect to win away the active support or at least the benevolent or fearful neutrality which at that time was held by the Communists masquerading as nationalists.

The Navarre plan failed, but not because the change in military strategy which it involved was necessarily ill conceived, not because the French shirked their military responsibilities, not because American aid was inadequate. The plan failed because the principal nationalist leaders of Vietnam were unable or unwilling to make the effort necessary to rally the peoples of Indochina against the Communists. It failed because the French were unable or unwilling to take the decisive political steps which would have made the independence of Vietnam clear cut and unequivocal. Instead, negotiations for this purpose dragged on interminably, and the precious hours which were needed to galvanize the struggle for independence slipped away. These negotiations began last year; and by the time the Geneva Conference began, they were still going on inconclusively.

Mr. President, I think it is of the greatest significance that in the truce which now is being arranged, Laos and Cambodia will probably manage to retain their independence, even though they possessed, relatively speaking, the smallest military establishments in the area. Vietnam, whose defense forces numbered several hundred thousands—yesterday the figure was 300,000—and included skilled troops of the French Union, has passed partially into Communist control. The answer to this apparent paradox may be found in part, perhaps, in the fact that the finalizing of the independence of Laos and Cambodia was not delayed as in the case of Vietnam. It may also be found, perhaps, in the fact that the rulers of these two countries stayed in their homelands and led their people.

Certainly, evidence that the nationalist leaders in Vietnam were not developing roots in the populace must have been visible months ago. Certainly the failure of the French to move decisively to grant independence to this state was evident months ago. What action did the administration take to counter these failures? Did officials in the administration receive accurate reports on developments in the field? Did they know what was happening? If they did know, why was there no report to the Senate and the American people on the true situation? If they knew, how is it possible to account for the optimism that seemed to prevail almost until the last hour before the crisis? If they knew, how could the Secretary of Defense be quoted as late as February 9 as saying, "I would think that a military victory would be perhaps both possible and probable."

If they knew that a failure was impending, as they should have known, why did responsible officials go on piling up military supplies and equipment in the warehouses of Indochina? Part of these supplies are now going to the Communists by defection of troops or abandonment, and may very well be turned against American forces at some time in the future.

The Navarre plan, if I may reiterate, died not from military weakness, but from political causes. At no time until the battle of Dien Bien Phu did the French or the Vietnamese indicate in any way that the military aid being supplied by this country was inadequate. They were opposed, I believe, even to the sending of a training mission from this country.

At all times, at least until Dien Bien Phu, the Franco-Vietnamese forces far outnumbered the Viet Minh divisions. The non-Communists had absolute control of the air and, by far, a superiority in naval craft and heavy equipment. In these circumstances how can the failure of the Navarre plan be attributed to anything other than political causes?

But in what fashion did the administration react when it finally realized that the Navarre plan was failing? It reacted as though the causes of the failure were military. The Chairman of the Joint Chiefs of Staff of the Armed Forces on March 22 still insisted, in his words: "The French are going to win. It is a fight that is going to be finished with our help." This was a military answer to a political problem.

At the same time, the Secretary of State set out to seek united action in the form of the ill-fated southeast Asia alliance. This, too, had he been successful, would have been a military answer to a political problem.

The nations which the Secretary tried to bring into the alliance were the Philippines, Thailand, Australia, France, New Zealand, the United Kingdom, and the Indochinese states. Had the alliance been established, its power would have rested largely on non-Asian states. It was an ill-conceived alliance. It was based on the premise that the defense of Asian nations against Communist tyranny rests in the first instance on the West. That, in my opinion, is a false premise. Asian freedom must be defended primarily by Asians.

A people, whether in Asia or in the Americas, can preserve their independence only if they have it in the first place and if they are willing to fight to keep it. Beyond this initial responsibility, which every nation must accept, nations can combine among themselves for a joint defense of freedom. If they are threatened by aggression, singly or jointly, they can seek recourse through the United Nations. But from the beginning to the end of this process of defense, the key factor is the determination of the people of each nation to defend their freedom. This factor was lacking in the Secretary of State's 11th-hour attempt to set up an alliance to save Indochina.

His attempt failed and the wreckage of American policy in Southeast Asia now lies among the ruins of the war of the deltas. We are confronted with the urgent necessity of raising up a new, a sounder, and more durable policy for that area.

Southeast Asia today is no less important to the security and welfare of free nations than it was a few months ago, when the Secretary of State said:

> Under the conditions of today, the imposition on southeast Asia of the political system of Communist Russia and its Chinese Communist ally, by whatever means would be a grave threat to the whole free community.

So long as the threat of totalitarian aggression remains in southeast Asia the danger to the United States and other free nations will also remain. The loss of part of Indochina does not diminish this danger; rather, it increases it.

But in remaining alert to the danger in southeast Asia we cannot ignore other areas of great importance to our security. Southeast Asia is only one front in the many-fronted struggle between freedom and tyranny. All of them have a bearing on the security of the United States. We can use our strength effectively in this many-sided conflict only if we deploy it within this broad context. In determining policies for southeast Asia its relative significance must be weighed against that of other fronts.

The primary decisions in such matters rest with the President. It is his responsibility to reconstruct policies in southeast Asia within the world-wide framework, which will serve to safeguard the Nation. It seems to me, however, that if such policies are to prove more durable than those which have been pursued in the past, they need to be constructed on certain principles. These are principles which can be found in the fundamental values of our own society, as well as in the values of an awakened Asia.

I am led to make certain suggestions along these lines. I claim no originality in these suggestions. I am stating them only because I believe there is a need to consider a clear-cut course of action to end the weak, aimless drift and the futile expediency into which our foreign policy for southeast Asia appears to have slipped. If we are to avoid precipitate action or a blind retreat in Asia, either of which might be disastrous, we must somehow reestablish guideposts to action in that area.

I make the following suggestions without in any sense regarding them as immutable. I make them with a full awareness of their imperfections and their inadequacies. I hope they will be challenged, debated, discussed, and improved, but I make them now in the hope that they may help to put up the guideposts that are so urgently needed.

First. Colonialism—Chinese Communist or any other—has no place in Asia; and the policies of the United States should in no way act to perpetuate it.

Second. The United States should look with favor on governments in Asia which are representative of their people and responsive to their needs; but this Nation should not intervene in the internal affairs of any peaceful country.

Third. The defense of freedom in Asia must rest in the first instance on the will and determination of the free peoples of that region.

Fourth. Systems of alliances for the defense of free nations in Asia against aggression must draw their primary and preponderant strength from the Asian countries; the association of the United States, if at all, with such alliances should be indirect, through the machinery of ANZUS or similar combinations of non-Asian countries.

Fifth. The United Nations should serve as the only worldwide marshalling

center for resistance, in the event of aggression or threat of aggression in Asia.

Sixth. The economic development of the nations of Asia is preponderantly the responsibility of the peoples of that region, to be pursued in accord with their individual national genius and objectives; any assistance rendered by this country, whether directly or through the United Nations or other agencies, should be peripheral in scope and should be rendered only when genuinely desired.

The erection of guideposts such as these is only one requirement for a policy that can succeed in Asia. This step will be futile unless the conduct of our foreign policy is restored to the dignity and orderliness which the people of this country have a right to expect.

What transpired in the weeks of the gathering crisis before and during the Geneva crisis came close to being a shameful spectacle. The conduct of policy in that period spread fear and uncertainty throughout this country and seriously damaged the prestige of the United States abroad.

The time has come to put a stop to the multiple voices which apparently speak for the administration on foreign policy. One part of the administration cannot indicate publicly that we are about to intervene in a war and then another part suggest the opposite course on the following day.

The people of the United States elected a President to conduct their foreign policy, with the advice and consent of the Senate. The President can delegate his authority if he so chooses. But for the sake of the orderly processes of government, it ought to be clear to whom he has delegated it when he does so.

Presumably the President has a Secretary of State to assist him in matters of foreign policy. If that is the case, then the only official voices we should hear in these matters ought to be the voice of the President and the voice of the Secretary of State. If that is not the case, then it would be most helpful if the President would enlighten the Nation as to their names and at what particular moment others are speaking in the name of this country on foreign policy.

Before concluding my remarks today, I desire to say only one thing more. The Geneva Conference, I believe, may mark a major turning point in the tide of world affairs. We may well be entering a period of great change and flux. The change is already suggested by the "agonizing reappraisal" which has begun and which, before it is over, may lead to agonizing readjustments. In these circumstances, it seems to me that the temptation to assume an "all or nothing" posture with respect to foreign policy is ever present. The tendency will be to blame friendly nations for all that has gone wrong. We will be tempted to insist that they play the game our way or we will pick up our marbles and go home.

If this attitude prevails, if it is the decisive one, I believe we will end up, not with "all," but with "nothing." The tremendous economic sacrifices which the people of this Nation have made in the last decade will have been made in vain. The lives that were given in World War II and in Korea to construct a more orderly and decent world will have been given in vain.

If we choose the course of all or nothing, we may perhaps secure a few years respite from the international responsibilities which we have been carrying. Then the world will once again close in on us. We will end up with nothing but our own bitterness. It has happened before.

We need not choose this course. There is another open to us. If the present reappraisal is conducted with recognition not only of immediate interests, immediate passions, but also with a sense of responsibility to the generations of Americans that will come after us, then I believe we shall take this other course. I believe we shall find much worth preserving in what has been done in the last decade, much that can be built upon. We will not obtain "all" but neither will we settle for "nothing."

The choice is ours to make. Ultimately, it is a choice between shouldering day in and day out a part of the responsibility—however burdensome and irritating—of maintaining freedom in a world from which tyranny has not yet been banished; or of abandoning this responsibility today only to have to pick up tomorrow the crushing burden of a third world war.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MANSFIELD. I am glad to yield.

Mr. FULBRIGHT. First, I should like to compliment the Senator on his magnificient speech and to associate myself with much that he has said. Of course, he is one of the best qualified men in the Senate and in Government on the subject of Asia. I should like to ask him this question: Does he feel that the situation in Asia with regard to our policy is unique, and is the situation with regard to our relations in Europe any better than it is in Asia, or are the situations all a part of the general deterioration of international relations?

Mr. MANSFIELD. I would say to the Senator that my impression, for what it may be worth, is that, so far as both Asia and Europe are concerned, our policies and our prestige are both diminishing.

Mr. FULBRIGHT. Does the Senator believe that we can play our part, namely, the part it was intended that we play in the NATO organization, for example, and be friendly and cooperative with European nations, but in Asia follow a different and contrary policy?

Mr. MANSFIELD. The question the Senator asks is a difficult one to answer, because if we believe in NATO—and I am sure a great majority of the American people and most of the Senators do believe in it—then we believe in certain agreements which will last for a 20-year period. We cannot forego those agreements in order simply to take care of something which is happening in another part of the world. It appears to me that the NATO agreement, which is tied to the security of this country, and under which each nation agrees that in case of an attack upon any one of them all the other nations will come to that nation's assistance, is the primary instrument in the promulgation of our foreign policy and in providing for our security.

Mr. FULBRIGHT. The point I am trying to make is this: I recognize the influence of written agreements—and I believe this country has a very good record of carrying out its pledged agreements—but if violent and strong disagreements or differences of view arise under any particular treaty or agreement—in this case NATO—does it not weaken the alliance itself if there arise such differences, such as the difference that seems to be growing between Great Britain and the United States? Does not the Senator believe that although such differences may have their source in Asia they will nevertheless influence the effectiveness of the alliance in Europe?

Mr. MANSFIELD. There can be no question about that. I am afraid that sometimes we take too seriously differences of opinion among friends—not that we should not take them seriously—because they are in themselves signs of strength and courage, but I do not believe that we should go to the extreme of giving up all that we have built up over the years merely because at a particular time we may disagree with other nations on a certain question.

Mr. FULBRIGHT. I appreciate the statement of the Senator from Montana. There is one other question that I should like to ask him. The Senator did not quite say what he thought about the current matter of great interest with respect to withdrawing from the United Nations, which is a position taken by many persons during the last 2 or 3 days. I wonder what the Senator thinks about it. I believe it was implicit in his remarks, if I understood them, but he did not directly say what he thinks about the proposal to withdraw from the United Nations.

Mr. MANSFIELD. Mr. President, the Senator from Arkansas was a member of the Committee on Foreign Relations when I, as a Member of the House, and Representative VORYS were nominated by President Truman as members of the American delegation to the United Nations.

The Senator will also recall that at that time the ranking Republican member of the Committee on Foreign Relations, the Senator from New Jersey [Mr. SMITH] wrote letters to both Representative VORYS, to me, and to other members of the delegation, asking us what our stand was on recognition of Red China by this country, and what our stand was on the admission of Communist China into the United Nations.

We wrote him at that time that we were opposed to the recognition of Red China by this country, and that we were opposed to the admission of Red China to the United Nations. I have learned of nothing which would cause me to change my position from that day to the present. I am glad again to go on record this afternoon by saying that, so far as I am personally concerned, I am opposed to Red China being recognized by this

country, and I am opposed to Red China entering the United Nations.

Mr. FULBRIGHT. Does the Senator from Montana then wish to leave the impression that if Red China is admitted, he will recommend the withdrawal of this country from the United Nations?

Mr. MANSFIELD. I intend to leave the impression, and to state as forcibly as I can, that when that time comes I, like the President of the United States, shall be glad to look into the question very thoroughly and to make up my own mind.

I believe that so far as the matter of withdrawal from the United Nations is concerned, we must weigh all factors involved, recognizing the fact that we were one of the originators of the United Nations and that, as the distinguished Senator from Iowa [Mr. GILLETTE] has pointed out, if we were to withdraw it would mean pushing free nations into the Soviet orbit.

It is very interesting to note that the President on a number of occasions—I have the news stories here—when asked about the admission of Red China into the United Nations, always has stated that for the present he is against the admission of Red China into the United Nations. Yesterday, if my memory serves me correctly, he stated he would consider all the possibilities at the time the question arose. I hope, however, that if it ever does come to pass he will call Congress into session and lay the facts before it, and let us help him make his decision.

Mr. FULBRIGHT. The Senator from Montana agrees with the President, if I correctly understand him, that the determination which has been expressed in some circles that under no circumstances at any time should Red China be admitted into the United Nations, is not in accord with a wise policy such as we should pursue at this time?

Mr. MANSFIELD. It would be pretty difficult for us to follow such a policy, because, as one Congress cannot bind the succeeding Congress, one generation cannot bind the next generation. When the time comes, those who are then in power are the ones who will have to make the decision.

Mr. FULBRIGHT. I am in agreement with the Senator's views. It seems to me to be a great mistake to take the absolute attitude that under no circumstances shall we do this or that. It makes it impossible really to do business in this field with our allies, or with our enemies, for that matter.

Mr. MANSFIELD. The Senate should be upholding the hands of the President.

Mr. FULBRIGHT. I think that in this instance that is correct.

Mr. KENNEDY. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. KENNEDY. The Senator from Montana made the point that the United States is speaking with many tongues. The vagueness with which the President answered the question on the admission of Red China to the U. N. encourages a difference of view among members of the administration. This vagueness has contributed to our difficulties in Indochina. If the President had spoken clearly and unequivocally, it seems to me we would have avoided much of the difficulty which we now face.

Mr. MANSFIELD. The Senator is exactly right. The situation shows no sign of being alleviated at the present time.

Mr. KENNEDY. With reference to the question of whether the United States should withdraw from the United Nations if Red China is admitted, it seems to me the President should state our position one way or the other, instead of leaving the matter in doubt for the next few months, allowing pressures to build up here and abroad.

Mr. MANSFIELD. I would say that the President's answer was a calculated answer, because he tried to anticipate all the angles.

Mr. KENNEDY. In answer to the question of the Senator from Arkansas [Mr. FULBRIGHT] as to what price the United States should pay in Asia to maintain its alliances in that area, there is no doubt that we have paid a heavy price since 1945 in order to conciliate the British and the French; we have paid a heavy price in connection with our relationship with the peoples of the Middle East and Asia. It seems to me we should realize what a heavy price we have paid, and, in the future, we should emphasize the policy of independence for all peoples and equal opportunities for them to develop and maintain a policy of self-government. If we continue to pay this price we are going to be faced with other Indochinas all over the world where colonialism is maintained.

The two places in the Western Hemisphere where communism developed were British Guiana and Guatemala. Guatemala has been the victim of economic colonialism for many years in the past. British Guiana is a colony of the British. It seems to me that the United States should first clarify its own position on this matter of colonialism and then adopt a policy of encouraging all the peoples of the earth, regardless of what alliances we may have in other parts of the world, to move towards independence. Otherwise we shall be paying too great a price.

Mr. MANSFIELD. The Senator from Massachusetts is correct. He will agree with me, I believe, that we cannot continue the course we are following at the present time. We have not the manpower. It is time to stop, look, and listen, and reappraise our foreign policy. I had hoped this administration would come forward with a new and bolder foreign policy, as was promised us in the campaign. But it is the same old policy, so far as I know. Nothing new has been added; the ingredients are the same, and we are faced with a lack of leadership.

Mr. JACKSON. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. JACKSON. Needless to say, I am happy to join with my colleagues in commending the Senator from Montana for his outstanding contribution today to the subject of our foreign policy. Speaking of the conflicting statements which have been made over a period of time, does the Senator think it wise to announce in advance that we are going to send aid or troops to a country, when it is not necessary to make such a statement? In other words, it puts the enemy on notice that we are not going to do anything to stop aggression in a given area. That statement, among other statements, was made.

Mr. MANSFIELD. That is true. There has been too much "bluff" in this administration, contrary to the policy during the period of the administration of Theodore Roosevelt, when the slogan was, "Speak softly, but carry a big stick." I think some of the officials of the administration are speaking loudly, but carrying a feather duster, because they do not have anything with which to back up the statements they make. They talk about a New Look, when we have 50 ships in mothballs and a large reduction in the naval force. We cannot back up our statements unless we have something with which to back them up.

Mr. JACKSON. Is it not a sound policy to keep the enemy in a state of uncertainty? Why announce to the enemy that we are not going to send troops? It may be very much of a political hazard in this country. I do not see the point of the administration's announcing in January that we were going to have massive atomic retaliation, and then following it up by saying that we were not going to send troops into Indochina. Why is it necessary to make such statements? Why not keep the enemy in a state of uncertainty so that he does not know what we are going to do next?

Mr. MANSFIELD. There is no need of trying to make policy by imposing threats on others. It simply does not work to make threats against our enemies unless we are prepared to back them up.

Mr. JACKSON. So, from this time forward, when we face other situations in the world and announce the policy of a possible use of force, the enemy will probably assume that we are not going to do anything, and that will leave our diplomats in a distinctly weakened position.

Mr. MANSFIELD. That is true. So far as confusion is concerned, I think the American people are more confused than are our enemies.

Mr. JACKSON. Will the Senator agree that if we have learned anything from the situation in Indochina it is that military assistance alone is no longer our contribution to the world?

Mr. MANSFIELD. I could not agree more heartily with the Senator.

Mr. JACKSON. Is it not true that the American people have an unfortunate habit of feeling that there is a cure-all which they can buy at a bargain counter to solve our international problems?

Mr. MANSFIELD. The American people are looking for an easy way out of the Nation's difficulties, and the Republican administration is trying to give it to them, but there is no quick way to do it.

Mr. JACKSON. Will the Senator agree with me that a country which is so powerful and strong as is the United States should act with a little more humility, a little more patience, and a little

more understanding in trying to work out its international problems?

Mr. MANSFIELD. Again, I say to the Senator that I could not agree more heartily with him. I think he has hit the nail on the head.

Mr. HUMPHREY. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. HUMPHREY. The Senator has discussed the variance of opinion which exists between our allies and ourselves, and the Senator from Arkansas and the junior Senator from Montana were discussing the NATO alliance and its relationship to our hoped-for policy in the Far East. If the senior partner in the great free world alliance is undecided or is without a policy in a particular area of the world, does it not lead the junior partners, the other partners, or the copartners, to go off on their own with any number of policies?

Mr. MANSFIELD. There is no question about it.

Mr. HUMPHREY. Would not the Senator say that the fact that there was indecision or confusion in our own policy statements has led to the British, the French, and perhaps other nations, to assert and to formulate policies beyond anything we ourselves had thought of or were planning?

Mr. MANSFIELD. That would be partly the case; but I think also it may well be that as the strength of the British and the French revives, as they become more and more their own masters in their own houses, and less and less dependent upon us, as nationalism takes over, and they begin to look out on their own, that will be a sign of health, because I do not want my country to be allied with people who are "yes-men" to us. I want our country to be allied with nations who respect us, who have ideas of their own, who can make their own decisions, but who can work together on a cooperative basis.

Mr. HUMPHREY. Is the Senator familiar with a number of statements which have been made by leading spokesmen of the administration, not only recently, but over the past year and a half? Does the Senator recall the month of February 1953, when the Secretary of State and the Director of the Foreign Operations Administration were touring in Europe, and statements came back, or at least were reported in the American press, that if the French did not sign up under EDC by April or by May, there simply would not be any more aid?

Mr. MANSFIELD. I do. That is only one of a number of illustrations which could be cited to indicate that this administration has used the idea of threat in order to force the happening of things it wanted. Of course, that does not work, and it has not worked, but we are now paying the price for it.

Mr. HUMPHREY. Does the Senator recall that in the meeting of the NATO representatives in 1953, following the Lisbon Conference of 1952, it was on the initiative of the American representatives that the NATO goal of strength buildup of both the air force and ground troops was extended for 2 more years, rather than to be accomplished within the time schedule agreed to at the Lisbon Conference?

Mr. MANSFIELD. I do, indeed.

Mr. HUMPHREY. In other words, is it not true that once the United States Government notified its North Atlantic Treaty allies that the period of urgency was over, the natural tendency was for our allies to relax and, more or less, to take it easy?

Mr. MANSFIELD. Yes; to reduce their armed forces, to reduce the draft period for their youth, and to do a number of other things, because they all felt that since the United States was reducing its military expenditures and reducing its Armed Forces, they might well follow suit. It was an easy out for them. I do not blame them; I blame the United States Government for doing what it did at home, by setting an example.

Mr. HUMPHREY. There was a picture, then, first of all, of a very sharp reduction in our foreign operations program and in our military program. The statements of key spokesmen of the administration to our allies were to the effect that they would suffer the consequences, but there was no followup. As the Senator recalls, we went ahead and appropriated substantial sums of money for Britain and France, despite the statements made, to the effect that "if you do not join the EDC, you are going to be disciplined, and we are going to do something about it."

We went from that period of equivocation, or from making statements with no followup, to a period when Dictator Stalin died, and we were wondering whether or not there had been a change in the world situation. Is not that true?

Mr. MANSFIELD. That is correct.

Mr. HUMPHREY. That was the only accomplishment of the Berlin Conference, according to the statement which was made by this Government; namely, that the Allies had agreed that the intentions of the Soviet Union were the same.

Mr. MANSFIELD. But that was no accomplishment. It was not necessary for representatives of this Government to go to Berlin to learn that fact. So far as the Berlin Conference was concerned, there was a 100-percent failure of American diplomacy, just as the diplomacy at Geneva is turning out to be. We gained nothing at Berlin.

We have not agreed to the recognition of Red China, or to the admission of Red China to the United Nations, but at least by agreeing to the meeting at Geneva, and by getting a paper signed, we have given Russia an advantage she did not previously have. There are other things which Russia got, not directly, but indirectly. But the breakup of the European Defense Community is happening fast at the present time.

Mr. HUMPHREY. The Senator is saying that the major accomplishment of the Berlin Conference was that the United States merely rediscovered that the Kremlin was still bent upon world domination and world subversion. Anyone ought to have known that without having to go to Berlin to learn it. One would not have had to go to Arlington, Va., to find that out.

Mr. MANSFIELD. The Senator is correct.

Mr. HUMPHREY. As I understand from the Senator's comments, the objective of the Soviet Union has been, for a considerable period of time, to divide the United States from our allies. Is that correct?

Mr. MANSFIELD. That is correct.

Mr. HUMPHREY. The second objective has been to wage a relentless trade war.

Mr. MANSFIELD. That is correct.

Mr. HUMPHREY. Does the Senator know the number of trade agreements the United States of America has signed in the past year or year and a half, as compared with the number which have been signed by the Soviet Union?

Mr. MANSFIELD. To the best of my knowledge, the United States Government, under this administration, has signed no new trade agreements. On the other hand, the Soviet Union has signed between 20 and 30 new trade agreements. I may be wrong, but I think, generally speaking, those figures are correct.

Mr. HUMPHREY. Does the Senator from Montana recall the debate in the Senate not long ago on the extension of the Reciprocal Trade Act?

Mr. MANSFIELD. I recall the Democratic Party trying to uphold the President's hands in getting a 3-year extension of the Reciprocal Trade Act. I recall the defeat of the amendment offered by the distinguished Senator from Tennessee [Mr. GORE]. I recall that we now have a 1-year extension, but no new reciprocal trade treaties are in sight, with the possible exception of one with Japan some time early in the next year. But I am afraid that by the time we get around to considering a Japanese trade treaty, we may find that the Japanese Empire is not in a position to go along with us as we should like to have them do so.

Mr. HUMPHREY. Does the Senator from Montana realize that the Department of Agriculture, as a result of some 20 trade missions sent to many countries throughout the world to study American trade policies, particularly as they pertain to agricultural commodities, compiled and submitted a report, and made an announcement, or at least prepared a press release, which was dated for release as of Monday, June 28?

I have been looking through my files to see if I could locate a copy of the release, but I believe it is in my office. The release said that it was imperative for the national security of the United States to have a 3-year extension of the Reciprocal Trade Act. Is the Senator from Montana aware of that?

Mr. MANSFIELD. Yes. Did not the Randall Commission say the same thing?

Mr. HUMPHREY. Would the Senator be interested to know that that release was prepared by the President's own Cabinet officer, Mr. Benson, in his Department, and was available in the Department of Agriculture at the very moment and the very hour when the Senate was debating the so-called administration bill for a 1-year extension of the Trade Agreements Act?

Mr. MANSFIELD. I did not know that.

Mr. HUMPHREY. Would the Senator be interested to know that so far as the junior Senator from Minnesota is aware, that release was never made, although it was dated Monday, June 28, 1954?

Mr. MANSFIELD. I have never seen any indication that it had been released.

Mr. HUMPHREY. I think it might be of interest to the Senate to know that during the very time when the Senate was debating the extension of the Reciprocal Trade Act, one of the key departments of the administration had prepared a report, which called for a 3-year extension of the Reciprocal Trade Agreements Act as being important or imperative for American security. Yet that release was held back while the Senate was debating the very subject.

I have a copy of the release which was prepared by the Department of Agriculture. How I got it is my business; but I have a copy of it. It was to have been released on Monday, June 28. It was nonclassified, I may say; it was not secret material. It was straight mimeographed copy.

Is the Senator from Montana aware of such a program having been released?

Mr. MANSFIELD. No.

Mr. HUMPHREY. If it was released, it did not make very many headlines. I think this is indicative of a conflict of attitude and a conflict of policy within the administration. Is not that correct?

Mr. MANSFIELD. Yes. I agree with the Senator from Minnesota. All we asked of the administration is that it be honest with us. We want to cooperate with the administration in foreign policy, because we realize that politics stops at the water's edge. But we want to be in on the takeoff as well as in at the crash landings, as the statement was phrased by the distinguished leader of the majority party.

I think if the difficulty in the Republican Party, or between the two branches of the party could be overcome, President Eisenhower could get his program through Congress very rapidly, as he desires to do in the field of foreign policy.

Mr. HUMPHREY. Is the Senator from Montana saying that if the President is trying to formulate a policy which will unite the Republican Party, he will get a policy which will disunite our allies?

Mr. MANSFIELD. It will disunite the country.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. SPARKMAN. Speaking of the report which was made at the roots, and which went over at the request of the Department of Agriculture, it recommended the very thing which the President recommended in his March 31 message. Yet at the time the report was made and the release was prepared, as was referred to by the Senator from Minnesota, is it not a fact that the President himself had withdrawn from the March 31 stand and had consented to a 1-year extension rather than to a 3-year extension?

Mr. MANSFIELD. Yes; that is true, but that falls into a pattern.

Mr. SPARKMAN. Yes. That is the point I wish to make. The able Senator from Montana has said something about the uncertainty of our foreign policy. Is that not also exemplified in the foreign-trade program?

Mr. MANSFIELD. There can be no question at all about that. What good is a foreign-trade program if reciprocal trade agreements are not executed under the program? I really think that rather than an extension and possibly no formulation of new trade treaties, we might have been more honest with ourselves and with the countries with which we were dealing if there had been no extension of the trade-agreements act at all.

Mr. SPARKMAN. Is it not true that in the field of international relations, if we are to be successful, and certainly if we are to exert the leadership which we ought to exert, we must be firm and must be certain, so that every nation in the world will know what our policy is?

Mr. MANSFIELD. That is true, and I think the administration ought to take the Senate, the House of Representatives, and the American people into its confidence whenever and wherever it can.

Mr. SPARKMAN. I agree with the Senator in that statement. By the way, I should like to commend the able Senator from Montana for having given us one of the clearest and ablest discussions of some of our problems in the field of foreign relations that I have ever heard on the Senate floor.

In that connection, I should also like to commend the able Senator from Iowa [Mr. GILLETTE] for the very fine remarks which he made immediately preceding the speech of the Senator from Montana.

With respect to the subject which he discussed, and which the Senator from Montana has also discussed, that is, the question of admission of Red China into the United Nations, a thought occurs to me, and I wish to ask the Senator from Montana if he agrees with me: Why all this spirit of defeatism? Certainly we are opposed to the admission of Red China into the United Nations. As I recall, last year, or certainly not more than 2 years ago, the Senate voted unanimously that it was the sense of the Senate that it was opposed to the admission of Red China into the United Nations. I believe that is still the sentiment of the Senate today.

Mr. MANSFIELD. I know of no Senator who is in favor of the admission of Red China into the United Nations.

Mr. SPARKMAN. Why is it being assumed that, if the United States exercises the leadership in the United Nations which it ought to exercise and ought to be able to exercise, we stand in danger of having Red China admitted into the United Nations? Certainly during the Democratic administrations we were able to withstand that threat, and the question came up 200 times. Does the Senator remember that?

Mr. MANSFIELD. That is correct.

Mr. SPARKMAN. That question came up in the deliberations of the Security Council and the various subordinate organizations of the United Nations; yet we were able, time after time after time, to win when there was a vote on the question. No later than yesterday the move for such admission was voted down in 1 of the subordinate bodies of the United Nations, by a vote of 9 to 2, if I remember correctly. If we continue to work without allies and friends, and if we have the strength with which to maintain the leadership we should be exercising, why should it be assumed that we will not be able to win such a decison, just as we did during the Democratic administrations?

Mr. MANSFIELD. I wondered why the question was even raised.

Mr. COOPER. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. UPTON in the chair). Does the Senator from Montana yield to the Senator from Kentucky?

Mr. MANSFIELD. I am glad to yield to the Senator from Kentucky.

Mr. COOPER. First, I should like to say that I find much to commend in what the distinguished Senator from Montana has said. I have listened to most, if not all, of the speeches he has made on foreign affairs, and I have found them, without exception, constructive and scholarly. I know the Senator from Montana is motivated by a high sense of patriotism, and I have the highest regard for his views. I wish to commend the Senator from Montana for the principles which he has outlined as the basis for a foreign policy in the Far East.

I am loath to argue certain points which the Senator from Montana has made with which I disagree, because of the constructive nature of his speech. I am not a member of the Committee on Foreign Relations, and so far as foreign policy is concerned, my information is limited to that which is available to other Members of the Senate.

I must say that the speeches which the Senator from Montana, the distinguished Senator from Massachusetts [Mr. KENNEDY], the Senator from Illinois [Mr. DOUGLAS], and other Senators, have made criticizing the administration's policy in Indochina seem to me to bear an aspect of indefiniteness. There has been much criticism of the administration policy. But when one tries to analyze exactly to what point the criticism is directed, it becomes difficult to ascertain. The question of what shall be done in Indochina is a monumental problem for this administration. Several courses were available to the administration in Indochina. One course was to intervene with military force. I have read or heard the speeches of the Senator from Montana and of other Senators of the minority on the question of intervention. Everyone except the Senator from Illinois [Mr. DOUGLAS] was against intervention. Surely the Senators who criticize cannot find fault with the administration policy because it did not intervene militarily.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. MANSFIELD. First I should like to say how much I appreciate the kind words of the Senator from Kentucky.

Mr. COOPER. I meant them.

Mr. MANSFIELD. I had the honor and privilege of serving with the Senator from Kentucky as a delegate to the United Nations.

The Senator is correct when he states that, so far as I am concerned, in all my speeches I have been against intervention; but I think he is a little incorrect when he states there was no possibility of intervention, because, if my memory serves me correctly, Secretary of State Dulles did talk with the leadership of the Congress about having a resolution introduced which would have given the President power to act as he saw fit in the Indochina crisis. If my memory serves me correctly, Admiral Radford also advanced the idea to congressional leaders about the possibility of waging what he called a limited war, in which air and sea power would go to the relief of the French and Vietnamese at Dien Bien Phu. I think we were right on the verge of intervention, and that the only thing that prevented intervention was the opposition of the Congress and the rising sentiment of the American people against intervention in that area of the world.

Mr. COOPER. I am sure that every possibility was considered by the administration. It would have been a very poor administration which would have failed to consider every course. I do not want to be critical of the speeches that have been made, for the sake of criticism or for any political reason, because the question is one which involves tremendous consequences to this country and its future. But as I have said, when I hear the criticism of failure of policy in Indochina it is difficult to pin down the charge of failure. One possibility was that of military intervention. As I have said, every Senator of the minority who spoke on the subject in the Senate, with the exception of one which I can remember, the distinguished Senator from Illinois, stated flatly that he was against intervention. Surely then, you do not criticize the administration because it did not enter the war.

Another possibility was to have washed our hands of the whole problem. You would not want the administration to do that and the administration did not do that. A year ago the Secretary of State came to the Congress and pointed out the danger in Indochina, and asked for an appropriation of $1 billion in aid of France and the states of Indochina. The question was debated on the floor of the Senate. I remember that during the debate on the appropriation for aid the Senator from Massachusetts [Mr. KENNEDY] took part in the debate and urged that aid be conditioned on independence being granted to Indochina. It cannot be said that the administration abandoned Indochina. The record is to the contrary.

What was the other possible alternative? It seems to me that the one adopted, that is the effort to build up a united front with the purpose of deterring further aggression, was the only possible course short of reckless intervention.

Mr. MANSFIELD. That is partly correct.

Mr. KENNEDY. Mr. President——

Mr. COOPER. Mr. President, I simply find difficulty, when we pin down the criticism, in ascertaining just what the dissenting Senators regard as a failure on the part of the administration.

Mr. MANSFIELD. Mr. President, at this time I shall yield to the Senator from Massachusetts, and then I shall resume the debate.

Mr. COOPER. I wish to say to my friend, the Senator from Montana, that, in view of my very real confidence in him and my appreciation of the way in which he approaches the subject, in raising my questions, I do not detract from the parts of his speech which I regard as being of a constructive character.

Mr. MANSFIELD. As always, Mr. President, I deeply appreciate what the Senator from Kentucky has to say.

Mr. KENNEDY. Mr. President——

Mr. MANSFIELD. Mr. President, at this time I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, in answer to the Senator from Kentucky, I would say that neither the congressional leaders nor any of the Members of the Senate on this side of the aisle whom I heard speak on the subject, when it was under debate in the Senate in April, took the position that the United States was absolutely opposed to intervention in Indochina. What they said was that they would not support United States intervention in Indochina unless certain conditions were met. Those conditions were three in number. One was independence for Indochina. The second was a united effort and action by other Asiatic powers in Indochina. The third was that the French be willing to continue the struggle. The meeting of those three conditions was regarded as essential to any successful intervention in Indochina; and the Senators on this side of the aisle took the position that any intervention which occurred in the absence of meeting those conditions would be doomed to failure.

So the position of the Senators on this side of the aisle was not one of opposition to intervention, but, rather, it was that certain conditions should be met, in that these conditions constituted the minimum essential to success.

In addition to making that point, I wish to state, as a second point, that insofar as mistakes by the administration are concerned, I think the Democratic administration made some mistakes, too, before 1952, in not insisting that independence be granted to Indochina.

However, certainly the present administration made a major mistake in assuming that the Navarre plan would be successful, and in continuing in that assumption right up until February and March 1954 when the situation in Indochina was very obviously deteriorating. In February 1954, Secretary Wilson said:

> I see no reason why Indochina should be another Korea. I believe success in Indochina will be not only possible, but probable.

And early in April Secretary Dulles reaffirmed his support of the Navarre plan, which was predicated upon military success by the end of 1955. The truth is that the administration not only failed to realize that disaster was coming in Indochina; they failed to realize that French public opinion no longer supported any policy except negotiation in that area.

Mr. COOPER. But by laying down the conditions, the Senators were ruling out any possibility of immediate action, because it was evident that their conditions could not be met in any reasonable time.

I point out that, in my opinion, the administration has been working to achieve the very goals which the Senator from Massachusetts has stated. I do not see any great difference between the action the administration has taken and the conditions which the Senators on the other side of the aisle lay down in their speeches. The arguments which the Senators on the other side of the aisle have made are inconsistent.

Mr. SPARKMAN. Mr. President, will the Senator from Montana yield to me?

Mr. MANSFIELD. I yield.

Mr. SPARKMAN. I should like to have the Senator from Kentucky remember that, following the massive retaliation threat, when there was some discussion and some objection, the administration made statements which indicated that we were going to see that Indochina did not fall. The statement was made that Indochina was so important that we were going to make sure that she did not fall. Certainly the inference to be drawn from those statements was that we would intervene, if necessary, even if we had to act alone. Considerable objection was raised to that idea.

Then it was that the Secretary of State announced, in effect, that he was going to have the alliance; and he made the hurried trip to which the able Senator from Montana has referred. After the Secretary of State made that statement, he made a trip to Europe, to talk with the French and the British; but in that connection he got nowhere.

I think that is a mistake to which we can point, namely, the attitude expressed by our Nation, which led the world to believe that we were going to intervene in Indochina, even if we had to take action all by ourselves. Such a statement was not likely to cause other nations to become our allies and to help us. So that is where a mistake was made.

As a matter of fact, probably the French could not have complied with that condition, because by that time they had already, in effect, driven their allies away from them. But certainly the course of action on the part of the United States has not been such as to inspire friendly nations to stand with us in a move that could be calculated to elicit the full cooperation of Indochina.

At the time when we were reducing our defenses and were removing pressure on the Communists in Korea, and thus were making it possible for the Communists to transfer their strength to the borders of Indochina, brave, bold, big statements were being made, that we would not let Indochina fall at all; that we could not afford to let that happen; that Indochina was too important. But

today what do we find? We find a surrender line down right across the middle of Vietnam; and now the pious hope is expressed that Cambodia and Laos may be saved. Mr. President, who believes that they will be saved ultimately? As the Senator from Montana has pointed out, a little time may be gained, but certainly no more than that.

I think the strong statements which have been made have driven our friends away from us, and I believe such statements constitute one of the principal mistakes which have been made in regard to this whole situation.

Mr. COOPER. Mr. President, will the Senator from Montana yield further to me?

Mr. MANSFIELD. I yield.

Mr. COOPER. The administration did express from the outset its concern over the situation in Indochina. My friend, the Senator from Alabama, will certainly agree that the administration ought to have expressed concern, as it did during all those months. The Congress cannot claim lack of knowledge. I cannot remember that representatives of the administration ever said the United States would intervene militarily in Indochina. The possibility of intervention would certainly be considered and properly so in any discussion of Indochina. But I do not believe it can be stated that the administration ever said it would use military force.

My friends on the other side of the aisle cannot have it both ways. They have said that the administration conveyed the impression that the United States was willing to intervene and did not do so. Yet all my friends on the other side of the aisle have said again and again that they opposed intervention. Let me ask them now whether they favor intervention?

Mr. MANSFIELD. No. I was never in favor of intervention; and I am opposed to it now. I think it would be suicidal. I believe the worst thing that could happen to the United States would be to have our forces intervene in Indochina and then bog down in the jungles there, for in that case I think there would not only be war in Indochina, but also another war in Korea, and a third world war would commence in Asia, and no doubt it would involve the countries of Europe. As a result there would be regimentation and a garrison-state condition not only in Asia and Europe but also here in the United States.

Mr. COOPER. I agree that the attitude of most Members of Congress and of the American people was against military action by the United States. To what action taken by the administration was the Senator from Montana and his colleague opposed? Do they consider the effort to secure agreement among our allies and other countries in southeast Asia a failure of policy?

Mr. MANSFIELD. Not necessarily; but I did not see much use in it. Why get the western or occidental bloc of nations to agree about the handling of the situation in southeast Asia? Instead, the better course would be to get the nations of southeast Asia to form a bloc, if need be, and to agree upon a course of action, and in that way to have the nations of southeast Asia help each other, in a way similar to the course of action taken by the nations of the Western Hemisphere under the Monroe Doctrine, in 1823.

Mr. COOPER. I said in the beginning that I thought the principles the Senator from Montana laid down were excellent. I shall not argue further, except to say that I have had great difficulty in finding one course of action the administration took to which any of my friends on the other side of the aisle disagree. I am referring to action, not attitudes and words.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. COOPER. May I finish?

The Senator from Montana mentioned NATO and EDC. In the past year Germany has acted, and the British also have taken a position with regard to the nature of their association. Some progress has been made.

Mr. MANSFIELD. The Senator from Kentucky is an incurable optimist.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. FULBRIGHT. The Senator from Kentucky seeks to oversimplify the problem. No one is objecting to one position alone. It is the approach as a whole to the problem which is the subject of criticism. The problem is very complex. It is not the action about which we are complaining. It is the inaction, the inability to persuade any of our allies to go along with us to achieve results, both in Asia and in Europe.

With respect to Asia, I think it is quite obvious that India and Indonesia are quite important in that area; but for some reason or other we have alienated them or, to put it in another way, we have failed to achieve the friendly cooperation of India in any effort to bring about peace and settle the question in Indochina. I think that is the complaint.

I agree with the Senator that I complained about intervention under the conditions which existed. If the conditions had been different, as the Senator from Massachusetts indicated, particularly with regard to colonialism, then intervention might have been quite different. I was reluctant to recommend intervention so long as Indochina was still a colony and there was no real commitment that it would some day cease to be a colony. The Senator from Massachusetts mentioned certain other conditions.

Is not the real complaint that there was a lack of any policy, a lack of any action, or certainly a lack of success in achieving results, both in Asia and in Europe? With regard to EDC, contrary to what the Senator from Kentucky says, it is my impression that the administration has now almost given up hope of bringing about results. No one has said so, but the attitude of the press and of the administration is that there is no hope that France will ratify the EDC arrangement, or that Italy will follow. Is not that the Senator's impression?

Mr. MANSFIELD. There is very little hope, and the hope seems to be decreasing as time goes on. Personally, I should like to see an end to the EDC concert. So long as the originators do not wish to come in, why bother with it? The idea behind EDC was to bring Germany into the NATO organization. Why not forget EDC, and try to bring both Germany and Spain into NATO, and have the organization which we want?

Mr. FULBRIGHT. The Senator from Alabama spoke of the admission of Red China into the United Nations. It seems that a spirit of defeatism has overtaken the administration, and that it feels that it cannot achieve results in either Asia or Europe. That is a very bad thing. I do not wish to add to the difficulties.

I should like to find some way to strengthen the optimism of the administration and its determination to move forward, as I thought we were trying to do in connection with the trade policy. I thought we were giving the administration the opportunity to move in the direction in which the President himself said he wanted to move a short time before. Likewise in this area, if we can help the administration to obtain the cooperation of India, Indonesia, and Burma, along with Thailand, we can move forward. Thailand is really a rather small reed upon which to lean. We must have the cooperation of the other countries. If we have that, we can move forward with some kind of arrangement which will limit further Communist expansion. I think it would be possible if only the administration could believe it to be possible. Some of the administration leaders are continually condemning Nehru as not speaking for India. It is said that he is a neutralist. If we could assume a different attitude, and could believe that we could work with India, I think we might get results.

Mr. KNOWLAND. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. KNOWLAND. First let me say to the distinguished Senator that I was present at the opening of his remarks. Through the courtesy of his office I was supplied with a copy of his speech, which I have read during the time when, of necessity, I was absent from the Chamber.

I have several questions to ask the Senator, based upon the text of his remarks. Perhaps some of them have been clarified in the ensuing colloquy, most of which I missed. I think the answers to these questions might be helpful in achieving our common purpose, that of seeking a bipartisan foreign policy which will give strength to our Nation in meeting the very real challenges which exist in the world today.

Let me say to the distinguished Senator from Montana, with whom I serve on the Foreign Relations Committee, that I have the highest regard for his diligence in the committee, and for his sincerity. While we have from time to time disagreed on some aspects of our foreign policy, both on the floor of the Senate and on the radio or television, I have found that the Senator has a desire—as I think all 96 Members of this body have—to arrive at solutions, insofar as we are constitutionally called upon

to do so, in the best interests of our Nation.

Mr. MANSFIELD. Before the distinguished majority leader begins, let me say that I reciprocate his kind words, and assure him that I have nothing but the highest respect and admiration for him, even though I disagree with him on occasion.

Mr. KNOWLAND. As I understand, the Senator was critical of the agreement to go to Geneva.

Mr. MANSFIELD. That is correct.

Mr. KNOWLAND. As I understand, as a result of the cease-fire negotiations which were entered into under the last administration and continued under this one—and I raise this question not on the basis of partisanship, but as a matter of historical accuracy—in the armistice negotiations there was the requirement that there be a peace conference with respect to Korea.

Mr. MANSFIELD. That is correct.

Mr. KNOWLAND. I take it that the Senator would have no particular objection to the Secretary of State or the Government of the United States having complied with the terms of the armistice by attending a peace conference so far as Korea was concerned.

Mr. MANSFIELD. Not at all.

Mr. KNOWLAND. Holding the conference in Geneva may have been no better or no worse than holding it in New Delhi, Honolulu, Paris, or any other city which might have been selected.

Mr. MANSFIELD. It was more economical.

Mr. KNOWLAND. I take it that the Senator's objection to the Geneva Conference, and to the attendance by the Secretary of State and other United States Government representatives, does not pertain in the least to the aspects of the Geneva Conference dealing with the Korean war.

Mr. MANSFIELD. No. The Korean truce was given top priority when, as a matter of fact, everyone knew that the real matter to be discussed there would be Indochina.

Mr. KNOWLAND. I think the Senator is aware of the fact that the Secretary of State had shown no enthusiasm for the Geneva Conference, insofar as the Indochina aspects of the situation were concerned.

Mr. MANSFIELD. As I recall, neither did the majority leader show any enthusiasm for the Geneva Conference.

Mr. KNOWLAND. The Senator is correct on that point. Nevertheless, we were associated with certain allies. I think it is historically correct to say that the chief urging for the Geneva Conference came from France, which was heavily involved in the situation in southeast Asia.

Mr. MANSFIELD. That is correct.

Mr. KNOWLAND. Does the Senator in any way now feel that the system of collective security under which both the prior administration and this administration have proceeded to date should be abandoned, either in Europe or in the Middle East, or in Asia?

Mr. MANSFIELD. No; I do not.

Mr. KNOWLAND. So I assume that at least the Senator has not parted company with the present foreign policy of the executive branch of the Government in supporting and trying to gain support for an effective system of collective security.

Mr. MANSFIELD. That is correct. However, I should like to ask the distinguished majority leader what the difference is between this administration's foreign policy and the previous administration's foreign policy. We have been hearing speeches lately about a new policy of strength, instead of a policy of weakness. I should like to know what the differences are.

Mr. KNOWLAND. I will say to the Senator that I have not, as majority leader, endeavored to raise any narrow partisan issue. I realize that there were grave problems facing the last administration.

Mr. MANSFIELD. I understand.

Mr. KNOWLAND. I realize that there are grave policies facing this administration. There is one basic difference in the cycle of time, and that is that a number of new crises—if we may call them such—have arisen within the period of the last few weeks. Certainly the Secretary of State, when he went to Geneva, made an earnest effort to find out whether those nations who were associated with us were prepared to stand together in an effective system of collective security.

Mr. MANSFIELD. That is correct.

Mr. KNOWLAND. I should like to find out whether the Senator differs on this point. It would appear that, having diligently sought to get their support, he came back with negative information. It seems to me that that in and of itself is extremely important information for the American people, for the Government of the United States, and for Congress to have. During the past 9 years, since the close of World War II, we have, through a great expenditure of our resources and through a considerable expenditure of our manpower in Korea, sought to build up a collective system of security, feeling that when the chips were down those with whom we were associated would be prepared to stand up and be counted. If we were operating under a false impression in that respect, does not the Senator feel that, entirely regardless of partisanship, it was extremely important for the American people to realize that some of the collective security ideas, which were embodied in our past policies, were not going to work? Was not that information of vital importance to the country?

Mr. MANSFIELD. Yes; but, if we should follow the Senator's logic, the next step would be to say, "Well, don't you think it is about time that we reappraised our foreign policy?" I would say, "Yes." My idea is that foreign policy should be appraised and reappraised all the time. There should be no "agonizing reappraisal," because, after all, we must make changes and additions from time to time.

Mr. KNOWLAND. I am not unmindful of the Senator's comment in his speech that foreign policy should always be reappraised. It is almost a daily, weekly, and yearly process. On that point I believe the Senator is quite correct, and that his point is well taken. However, I submit to the distinguished Senator that when we have built a series of alliances, and we have done it with great sacrifices, and the time comes when we must find out whether our alliances will work and prevail, it is extremely important for the United States to find out whether those nations with which we are allied are prepared to stand up when the chips are down. Does not the Senator feel that it is of vital importance for us to know that?

Mr. MANSFIELD. I will say that I would agree with the majority leader; but let me ask him whether he has in mind the North Atlantic Treaty Organization?

Mr. KNOWLAND. I have in mind the European Defense Command under the North Atlantic Treaty Organization.

Mr. MANSFIELD. The majority leader knows that that does not apply to southeast Asia, if he is trying to tie it to the proposal of Secretary Dulles to enter into a southeast Asia pact.

Mr. KNOWLAND. I know that, but I believe that the American people, at least for the past several years, have recognized the fact that we are facing a global menace in the form of international communism. I do not believe that anyone is under any illusion that if the Soviet Union should determine on aggression the aggression would be limited, for instance, to Europe alone. It would of necessity spread into the global field.

Mr. MANSFIELD. That is correct.

Mr. KNOWLAND. In other words, we are facing a global menace in the event of war; therefore, we cannot close the door to that type of aggression merely by closing the door in Europe. Does not the Senator agree, as a practical matter, that that is a fact?

Mr. MANSFIELD. That is a logical premise. However, I should like to call the majority leader's attention to the fact that in considering mutual aid prior to this time the question arose on numerous occasions whether assistance of various kinds applicable to Europe would also be applicable to the colonies of the European nations who are members of the North Atlantic Treaty Organization. The answer has always been "No." There is sharp division so far as NATO is concerned. It is an alliance which extends from Turkey, north to Norway and Iceland, and includes the United States and Canada. It is confined to those countries, and not to any colonial possession held by them.

Mr. KNOWLAND. The majority leader and the distinguished Senator from Montana do not differ on either the legal or the moral basis of the North Atlantic treaty alliance as covering that particular area. However, I say there was the general impression in the Senate—and I think there was the general impression throughout the country—that if it is, indeed, a fact, as many of us believe it to be, that international communism is a global menace, and aggression, if it took place in Europe, would be bound to spread to Asia, and therefore it would do no good then to close the front door in Europe if the back door was left open in Asia, and perhaps even have the Pacific coast left open. It

seems to me that we all have a right to expect those with whom we are allied in the North Atlantic treaty alliance in Europe not to be unconcerned with the same menace of communism if it should crop in southeast Asia or in the Middle East. Is not that a fair presumption?

Mr. MANSFIELD. The Senator's logic is very hard to contend against. However, I think there are certain factors which ought to be given consideration. Let us suppose that Mr. Dulles had been successful in getting the countries in this all-white pact to defend southeast Asia——

Mr. KNOWLAND. If the Senator will permit me to interrupt, certainly we want to be fair in this situation, and I am sure the Senator wants to be fair, because that has been my observation of him. I should like to say that the Secretary of State has diligently endeavored to find out whether we could get the Philippines, Thailand, Burma, and other nations in Asia that were prepared to do so, to join in collective security.

Mr. MANSFIELD. That is correct.

Mr. KNOWLAND. And to join in that pact.

Mr. MANSFIELD. That is correct.

Mr. KNOWLAND. The Senator has mentioned certain other nations in Asia, such as India and Indonesia and Pakistan, I believe. Does the Senator not recognize the fact that under its present policies the Government of India—I am not complaining because those Asian countries are all sovereign governments and they have a right to make up their own minds—at least up to the present moment, has shown, to put it mildly, a reluctance to enter into any type of collective-security system which would involve the use of Indian armed forces in the support of a collective-security system.

The Senator from Montana is not unmindful of the fact that even as to Korea, when the United Nations went on record as declaring Communist China and North Korea aggressors, and called upon all the member states to join together in a system of collective defense, of the 60 member states of the United Nations only 16 contributed forces and those 16 countries contributed less than 45,000 men, as compared with our own contribution of more than 450,000 men at one time. The Senator is not unmindful of the fact, I take it, that in that action, which was the first overt Communist aggression since the close of World War II, India did not contribute a single soldier, sailor, or airman to the resistance of aggression, despite the action taken by the United Nations, in which organization India holds membership.

Mr. MANSFIELD. The Senator is correct.

Going back now, to the pact idea, I assume the Secretary of State tried to contact some of the Asiatic nations in the southeastern part of the continent, but the thing that always worries me is the argument which the distinguished majority leader has made on many occasions, namely, the fact that we furnished 90 percent of the troops in Korea.

Mr. KNOWLAND. Ninety percent of the United Nations troops.

Mr. MANSFIELD. But suppose New Zealand had 10,000, Australia had 50,000, and France and Great Britain were involved in an armed conflict, who does the Senator think would be furnishing most of the manpower?

When the military commanders of five western nations met in Washington some time ago, what were they considering? They were considering a pact for southeastern Asia. That is not the way to win. If we wish to win, we have got to give the nations in that area the opportunity to defend themselves. We should be in the background to help them when we can, but, certainly, we should not take the primary steps.

I noticed that after the military commanders had met for a few days, the Philippine Chief of Staff came to the Capital and met with them on the last day. I think it would have been better if he had not come at all, because if we are going to do anything in that quarter of the world, we should give the people who live there the primary responsibility.

I am sure the Senator would agree with that thesis.

Mr. KNOWLAND. The majority leader does not differ with the Senator as to the fact of the importance of the people of Asia participating in a collective security system for their own defense, but the point which I think goes to the basis of the argument—and I should like the Senator to clarify it if he will—is that, as it seems to me, there are two alternatives. One is that nothing should either be done or attempted until India and Indonesia, as an example, said they were prepared to furnish troops to the collective system of defense. Does the Senator believe that nothing should be attempted or that nothing should be done until India and Indonesia have signed on the line that they will furnish X number of divisions to help prevent the rest of southeast Asia from going down the drain?

Mr. MANSFIELD. No; I would not go that far, because I realize, as does the majority leader, that it will be a question of time before India and Indonesia come into such a pact. In my opinion, the primary emphasis should be placed on their being given an opportunity to determine their own fate. As I recall the results of the Colombo conference, it seems to me there was a good deal of opposition from the Ceylonese and the Burmese who were beginning to feel that there was an onrush of Communist aggression, and because of that, Nehru was beginning to do a little second thinking. Of course, since that time, since the Chinese Communist leader went to India and was wined and dined. I do not know what the situation is. It seems to me we should not bind them to a pact. If they need military assistance, we should provide it only after they have used up their resources and manpower.

Mr. KNOWLAND. I think the distinguished Senator from Montana and I see eye to eye on the question of colonialism, and have so expressed ourselves on the floor, but does he know of a single nation that has more steadfastly worked toward giving the freedom and independence which the Vietnamese, the Laotians, and the Cambodians want than has the Government of the United States?

Mr. MANSFIELD. I do not. I agree with the majority leader on that point.

Mr. KNOWLAND. I mentioned the Republic of Korea, which has some 600,000 troops, well seasoned, battle-trained, equipped, and trained by our forces under General Van Fleet and General Taylor. The Army of South Korea is recognized as a very potent force; as a matter of fact, the fourth largest standing army in the world today. I have also mentioned the Republic of China, on Formosa, with some 500,000 troops, not so well equipped, not so battle-seasoned, but, nevertheless, perhaps the sixth largest standing army in the world. Those two relatively small nations have a million one hundred thousand troops in their ground forces, but they were not included in the discussions regarding an Asian pact. Why? Because, in effect, the British felt they could not participate if the Republic of Korea and the Republic of China on Formosa participated. Why did the British feel that way? I do not have the innermost secrets of the British Cabinet, but I rather suspect it was because the Indians were exercising a type of veto over such participation. If we are going to make the southeast Asian countries have an exclusive society and eliminate 1,100,000 Asians who want to fight for their independence—and they outnumber all the rest of the armed forces of Asia put together by probably at least 5 times or possibly 10 times—how can we possibly build a system of collective defense in southeast Asia, particularly when neither India nor Burma is willing to go ahead with such a system?

Mr. MANSFIELD. I will admit that such a possibility would be difficult of achievement. But it has not been attempted and we will never know, unless we try, whether or not there is much of a possibility to have a pact of that kind.

I should like to see this country, through the Secretary of State or one of his emissaries, come forward with a suggestion of that kind and hold some sort of conference in the far Pacific, with India, Indochina, Ceylon, Pakistan, Burma, and the three Indochinese states, as well as the Philippines, invited, and, if we want to, have the people on Formosa invited. If we had such a conference as that, carried on by the Asian nations themselves, there might be a possibility. If there were no possibility, then it would be time to reappraise our position and, once again, see what could be done.

Mr. KNOWLAND. The only point on which the Senator and I differ is with reference to one factor. What are the 600,000 ROK troops doing? They are mobilizing, at least, while a million and a half Chinese Communist troops are mobilizing. What are the Chinese Nationalist troops doing? They are mobilizing, while up and down the coast of China, opposite the island of Formosa, another million and a half Chinese Communist troops are gathered. If South Korea and the Nationalist Chinese Government on Formosa are not included as a part of a collective system of defense,

then we stand a good chance of the million and a half troops from North China and Manchuria, the million and a half troops from the coastline of China, and some 3 million additional troops over those now in the Yunan Province along the Indochina frontier moving against southeast Asia. So it seems to me, if we are going to have an effective collective system of defense in Asia, that the logic of the situation demands that the Republic of Korea and the Republic of China on Formosa be included, and we must at least encourage the Japanese to build their forces sufficiently large so that they can defend their own home islands, thus relieving us of the necessity of stationing American troops in Japan for ground defense purposes.

Mr. MANSFIELD. I would agree with the Senator, but the question comes to my mind: How would the Japanese and the Koreans get along? How would the Japanese and the Chinese who are in Formosa get along? The same problem exists there as exists in connection with other Asiatic countries.

Mr. KNOWLAND. I am not suggesting that Japanese troops be used in Korea. I think that, politically, at the present time they cannot be used. All I am suggesting is that it should not be necessary to tie down American divisions in Japan, to defend the homeland of Japan, when that nation of 80 million people should be able to supply sufficient ground forces to defend their own homeland. Our divisions should be made a part of our general mobile reserves, which should be sufficiently strong so that the Chinese Communists or the Soviet Union would not dare to attack.

Mr. MANSFIELD. That is a good argument, but how are the Japanese going to become strong if they are not able to live? How are they going to live, if they are not able to eat? Who is going to fill the void which has been created by a lack of markets, an increase in population, and a tremendous birthrate? I think that is a serious problem.

We talk about withdrawing American divisions from Japan. I think they should be withdrawn. They should be withdrawn from Korea, too, at the earliest opportunity. Korea has a 600,000-man army, which should be sufficient to defend the southern half of the Korean Peninsula.

Mr. KNOWLAND. Does the Senator from Montana believe that the Japanese economy will be better able to exist if all of southeast Asia passes into the hands of the Communists? The raw materials and the rice of southeast Asia will be used as weapons by the Communists to try to bring Japan to her knees.

Mr. MANSFIELD. I do not at all believe that Japan would be better off. The majority leader knows how I feel on that subject. But the point is, with a population of 80 million, with a tremendous birthrate, and with very little arable land, how are the Japanese going to be effective on the side of the Allies, if they cannot find markets?

Mr. KNOWLAND. I shall not pursue the subject further, but I wish to make it plain to Members on both sides of the aisle that we have very definite problems. Some problems have been pointed out by the distinguished Senator from Montana today. Other problems have been pointed out by the President of the United States and by the Secretary of State.

This is not a partisan issue. I hope it will not become a partisan issue. It is a matter in which the life of our Nation and the life of the free world itself is at stake. I hope that we can avail ourselves of the ability and the knowledge which exist in the United States Senate and the House of Representatives, in the executive branch of the Government, and among those who are presently in office and those who have been in office. I hope we can all put our heads together, and recognize that we are confronted with one of the greatest dangers that has ever faced our Nation, or perhaps the entire world; and that unless the free peoples of the world are able to present a united front, unless they are all able to stand up and be counted, they may be engulfed, one by one, until finally the United States will be left, not by our own choice, but by the irresistible course of history, as an isolated island in a totalitarian world.

While under those circumstances it might be possible to make of this Nation a continental Dien Bien Phu, if all of Asia were in Communist hands, if all of Europe were in Communist hands, and if all of the Middle East were in Communist hands, it would certainly greatly endanger our survival, and certainly would lead to a much different political and economic system than that which we now have.

The situation is fraught with such consequences that I hope we can constantly rise above any narrow partisanship in an endeavor to find a solution which is best for the Nation.

Mr. MANSFIELD. I wish to express my appreciation for the speech which has just been made by the distinguished majority leader. I admire him for his honesty and his integrity. I hope he is aware of the fact that when I say that, I mean it in all sincerity.

The Democratic Party, so far as I have been able to ascertain, has been more than willing to go along with the ideals which have just been expressed by the majority leader; but the Democrats, as a party, do not like to be kicked around or knifed in the back, as happens occasionally, for purely partisan purposes. We believe that politics should stop at the water's edge. We do not claim that Democratic administrations always have been perfect, any more than we will admit that the present administration is perfect. Both parties are subject to making mistakes.

But I feel, as does the majority leader, that the times are critical; that the times call for an honest, real bipartisan foreign policy, and that backbiting, knifing, and stabbing, should be done away with.

I think I can assure the distinguished majority leader that I express the sentiments of the Democratic Party when I say that we will try, as we always have done in the past, to go along on the basis of a good, sound foreign policy, and that we will always place our country ahead of our party.

Mr. CAPEHART. Mr. President, I rise to discuss the pending bill, but before doing so, I wish to say that I have been sitting in the Chamber for the last hour, listening to the very able debate between the Senator from California [Mr. KNOWLAND] and the Senator from Montana [Mr. MANSFIELD]. I have enjoyed it very much. I think it has been very helpful.

However, I am one individual who does not believe in a bipartisan foreign policy. I am one who hopes that the Senators on the other side of the aisle will continue to be critical of our foreign policy, just as I have encouraged the Senators on this side of the aisle to be critical of the foreign policy when Senators on the other side were formulating it. I cannot see any reason why we should not have just as much right to question the foreign policy of our Nation as we have to question its domestic policy. I cannot quite understand how we shall ever have a good foreign policy unless we formulate it openly, and permit persons to express their viewpoints and to criticize.

I do not mean by that to say that once a decision has been reached by Congress or by the Government, once a law has been enacted, once the United States has joined an organization, once a treaty has been ratified, once an agreement has been entered into with another nation or with a group of nations, we should not have a bipartisan policy. Then the policy ought to become a bipartisan matter because it will then be the law of the land and the policy of the United States, and all of us should get behind it—Democrats, Republicans, and all 160 million Americans. The policy then should be enthusiastically supported as long as it is law or the treaty.

But I think that great harm has been done the world and the United States during the past 25 or 30 years because there has been prevalent an idea that all of us had to agree to have a bipartisan foreign policy. What is a "bipartisan foreign policy"? What is meant by that term? Is it a policy of the Secretary of State, a policy of the President, a policy of Congress; or is it a policy which has been agreed to after open, frank, and honest debate and criticism in the Congress of the United States?

I think we shall become involved in a great deal of trouble if we proceed on the theory that, so far as our foreign policy is concerned, it ought to be a dictatorial type—a policy which can be established by 1 or 2 men. I think that has been the mistake which has been made in the past. I think that if in the past there had been more frank and open expression, if Senators and Representatives, and the people as well, had been encouraged to stand up and to express themselves in respect to foreign policy, and to criticize it if they felt it should be criticized, the country would have been much better off. Instead, there has been what I believe to be a narrow conception of bipartisan foreign policy.

The end result has been—and I think I can say this without fear of successful contradiction—that almost every one of the schemes or organizations or arrange-

ments which the United States has entered into during the past 25 years has failed to accomplish the purpose for which it was intended. I am not saying that such organizations were not good. I voted for many of them. I am not saying they might not eventually accomplish the purpose for which they were intended. But, so far, up to this time, they have not accomplished the purposes for which they were designed.

It is now being said that perhaps, under certain conditions, the United States will have to withdraw from the United Nations. Evidently the United Nations has not accomplished the purpose for which it was intended.

We find our ally, Great Britain, pretty much going along in her own direction at the moment. We speak about making arrangements. It is very hard to make arrangements in advance, because my observation has been that nations are like individuals. They agree at the moment to do that which is to their best interest at the specific time. It has not been too long ago since the British were very much interested in anything the United States did toward helping them. Today their economy is quite strong, and they are back on their feet; and I am glad they are. As a result, they are showing quite a different attitude from that of 5 or 6 years ago.

My point is that other nations are going to "join up," as we say in Indiana, at a given time, depending on their own best interests at that particular time. It cannot be said in the Senate today, with any degree of accuracy, that we are making an arrangement today which will be good 10 years from now, because it may be that the best interests of a given nation today may not be its best interests 10 years from now.

The question of foreign policy is one which ought to be debated. Foreign policy changes from day to day, as it always will. I think we must have confidence in the President and the Secretary of State, and other persons who are or ought to be in a position of knowing more about conditions than Members of Congress do, and we will have to go along with them.

I hope we will not discourage anyone from being critical of our foreign policy. On the other hand, I think we should not encourage the sabotage of something to which the Congress has given its approval. For example, the United States is now a member of NATO. We ought to support that organization enthusiastically as long as our Government is a member of it. This country is also a member of the United Nations. We ought to go along with that as long as our country is a member of it, because the United Nations Charter is the law of the land.

I am 100 percent in accord with a bipartisan policy once we have decided an issue. Just as we fight on the floor of the Senate over proposed legislation, once it is approved and passed, we obey the law, and it is no longer a partisan matter. I think foreign policy ought to be treated on the same basis.

If we deny ourselves the right of debate, and carry the so-called bipartisan policy to extremes, we will end up not with a representative form of government, with 96 Senators representing 48 States participating in questions of foreign policy, but possibly the President or the Secreary of State, or some other individual or small group alone will determine foreign policy. I am sure that was never the intention of the founders of our Government, it is not stated in the Constitution of the United States, and I am certain it is not the intention of the people of the United States. We ought to discuss foreign policy. We can disagree on the floor of the United States Senate as violently on foreign policy as we can on domestic policy, and we ought to speak our minds and say what we think, and we should think straight, if we possibly can; but once an issue is decided, what is agreed on should be recognized as the law of the land, and we ought not to be narrow-minded or bitter about the decision, nor should we backbite, but we ought to go along with the decision.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield to the Senator from California.

Mr. KNOWLAND. I should like to ask the distinguished Senator whether there was anything in either the remarks of the Senator from Montana or those of the Senator from California which indicated that there should not be free and full discussion of the question on the floor of the Senate?

Mr. CAPEHART. I never intended by the remarks I have made to intimate that there was any such suggestion. I said I sat here for an hour and enjoyed very much hearing the discussion, and learned a great deal, and I repeat that; but the Senator from California did discuss foreign policy, and he did talk about a bipartisan foreign policy, and both he and the Senator from Montana expressed different viewpoints, which I think is helpful. The majority leader has spoken out very sharply in the last few days on that subject. That is what one should do if he feels deeply about it. That is what we ought to do as parties, if we feel that way about it as parties. We will keep out of trouble if we encourage and permit open and frank discussion

I know, of course, that there will be those who will argue that if that is done, what is said will be misunderstood by other nations and other peoples. They seem to be misunderstanding us anyway. I think we get the best out of people when we permit frank and open discussion and debate. I hope that will be the course followed here.

Mr. President, I had not intended to make a speech. I do not know whether or not I have made any contribution, but I have stated my views about the subject of our foreign policy, which are the opinions I have held since I have been a Member of the Senate.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, announced that the House had agreed to the amendment of the Senate to the bill (H. R. 7468) to amend certain provisions of part II of the Interstate Commerce Act so as to authorize regulation, for purposes of safety and protection of the public, of certain motor-carrier transportation between points in foreign countries, insofar as such transportation takes place within the United States.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the Vice President:

S. 268. An act for the relief of Harold Trevor Colbourn;

S. 381. An act for the relief of Donald Grant;

S. 455. An act for the relief of Johan Gerhard Faber, Dagmar Anna Faber, Hilke Faber, and Frauke Faber;

S. 490. An act for the relief of Josephine Reigl;

S. 520. An act for the relief of Mr. and Mrs. Ivan S. Aylesworth;

S. 579. An act for the relief of Wong You Henn;

S. 676. An act for the relief of Eftychios Mourginakis;

S. 747. An act for the relief of Jacek Von Henneberg;

S. 1050. An act for the relief of Josephine Maria Riss Fang;

S. 1382. An act for the relief of Elie Joseph Hakim and family;

S. 1508. An act for the relief of Borivoje Vulich;

S. 1517. An act for the relief of Helen Knight Waters and Arnold Elzey Waters, Jr.;

S. 1689. An act for the relief of Mrs. Cacila Gotthardt Gange;

S. 1796. An act to incorporate the Board of Fundamental Education;

S. 1991. An act for the relief of Esperanza Jimenez Trejo;

S. 1999. An act to provide for the recovery, care, and disposition of the remains of members of the uniformed services and certain other personnel, and for other purposes;

S. 2198. An act for the relief of (Sister) Jane Stanislaus Riederer;

S. 2369. An act for the relief of Karl Ullstein;

S. 2370. An act to authorize the sale of certain vessels to Brazil for use in the coastwise trade of Brazil;

S. 2465. An act for the relief of Lydia Wickenfeld Butz;

S. 2468. An act to authorize the President to appoint to the grade of general in the Army of the United States those officers who in grade of lieutenant general, during World War II commanded the Army Ground Forces, commanded an Army, commanded Army forces which included a field army and supporting units, or commanded United States forces in China and served as chief of staff to Generalissimo Chiang Kai-shek in the China Theater of Operations, and for other purposes;

S. 2488. An act to provide that each grant of exchange assignment on tribal lands on the Cheyenne River Sioux Reservation and the Standing Rock Sioux Reservation shall have the same force and effect as a trust patent, and for other purposes;

S. 2728. An act to authorize the collection of indebtedness of military and civilian personnel resulting from erroneous payments, and for other purposes;

S. 3196. An act for the relief of Dr. Helen Maria Roberts (Helen Maria Rebalska);

S. 3291. An act authorizing the President to present a gold medal to Irving Berlin;

S. 3336. An act to promote the apportionment of the waters of the Columbia River and tributaries for irrigation and other purposes by including the States of Nevada and Utah among the States authorized to negotiate a compact providing for such apportionment; and

S. J. Res. 165. Joint resolution to provide for construction by the Secretary of the Interior of the Glendo unit, Wyoming, Missouri River Basin project.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, July 8, 1954, he presented to the President of the United States the following enrolled bills and joint resolution:

S. 268. An act for the relief of Harold Trevor Colbourn;

S. 381. An act for the relief of Donald Grant;

S. 455. An act for the relief of Johan Gerhard Faber, Dagmar Anna Faber, Hilke Faber, and Frauke Faber;

S. 490. An act for the relief of Josephine Reigl;

S. 520. An act for the relief of Mr. and Mrs. Ivan S. Aylesworth;

S. 579. An act for the relief of Wong You Henn;

S. 676. An act for the relief of Eftychios Mourginakis;

S. 747. An act for the relief of Jacek Von Henneberg;

S. 1050. An act for the relief of Josephine Maria Riss Fang;

S. 1382. An act for the relief of Elie Joseph Hakim and family;

S. 1508. An act for the relief of Borivoje Vulich;

S. 1517. An act for the relief of Helen Knight Waters and Arnold Elzey Waters, Jr.;

S. 1689. An act for the relief of Mrs. Cacila Gotthardt Gange;

S. 1796. An act to incorporate the Board of Fundamental Education;

S. 1991. An act for the relief of Esperanza Jimenez Trejo;

S. 1999. An act to provide for the recovery, care, and disposition of the remains of members of the uniformed services and certain other personnel, and for other purposes;

S. 2198. An act for the relief of (Sister) Jane Stanislaus Riederer;

S. 2369. An act for the relief of Karl Ullstein;

S. 2370. An act to authorize the sale of certain vessels to Brazil for use in the coastwise trade of Brazil;

S. 2465. An act for the relief of Lydia Wickenfeld Butz;

S. 2468. An act to authorize the President to appoint to the grade of general in the Army of the United States those officers who, in grade of lieutenant general, during World War II commanded the Army ground forces, commanded an army, commanded Army forces which included a field army and supporting units, or commanded United States forces in China and served as chief of staff to Generalissimo Chiang Kai-shek in the China theater of operations, and for other purposes;

S. 2488. An act to provide that each grant of exchange assignment on tribal lands on the Cheyenne River Sioux Reservation and the Standing Rock Sioux Reservation shall have the same force and effect as a trust patent, and for other purposes;

S. 2728. An act to authorize the collection of indebtedness of military and civilian personnel resulting from erroneous payments, and for other purposes;

S. 3196. An act for the relief of Dr. Helen Maria Roberts (Helen Maria Rebalska);

S. 3291. An act authorizing the President to present a gold medal to Irving Berlin;

S. 3336. An act to promote the apportionment of the waters of the Columbia River and tributaries for irrigation and other purposes by including the States of Nevada and Utah among the States authorized to negotiate a compact providing for such apportionment; and

S. J. Res. 165. Joint resolution to provide for construction by the Secretary of the Interior of the Glendo unit, Wyoming, Missouri River Basin project.

MANAGEMENT OF THE EXPORT-IMPORT BANK OF WASHINGTON, ETC.

The Senate resumed the consideration of the bill (S. 3589) to provide for the independent management of the Export-Import Bank of Washington, under a Board of Directors and for other purposes.

Mr. CAPEHART. Mr. President, when the bill was introduced, much discussion and colloquy in great detail was had on the subject. Again on Tuesday of this week it was discussed in the Senate. The bill was reported unanimously from the Senate Committee on Banking and Currency. It proposes to expand the activities of the Export-Import Bank. I know of no one opposed to it. The President of the United States is enthusiastically in favor of the bill and what it will do for the country.

Mr. President, I shall not speak further on the bill, except to answer questions which my colleagues may have to propound.

Mr. SMATHERS. Mr. President, I wonder if the Senator from Indiana will yield to me so that I may ask a few questions.

Mr. CAPEHART. I am very happy to yield to the Senator from Florida.

Mr. SMATHERS. First, I wish to congratulate the Senator from Indiana, the chairman of the Committee on Banking and Currency, as well as the minority ranking member, the able Senator from South Carolina [Mr. MAYBANK], for bringing this most necessary bill to the floor of the Senate. As I understand, one of the purposes of the bill is to launch the United States into a more active and aggressive foreign trade policy. Is that correct?

Mr. CAPEHART. Yes. The purpose of the bill is to expand the activities of the Export-Import Bank in order to help our small exporters, to lend money on longer terms to our friends in foreign countries, and to encourage trade and a greater flow of trade in both directions, sales by our people to other countries, and sales from other countries to our people.

Mr. SMATHERS. Is it not the opinion of the chairman of the committee that if the bill is passed, it will make it possible for more loans to be made and more business to be entered into between this nation and other nations, and on more favorable terms?

Mr. CAPEHART. Yes; because the bill increases the authority of the bank to lend money up to $5 billion, which is a $500 million increase over the provisions of the present law. It is the intention of the Senate Banking and Currency Committee, and it will be the intention of the Senate and the Congress when the bill passes that the Bank increase its lending activities.

Mr. SMATHERS. Is it not a fact that the bill provides for an expanded amount of credit?

Mr. CAPEHART. Yes, to the extent of $500 million.

Mr. SMATHERS. I should like to read to the chairman of the committee a paragraph appearing on page 3 of the report:

> When enacted into law and after the effective date, the provisions of the bill supersede Reorganization Plan No. 5 of 1953. This will leave the National Advisory Council on International Monetary and Financial Problems with the power to coordinate the foreign lending activities of the Export-Import Bank with those of other Government agencies. The present power of the National Advisory Council to "establish the general lending and other financial policies" of the bank will be abolished.

My question is, does the paragraph which I have read in anyway indicate that the passage of the bill will endanger the independence or freedom of the Export-Import Bank to make its own loans?

Mr. CAPEHART. It does not. The bill proposes to increase the independence of the bank. When the National Advisory Council on International Monetary and Financial Problems was organized, which came into existence as a result of the so-called Bretton Woods agreement, the President of the Export-Import Bank was a member of the Council. Therefore he sat and participated in the deliberations of the Council. However, under Reorganization Plan No. 5, which was adopted last year, the President of the Export-Import Bank was relieved of membership on the Council, and the Export-Import Bank has had no representation on the Council. What is being proposed in this instance is to reinstate the representation of the Export-Import Bank on the Council. It will give the bank more independence and be more helpful to it.

Mr. SMATHERS. Under this measure is it correct to assume that the chairman of the committee feels that there will be more freedom for the Export-Import Bank, and that no longer will it be dominated by the World Bank?

Mr. CAPEHART. That is exactly the intention of the committee in connection with this measure. Certainly that is the intention of the two authors of the bill—myself and the able senior Senator from South Carolina [Mr. MAYBANK]—namely, that the Export-Import Bank shall become an independent agency, subject only to the supervision of the coordinating council, which, by the way, was established by law by the Congress. Otherwise, the Export-Import Bank is to be an independent agency. It is to make its own loans. Of course, it is to cooperate with all other governmental agencies, as should be the case; but certainly the Export-Import Bank is not to take a second or subordinate position to the World Bank, insofar as loans to United States exporters are concerned.

Mr. SMATHERS. It would be helpful, for the RECORD, if the chairman of the committee would state the reasoning of the committee in not providing a definite length of term for the officers of the Export-Import Bank.

Mr. CAPEHART. I assume that the Senator from Florida refers to the terms of service of the directors of the Export-Import Bank.

Mr. SMATHERS. Yes.

Mr. CAPEHART. The bill does not contain any limitation on the terms of service of the members of the Board of Directors of the Export-Import Bank. They are to serve at the will of the President. The committee discussed the possibility of providing for a definite term of 5 years or 7 years. The committee reached the conclusion that, inasmuch as the directors are to spend all their time in the work of the Export-Import Bank, and inasmuch as they will be charged with a certain amount of executive responsibility, it might be just as well to have them serve at the will of the President of the United States, since the President would name them. We discussed the matter, and reached the conclusion that we should at least try the plan outlined in the bill.

After frank discussion, I think each of the 15 members was satisfied that perhaps that was the better plan at this time.

Mr. SMATHERS. I thank the Senator from Indiana for the explanation he has given.

Mr. President, will the Senator from Indiana yield approximately 4 minutes to me, so that I may make a brief statement about the bill, in relation to its effect on Latin America?

Mr. CAPEHART. Mr. President, I am very happy to yield the floor, Mr. President.

Mr. SMATHERS. Mr. President, I should like to comment upon the timeliness of this measure, and to commend the chairman of the committee, the ranking minority member of the committee, and the other members of the committee for the forthright manner in which they have directed this attack upon the problem of increasing American trade and strengthening American friendship in our hemisphere and all around the world. This measure is most timely and can be most helpful, particularly with respect to our neighbors to the south.

Mr. President, we have just witnessed the repulse of world communism at its first beachhead in the Western Hemisphere. Let me state that in using that phrase I give due recognition to the distinguished minority leader, the senior Senator from Texas [Mr. JOHNSON], who was the first to talk about the Communist beachhead in South America.

However, the military defeat of the Communists is not sufficient, as all of us recognize. In addition, we must move toward the development of the underdeveloped areas of the Western Hemisphere, to the end that the standards of living may be raised throughout the New World. Illiteracy and poverty provide the breeding places for communism; and our most effective weapons against communism are economic advancement and enlightenment.

Mr. President, the purpose of this measure, as I understand it, is to make the Export-Import Bank stronger, more independent, and more capable of carrying out a more comprehensive and realistic program throughout the world. The enactment of this measure will not only advance foreign trade, which is most important to the stabilization of the economy of the United States and also to the economy of the rest of the world, but it will also be of substantial benefit in the conduct of our foreign relations. This is particularly true with regard to Latin America. In fact, it is our concern for the nations of the Americas to the south of us which is partially responsible for the development of this measure.

The Chairman of the Banking and Currency Committee toured a great portion of Latin America last fall, and brought back a report of need which has been most valuable and helpful in connection with the deliberations of the committee in its formulation of this proposed legislation. It is to be hoped that this measure will be passed promptly, as I believe it will be, and that it will lead to broader recognition of the importance to the United States of Latin America. But, more important, it is to be hoped that this measure, when enacted, not only will result in a more realistic program of assistance throughout Latin America, but also that it will be reflected in closer trade, and friendly relationships throughout this hemisphere.

Mr. President, Latin America is the fastest growing area in the world. Its present population of approximately 173 million is about equal to that of the United States and Canada combined. There are 62 Latin American cities with populations of 100,000 or more. The 3d, 4th, 5th, and 6th largest cities in the Western Hemisphere are in Latin America: Buenos Aires, which has a population of 3 million; Rio de Janeiro, with a population of 2,400,000; São Paulo, Brazil, with a population of 2,200,000; and Mexico City, also with a population of 2,200,000.

What is most significant, populationwise, is that while the world population is growing at the rate of approximately 1 percent a year, and the population of the United States is growing at the annual rate of 1.7 percent, the population of Latin America is growing at the rate of 2.5 percent. If the present rate of growth of Latin America continues, within 50 years the population of the countries of Latin America will outnumber the population of the countries of North America by more than 2 to 1—with 550 million people then residing in Latin America and about 250 million people residing in North America.

Mr. President, another factor of still greater importance is that much of the area of Latin America is now beginning to move from an underdeveloped status to a higher producing and consuming level.

If the United States and the other nations of the Western Hemisphere adopt and carry forward a program of mutual development of hemispheric natural resources, the hope for peace, prosperity, and happiness in the world will be immeasurably strengthened.

So, Mr. President, I believe this measure is most important and timely.

Again, I wish to congratulate the Senator from Indiana [Mr. CAPEHART], the Senator from South Carolina [Mr. MAYBANK], and all the other Members of the Banking and Currency Committee for bringing before the Senate this most necessitous piece of legislation when enacted it will put into effect and give meaning to the slogan of "trade, not aid." This measure is the first realistic, practical measure we have had at this session designed to strengthen the economic relationships of the United States with the other nations of the Western Hemisphere.

Mr. President, I hope the bill will be passed promptly and without difficulty.

Mr. MAYBANK. Mr. President, I most heartily concur in the remarks made by the distinguished chairman of the committee, the senior Senator from Indiana [Mr. CAPEHART], and also in the remarks made by the distinguished junior Senator from Florida [Mr. SMATHERS].

Since I have been a Member of the Senate, I have always been interested in the Export-Import Bank. I was somewhat disappointed in the reorganization plan of a little more than a year ago, which in my judgment did not do the Export-Import Bank any good, but at the time there were not sufficient votes in the Senate to defeat the plan.

The Senator from Indiana has now moved to correct that situation by bringing forward this bill which will provide a Board of Directors for the Export-Import Bank. The bill not only calls for an increase of $500 million in the authority of the Export-Import Bank to make loans, but also provides for insurance features. Moreover, it gives certain rights to the Board of Directors of the Export-Import Bank, who in the future will not be hampered by other Government agencies in the way that has occurred in the past. The bank will be free to make loans, perhaps on the basis of longer terms, in order to meet the competition confronted by American businessmen and manufacturers and to enable them to operate on a more favorable basis.

So, Mr. President, I wish to concur in what the Senator from Florida has said and, in fact, in what the President, himself, has said. I refer to the statement that this is a bill for "trade, not aid."

In this connection, let me remind the Senate of the requests which have been made of us by the foreign aid bill, which proposes to give away approximately $3,400,000,000. As a member of the Appropriations Committee, I realize that more than $9,760,000,000 of the funds previously made available have not yet been spent, including $2,500,000,000 of the foreign-aid appropriations which have been made in the last few years; and let me say that I am glad I did not vote for those appropriations. In fact, Mr. President, the spending of much of that money has not yet even been planned. Those of us who serve on the Appropriations Committee have been told that plans are now being made regarding how to spend the $2,500,000,000 of foreign-aid appropriations which are still unspent and unobligated. In addition, we are faced with the fact that the pending foreign-aid bill calls for appropriations of $3,400,000,000. Of

course, we have $1 billion in a give-away bill for Indochina, which has already collapsed.

I mentioned these things in order to emphasize the fact that this proposal is something tangible, something practical. This is what the President said he wanted—trade, not aid. I hope the business interests of the country and the governments of other countries will use the facilities of the bank for their benefit, for the benefit of humanity, and for the upbuilding of various countries throughout the world.

Mr. CAPEHART. Mr. President, before a vote is taken, let me say that the pending measure will promote the program of the President and of the Congress—a program of more trade and less aid. It is one of the most constructive pieces of legislation directed to that end. I am hopeful that there will be more constructive measures of this sort, whereby we can help through loans, and not aid.

My observation, after talking with representatives of many foreign countries, is that they are not interested in anything except loans. They are interested in trade. That is what we endeavor to promote by this bill.

We have before us at the moment a foreign mutual military-aid bill. I am hopeful that before we are through with that bill we can convert a few hundred million dollars of the requested funds into loans. For example, if we could loan the states of Indochina and the Middle East some money to put into factories and processing plants to provide jobs for their people to enable them to increase their own standard of living and promote trade among themselves, we could go a long way toward curing many of the problems of the world. If we are to cure the problems of the world, we shall have to do it through trade, through jobs. We cannot do it with guns. We cannot do it with the military.

I do not mean by that statement to intimate that we ought not to have a strong Military Establishment. We ought to remain strong, but in the final analysis, trade makes jobs; and jobs make trade. In the final analysis people will be happy or unhappy in direct proportion to their ability to obtain jobs and earn wages, or own businesses. I believe that we ought to spend more of our time in doing things which would promote trade, rather than to give away so much money.

Mr. FREAR rose.

Mr. CAPEHART. Does the Senator wish me to yield to him?

Mr. FREAR. I wish to make a very brief statement when the Senator has concluded.

Mr. CAPEHART. I am through.

Mr. President, I appreciate the kind remarks of the able Senator from Florida [Mr. SMATHERS] and the able Senator from South Carolina [Mr. MAYBANK].

Also I wish to take this opportunity to thank every member of the Senate Committee on Banking and Currency for the fine support which has been given me.

Mr. LEHMAN. Mr. President, as a member of the committee I heartily concur in the remarks which have been made today by the distinguished Senator from Florida [Mr. SMATHERS] and other Senators in appreciation of the work which has been done by the chairman and by the ranking minority member of the Committee on Banking and Currency.

I believe this bill is sound. I believe it will inevitably lead to greater trade between this country and other countries of the world, notably those in Latin America which should be our greatest friends. They depend upon us. In association with us, I am convinced that they will become a great factor in maintaining the peace and security of the world.

I congratulate the distinguished chairman.

Mr. CAPEHART. I thank the Senator.

Mr. FREAR. Mr. President, as has already been stated on the floor of the Senate, last fall certain members of the Senate Banking and Currency Committee, accompanied by a member of the House Banking and Currency Committee, made a trip to South America, in accordance with Senate Resolution 25, I believe. The able and lovable chairman of the Senate committee [Mr. CAPEHART] took advantage of every possible opportunity during that trip to obtain information from our Latin American neighbors. He studied the pros and cons of every question which arose. He talked with businessmen, laborers, and employers. He listened to almost anyone who sought his ear.

The able chairman of the committee returned and made his report. Today, he and the ranking minority member of the committee [Mr. MAYBANK] are sponsoring this bill before the Senate. It is a bill well worth the favorable consideration of this body.

Every cent of money expended by the Export-Import Bank goes into American channels. It is used for the purchase of American goods and services. The Export-Import Bank is not like the International Bank for Reconstruction and Development, which can use its money in any place in the world. As a result of the dollars which the bank loans the pocketbooks and bank accounts of American corporations and individuals will be benefited, and at the same time the economic level of our Latin American neighbors will be raised. When their standard of living is raised—and, as I have indicated, this measure will prove of great assistance in that direction—they will be stronger allies of ours. The security of the Western Hemisphere will be increased. Although this is not a direct appropriation for the Defense Department, certainly indirectly it will play a great part in maintaining the security of our country.

I congratulate the able chairman of the committee, and also the ranking minority member, for all they have done in bringing this bill to the floor of the Senate. It is concise, and is drafted in language which can be understood by everyone. I know that it will be passed by the Senate.

Mr. CAPEHART. Mr. President, the able Senator from Delaware [Mr. FREAR] was a member of our group which went to Latin America and visited 15 countries. He was with us every day, and was just as much responsible as was the chairman for all the meetings which were held, and for the hard work which was done in trying to bring out the facts.

Mr. FREAR. I appreciate the very kind remarks of the Senator from Indiana.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 3589) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 3 of the Export-Import Bank Act of 1945, as amended, is hereby further amended to read as follows:

"SEC. 3. (a) The Export-Import Bank of Washington shall constitute an independent agency of the United States and neither the bank nor any of its functions, powers, or duties shall be transferred to or consolidated with any other department, agency, or corporation of the Government unless the Congress shall otherwise by law provide.

"(b) There shall be a President of the Export-Import Bank of Washington, who shall be appointed by the President of the United States by and with the advice and consent of the Senate, who shall receive a salary at the rate of $17,500 per annum, and who shall serve as chief executive officer of the bank. There shall be a first vice president of the bank, who shall be appointed by the President of the United States by and with the advice and consent of the Senate, who shall receive a salary at the rate of $16,000 per annum, who shall serve as president of the bank during the absence or disability of or in the event of a vacancy in the office of president of the bank, and who shall at other times perform such functions as the president of the bank may from time to time prescribe.

"(c) There shall be a board of directors of the bank consisting of the president of the Export-Import Bank of Washington who shall serve as chairman, the first vice president who shall serve as vice chairman, and three additional persons appointed by the President of the United States by and with the advice and consent of the Senate. Of the 5 members of the board, not more than 3 shall be members of any one political party. Each director, other than the president of the Export-Import Bank and the vice president of the Export-Import Bank, shall receive a salary at the rate of $15,000 per annum. Before entering upon his duties, each of the directors shall take an oath faithfully to discharge the duties of his office. Terms of the directors shall be at the pleasure of the President of the United States, and the directors, in addition to their duties as members of the board, shall perform such additional duties and may hold such other offices in the administration of the bank as the president of the bank may from time to time prescribe. A majority of the board of directors shall constitute a quorum. The board of directors shall adopt, and may from time to time amend, such bylaws as are necessary for the proper management and functioning of the bank, and shall, in such bylaws, designate the vice presidents and other officers of the bank and prescribe their duties.

"(d) There shall be an Advisory Committee of nine members, appointed by the board of directors on the recommendation of the president of the bank, who shall be broadly

representative of production, commerce, finance, agriculture, and labor. The Advisory Committee shall meet one or more times per year, on the call of the president of the bank to advise with the bank on its program. Members of the advisory committee shall be paid a per diem allowance of $50 for each day spent away from their homes or regular places of business, for the purpose of attendance at meetings of the committee, and in necessary travel, and while so engaged they may be paid actual travel expenses and not to exceed $10 per diem in lieu of subsistence and other expenses.

"(e) No director, officer, attorney, agent, or employee of the bank shall in any manner, directly or indirectly, participate in the deliberation upon or the determination of any question affecting his personal interests, or the interests of any corporation, partnership, or association in which he is directly or indirectly personally interested."

SEC. 2. Section 4 (a) of the Bretton Woods Agreements Act, as amended, is hereby further amended by striking out all following "Federal Reserve System," and inserting in lieu thereof "the president of the Export-Import Bank of Washington, and during such period as the Foreign Operations Administration shall continue to exist, the Director of the Foreign Operations Administration."

SEC. 3. The Export-Import Bank Act of 1945, as amended, is hereby further amended as follows:

(a) Section 6 is amended by striking out the words "three and one-half times the authorized capital stock of the bank" and substituting therefor the figure "$4,000,000,000."

(b) Section 7 is amended by striking out the words "four and one-half times the authorized capital stock of the bank" and substituting therefor the figure "$5,000,000,000."

SEC. 4. The provisions of this act for the appointment of a president and a first vice president of the bank and the members of the board of directors shall be effective upon its enactment. The remaining provisions of this act shall become effective when the president and first vice president of the bank and one other member of the board of directors initially appointed hereunder enter upon office, and shall thereupon supersede Reorganization Plan No. 5 of 1953.

MULTIPLE MINERAL DEVELOPMENT

Mr. MARTIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. UPTON in the chair). Without objection, it is so ordered.

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1620, Senate bill 3344.

The PRESIDING OFFICER. The Secretary will state the bill for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 3344) to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

The motion was agreed to, and the Senate proceeded to consider the bill.

CONSTRUCTION OF CERTAIN PUBLIC BUILDINGS BY LEASE-PURCHASE CONTRACTS — CONFERENCE REPORT

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6342) to amend the Public Buildings Act of 1949 to authorize the Administrator of General Services to acquire title to real property and to provide for the construction of certain public buildings thereon by executing purchase contracts, to extend the authority of the Postmaster General to lease quarters for post-office purposes, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

The motion was agreed to, and the Senate proceeded to consider the report.

Mr. MARTIN. Mr. President, the purpose of this bill (H. R. 6342) is to provide for the acquisition of title to real property and construction of public buildings by the Administrator of General Services and the Postmaster General through purchase-contract agreements, and for term-lease agreements for the accommodation of activities of the Federal Government. It provides a supplemental method of securing building space which would be used only in accordance with specified conditions and criteria.

When this bill was passed by the House of Representtaives it contained provisions which constituted a broad delegation of legislative authority to the executive department with respect to obtaining buildings for activities of the Federal Government.

After considering those provisions, the Committee on Public Works recommended certain restraints upon this broad delegation of authority. The Senate accepted these restraints and added further amendments of a restrictive nature. As passed by the Senate, the bill fulfilled its original objective of providing a supplemental method of obtaining Federal building space but only under certain specified criteria and with adequate safeguards to preserve the legislative responsibilities with respect to authorizations for Federal buildings.

Under the agreement recommended by the conferees, the substance of all of the Senate amendments is retained in the act. Many of the Senate amendments are agreed to in their entirety. Other Senate amendments are modified for purposes of clarification.

Mr. President, the report was printed in the RECORD on pages 8877–79, of June 24, and I presume that Senators have read it. Therefore I shall not read the whole report. However, it provides a limitation of 3 years, and during the first year provides a limitation on expenditures by the Post Office Department of $3 million, and by the General Services Administration of $5 million. First, the proposals must be approved by the Bureau of the Budget, setting forth the cost, the amount, the length of the lease, and figures of that kind. Then the proposals are referred to the Public Works Committees of the House and the Senate. It seems to me that the bill has been very carefully safeguarded. It will provide an opportunity to construct post office buildings and other buildings which the Federal Government needs at this time. We have not built any post offices in the United States for a period of 15 years.

The Senator from South Dakota [Mr. CASE], the Senator from California [Mr. KUCHEL], and the Senator from Florida [Mr. HOLLAND], who have done so much work not only in the hearings on the bill before the Committee on Public Works, but in the conference, and I will be very glad to answer any questions that any Senator may wish to propound. I believe it would be better to proceed in that way than for me to read the complete report, which is already printed in the RECORD.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. MARTIN. I yield.

Mr. BYRD. Unfortunately, I have just come into the Chamber, and I did not hear everything the Senator has said. As I understand, the conferees accepted practically all the Senate amendments. Is that correct?

Mr. MARTIN. They accepted practically all the Senate amendments. There was some clarifying language added, but it does not disturb the meaning of the amendments added by the Senate.

Mr. BYRD. The provision requiring approval by the Bureau of the Budget was rewritten, but it is practically in the same language as before. Is that correct?

Mr. MARTIN. It is in the same language, approximately. Certain constitutional questions were brought up, which we did not feel had much merit.

Mr. BYRD. Every agreement must have the approval of the Bureau of the Budget, as I understand.

Mr. MARTIN. It must have the approval of the Bureau of the Budget. In fact, the Director of the Budget must make a recommendation that the building is needed and furnish information concerning the length of the lease, and so forth. Then the recommendation is passed on by the Public Works Committees of both the House and the Senate. There is a limitation of 3 years on the amount of money, namely, the first year, $3 million for the Post Office Department, and $5 million for the General Services Administration.

Mr. BYRD. I thank the Senator from Pennsylvania.

Mr. CASE. Mr. President, will the Senator from Pennsylvania yield?

Mr. MARTIN. I yield.

Mr. CASE. Mr. President, for purposes of the RECORD and in elaboration of the answer which has already been given by the distinguished chairman of the committee to the Senator from Virginia [Mr. BYRD], I should like to point out the process provided by the conference agreement in relation to getting the approval of the Senate and House Committees on Public Works.

In the bill as it passed the Senate, following a prolonged debate, as Senators

will remember, the big issue was the question of an administrative agency coming into agreement with the Committees on Public Works regarding lease-purchase contracts. The conference report eliminates reference to the contracts as such. The action of the committees will be as to projects rather than contracts of agreement. It may amount to the same thing, but there is some difference, because the committees are not required to pass upon particular contracts. It was on that point that the strongest arguments were made by those who feared that some constitutional questions might be involved. The procedure is that the proposed project will be submitted to the Committees on Public Works, and those committees, and through them, the Congress, will retain the right to authorize or not to authorize projects.

At the present time, in the absence of any legislation on the subject, no project can be entered upon by an administrative agency of the Government for the purchase of real estate or the construction of buildings involving the purchase of real estate, except by an authorizing act of the Congress.

This bill retains the authorization power in the hands of the Congress by providing that funds shall not be appropriated by the Congress unless they are based upon a list of eligible projects which has been reviewed by the appropriate committees. It is the belief of the conferees that an appropriation to make rents or rental moneys available for the payment of lease-purchase agreements would not be in order on an appropriation bill if they related to projects which had not been previously established on an eligible list. The conference bill avoids the constitutional question which was raised during the time the measure was under consideration by the Senate, for it does not require the agencies of the Government to submit agreements to the Congress, but they will submit their proposals for authorization, so to speak, by the inclusion on an eligible list, if the appropriate committees of the House and Senate agree.

There is retained in the conference agreement the several provisions which were hammered out in the Senate during the extended debate on the bill, namely, the provisions for detailed information on proposed projects. The approval of the Bureau of the Budget must be included in the data submitted by the General Services Administration or the Postmaster General. The approval of the Bureau of the Budget must be one of the certificates submitted to the Congress. Then there follows a long list of detailed information about the projects provided for in an amendment submitted on the floor of the Senate. So that when the record is complete, we shall not have given any blank checks to any agency of the Government to engage in an unlimited commitment of the Government for monthly payments for rentals or for retiring the principal cost of the buildings.

So, Mr. President, we think we have presented to the Congress a sound piece of legislation. There is a limitation on the time in which eligible lists may be established that will insure review of the Congress.

Mr. President, I wish to commend the diligent work of the junior Senator from California [Mr. KUCHEL] and of the Senator from Florida [Mr. HOLLAND] because of their very careful work during the time the bill was under review by the Senate Committee on Public Works. During the debate the Senator from Virginia [Mr. BYRD] and the Senator from Delaware [Mr. WILLIAMS] raised questions which received serious consideration by the members of the committee at the time the bill was before us.

The bill represents a major piece of legislation. When the record of this Congress is written, I am confident that the authorization here created to provide a public-buildings program, both for general office buildings and for post offices, will be listed among the notable achievements of this Congress. We present the conference report today with full confidence that it embodies a measure which will be useful in the 3 years immediately ahead and which will lay the foundation for constructive, forward-looking, long-range legislation for handling the office problems of the United States Government.

Mr. HOLLAND. Mr. President, will the Senator from Pennsylvania yield?

Mr. MARTIN. I yield.

Mr. HOLLAND. Mr. President, I am sure every Senator realizes that this act is a distinct departure. Certainly the committee members who handled it in the beginning made no pretense that it was not and the conferees now state that the act will be a real departure from earlier practices. The fact of the matter is that the Congress finds itself so overwhelmed with details that it has become increasingly impossible to handle, in the antiquated fashion, special authorizations of the many, many building projects which are now required because of the present size of this Nation.

So, Mr. President, the legislation is experimental. The conference report contains one feature which has already been mentioned, and which was not contained in either the House bill or the Senate bill, which holds the measure to an experimental period of 3 years and points up the fact that the Congress in passing this legislation knows it is truly an experiment which it hopes will succeed, and which it retains the right to review and either continue or completely discontinue after 3 years of trial. Unless Congress acts affirmatively at the end of 3 years, in accordance with this provision in the report, the experiment will come to an end.

Mr. President, the distinguished chairman of the Public Works Committee and the Senator from South Dakota have both stated what is a fact—that nearly all the Senate amendments were preserved intact. The conference report filed by the conferees of the House and appearing in the RECORD shows that to be true, and shows clearly the few changes which were made in the Senate bill, one of which I have already mentioned, namely, the 3-year limitation. That is something new, which appeared for the first time in the conference.

The other two principal changes made in the Senate bill are, first, the one which seeks to substitute a new method of authorization for that which has heretofore prevailed as a part of the legislative process. Senators will recall that when the bill was passed by the Senate it contained a provision which would have granted to the committees of the two Houses the power to have submitted to them the plans and projects of executive agencies for their approval. Their agreement to any proposed project was a condition precedent to any further action taken thereon.

By whatever name it may be called, that procedure was a kind of veto upon the executive in its activities in carrying out the provisions of the act. Lawyers objected to that provision as being unconstitutional. As to the soundness of their objection, the courts alone could say. But certainly there is some substance to the objection.

So the conference report carries out the same intent as effectively as did the Senate bill, by requiring that, as a legislative procedure, any plan or any project, to become a part of the whole operation under this act, before any appropriations for use in the project are ever made, must have been submitted to and approved by the appropriate committees of the two Houses. For the first time, at least, so far as I know, authorization by the two committees will become a condition precedent to the inclusion of that item as such, or of a general item including that and other items, in an appropriation bill. Any efforts to bypass this requirement can be made the subject of a point of order. I shall read into the RECORD three sentences from the statement of the Managers on the part of the House, because they so clearly state the situation:

> Under the new conference language, committee approval must be obtained before the necessary funds can be appropriated. If an appropriation should be proposed without committee approval, such appropriation would be subject to a point of order. Although the conferees feel that such a proposal would not be made, it is their intent and understanding that a point of order can be made and sustained against appropriations for projects lacking committee approval.

I may say that the Parliamentarians of the two Houses have been checked on the matter, and the conferees were advised that this was correct procedure, and that a point of order could properly be made and sustained under the procedure which is established by the bill.

The other real departure in the conference report from the Senate bill—and the only other substantial departure—is one which raises the size of the program for the first year. In the case of the General Services Administration part of the program, the amount is raised from $4 million to a maximum of $5 million.

In the case of the Post Office Department part of the project, the amount is raised from a maximum of $1 million to a maximum of $3 million.

The conferees felt that that was not only in line with the program, but was advantageous, in view of the 3-year re-

striction, which means that a real beginning can be made at once, and the 3 years will reflect a better period of trial than would be the case if the operation got under way more slowly, as was contemplated by the Senate at the time of the passage of the Senate bill.

Without further laboring the question, I merely wish to remind the Senate that the conference report is unanimous. The opinions of the conferees were by no means unanimous when we began the conference but the proposal marks, I think, a rather constructive working out of the ideas of the House and the ideas of the two groups within the Senate, who were striving to achieve something workable in this field, which would relieve Congress of some of the details while, at the same time, not releasing too greatly the powers or the responsibilities of Congress.

Mr. CASE. Mr. President, will the Senator yield?

Mr. HOLLAND. I am glad to yield to the Senator from South Dakota.

Mr. CASE. When the Senator from Florida is mentioning the difficulties and the labors of the committee of conference, I wish to pay tribute to the patience and diplomatic ability of the chairman of the Committee on Public Works, the distinguished Senator from Pennsylvania [Mr. MARTIN].

I think the Senator from Florida will agree with me that although the committee of conference began its work with many points of possible dispute and difference, it was in part, at least, due to the genial disposition, patience, and kindly attitude of the distinguished Senator from Pennsylvania that an agreement was reached.

Mr. HOLLAND. That is certainly true; and I may say that the same observation could be made of the distinguished Senator from South Dakota [Mr. CASE] and the chairman of the House group of conferees, who is also chairman of the Committee on Public Works of our sister body, who also had very definite convictions in the matter.

I think the entire conference was a constructive one, and that definitely useful results were accomplished. Certainly that is the hope and belief of all the conferees.

Mr. KUCHEL. Mr. President, when, approximately a year ago, the Committee on Public Works first began to grapple with the problems of formulating lease-purchase legislation, it studied as a point of departure the three ways by which a public agency acquires the necessary space in which to house its many activities. The first is the outright purchase of property. That type of acquisition, Mr. President, has not been engaged in by the Government of the United States for about a decade and a half. The reason, I think, is quite obvious. The fiscal situation and the difficulties, money-wise, which the Government has encountered in the past 15 years have prevented Congress from making appropriations for the construction of new buildings.

A second way in which space has been historically acquired by the Government has been upon a rental or a lease basis. I think the members of the Committee on Public Works were considerably impressed by the fact that there have been instances when the Government has paid rent on specific buildings for as long as a half century. Obviously, at the end of the 50 years, the Government had nothing to show for its periodic payments of money which had been made. That, I think, has been a real loss. Throughout such extended periods of payment, no equity in the properties has been created in the Goverment.

The third means by which the Government can acquire the space necessary to conduct its operations is through what has been termed a lease-purchase contract, an arrangement known to millions of American families and individuals. It is a method of purchase, by installment payments, of the great majority of homes in which the families of America live.

So it seemed from the very beginning—and I think I can say that there was considerable agreement in the committee—that Congress might well consider the adoption of a proper type of lease-purchase legislation, so that the Government would be able to acquire an equity in the property which it was using, by means of the installment payments, monthly or quarterly, of moneys necessary to continue the occupancy of the buildings.

But it seemed, also, that there appeared a considerable number of hazards in giving to any Federal agency a clear, untrammeled power to enter into lease-purchase agreements wholesale, across the entire breadth of the land. I think that from the very beginning the distinguished Senator from Pennsylvania [Mr. MARTIN], the able chairman of the Public Works Committee, and also the members of the committee from both sides of the aisle, were in firm agreement that Congress ought to reserve to itself, perhaps through the Committees on Public Works of the Senate and the House, some restrictions upon an otherwise untrammeled authority, which was evidenced in the bill as it came from the House of Representatives.

When the bill reached the floor of the Senate, some Members in good faith believed, for constitutional reasons or reasons of policy, that there should be no congressional restraints upon this broad delegation of authority in the bill. On the floor of the Senate the question was debated whether Congress should continue, as the bill indicated it would continue, to maintain an authority over the types of lease-purchase agreements to be entered into, or whether, to the contrary, it should, in wholesale fashion, delegate the authority to enter into lease-purchase agreements to the General Services Administration and the Post Office Department?

The Senate demonstrated conclusively its views upon that question when, by a vote of 60 to 8, it determined that Congress, and the appropriate committees of Congress, should continue to have, a responsibility to determine whether lease-purchase agreements would be or would not be entered into. That responsibility, in acceptable language, remains in the conference report.

The distinguished Senator from South Dakota [Mr. CASE], the able Senator from Delaware [Mr. WILLIAMS], and the distinguished Senator from Virginia [Mr. BYRD] recommended that contractual standards be written into the bill, and the members of the committee were happy to work with them in the preparation of the amendment along that line.

In addition to that, as the distinguished Senator from Florida [Mr. HOLLAND] has suggested, there is also in this proposed legislation the requirement that the Bureau of the Budget itself shall determine whether in each instance a proposed lease-purchase contract will fit into the pattern of things, moneywise, so far as the administration is concerned.

We accomplished one more thing in which I think the people of the country will be interested. We wrote into the bill the provision that, when payments are made by the Government to the individual who is constructing the building and selling it to the United States, and during the entire lifetime of the contract, ad valorem taxes will be paid not only to the community in which the building is located, but also to the county, and to the State as well, in a State where an ad valorem real property tax is in effect. I am a firm adherent to the doctrine that in lieu tax payments should be made by the Federal Government where the burden of large Federal holdings is imposed upon communities.

Until the time comes, and I hope it may be soon, Mr. President, when dwindling local tax bases will not face Federal governmental encroachment, the provisions of this bill will be helpful to the local taxpayer. Until Congress passes legislation to assist American cities as expanded Federal activities bite off great chunks from local tax rolls, we have here a good provision.

The average lease-purchase contract will run, I suppose, 10 years or more; and during that time the property involved will continue to support local government. Meanwhile, I believe broad gage in-lieu tax legislation will have been enacted by the Congress.

So I am confident that we may honestly say that in the proposed legislation, a forward step has been taken, and a modern technique of business has been given to the Federal agencies involved, to enable them to acquire necessary space to house the activities of the Government. This is the same basis of up-to-date procedure which well-managed business employs.

I should like to comment briefly on one more aspect. The bill represents an arrangement which will remain in effect for three years. Out in the open for all those interested to observe, for all in the Government and out of the Government to scrutinize, a record will be made upon which it can then be determined whether this type of legislation should become permanent. If the General Administration Services and the Post Office Department move vigorously, I am sure we will learn before the trial period is over that this plan will solve

problems of governmental agencies as it does for individuals.

It is a fine thing for one such as I, a Member of the Senate for only a short time, to observe the processes by which a bill can be strengthened and safeguarded, all in the public interest, and which, when finally passed, presents to the agencies of the Government a new opportunity, by using good business judgment, to acquire in the towns and communities of America buildings which are necessary to enable the public business of the Government of the United States to be properly conducted.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield to the Senator from Mississippi.

Mr. STENNIS. For the record made on the bill, I think a Senator who is not a member of the conference committee should say a word of commendation for the very fine work which the members of that committee have done with reference to the bill. I am a member of the Senate Committee on Public Works, and I have confessed that the bill came to the floor of the Senate in such form that, after some of the defects were exposed, we did not have as much pride in it as we had theretofore.

This is one instance in which the junior Senator from Mississippi thinks a bill was greatly improved and strengthened on the Senate floor. The bill then went to the conference committee. I was not a member of that committee, but I did, as a substitute, attend one of its meetings in the beginning. It seemed like it was impossible for the members ever to reach a common basis of understanding as a result of which a bill could emerge, much less to have a unanimous report. Because of the very fine work of the competent men who composed the conference group, I think we now have before us a bill which is stronger than it was when it went to conference—stronger by far—and which at the same time retains the principles and the substance contained in the amendments adopted by the Senate, which improved the bill as reported by the committee.

I think a word should be said about the fine work of the Senator from Virginia [Mr. BYRD]. The proposal made by him was a sound one and strengthened the bill, and time will prove the wisdom of his position. Other Senators joined, of course, in his proposal, but, with his usual thoroughness, he presented his proposal on the floor of the Senate, and it was accepted. As a result, I think the bill has been greatly strengthened.

I certainly hope time will prove, as has been stated by the Senator from California, that this arrangement will be an improvement over the old system. The bill presents great possibilities. Congress still has control.

I wish again to commend the conferees and all those who contributed to the provisions of the bill, and express the hope that it will be workable, sound legislation.

Mr. KUCHEL. I should like to say, in answer to the distinguished Senator from Mississippi, that I well recall several instances in which he contributed in great part to the improvement of the proposed legislation. I remember specifically the question whether the Congress should continue to control the decisions which would be made by the Government agencies, that it was his argument which went a long way in the Senate Committee on Public Works toward keeping before the committee the provision on that aspect which is now in the bill. I thank the Senator from Mississippi, along with my other colleagues, the distinguished chairman of the committee, the Senator from Pennsylvania [Mr. MARTIN], the Senator from Florida [Mr. HOLLAND], and the Senator from South Dakota [Mr. CASE]. All of them deserve high praise for their diligent efforts, which resulted in an excellent piece of legislation.

As the Senator from Mississippi has suggested, other distinguished Members of the Senate who are not members of the committee should also be commended. I have in mind the senior Senator from Virginia [Mr. BYRD], who took part in making additional recommendations in the nature of safeguards so far as the public interest is concerned.

Mr. LONG. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield to the Senator from Louisiana.

Mr. LONG. I wish to congratulate the distinguished Senator from California [Mr. KUCHEL] for the fine work he has done on the bill, and also to commend the Senator from Florida [Mr. HOLLAND] for what he did, as well as to thank the other members of the committee and the conferees who have worked out the compromise which is now before the Senate.

It seems to me the conference succeeded in finding a device whereby the committees can very properly keep an eagle eye on the way the post-office leases are handled, in order to make sure that there will not be a repetition of the kind of scandals which took place under section 608 of the Housing Act. I think a very good device has been found under which Congress and the appropriate committees will have an opportunity to examine into the lease-purchase contracts, and make sure they are in the public interest when it is necessary that contracts be entered into for the construction of post offices.

Mr. KUCHEL. If I may for a moment speak for all my brethren on the committee, I wish to express our thanks for the comments which the Senator has made. And the Senator from Louisiana is completely right when he says the bill is in the public interest. The conference bill provides for a complete disclosure of all contracts for post offices and other governmental buildings which it is contemplated will be entered into by the two Government agencies.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. KUCHEL. I am happy to yield to the distinguished Senator from Kansas.

Mr. CARLSON. I, too, wish to express my appreciation to the members on the Committee on Public Works, to the subcommittee, and to the conference committee, for the work they did on the bill. As the distinguished Senator from California, the distinguished Senator from Florida, and other Senators who worked on the bill very diligently, may know, I was somewhat concerned, because we were entering a new field, that legislation would be proposed which would prove to be ineffective.

I wish to say that I am greatly pleased with the conference report which has been returned. The bill provides the Government with an opportunity now to construct buildings throughout the Nation under lease-purchase contracts, and instead of paying rentals for literally hundreds of years, the Government, in a matter of years, will own the buildings. That is a program which is new.

I think the committee is entitled to the thanks of the Congress and the people of the country. I am aware of the crosscurrents and concerns encountered during the writing of the proposed legislation.

I am happy to appear in the Senate this afternoon and express my delight and my sincere thanks to the members of the committee for the work they have done on the bill, because I know that in the future the Government will receive value for the money it spends for the buildings contemplated under the bill. I can speak from experience as a former Governor of Kansas, where there is in operation a plan similar to the one now proposed for the Federal Government. I can inform the Senate that in Kansas the plan is working very well.

We are indebted to the chairman of the subcommittee, the Senator from California [Mr. KUCHEL], and to the chairman of the full committee.

Mr. KUCHEL. I am sure I speak for every member of the subcommittee and the full committee in expressing my thanks for the generous comments of the Senator.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. MARTIN. Mr. President, following adoption of the conference report, I wish to express my appreciation of the excellent work done by the subcommittee having the bill under consideration. The bill has been considered for almost 1 year. It represents a complete departure from anything the United States Government has previously undertaken.

Personally, I think the bill provides sufficient safeguards, and that it will work to the advantage of the American people.

At this time I wish to thank the chairman of the subcommittee, the junior Senator from California [Mr. KUCHEL], and also the Senator from South Dakota [Mr. CASE], and the Senator from Florida [Mr. HOLLAND], all of whom devoted many hours and earnest efforts to the formulation of the bill. I also wish to thank the other Senators who, when the bill came to the floor of the Senate, helped work out the amendments and devoted a great deal of time and effort to their consideration. I also wish to express my profound appreciation and thanks to the Senate Members and also the House Members of the committee of conference. All of them worked dili-

gently toward the sole end of preparing a bill which would contain proper safeguards and also provide for accomplishing the desired results.

Mr. President, at this time I wish to state that the Senator from Washington [Mr. MAGNUSON] was in opposition to the bill. If he were now on the floor, I believe he might wish to express his opposition to the bill. Last night he told me that at this time he would not do anything except express his opposition. In fairness to him, I think that statement should be made.

CONSTRUCTION OF CERTAIN PUBLIC BUILDINGS BY PURCHASE CONTRACTS—CORRECTIONS IN ENROLLMENT OF BILL

The PRESIDING OFFICER (Mr. UPTON in the chair) laid before the Senate House Concurrent Resolution 251, which was read as follows:

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill H. R. 6342 entitled "An act to amend the Public Buildings Act of 1949 to authorize the Administrator of General Services to acquire title to real property and to provide for the construction of certain public buildings thereon by executing purchase contracts; to extend the authority of the Postmaster General to lease quarters for post-office purposes; and for other purposes," the Clerk of the House is authorized and directed to make the following corrections:

At the end of the matter inserted in lieu of that proposed by the amendment of the Senate numbered 1 insert a period in lieu of the semicolon.

In the matter inserted in lieu of that proposed by the amendment of the Senate numbered 5 insert quotation marks before each of the eight parenthetical numerals, and at the end of such matter insert a period in lieu of the semicolon.

At the end of the matter inserted in lieu of that proposed by the amendment of the Senate numbered 15 insert a period in lieu of the semicolon.

At the end of the matter inserted in lieu of that proposed by the amendment of the Senate numbered 17 insert a period in lieu of the semicolon.

At the end of the matter inserted in lieu of that proposed by the amendment of the Senate numbered 19 insert a comma in lieu of the semicolon.

Mr. MARTIN. Mr. President, I ask unanimous consent for the present consideration of the concurrent resolution.

There being no objection, the concurrent resolution (H. Con. Res. 251) was considered and agreed to.

MULTIPLE MINERAL USE OF PUBLIC LANDS

The Senate resumed the consideration of the bill (S. 3344) to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes.

Mr. SMATHERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BEALL in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SMATHERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the first committee amendment.

Mr. SMATHERS. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendments agreed to en bloc are as follows:

On page 4, at the beginning of line 6, to strike out "February 10, 1954" and insert "December 11, 1953"; on page 5, line 20, after the word "tract", to insert "then available for such leasing"; on page 8, line 7, after the word "leasing", to strike out "law" and insert "laws"; on page 11, line 22, after the word "as", to strike out "he" and insert "the Secretary"; in line 24, after the word "lease", to insert "provided expressly, that not less than ninety days prior to the filing of such request for publication there shall have been filed for record in the county office of record for the county in which the lands covered thereby are situate a notice of the filing of such application or offer or of the issuance of such permit or lease which notice shall set forth the date of such filing or issuance, the name and address of the applicant, offeror, permittee or lessee and the description of the lands covered by such application, offer, permit or lease"; on page 12, line 9, after the word "by", to insert "a certified copy of such recorded notice and"; after line 24, to insert:

"The filing of such request for publication shall also be accompanied by the certificate of a title or abstract company, or of a title abstractor, or of an attorney, based upon such company's abstractor's, or attorney's examination of the instruments affecting the lands involved, of record in the public records of the county in which said lands are situate as shown by the indices of the public records in the county office of record for said county, setting forth the name of any person disclosed by said instruments to have an interest in said lands under any unpatented mining claim heretofore located, together with the address of such person if disclosed by such instruments of record."

On page 14, at the beginning of line 1, to insert "heretofore located"; on page 15, line 17, after the word "be", to strike out "sent" and insert "mailed"; on page 15, line 22, after "section 7," to insert "and shall cause a copy of such notice to be mailed by registered mail to each person whose name and address is set forth in the title or abstract company's or title abstractor's attorney's certificate filed as aforesaid, as having an interest in the lands described in said notice under any unpatented mining claim heretofore located, such notice to be directed to such person's address as set forth in such certificate"; on page 16, at the beginning of line 8, to insert "heretofore located"; on page 17, line 19, after the word "claim", to insert "heretofore located"; on page 19, after line 23, to strike out:

"SEC. 9. Notwithstanding the provisions of the Atomic Energy Act, and particularly section 5 (b) (7) thereof, or the provisions of the act of August 12, 1953 (67 Stat. 539), and particularly section 3 thereof, any mining claim, whether heretofore or hereafter located under the mining laws of the United States, for, or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of the Atomic Energy Act, would have been or would be locatable under such mining laws, shall be valid and effective in all respects to the same extent as if said mineral deposit were a locatable mineral deposit other than a fissionable source material. Notwithstanding the provisions of said section 5 (b) (7) of the Atomic Energy Act no mining claim heretofore or hereafter located under the mining laws of the United States shall be subject to, and no mineral patent hereafter issued shall contain, a reservation to the United States of fissionable source material, but the United States, its agents or representatives, shall have the right at any time to enter upon the land to prospect for, mine and remove fissionable source material upon making just compensation for any damage or injury occasioned thereby: *Provided*, That no such right of entry shall be exercised unless the Atomic Energy Commission shall have determined that the security needs of the United States require emergency production of fissionable source materials: *Provided further*, That the amounts to be paid to the owners of rights under any such mining claim for any fissionable source material so mined and removed by the United States, its agents or representatives, shall be such amounts as the Commission in its discretion deems to be fair and reasonable."

On page 21, after line 4, to insert:

"SEC. 9. Notwithstanding any previous act, regulation, or decision, the reservation of minerals in lands withdrawn from the public domain for mineral purposes by Executive order, proclamation, or other administrative procedure shall be applicable only to those minerals and for the purposes expressed in said Executive order, proclamation, or other administrative procedure. The Secretary of the Interior shall retain the power and authority to dispose of other leasable minerals in said lands by leasing procedures applicable to the public domain. This section shall become effective April 1, 1955."

On page 21, after line 15, to insert:

"SEC. 10. The Atomic Energy Act is hereby amended as follows:

"(a) Section 5 (b) (5) is revised to read:

"'(5) Acquisition: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to purchase, take, requisition, condemn, or otherwise acquire—

"'(A) supplies of source materials or any interest in real property containing deposits of source materials; and

"'(B) rights to enter upon any real property deemed by it to have possibilities of containing deposits of source materials and to conduct prospecting and exploratory operations for such deposits.

Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property or interest in property taken, requisitioned, or condemned under this paragraph.'

"(b) Section 5 (b) (6) is revised to read:

"'(6) Operations on lands belonging to the United States: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to issue leases or permits for prospecting for, exploration for, mining, or removal of deposits of source materials (or for any or all of these purposes) in lands belonging to the United States.'

"(c) Section 5 (b) (7) is revised to read:

"'(7) Public lands: No individual, corporation, partnership, or association, which had

any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual, corporation, partnership, or association took part in such project, if such individual, corporation, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such uranium, thorium, or other materials in the specific lands upon which such location, entry, or settlement is made, and subsequent to the date of the enactment of this act made such location, entry, or settlement or cause the same to be made for his, or its, or their benefit. In cases where any patent, conveyance, lease, permit, or other authorization has been issued, which reserved to the United States source materials and the right to enter upon the land and prospect for, mine, and remove the same, the head of the department or agency which issued the patent, conveyance, lease, permit, or other authorization shall, on application of the holder thereof, issue a new or supplemental patent, conveyance, lease, permit, or other authorization without such reservation.'

"(d) Notwithstanding the provisions of the Atomic Energy Act, and particularly section 5 (b) (7) thereof, prior to its amendment hereby, or the provisions of the act of August 12, 1953 (67 Stat. 539), and particularly section 3 thereof, any mining claim, heretofore located under the mining laws of the United States, for, or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of said Atomic Energy Act, would have been locatable under such mining laws, shall, insofar as adversely affected by such possible contrary construction, be valid and effective, in all respects to the same extent as if said mineral deposit were a locatable mineral deposit other than a fissionable source material."

On page 24, line 12, to change the section number from "10" to "11"; on page 25, line 10, after "(60 Stat. 755)", to strike out "and all heretofore enacted acts which are amendatory of or supplementary to said act" and insert "as amended"; in line 16, after "5 (b)", to strike out "(7)" and insert "(1))"; in line 18, after the word "States", to strike out "'uranium lease application' shall mean an application for a uranium lease filed with said Commission pursuant to the provisions of its Domestic Uranium Program Circular 7 (10 C. F. R. 60.7); 'uranium lease' shall mean a uranium mining lease issued by said Commission pursuant to the provisions of said Circular" and insert "'uranium lease application' shall mean an application for a uranium lease filed with said Commission with respect to lands which would be open for entry under the mining laws except for their being lands embraced within an offer, application, permit, or lease under the mineral leasing laws or lands known to be valuable for minerals leasable under those laws; 'uranium lease' shall mean a uranium mining lease issued by said Commission with respect to any such lands"; and on page 26, line 8, to change the section number from "11" to "12", so as to make the bill read:

"*Be it enacted, etc.*, That, (a) subject to the conditions and provisions of this act and to any valid intervening rights acquired under the laws of the United States, any mining claim located under the mining laws of the United States subsequent to July 31, 1939, and prior to February 10, 1954, on lands of the United States, which at the time of location were—

"(1) included in a permit or lease issued under the mineral leasing laws; or

"(2) covered by an application or offer for a permit or lease which had been filed under the mineral leasing laws; or

"(3) known to be valuable for minerals subject to disposition under the mineral leasing laws,

shall be effective to the same extent in all respects as if such lands at the time of location, and at all times thereafter, had not been so included or covered or known: *Provided, however*, That, in order to be entitled to the benefits of this act, the owner of any such mining claim located prior to January 1, 1953, must have posted and filed for record, within the time allowed by the provisions of the act of August 12, 1953 (67 Stat. 539), an amended notice of location as to such mining claim, stating that such notice was filed pursuant to the provisions of said act of August 12, 1953, and for the purpose of obtaining the benefits thereof: *And provided further*, That, in order to obtain the benefits of this act, the owner of any such mining claim located subsequent to December 31, 1952, and prior to February 10, 1954, not later than 120 days after the date of enactment of this act, must post on such claim in the manner required for posting notice of location of mining claims and file for record in the office where the notice or certificate of location of such claim is of record, an amended notice of location for such claim, stating that such notice is filed pursuant to the provisions of this act and for the purpose of obtaining the benefits thereof and, within said 120-day period, if such owner shall have filed a uranium lease application as to the tract covered by such mining claim, must file with the Atomic Energy Commission a withdrawal of such uranium lease application or, if a uranium lease shall have issued pursuant thereto, a release of such lease, and must record a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall have been filed for record.

"(b) Labor performed or improvements made after the original location of and upon or for the benefit of any mining claim which shall be entitled to the benefits of this act under the provisions of subsection (a) of this section 1, shall be recognized as applicable to such mining claim for all purposes to the same extent as if the validity of such mining claim were in no respect dependent upon the provisions of this act.

"(c) As to any land covered by any mining claim which is entitled to the benefits of this act under the provisions of subsection (a) of this section 1, any withdrawal or reservation of lands made after the original location of such mining claim is hereby modified and amended so that the effect thereof upon such mining claim shall be the same as if such mining claim had been located upon lands of the United States which, subsequent to July 31, 1939, and prior to the date of such withdrawal or reservation, were subject to location under the mining laws of the United States.

"SEC. 2. (a) If any mining claim which shall have been located subseqeunt to December 31, 1952, and prior to December 11, 1953, and which shall be entitled to the benefits of this act, shall cover any lands embraced within any mining claim which shall have been located prior to January 1, 1953, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim so located subsequent to December 31, 1952, shall be deemed to have been located December 11, 1953.

"(b) If any mining claim hereafter located shall cover any lands embraced within any mining claim which shall have been located prior to February 10, 1954, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim hereafter located shall be deemed to have been located 121 days after the date of the enactment of this act.

"SEC. 3. (a) Subject to the conditions and provisions of this act and to any valid prior rights acquired under the laws of the United States, the owner of any pending uranium lease application or of any uranium lease shall have, for a period of 120 days after the date of enactment of this act, as limited in subsection (b) of this section 3, the right to locate mining claims upon the lands covered by said application or lease.

"(b) Any rights under any such mining claim so hereafter located pursuant to the provisions of subsection (a) of this section 3 shall be subject to any rights of the owner of any mining claim which was located prior to February 10, 1954, and which was valid at the date of the enactment of this act or which may acquire validity under the provisions of this act. As to any lands covered by a uranium lease and also by a pending uranium lease application, the right of mining location under this section 3, as between the owner of said lease and the owner of said application, shall be deemed as to such conflict area to be vested in the owner of said lease. As to any lands embraced in more than one such pending uranium lease application, such right of mining location, as between the owners of such conflicting applications, shall be deemed to be vested in the owner of the prior application. Priority of such an application shall be determined by the time of posting on a tract then available for such leasing of a notice of lease application in accordance with paragraph (c) of the Atomic Energy Commission's Domestic Uranium Program Circular 7 (10 C. F. R. 60.7 (c)) provided there shall have been timely compliance with the other provisions of said paragraph (c), or, if there shall not have been such timely compliance, then by the time of the filing of the uranium lease application with the Atomic Energy Commission. Any rights under any mining claim located under the provisions of this section 3 shall terminate at the expiration of 30 days after the filing for record of the notice or certificate of location of such mining claim unless, within said 30-day period, the owner of the uranium lease application or uranium lease upon which the location of such mining claim was predicated shall have filed with the Atomic Energy Commission a withdrawal of said application or a release of said lease and shall have recorded a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall be of record.

"(c) Except as otherwise provided in subsections (a) and (b) of this section 3, no mining claim hereafter located shall be valid as to any lands which at the time of such location were covered by a uranium lease application or a uranium lease. Any tract upon which a notice of lease application has been posted in accordance with said paragraph (c) of said Circular 7 shall be deemed to have been included in a uranium lease application from and after the time of the posting of such notice of lease application: *Provided*, That there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then from and after the time of the filing of a uranium lease application with the Atomic Energy Commission.

"SEC. 4. Every mining claim or millsite hereafter located under the mining laws of the United States and every mining claim or millsite heretofore so located which shall be entitled to benefits under the first three sections of this act shall be subject to a reservation to the United States of all Leasing Act minerals and of the right (as limited in section 6 hereof) of the United States, its lessees, permittees, and licensees to enter upon the land covered by such mining claim or millsite and to prospect for, drill for, mine, treat, store, transport, and remove Leasing Act minerals and to use so much of the surface and subsurface of such mining claim or millsite as may be necessary for such purposes, and whenever reasonably

necessary, for the purpose of prospecting for, drilling for, mining, treating, storing, transporting, and removing Leasing Act minerals on and from other lands; and any patent issued for any such mining claim or millsite shall contain such reservation.

"SEC. 5. Subject to the conditions and provisions of this act, mining claims and millsites may hereafter be located under the mining laws of the United States on lands of the United States which at the time of location are—

"(a) included in a permit or lease issued under the mineral leasing laws; or

"(b) covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

"(c) known to be valuable for minerals subject to disposition under the mineral leasing laws;

to the same extent in all respects as if such lands were not so included or covered or known.

"SEC. 6. (a) Where the same lands are being utilized for mining operations and Leasing Act operations, each of such operations shall be conducted, so far as reasonably practicable, in a manner compatible with such multiple use.

"(b) Any mining operations pursuant to rights under any unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any Leasing Act mineral. Subject to the provisions of subsection (d) of this section 6, mining operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of Leasing Act operations, or with the utilization of such improvements, workings, or facilities.

"(c) Any Leasing Act operations on lands covered by an unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any mineral not so reserved from such mining claim or millsite. Subject to the provisions of subsection (d) of this section 6, Leasing Act operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of mining operations, or with the utilization of such improvements, workings, or facilities.

"(d) If, upon petition of either the mining operator or the Leasing Act operator, any court of competent jurisdiction shall find that a particular use in connection with one of such operations cannot be reasonably and properly conducted without endangering or materially interfering with the then existing improvements, workings, or facilities of the other of such operations or with the utilization thereof, and shall find that under the conditions and circumstances, as they then appear, the injury or damage which would result from denial of such particular use would outweigh the injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof if that particular use were allowed, then and in such event such court may permit such use upon payment (or upon furnishing of security determined by the court to be adequate to secure payment) to the party or parties who would be thus injured or damaged, of an amount to be fixed by the court as constituting fair compensation for the then reasonably contemplated injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof by reason of the allowance of such particular use.

"(e) Where the same lands are being utilized for mining operations and Leasing Act operations, then upon request of the party conducting either of said operations, the party conducting the other of said operations shall furnish to and at the expense of such requesting party copies of any information which said other party may have, as to the situs of any improvements, workings, or facilities theretofore made upon such lands, and upon like request, shall permit such requesting party, at the risk of such requesting party, to have access at reasonable times to any such improvements, workings, or facilities for the purpose of surveying and checking or determining the situs thereof. If damage to or material interference with a party's improvements, workings, facilities, or with the utilization thereof shall result from such party's failure, after request, to so furnish to the requesting party such information or from denial of such access, such failure or denial shall relieve the requesting party of any liability for the damage or interference resulting by reason of such failure or denial. Failure of a party to furnish requested information or access shall not impose upon such party any liability to the requesting party other than for such costs of court and attorney's fees as may be allowed to the requesting party in enforcing by court action the obligations of this section as to the furnishing of information and access. The obligation hereunder of any party to furnish requested information shall be limited to map and survey information then available to such party with respect to the situs of improvements, workings, and facilities and the furnishing thereof shall not be deemed to constitute any representation as to the accuracy of such information.

"SEC. 7. (a) Any applicant, offeror, permittee, or lessee under the mineral leasing laws may file in the Office of the Secretary of the Interior, or in such office as the Secretary may designate, a request for publication of notice of such application, offer, permit, or lease, provided expressly, that not less than 90 days prior to the filing of such request for publication there shall have been filed for record in the county office of record for the county in which the lands covered thereby are situate a notice of the filing of such application or offer or of the issuance of such permit or lease which notice shall set forth the date of such filing or issuance, the name and address of the applicant, offeror, permittee or lessee and the description of the lands covered by such application, offer, permit or lease. The filing of such request for publication shall be accompanied by a certified copy of such recorded notice and an affidavit or affidavits of a person or persons over 21 years of age setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in actual possession of or engaged in the working of such lands or any part thereof, and, if no person or persons were found to be in actual possession of or engaged in the working of said lands or any part thereof on the date of such examination, setting forth such fact, or, if any person or persons were so found to be in actual possession or engaged in such working on the date of such examination, setting forth the name and address of each such person, unless affiant shall have been unable through reasonable inquiry to obtain information as to the name and address of any such person, in which event the affidavit shall set forth fully the nature and results of such inquiry.

"The filing of such request for publication shall also be accompanied by the certificate of a title or abstract company, or of a title abstractor, or of an attorney, based upon such company's, abstractor's, or attorney's examination of the instruments affecting the lands involved, of record in the public records of the county in which said lands are situate as shown by the indices of the public records in the county office of record for said county, setting forth the name of any person disclosed by said instruments to have an interest in said lands under any unpatented mining claim heretofore located, together with the address of such person if disclosed by such instruments of record.

"Thereupon the Secretary of the Interior, or his designated representative, at the expense of the requesting person (who, prior to the commencement of publication, must furnish the agreement of the publisher to hold such requesting person alone responsible for charges of publication), shall cause notice of such application, offer, permit, or lease to be published in a newspaper having general circulation in the county in which the lands involved are situate.

"Such notice shall describe the lands covered by such application, offer, permit, or lease and shall notify whomever it may concern that if any person claiming or asserting under, or by virtue of, any unpatented mining claim heretofore located, any right or interest in Leasing Act minerals as to such lands or any part thereof, shall fail to file in the office where such request for publication was filed (which office shall be specified in such notice) and within 150 days from the date of the first publication of such notice, a verified statement which shall set forth, as to such unpatented mining claim:

"(1) The date of location;

"(2) The book and page of recordation of the notice or certificate of location;

"(3) The section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument;

"(4) Whether such claimant is a locator or purchaser under such location; and

"(5) The name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatented mining claim; such failure shall be conclusively deemed (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

"If such notice is published in a daily paper, it shall be published in the Wednesday issue for 9 consecutive weeks, or, if in a weekly paper, in 9 consecutive issues, or, if in a semiweekly or triweekly paper, in the issue of the same day of each week for 9 consecutive weeks.

"Within 15 days after the date of first publication of such notice, the person requesting such publication (1) shall cause a copy of such notice to be personally delivered to or to be mailed by registered mail addressed to each person in possession or engaged in the working of the land whose name and address is shown by an affidavit filed as aforesaid, and to each person who may have filed, as to any lands described in said notice, a request for notices, as provided in subsection (d) of this section 7, and shall cause a copy of such notice to be mailed by registered mail to each person whose name and address is set forth in the title or abstract company's or title abstractor's or attorney's certificate

filed as aforesaid, as having an interest in the lands described in said notice under any unpatented mining claim heretofore located, such notice to be directed to such person's address as set forth in such certificate; and (2) shall file in the office where said request for publication was filed an affidavit showing that copies have been so delivered or mailed.

"(b) If any claimant under any unpatented mining claim heretofore located which embraces any of the lands described in any notice published in accordance with the provisions of subsection (a) of this section 7 shall fail to file a verified statement, as above provided, within 150 days from the date of the first publication of such notice, such failure shall be conclusively deemed, except as otherwise provided in subsection (e) of this section 7, (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

"(c) If any verified statement shall be filed by a mining claimant as provided in subsection (a) of this section 7, then the Secretary of the Interior or his designated representative shall fix a time and place for a hearing to determine the validity and effectiveness of the mining claimant's asserted right or interest in Leasing Act minerals. The procedures with respect to notice of such a hearing and the conduct thereof, and in respect to appeals shall follow the then established general procedures and rules of practice of the Department of the Interior in respect to contests or protests affecing public lands of the United States. If at any time prior to a hearing the person requesting publication of notice and any person filing a verified statement pursuant to such notice shall so stipulate, then to the extent so stipulated, but only to such extent, no hearing shall be held with respect to rights asserted under that verified statement, and to the extent defined by the stipulation the rights asserted under that verified statement shall be deemed to be unaffected by that particular published notice.

"(d) Any person claiming any right in leasing-act minerals under or by virtue of any unpatented mining claim hertofore located and desiring to receive a copy of any notice of any application, offer, permit, or lease which may be published as above provided in subsection (a) of this section 7, and which may affect lands embraced in such mining claim, may cause to be filed for record in the county office of record where the notice or certificate of location of such mining claim shall have been recorded, a duly acknowledged request for a copy of any such notice. Such request for copies shall set forth the name and address of the person requesting copies and shall also set forth, as to each mining claim under which such person asserts rights in leasing-act minerals:

"(1) the date of location;

"(2) the book and page of the recordation of the notice or certificate of location; and

"(3) the section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument.

Other than in respect to the requirements of subsection (a) of this section 7 as to personal delivery or mailing of copies of notices and in respect to the provisions of subsection (e) of this section 7, no such request for copies of published notices and no statement or allegation in such request and no recordation thereof shall affect title to any mining claim or to any land, or be deemed to constitute constructive notice to any person that the person requesting copies has, or claims, any right, title, or interest in or under any mining claim referred to in such request.

"(e) If any applicant, offeror, permittee, or lessee shall fail to comply with the requirements of subsection (a) of this section 7 as to the personal delivery or mailing of a copy of notice to any person, the publication of such notice shall be deemed wholly ineffectual as to that person or as to the rights asserted by that person and the failure of that person to file a verified statement, as provided in such notice, shall in no manner affect, diminish, prejudice or bar any rights of that person.

"SEC. 8. The owner or owners of any mining claim heretofore located may, at any time prior to issuance of patent therefor, waive and relinquish all rights thereunder to leasing-act minerals. The execution and acknowledgment of such a waiver and relinquishment by such owner or owners and the recordation thereof in the office where the notice or certificate of location of such mining claim is of record shall render such mining claim thereafter subject to the reservation referred to in section 4 of this act and any patent issued therefor shall contain such a reservation, but no such waiver or relinquishment shall be deemed in any manner to constitute any concession as to the date of priority of rights under said mining claim or as to the validity thereof.

"SEC. 9. Notwithstanding any previous act, regulation, or decision, the reservation of minerals in lands withdrawn from the public domain for mineral purposes by Executive order, proclamation, or other administrative procedure shall be applicable only to those minerals and for the purposes expressed in said Executive order, proclamation, or other administrative procedure. The Secretary of the Interior shall retain the power and authority to dispose of other leasable minerals in said lands by leasing procedures applicable to the public domain. This section shall become effective April 1, 1955.

"SEC. 10. The Atomic Energy Act is hereby amended as follows:

"(a) Section 5 (b) (5) is revised to read:

"'(5) Acquisition: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to purchase, take, requisition, condemn, or otherwise acquire—

"'(A) supplies of source materials or any interest in real property containing deposits of source materials; and

"'(B) rights to enter upon any real property deemed by it to have possibilities of containing deposits of source materials and to conduct prospecting and exploratory operations for such deposits.

'Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property or interest in property taken, requisitioned, or condemned under this paragraph.'

"(b) Section 5 (b) (6) is revised to read:

"'(6) Operations on lands belonging to the United States: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to issue leases or permits for prospecting for, exploration for, mining, or removal of deposits of source materials (or for any or all of these purposes) in lands belonging to the United States.'

"(c) Section 5 (b) (7) is revised to read:

"'(7) Public lands: No individual, corporation, partnership, or association, which had any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual, corporation, partnership, or association took part in such project, if such individual, corporation, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such uranium, thorium, or other materials in the specific lands upon which such location, entry, or settlement is made, and subsequent to the date of the enactment of this act made such location, entry, or settlement or cause the same to be made for his, or its, or their benefit. In cases where any patent, conveyance, lease, permit, or other authorization has been issued, which reserved to the United States source materials and the right to enter upon the land and prospect for, mine, and remove the same, the head of the department or agency which issued the patent, conveyance, lease, permit, or other authorization shall, on application of the holder thereof, issue a new or supplemental patent, conveyance, lease, permit, or other authorization without such reservation.'

"(d) Notwithstanding the provisions of the Atomic Energy Act, and particularly section 5 (b) (7) thereof, prior to its amendment hereby, or the provisions of the act of August 12, 1953 (67 Stat. 539), and particularly section 3 thereof, any mining claim, heretofore located under the mining laws of the United States for, or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of said Atomic Energy Act, would have been locatable under such mining laws, shall, insofar as adversely affected by such possible contrary construction, be valid and effective, in all respects to the same extent as if said mineral deposit were a locatable mineral deposit other than a fissionable source material.

"SEC. 11. As used in this act 'mineral leasing laws' shall mean the act of October 20, 1914 (38 Stat. 741); the act of February 25, 1920 (41 Stat. 437); the act of April 17, 1926 (44 Stat. 301); the act of February 7, 1927 (44 Stat. 1057); and all acts heretofore or hereafter enacted which are amendatory of or supplementary to any of the foregoing act; 'Leasing Act minerals' shall mean all minerals which, upon the effective date of this act, are provided in the mineral leasing laws to be disposed of thereunder, 'Leasing Act operations' shall mean operations conducted under a lease, permit, or license issued under the mineral leasing laws in or incidental to prospecting for, drilling for, mining, treating, storing, transporting, or removing Leasing Act minerals; 'mining operations' shall mean operations under any unpatented or patented mining claim or millsite in or incidental to prospecting for, mining, treating, storing, transporting, or removing minerals other than Leasing Act minerals and any other use under any claim of right or title based upon such mining claim or millsite; 'Leasing Act operator' shall mean any party who shall conduct Leasing Act operations; 'mining operator' shall mean any party who shall conduct mining operations; 'Atomic Energy Act' shall mean the act of August 1, 1946 (60 Stat. 755), as amended; 'Atomic Energy Commission' shall mean the United States Atomic Energy Commission established under the Atomic Energy Act or any amendments

thereof; 'fissionable source material' shall mean uranium, thorium, and all other materials referred to in section 5 (b) (1) of the Atomic Energy Act as reserved or to be reserved to the United States; 'uranium lease application' shall mean an application for a uranium lease filed with said Commission with respect to lands which would be open for entry under the mining laws except for their being lands embraced within an offer, application, permit, or lease under the mineral leasing laws or lands known to be valuable for minerals leasable under those laws; 'uranium lease' shall mean a uranium mining lease issued by said Commission with respect to any such lands; and 'person' shall mean any individual, corporation, partnership, or other legal entity.

"SEC. 12. If any provision of this act, or the application of such provision to any person or circumstances, is held unconstitutional, invalid, or unenforcible, the remainder of this act or the application of such provision to persons or circumstances other than those as to which it is held unconstitutional, invalid, or unenforcible, shall not be affected thereby."

Mr. BARRETT. Mr. President, the Mining Act of 1872 provided for the location of mining claims on public lands. It was contemplated under that act that the minerals of the country would be disposed of completely and exclusively under its provisions. The first radical departure from that system came about through the passage of the Mineral Leasing Act of 1920. That act provided that, save for valid claims then existing, oil, gas, coal, phosphate, sodium or oil shale could be disposed of only under that legislation. That act also provided that lands which were known to contain those minerals or which were under lease to develop such minerals were not subject to location under the mining law of 1872.

From the passage of the Leasing Act the conflict between the Mining Act system and the leasing system increased with the years. The basic principles of the mining law, with its exclusiveness and entirety of disposition, was wholly inconsistent with the limited method of disposition under the Leasing Act. And so, Mr. President, the conflict between these two distinct but entirely opposite systems for public land usage and disposition grew with expansion under each method until the situation became not only both acute and intolerable to everyone concerned, but against the public interest as well.

STATUS OF URANIUM CLAIMS IN DOUBT

When it was found last year that hundreds of very valuable uranium claims on the Colorado plateau were in a very doubtful legal status because of the conflict between the two systems it was found necessary to do something. Stopgap legislation was enacted. Then and there advocates of each system determined that, as a matter of public policy, a sincere effort should be made to find a compatible system of land use under both the Mining Act and the Leasing Act.

To my way of thinking, Mr. President, representatives of each system are to be congratulated for their sincere efforts to rise above narrow self interest of their separate industries and to look upon the problem from the standpoint of the broad public interest. Their sole desire was to find remedial legislation that would permit maximum utilization of our mineral resources.

Their objective was to find a method under which the utilization of one resource would not unduly interfere with the utilization of another resource. So, we have proposed legislation before us today that is approved largely by mining men, including uranium miners, and by the oil and gas industry as well. This bill makes provision for concurrent and multiple usages of our natural resources under both systems. The bill has the approval of the Secretary of the Interior, the Bureau of the Budget, the Atomic Energy Commission, and the Joint Committee on Atomic Energy of the Congress.

SIXTY MILLION ACRES OPENED TO MINE LOCATION

This bill will open to location under the mining laws about 60 million acres now withdrawn under the Mineral Leasing Act. So, Mr. President, the search for uranium will benefit immeasurably if this legislation is enacted.

The stopgap legislation of last year provided a cutoff date of December 31, 1952. The first three section of the bill are designed to protect equities created as a result of last year's legislation.

Section 1 gives a preference to any mining claimant who attempted to validate his claim under Public Law 250. This section brings forward the cutoff date of Public Law 250 to February 10, 1954, in order to protect those who acted in good faith in prospecting between January 1, 1953, and the issuance of AEC circular No. 7 which outlined procedures for uranium leases.

Section 2 gives priorities to claimants having equities as a result of Public Law 250. Where conflicts develop claims located during the period of last year's law have preference to those located after the cutoff date. Also, preference is given to those claims located before February 10, 1954, and those located after that date.

Section 3 gives the owner of an AEC lease the right to file a mining claim on the same lands subject to a mining claim filed before February 10, 1954, and valid.

PROVISION FOR MULTIPLE USE

Sections 4 and 5 establish a basis for multiple use of the same lands under the mining laws and the Mineral Leasing Act. All future mining claims and patents are to provide for the reservation of Mineral Leasing Act minerals. Also, mining claims can be located on lands leased under the Mineral Act, or known to be valuable for Leasing Act minerals.

Section 6 establishes the basic principles of operation which are to be followed under multiple use of the same lands. It establishes the general principle that each operation shall be conducted in a manner compatible with any other mineral use insofar as reasonably practicable. This is a reciprocal section, and calls upon the miner and the lessee to act in such a manner as not to unreasonably interfere with the operations of each other.

DORMANT CLAIMS

Section 7 provides an in rem procedure where those who claim rights in the Leasing Act minerals under an unpatented mining claim can be called upon to come forward and assert those rights. It is based upon the procedure known to mining people under patent application. It has been held that one who has an unpatented mining claim has certain possessory rights as may be found valid by the Secretary of the Interior. Under the procedure established by this section a mining claimant is called upon to assert his rights to Leasing Act minerals or upon failure to do so his claim shall become subordinate to lessee under Mineral Leasing Act. This section provides procedure under which lessees may obtain determination of rights under unpatented mining claims affecting lands under which oil- and gas-lease rights are asserted. The purpose is to eliminate title uncertainties which follow from possible existence of unidentifiable mining locations and from uncertain status of inactive locations. It does not affect the rights of a mining claimant in minerals other than those mentioned in the Leasing Act.

Section 8 permits the owner of a mining claim to release Leasing Act minerals.

Section 9 limits the effect of Executive withdrawals of public lands for mineral purposes to particular minerals, and leaves all others open.

Section 10 amends certain portions of the Atomic Energy Act so as to eliminate the reservation of fissionable source materials to the United States. It also preserves the validity of otherwise valid uranium claims because of reservation.

1872 MINING ACT—1920 OIL AND GAS LEASING ACT

Mr. MALONE. Mr. President, will the Senator yield?

Mr. BARRETT. I yield.

Mr. MALONE. First, I wish to compliment the distinguished Senator from Wyoming on the work he has done on the subcommittee of the Interior and Insular Affairs Committee, of which I am a member.

FEE SIMPLE TITLE

It was necessary to adjudicate the claims and to take a forward step in the manner of development of some of the rare minerals without undue injury to the mining claim owners or to the operators under the 1920 Oil and Gas Leasing Act.

Would it be possible under the provisions of the bill for a locator of a mining claim under the 1872 Mining Act to gain title in fee simple to his mining claim through a patent under the proposed legislation, as has been possible up to now?

Mr. BARRETT. I will say to my distinguished colleague from Nevada that the future mining locator will get the title to the surface. He will get title to all the minerals under the surface except the minerals enumerated in the Mineral Leasing Act of 1920, namely, coal, oil, gas, phosphate, and oil shale.

Mr. MALONE. The locator of a claim on an unoccupied piece of ground would obtain his patent in fee simple under the 1872 act in the usual manner as it now stands, providing he proved $500 worth of work on the claim necessary for a

patent on his 20-acre claim, or fraction thereof, he would obtain his patent.

However, if this bill should become law in the future, a patent might issue under the 1872 act, the same ground would always be subject to leasing under the 1920 Leasing Act, as amended, with respect to oil, gas, phosphate, and sulfur, including the minerals which the Senator has already mentioned.

Mr. BARRETT. The Senator is correct. The bill provides, however, that while the reservation will be to the United States for the minerals enumerated under the Leasing Act of 1920, together with the right to prospect for such minerals, nevertheless, the lessee for any of those minerals would be obliged to respect the rights of the mining claimant, and would not be permitted to interfere with his improvements and facilities on the land.

The bill also provides that the mining claimant, if he feels aggrieved, may go into court to protect his rights in case there is any violation. However, this is a reciprocal piece of legislation. As I stated a moment ago, the rights of the mining claimant are as extensive as those accorded to the oil and gas industry, if not more so. As the Senator knows, there are thousands of uranium claimants in the western section of the country, and they can now go upon the lands leased for oil and gas, file mining claims, and recover certain minerals.

Mr. MALONE. Land lease under the 1920 Oil and Gas Leasing Act can be located under the 1873 Mining Act for minerals not reserved under the act and the locator could, through doing his location work annually, patent it when the required work has been done, and owns the minerals not reserved under the Leasing Act. Is that correct?

Mr. BARRETT. The Senator is right, with the exception of one item. Under this proposed legislation, a claimant can file on presently existing oil and gas leases, as well as on oil and gas leases that may be issued in the future, and acquire the right to the minerals under the Mining Act of 1872.

Mr. MALONE. Do I correctly understand that on any lease already granted, that in the future, after this act passes, a location of a mining claim under the 1872 Act is legal?

Br. BARRETT. That is correct.

Mr. MALONE. The land could also be leased for oil and gas on mining claims that had already been located prior to the passage of this act.

Mr. BARRETT. The Senator is now touching on a rather technical point. I should say that if the mining claim were valid and if all of the assessment work had been done on it which had been required to be done, and if the mining claimant had observed all the requirements of the law, the oil and gas leases could not come in ahead of the mining claim.

On the other hand, if the mining claim had been abandoned for years and if the mining claimant had not done the assessment work which he is required to do under the law, a different problem would be presented. That is what I spoke about a little while ago when I said that the mining claimant would be required to show that he is entiled to the Leasing Act minerals in that property, and he could proceed to go to patent if the Secretary found that he was correct in his assumption.

Mr. MALONE. That is the point the junior Senator from Nevada wanted to make. Any claimant who is in good standing under the 1872 Mining Act up to now could always get title in fee simple by following through to patent. That provision has not been changed.

Mr. BARRETT. That is correct. The claimaint would not lose anything under the proposed legislation.

Mr. MALONE. So far as proving his work is concerned, when he does his assessment work, he must file notice of that fact with the county clerk of the county wherein the claim is located, and if that has been done in the regular manner, what additional proof if any would be required under this act?

Mr. BARRETT. No additional proof is required. Under present law, of course, he must prove discovery, and perform his assessment work. This bill provides that a claimant could come forward and assert his right and say, "On this claim in 1950 I have done the assessment work."

Mr. MALONE. And show his receipts.

Mr. BARRETT. That is right. In other words, make whatever proof would be required to be made.

Mr. MALONE. In other words, show his receipts for the assessment work. If he has done his $500 worth of work the claim could be patented in the regular way and he would receive the title in fee simple.

Mr. BARRETT. The Senator is correct.

Mr. MALONE. I should like to ask further if the distinguished Senator from Wyoming feels that this change in the Leasing Act and the modification of the 1872 Mining Act might be an entering wedge or a foot in the door to extend to all public lands the Leasing Act and to abolish the simple location process that has been required since 1872. The location of a mining claim is the only method left applying to public lands whereby a man without any capital at all and with nothing but a sack of grub could go out and own something and go to work.

I should like to say that for 20 years, 8 of which the junior Senator from Nevada has spent on the floor of the Senate, many bills have been introduced in Congress, and many approaches have been made trying to force through a leasing system that would take the place of the location system with the lease holding at the discretion of the Government, or at least the Government bureau would be the judge of his work.

Mr. BARRETT. My answer is that this proposed legislation was introduced by the Senator from Colorado [Mr. MILLIKIN], and he was joined in its introduction by the Senator from New Mexico [Mr. ANDERSON], the senior Senator from South Dakota [Mr. MUNDT], the junior Senator from South Dakota [Mr. CASE], the Senator from Utah [Mr. WATKINS], the Senator from California [Mr. KUCHEL], and myself. We are all from the western section of the country, and we understand the development of our minerals under the Mining Act of 1872. I know that none of us has in mind an extension of the leasing provisions to other minerals which are not included under the Oil and Gas Leasing Act.

Mr. MALONE. The junior Senator from Nevada has been all through this matter, and I should like to have the RECORD show that this modification of the 1872 act is for the specific purpose, and for that purpose alone, of allowing prospecting and mining on existing oil and gas leases on lands covered in the Oil and Gas Act, and, as the Senator from Wyoming has stated, is reciprocal to the point that there are some modifications on both sides. Therefore, it opens up the situation for both of them. However, it is particularly for prospecting and the production of oil and gas and coal and phosphate on mining-claim lands and minerals on oil and gas leases.

Mr. BARRETT. The Senator is entirely correct. As I said, there would be opened up about 60 million acres on which mining claimants could file for the mining of minerals such as uranium.

Mr. MALONE. Does the Senator say that 60 million acres now under lease would be opened up?

Mr. BARRETT. Yes; which are withdrawn, so far as mining claimants are concerned, at this time.

Mr. MALONE. That is the interest of the junior Senator from Nevada. There is no intention of opening up the subject for further modification later or for a Federal leasing system.

Furthermore, I should like to say at this time that the Senator from Wyoming has served with the junior Senator from Nevada on the Minerals, Materials, and Fuels Subcommittee which has just completed a report showing, among other things, that the production of uranium, within the foreseeable future, could be made adequate in the United States for all our needs, if the tax situation is adjusted and a proper protective policy laid down by Congress, so that we need not be dependent for uranium—for our nuclear energy—on any outside country beyond a major ocean.

Mr. BARRETT. I thank the Senator. In all honesty, I must say that the Senator did practically all the work in the committee, and I may say, further, that it was a very splendid job and was in the public interest. It will prove to be a great boon for the mining industry in the years ahead.

Mr. MALONE. I thank the Senator.

Mr. CASE. Mr. President, will the Senator from Wyoming yield?

Mr. BARRETT. I yield.

Mr. CASE. First of all, I should like to express my appreciation to the Senator from Wyoming and to the Committee on Interior and Insular Affairs for reporting this bill. It seeks to meet a very real need in the mining field by making it possible for the development of claims which have rested on a very uncertain base up to this time, particularly with respect to fissionable materials which have been found in certain areas. In my own State and in States immediately west of South Dakota there are many

claims which this measure should benefit.

Mr. BARRETT. There are thousands upon thousands of uranium claims filed on what is known as the Colorado Plateau which extends over parts of the States of Utah, Arizona, New Mexico, as well as Colorado. This fact is one of the reasons why this proposed legislation is absolutely necessary. The claims were filed on lands covered by oil and gas leases, and legislation is necessary to validate them.

Mr. CASE. The prior legislation took care of the situation up to a year and a half ago.

Mr. BARRETT. That is correct.

Mr. CASE. I should like to ask 2 or 3 questions, so that I may be in a position to answer letters which I know I shall receive from holders of mineral entries. First, in respect to so-called hard-rock claims, lode claims, will persons who already have filed lode claims find that this measure affects the title to oil and gas deposits they might get if they patent their land?

Mr. BARRETT. I would say that if they have performed all the acts required by the 1872 mining law, and if they assert their rights, they will be protected. If they have not complied with the mining law of 1872, if they have abandoned their claim, or if their claims are invalid for any reason, then, of course, they are not protected.

Mr. CASE. The claim would not be a valid one.

Mr. BARRETT. That is correct.

Mr. CASE. As I recall, the certificate which a locator files recites that he lays claim to all the minerals. Assuming he complies with the law, he will be able to receive a patent which will entitle him to any royalties that might later be forthcoming because of oil and gas developments?

Mr. BARRETT. So far as the past is concerned, yes; but not as to future claims.

Mr. CASE. When the Senator uses the word "past," does he refer to the date of the location or the date of the patent?

Mr. BARRETT. I refer to the date of location, because if the claim was located at that time and if the claimant has observed all the requirements of the law, then the patent issued pursuant to that would date back to the time when the claim was originally filed.

Mr. CASE. Assuming the claim was duly filed and the work on it had been kept up.

Mr. BARRETT. Yes.

Mr. CASE. After the signing of the act, if he should then enter a lode claim and subsequently someone should seek to get oil and gas leasing rights, could he get them?

Mr. BARRETT. Yes.

Mr. CASE. With respect to the patenting of land under the homestead law, suppose a man has filed a claim, under prior acts the Government has reserved rights, has it not?

Mr. BARRETT. That is true under the Stock Grazing Act, but as to any other act, if homestead entry was made and there was an existing oil and gas lease, the Government would do one of three things. It would either not allow the homestead claim to be filed, reject the application, or grant a restricted patent.

Mr. CASE. Homesteading is almost a thing of the past.

Mr. BARRETT. That is correct.

Mr. CASE. But there are some entries where final proof has not yet been made. Would this measure in any sense injure any right a bona fide homestead entrant thought he had, if entry was made prior to this time, assuming that he has complied with all the requirements of homesteading?

Mr. BARRETT. I would say "No."

Mr. CASE. With respect to location for placer mining—the Senator lives close to the Black Hills, where there are still entries for placer mining——

Mr. BARRETT. The same principle would hold true, if everything was done that was required to be done under the mining laws.

Mr. CASE. Then this measure would not take anything of that nature away from the existing claimant?

Mr. BARRETT. No.

Mr. CASE. Would the same hold true with respect to Indian trust lands?

Mr. BARRETT. I will say to the Senator that it is my opinion that the Indian trust lands are in a wholly different category from so-called public lands of the United States. They are leased under different legislation for the benefit of the Indians, I believe. The Senator, however, is as well informed on that question as I am, as is also the Senator from New Mexico [Mr. ANDERSON].

Mr. ANDERSON. Mr. President, will the Senator from Wyoming yield?

The PRESIDING OFFICER (Mr. CRIPPA in the chair). Does the Senator from Wyoming yield to the Senator from New Mexico?

Mr. BARRETT. I yield.

Mr. ANDERSON. First, I congratulate the Senator from Wyoming on the excellent job he has been doing in answering questions. We have a situation in New Mexico in which the Navaho Indians are leasing lands for uranium and also for oil and gas. They would not be affected by this measure; would they?

Mr. BARRETT. It is my opinion that they would not be affected.

Mr. CASE. Mr. President, will the Senator from Wyoming yield further?

Mr. BARRETT. I yield.

Mr. CASE. It can be safely asserted, then, that this measure does not forfeit any rights the Indians may have in trust lands; is that correct?

Mr. BARRETT. That is correct.

Mr. CASE. Of course, it follows out the principle which the Senator has already mentioned with respect to the other entries under various laws.

I wish to thank the Senator, and I sincerely hope the bill will pass and will receive consideration in the other body, and that there will be no changes which will interfere in any respect with the protection of the rights covered in this discussion.

Mr. BARRETT. I thank the Senator from South Dakota.

Mr. LANGER. Mr. President, will the Senator from Wyoming yield?

Mr. BARRETT. I yield.

Mr. LANGER. What would be the effect if 4 or 5 years ago someone filed on a mining claim, if the necessary assessment work has been done?

Mr. BARRETT. There would be no change in the rights of the man who filed if he observed all the requirements of the law.

Mr. LANGER. Suppose that on the mining claim there is some very fine timber. Would the timber rights be affected in any way?

Mr. BARRETT. No; the timber rights would not be affected. If he has done his assessment work, observed the requirements of the law, assert his rights, if they were questioned, and applied for a patent, he would receive a patent which would give him a fee simple title.

Mr. LANGER. Is there any limitations on an individual or a corporation applying?

Mr. BARRETT. In the case of lode claims, there is a limitation of 20 acres. In the case of placer claims, the limitation is 160 acres for 8 persons. That is 20 acres to a person also. So far as I know, that is the only requirement. That has been the law since 1872.

Mr. CASE. Of course, one may file for more than one lode location.

Mr. LANGER. I desired to ascertain what the limit is.

Mr. BARRETT. The law has not been changed in that respect since 1872.

Mr. CASE. I think an individual can file for six mineral claims or lode locations. That is my understanding; I do not undertake to say that that is the law.

Mr. LANGER. Can the Senator from Wyoming state the number of witnesses who appeared at the hearings?

Mr. BARRETT. I would say that about 20 or 25 witnesses were heard. In addition, there were present 25 or so representatives of the industries affected, and they voiced no real objections to the measure.

Mr. LANGER. Did representatives of the Department of the Interior testify?

Mr. BARRETT. Yes, indeed, they did, including Assistant Secretary Felix Wormser.

Mr. LANGER. That was in connection with the 40 million or 50 million acres of land they have. Did they testify in regard to the public lands?

Mr. BARRETT. They aggregate about 150 million or 160 million acres.

Mr. LANGER. Yes. They are not in any particular locality.

Mr. BARRETT. Oh, no; they are spread over a considerable area.

Mr. LANGER. Was there any opposition to the bill?

Mr. BARRETT. There was no real opposition to the bill, that I observed. The bill has been approved, as I have said previously, by the Secretary of the Interior, the Bureau of the Budget, the Atomic Energy Commission, the Joint Committee on Atomic Energy, by mining associations, and by oil and gas associations. So far as I know, there was no opposition registered to the bill.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. BARRETT. I am delighted to yield to the Senator from New Mexico.

Mr. ANDERSON. I started to say, a moment ago, when the Senator from South Dakota was discussing the question, that I wished to congratulate the Senator from Wyoming. I most certainly wish to congratulate the distinguished junior Senator from Colorado [Mr. MILLIKIN], whose bill this is. We were privileged to join with him in introducing the bill. I think it is an excellent measure and should prove to be very useful.

When the distinguished junior Senator from Nevada [Mr. MALONE] was speaking a while ago on the subject of unpatented mining claims, I noticed, on page 4 of the report, the following paragraph:

> Section 8 provides that the owner of an unpatented mining claim heretofore located may relinquish all rights under the claim to the oil and gas and other leasing act minerals. This provision would assist in the negotiation of settlements and the avoidance of conflicts.

This bill would make it possible for a person who has a still unpatented mining claim, on which he has filed location, to go ahead and make an agreement, a settlement, or a contract of some kind for the oil and gas rights, which he previously had difficulty in doing.

Mr. BARRETT. The Senator is entirely correct. Furthermore, it ought to be pointed out that the mining claimant, when he relinquishes all minerals under the Leasing Act, can still go ahead and perfect his claim under the mining law of 1872, and get service on all the other minerals.

Mr. ANDERSON. Again, I wish to congratulate the Senator from Wyoming upon his explanation of the bill. He has done an excellent piece of work.

Mr. BARRETT. I thank the distinguished Senator from New Mexico.

Mr. President, I ask unanimous consent to have the report of the committee printed at this point in the RECORD.

There being no objection, the report (No. 1610) was ordered to be printed in the RECORD, as follows:

The Committee on Interior and Insular Affairs, to whom was referred the bill (S. 3344) to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes, having considered the same report favorably thereon with amendments and recommend that the bill, as amended, do pass.

Extensive public hearings were held by the committee at which spokesmen for mining industry, oil and gas operators, uranium producers, and other interested persons appeared in support of the measure. The Department of the Interior and the Atomic Energy Commission also testified and have reported favorably on the measure.

No appropriation of Federal funds is involved.

PURPOSE OF MEASURE

The intent of the bill S. 3344 is to resolve conflicts between the mining laws of the United States and the Mineral Leasing Act which have prevented mineral development of the same tracts of the public lands from going forward under both systems. Land on which mineral locations have been made under the mining laws has not been open to leasing under the Mineral Leasing Act, and on the other hand land covered by an oil and gas lease or a permit, or an application or offer for the same, under the Mineral Leasing Act, or known to be valuable for oil and gas or other Leasing Act minerals, could not be located under the mining laws.

S. 3344 would permit the development of mineral resources of the public lands, including uranium, to go forward on the same tracts of land under both systems. It would thus be a step forward in the development of the natural resources of the Nation. An immediate effect would be the opening of some 60 million acres of the public lands, now under oil and gas lease, to location for uranium and other minerals. At the same time, it would stimulate oil and gas development on the public lands by authorizing operations for leasable minerals on lands open to location under the mining laws, and by establishing a means for determining the validity of any rights claimed for Leasing Act minerals under patented mining claims located prior to the effective date of this act.

BACKGROUND OF LEGISLATION

The problem which S. 3344 seeks to solve has existed since the passage of the Mineral Leasing Act of 1920, setting aside all leasable minerals in the public lands of the United States for disposition under that act. With the critical needs of the Nation for supplies of fissionable materials within our borders, however, and the consequent great impetus given to exploration for uranium, the situation has become urgent. For example, the Colorado Plateau, extending over parts of the States of Utah, Arizona, New Mexico, and Colorado, has perhaps the greatest uranium reserves of any known area under the American flag, yet much of the area is covered by oil and gas leases, thus, in effect, withdrawing it from all mineral development other than oil and gas.

Your committee faced the problem at length last year in its consideration of S. 1397, which became Public Law 250, 1st session, 83d Congress (act of Aug. 12, 1953; 67 Stat. 539). This act permitted the validation, under the procedures set forth, of mining claims located between August 1, 1939, and December 31, 1952, which might otherwise have been invalid by reason of having been located on lands included in a permit, lease, application or offer under the Mineral Leasing Act or known to be valuable for minerals subject to disposition under that act. In recognition of the need for multiple mineral development of the public lands the validation afforded by the act of August 12, 1953, was made subject to the reservation to the United States of all Leasing Act minerals, together with appropriate rights of entry and operation.

The act of August 12, 1953, was a limited and temporary measure and it was realized that in the interest of multiple mineral development of the public lands further legislation of a general scope was necessary. The report, Mining Claims on Oil Lands of the Senate Interior Committee on S. 1397 (S. Rept. 593, 83d Cong., 1st sess.), pointed out this need, setting forth in this connection a report from the Department of the Interior, urging adoption of legislation which would permit lands leased for oil and gas or other minerals under the Mineral Leasing Act, or known to be valuable for such minerals, to be also utilized for mineral development under the mining laws, and which, conversely, would reserve Leasing Act minerals from future mining claims and patents under the mining laws.

POSITION OF MINING INDUSTRY AND OIL OPERATORS

As a result of the committee's findings and action with respect to Public Law 250, the Department of the Interior subsequently requested both the oil and gas industry and the mining industry to consider the problem jointly with a view to assisting Congress to work out a solution on a permanent basis.

Responsive to this request the National Petroleum Council made a report to the Secretary recommending legislation which "would adequately reconcile the conflicting scope and operation of the mining laws and the Mineral Leasing Act for the purpose of the oil and gas industry and the mining industry, and in the best interests of the United States, and would result in increased development of the oil and gas resources of the public lands without infringing any of the proper benefits now accorded the mining industry by the mining laws or retarding development of mineral resources under those laws."

The American Mining Congress at its 1953 meeting adopted the following declaration of policy:

"We recognize that the coexistence of two systems for acquiring rights to prospect for and remove the mineral resources of the public domain—one under the general mining laws and the other under the Mineral Leasing Act of 1920—has resulted in conflicts. We believe that the conflicts in these two systems should be carefully reviewed and an effort made to remove them, so as to eliminate, insofar as possible, any restriction of opportunity for development of our mineral resources, while leaving intact the basic principles and fundamental benefits of our system of mining locations."

EXPLANATION OF THE PROVISIONS

The first three sections of S. 3344 are technical in nature, and are designed to protect equities which were created in part as a result of consideration and enactment of Public Law 250 last year. Public Law 250 provided a cutoff date of January 1, 1953, for validation of mining claims made on lands under oil and gas lease. Enactment of the law did not of course cause prospecting for uranium to stop, after that date, nor was it the intent of the law that it should stop.

In both the hearings and the committee report on S. 1397, establishment of leasing procedures by the Atomic Energy Commission were envisioned. These procedures were in fact set up on a general basis by AEC Circular No. 7, issued January 29, 1954, and generally understood by prospectors to be effective February 10, 1954. Prospecting for fissionable source materials continued on the Colorado Plateau and elsewhere, and such activity was not discouraged in any way either by the Atomic Energy Commission or the Department of the Interior.

As pointed out, enactment of S. 3344 would open to location under the mining laws vast areas now withdrawn from such location under the mineral leasing laws. Sections 1, 2, and 3 of the bill would establish preference categories in order to protect mining claimants on such lands who have heretofore proceeded in good faith. Unless this were done, there would be a mad scramble to relocate such areas in an effort to capitalize on the title uncertainties inherent in the present situation. Serious conflicts, controversies and possible injustices would result.

Accordingly the sections grant (1) protection preference to any person who had located a claim prior to January 1, 1953, and who attempted to validate the claim under Public Law 250; (2) subject to (1), protection to any person who located a claim after December 31, 1952, and prior to February 10, 1954 (the effective date of AEC's Circular 7); and (3) subject to (1) and (2), a preference right to any person who, prior to the enactment of the bill, has posted notice of or filed application for or has secured a lease from the Atomic Energy Commission.

The committee believes that both equitable and national considerations warrant the relief accorded covered by the sections.

Sections 4, 5, and 6 of the bill deal with the basic problems of conflict between the mining laws and the Mineral Leasing Act.

Section 4 would make future mining claims and patents under the mining laws subject to the reservation to the United States of all minerals which are disposable under the Mineral Leasing Act, together with rights of entry and operation. Section 5 would permit the location of mining claims on lands which are subject to leases, permits, applications, or offers under the Mineral Leasing Act or which are known to be valuable for the minerals disposable under the Mineral Leasing Act. Section 6 prescribes the principles of operation to be followed in conducting mining operations and Mineral Leasing Act operations on the same lands.

Section 7 provides a procedure under which a lessee, permittee, applicant, or offeror under the Mineral Leasing Act may obtain a determination as to the existence of unpatented mining claims on the land under which rights in the oil and gas or other Leasing Act minerals are asserted, and the ownership of the rights so asserted. This procedure looks toward eliminating the title uncertainties which follow from the possible existence of unidentifiable mining locations and from the uncertain status of old and inactive locations, conditions which have retarded oil, gas, and other mineral development of the lands affected.

Section 8 provides that the owner of an unpatented mining claim heretofore located may relinquish all rights under the claim to the oil and gas and other Leasing Act minerals. This provision would assist in the negotiation of settlements and the avoidance of conflicts.

Section 9 of S. 3344 as reported is a new section added by the committee as a result of evidence that in some instances withdrawal of an area for one mineral has needlessly prevented development of deposits of other minerals in the same area. For example, a substantial reserve of helium was discovered by a Federal lessee while drilling for oil. Under existing law (act of September 1, 1937; 50 Stat. 885), the United States has title to all helium on the public lands and the area was immediately withdrawn. There was strong geologic evidence that a substantial oil deposit lay underneath the helium, and that the oil could be extracted without harm to the helium deposit. Yet, since the land was subject to the helium withdrawal, the oil deposit could not be developed.

The committee's amendment set forth in section 9 is designed to permit the development of leasable mineral resources, other than the one for which the withdrawal was made, in lands withdrawn for mineral purposes.

Section 10 of the reported bill covers the same subject matter as section 9 of S. 3344 as introduced. The language of subsections (a), (b), and (c) of the present section 10 is that proposed by the Atomic Energy Commission in its report to the committee and explained in detail by spokesmen for the Commission in the hearings. Department of the Interior spokesmen informed the committee that Interior would defer to the Commission's views as to the wording of the first three subsections, and strongly urged the adoption of the provision incorporated in subsection (d).

Section 10 of the reported bill would accomplish two principle objectives:

(1) Deletion of the reservation to the United States of fissionable material in the lands of the United States now in the Atomic Energy Act; and

(2) Confirmation of the validity of otherwise valid mining claims located on the basis of a discovery of fissionable source material alone.

Deletion of the reservation of fissionable materials necessitates several amendments to the Atomic Energy Act and these are set forth in subsections (a) (b) and (c) of section 10 in accordance with the Commission's recommendation.

Attention is directed to the following statement of the Commission in its favorable report to the committee:

"This (id est, deletion of the reservation) would represent no economic loss to the Government since at no time has the Atomic Energy Commission paid less for source materials originating on lands subject to the reservation than it has for source materials originating on lands to which the reservation had no application. The principal practical effect of the reservation thus far has been detrimental to the Commission's program in that, although neither the Commission nor the Department of Interior believes there is legal ground for it, doubt has arisen in the mining industry as to whether a mining claim based on the discovery of a source material alone is legally valid. Complete deletion of the reservation would place source materials on the same footing as any other minerals within the scope of the mining laws of 1872, as amended, and thereby leave no doubt whatsoever on this score."

Subsection (d), as stated, was adopted on the recommendation of the Department of the Interior to remove the cloud presently existing on claims located for fissionable materials by reason of the reservation.

Under a 1947 ruling by an official of the Department of the Interior, the reservation in section 5 (b) (7) of the Atomic Energy Act was interpreted as precluding mining locations for fissionable source materials (appeal of Jesse C. Clark, A. 24521, January 14, 1947). Although the Atomic Energy Commission has not given the act that interpretation and has encouraged mining locations for such materials, and although in the hearings spokesmen for the Department of the Interior testified that the present position of the Department is that such claims are valid, doubt does in fact still exist as to the validity of claims made on the basis of discovery or a source material alone. Subsection (d) of section 10 would protect mining claims against any invalidity by reason of having been located for fissionable source materials, and make it clear that the Atomic Energy Act does not preclude the location and patenting of mining claims for those materials, subject to the limitations in the act as to the disposal and use of such materials.

Section 11 defines the terms used in S. 3344, and sets forth the specific citation of the laws directly involved. The amendment to the definition of the term "uranium lease application" was made in accordance with the recommendation of the Atomic Energy Commission.

Section 12 is the usual "saving clause," providing that if any part of the measure shall be held to be invalid or unenforceable, the remaining provisions shall not be affected by such a holding.

The title is amended to insert the words "and the mining laws" after the words "mineral leasing laws."

THE AMENDMENTS

In addition to rewriting entirely the present section 10, and adding section 9, as discussed above, the committee adopted one other amendment of substance, based on the hearings. Additional provisions were added to subsection (a) of section 7 to require that before the lessee, permittee, applicant or offeror under the Mineral Leasing Act invokes the procedure provided for in section 7, a notice of the filing of his application or his offer or the issuance of his permit or lease shall be filed for record in the county office of record for the county in which the lands involved are situated, and that his request for publication of the notice which commences the procedure shall be accompanied by a certified copy of the recorded notice of his application, offer, permit, or lease.

The Committee added these provisions in an effort to afford further protection to the holder of a mining claim or interest therein.

CONCLUSION

Your committee is convinced that enactment of S. 3344, as amended, would result in greatly increased development of the mineral resources of the public lands of the United States, including increased domestic supplies of fissionable source materials. It therefore recommends prompt approval of the measure by the Senate.

REPORTS OF EXECUTIVE AGENCIES

The favorable reports of the Atomic Energy Commission and of the Department of the Interior are set forth in full below. Also set forth is the favorable comment of the Joint Committee on Atomic Energy of the Congress. The joint committee's views were sought since it is considering bills for overall revision of the Atomic Energy Act and the Interior Committee wished to do nothing at variance with or inconsistent with the probable action of the joint committee with respect to source materials.

UNITED STATES ATOMIC ENERGY COMMISSION,
Washington, D. C., May 21, 1954.

Hon. HUGH BUTLER,
Chairman, Committee on Interior and Insular Affairs, United States Senate.

DEAR SENATOR BUTLER: Our views have been requested on S. 3344 and H. R. 8892, identical bills to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and other purposes.

Insofar as they bear upon the activities and field of interest of the Atomic Energy Commission, the bills appear to have two major objectives:

1. To permit establishment of mining claims under the mining laws on lands to which the mineral leasing acts are applicable and

2. To confirm that despite the reservation to the United States of source material in the public lands set forth in section 5 (b) (7) of the Atomic Energy Act of 1946, as amended, valid mining claims may be established on the basis of a discovery of a source material alone.

We are of the opinion that realization of both objectives would further the Commission's aim of encouraging greater domestic production of source materials and are therefore happy to state our recommendation that the proposal be enacted. We should like to suggest certain amendments, however, which we believe are fully in keeping with the apparent purposes of the bills. The changes we suggest fall into two categories.

First, a group of formal changes which require very little discussion, all falling on page 21 of the committee prints:

1. In lines 1 and 2 of page 21, reference is made to the act of August 1, 1946, and "all heretofore enacted acts which are amendatory of or supplementary to said act." Since it might be difficult to determine with certainty what acts are "supplementary to" the Atomic Energy Act of 1946, our suggestion would be to substitute the words "as amended" for the longer phrase just quoted.

2. In line 7 of page 21 reference is made to "section 5 (b) (7) of the Atomic Energy Act." We believe that the reference should be to section 5 (b) (1).

3. In lines 8 through 14 of page 21 definitions are set forth of "uranium lease application" and "uranium lease." Both are defined by reference to the provisions of the Commission's Domestic Uranium Program Circular 7. We assume that all uranium lease applications or uranium leases relating to oil and gas lands are meant to be comprehended and that the reference to Circular 7 is intended to be shorthand for this purpose. The fact that the Commission both received some applications and issued some leases prior to the promulgation of Circular 7 produces the result that the shorthand phrase is somewhat deficient for its

intended purpose. It is suggested that lines 8 to 14 be revised to read as follows:

"Uranium lease application" shall mean an application for a uranium lease filed with said Commission with respect to lands which would be open for entry under the mining laws except for their being lands embraced within an offer, application, permit, or lease under the mineral leasing laws or lands known to be valuable for minerals leasable under those laws; "uranium lease" shall mean a uranium mining lease issued by said Commission with respect to any such lands;

Second, substitution of an entirely different draft for section 9 of the bills. This proposed alternative, set forth in full in the attached memorandum, is believed to be entirely consistent, so far as objectives are concerned, with section 9 as now set forth in the bills. It embodies the substance of proposals set forth in a general bill to amend the Atomic Energy Act, H. R. 8862 and S. 3323, now under consideration by the Joint Committee on Atomic Energy. It approaches the problems created by the reservation embodied in section 5 (b) (7) of the Atomic Energy Act by expunging the reservation from the act in its entirety. This would represent no economic loss to the Government since at no time has the Atomic Energy Commission paid less for source materials originating on lands subject to the reservation than it has for source materials originating on lands to which the reservation had no application. The principal practical effect of the reservation thus far has been detrimental to the Commission's program in that, although neither the Commission nor the Department of Interior believes there is legal ground for it, doubt has arisen in the mining industry as to whether a mining claim based on the discovery of a source material alone is legally valid. Complete deletion of the reservation would place source materials on the same footing as any other minerals within the scope of the mining laws of 1872, as amended, and thereby leave no doubt whatsoever on this score.

With the deletion of the reservation, three related amendments of the Atomic Energy Act of 1946 become necessary:

1. The reservation of section 5 (b) (7) includes a right to enter upon the land and prospect for, mine, and remove source materials, with just compensation for any damage or injury occasioned thereby. Because section 5 (b) (5) of the Atomic Energy Act in its present form authorizes the Commission to acquire by purchase or condemnation supplies of source materials or any interest in real property containing deposits of source materials, the deletion of the part of the reservation giving the United States rights to enter upon lands containing source materials is of no great consequence to the Commission. On the other hand, the Commission's authority under section 5 (b) (5) to acquire source materials and interests in real property containing them does not explicitly comprehend acquisition of prospecting and exploratory rights in lands deemed to have possibilities of containing source materials. Hence, it is suggested that the scope of section 5 (b) (5) be enlarged to comprehend exploratory and prospecting rights. With section 5 (b) (5) thus amended, section 5 (b) (6) in its present form would be superfluous and should be deleted.

2. Although enactment of S. 3344 and H. R. 8892 would no longer make it necessary for the Commission to issue leases for source materials with respect to oil and gas lands, a narrow area would remain (e. g., source materials discovered on lands withdrawn other than by reason of the application of the mineral leasing laws) in which the only way the Commission could be assured of making deposits of source materials available for development and mining by private industry would be through the exercise of the leasing power. The Commission's existing power to issue leases is legally founded upon the reservation now set forth in section 5 (b) (7) of the Atomic Energy Act. Hence, if the reservation is deleted as proposed, it will be necessary to add an explicit authorization to the Commission to issue leases for source materials with respect to lands belonging to the United States.

3. Since the reservation would be deleted for the future and since, where it exists, it is productive of uncertainty rather than advantageous to the Government, it is believed desirable to authorize the heads of agencies who have issued conveyances subject to the reservation to release the present holders of the land from the reservation. As indicated above this would put to rest any lingering doubts about validity of the claims in question without sacrifice of any substantial interest by the Government.

The pressure of time has prevented us from submitting this report to the Bureau of the Budget.

Sincerely yours,

LEWIS L. STRAUSS, *Chairman.*

DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D. C., May 14, 1954.

Hon. HUGH BUTLER,
Chairman, Committee on Interior and Insular Affairs, United States Senate, Washington, D. C.

MY DEAR SENATOR BUTLER: This in reply to the request of your committee for a report on S. 3344, a bill to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes.

I recommend the enactment of this bill.

The United States mining laws provide for the location of mining claims on public lands containing valuable mineral deposits (30 U. S. C., sec. 22 et seq.). After February 25, 1920, deposits of coal, phosphate, sodium, potassium, oil, oil shale, or gas became subject to disposition under the mineral-leasing laws (30 U. S. C., sec. 181 et seq.). Section 37 of the 1920 act provided that, except as to valid claims then existing, such deposits could be disposed of only under the mineral-leasing laws (30 U. S. C., sec. 193). Lands which were known to be valuable for minerals subject to the leasing laws or which were included in leases, permits, or applications or offers therefor could no longer be acquired under the mining laws.

To permit multiple development of lands in these latter categories, Congress passed the act of August 12, 1953 (67 Stat. 539), which, under certain conditions, validated mining claims located on such lands after July 31, 1939, but not later than December 31, 1952. S. 3344 would make some revisions in the terms of the 1953 act, but, in general, holders of such mining claims located after December 31, 1952, and prior to February 10, 1954, would be given the same benefits as those located prior to January 1, 1953, and these benefits would apply to a mining location which is made after the enactment of S. 3344.

The first three sections of S. 3344 provide for the validation of mining claims located subsequent to July 31, 1939, and prior to February 10, 1954, together with provisions for the conversion, at the election of the owners thereof, of uranium leases issued by the Atomic Energy Commission and applications for such uranium leases.

Sections 4 through 8 are provisions of general application, modifying the mineral-leasing laws and the mining laws in certain significant respects in the interests of encouraging multiple-mineral development on mining claims and lands previously subject to mineral development only under the mineral-leasing laws.

Section 9 would revise section 5 (b) (7) of the Atomic Energy Act of 1946 (42 U. S. C., sec. 1805) and section 3 of the act of August 12, 1953, supra, to remove any doubts that mining claims have been and may be validly located for valuable deposits of fissionable-source materials. This provision appears to be of utmost importance to the maintenance of an adequate supply of fissionable-source materials. However, this Department defers to the views of the Atomic Energy Commission with respect to the specific language proposed.

The following section-by-section discussion is limited to the important additions to or changes in the provisions of existing law (including the act of August 12, 1953, supra).

The provision in section 1 of the bill calling for posting and recording of amended notices of location is patterned after the 1953 act. However, if the claimant previously has filed a lease application or obtained a lease under Domestic Uranium Program Circular 7 of the Atomic Energy Commission for the same land, he would be required to file with the Commission a withdrawal of any such application or a release of any such lease and to record a notice of his withdrawal or release in the office where his notice of mining location shall have been filed. This provision seems very desirable, since it should tend to clarify the record title where both uranium leases and mining claims would otherwise cover the same land.

Section 2 deals with possible conflicts which may arise between mining claimants. The first possible conflict dealt with is that between (a) mining claims located prior to January 1, 1953, and (b) claims located after December 31, 1952, but prior to February 10, 1954. The second possible conflict mentioned is between (c) claims located prior to February 10, 1954, and (d) claims located after the date of enactment of these bills. In the case of the first possible conflict, claims in category (b) are to be presumed as located December 11, 1953, which is the day following the last date for recording category (a) mining claims under the 1953 act. In the case of the second possible conflict, claims in category (d) are to be presumed as located 121 days after enactment of the bill, that is, the day following the last date for recording category (c) mining claims.

Section 3 gives the holder of any pending uranium lease application or of a uranium lease a preference right to locate a mining claim within 120 days after the enactment date as against claimants attempting to locate a claim after the date of enactment. Provision is made for priorities among conflicting claimants to this preference right.

Under section 4 of the bill all mining claims and millsites located after enactment would be subject to a reservation to the United States of leasing act minerals. All claims validated by the bill would also be subject to such a reservation.

Section 5 expressly provides for the location, after enactment, of mining claims on lands valuable for leasable minerals, or included in a mineral lease or permit, or an application or offer for a mineral lease or permit.

Section 6 of the bill would set up legal standards for leasing act and mining operations on the same lands. Each type of operation generally would be required to be conducted so as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities made for the other type of operation, or with the utilization of such improvement, workings, or facilities. An exception is provided permitting such injury or damage if a court of competent jurisdiction finds that the refusal to permit the injury or damage would cause greater damage than that which would result to the existing improvements, workings, or facilities, or from interference with the utilization thereof, if the use were allowed. However, fair compensation would be required. Provision is also made for interchange of information and reasonable access

to each other's facilities, workings, and improvements.

Section 7 authorizes publication of notice of any leasing act permit, lease, or application or offer for such permit or lease. The mining claimant may file a claim to minerals subject to the mineral leasing laws by reason of his mining location. If he does not file his claim within 150 days after the date of first publication of the notice, any claim or right to these minerals by the locator will be deemed to be relinquished. If a claim is asserted, this Department would hold hearings to determine the right of the claimant to the minerals. This provision would delay somewhat the issuance of mineral leases and permits, but would furnish the mineral lessee or permittee with some security of title with respect to outstanding claims to the land he wishes to explore or develop. The publication provisions are comparable to those applicable to contests of applications for mineral patents under the mining laws.

A typographical error on page 8, line 6, of the bill may be corrected by striking out the word "law" and inserting in lieu thereof the word "laws." This Department strongly supports this bill since it would encourage fuller mineral development of the public lands.

Since I am informed that there is a particular urgency for the submission of the views of the Department, this report has not been cleared through the Bureau of the Budget and, therefore, no commitment can be made concerning the relationship of the views expressed herein to the program of the President.

Sincerely yours,

ORME LEWIS,
Assistant Secretary of the Interior.

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON ATOMIC ENERGY,
May 28, 1954.

Hon. HUGH BUTLER,
Chairman, Committee on Interior and Insular Affairs, United States Senate, Washington, D. C.

DEAR SENATOR BUTLER: We have received the request of May 24 from Mr. Stewart French, your committee counsel, soliciting the views of this committee on S. 3344, a bill to amend the mineral leasing laws to provide for multiple mineral developments of the public lands with particular reference to section 9 of the bill which provides for certain changes in the Atomic Energy Act.

As you know, this committee is in the process of making major revisions in the Atomic Energy Act of 1946, through bills H. R. 8862 and S. 3323. Since these bills were introduced, the committee has held extensive hearings and has put through a clean print, a copy of which is enclosed for your information.

This committee has also examined the report of the Atomic Energy Commission on S. 3344. We find that the position taken by the Commission is in line with the position presently set forth in H. R. 8862 and S. 3323. If you will refer to the clean print of the joint committee bill, you will note:

Section 66, dealing with the power of the Commission to acquire supplies of source materials, has been merged with the section on exploration, and then expanded in order to permit the Commission to condemn the right to enter upon real property deemed by the Commission to have possibilities of containing deposits of source material in order to conduct prospecting and exploratory operations for such deposits. Section 66 further permits the payment of just compensation for any interest taken in land, as is suggested to your committee by the Commission.

Section 67 is new and gives the Commission permission to issue leases of public lands. While there is some question as to the necessity of such a provision in view of the other extensive powers given to the Commission, the provision has been incorporated into the present proposal.

Section 68 contains some of the provisions of former section 67. By deleting the provisions of the original act, which contained reservations in favor of the United States with respect to the locations of source materials on public lands deeded to others, it was hoped that prospecting for source materials would be encouraged. In view of the deletion of this reservation, appropriate language was inserted in the section which would permit patentees to get new patents without any reservations. The language for this purpose is slightly different in the proposed bill than in the Commission proposals. Where the earlier language requiring the reservation provided that "the Secretary of the Interior shall cause to be inserted in every patent, conveyance, lease, permit, or other authorization, hereafter granted to use the public lands or their mineral resources * * *", the language of section 68 was drafted to provide a parallel instruction to order the issuance of new patents without the reservations. The Commission proposal would require any head of a department or an agency to issue a new or supplemental patent without such reservation. It is believed that the committee language more closely parallels the former language of the Atomic Energy Act. In addition, one new sentence has been added to section 68 requiring that any new patent shall be subject to any rights heretofore issued by the United States; then the new patent shall be subject to those rights, but the patentee shall be subrogated to the right of the United States.

It will be noted that proposed section 68 deletes the unfair advantage clause in the statute. While this clause was originally drawn to be applicable to the Manhattan Engineer District, and hence is now 8 years old, it appears to have been construed to apply to present Commission activities. Therefore, it probably will be reworded to bring it up to date and reinstated in section 68.

One very minor technical point should be mentioned in passing. It is suggested that the provisions of S. 3344 be reworded so that the phrase "fissionable source material" becomes "source material" throughout, and the clause in lines 17 through 20 of page 21 of the committee print would then read: "'source material' shall mean uranium, thorium, and all other materials defined in section 5 (b) (1) of the Atomic Energy Act to be source materials;"

We would, in turn, appreciate having the views of your committee on the clean print of H. R. 8862 and S. 3323 relating to source materials.

Sincerely yours,

STERLING COLE, *Chairman.*

CHANGES IN EXISTING LAW

In compliance with the Cordon rule (subsec. (4) of rule XXIX of the Standing Rules of the Senate), changes in existing law made by the bill S. 3344, as reported, are shown as follows (existing law proposed to be repealed is enclosed in black brackets, additions to existing law are italicized):

The Atomic Energy Act of 1946 (Public Law 585, 79th Cong., 2d sess.; 60 Stat. 755)

"Control of materials

"SEC. 5. (b) Source materials:

"(1) Definition: As used in this act, the term 'source material' means uranium, thorium, or any other material which is determined by the Commission, with the approval of the President, to be peculiarly essential to the production of fissionable materials; but includes ores only if they contain one or more of the foregoing materials in such concentration as the Commission may by regulation determine from time to time.

"(2) License for transfers required: Unless authorized by a license issued by the Commission, no person may transfer or deliver, receive possession of or title to, or export from the United States any source material after removal from its place of deposit in nature, except that licenses shall not be required for quantities of source materials which, in the opinion of the Commission, are unimportant.

"(3) Issuance of licenses: The Commission shall establish such standards for the issuance, refusal, or revocation of licenses as it may deem necessary to assure adequate source materials for production, research, or development activities pursuant to this act or to prevent the use of such materials in a manner inconsistent with the national welfare. Licenses shall be issued in accordance with such procedures as the Commission may by regulation establish.

"(4) Reporting: The Commission is authorized to issue such regulations or orders requiring reports of ownership, possession, extraction, refining, shipment, or other handling of source materials as it may deem necessary, except that such reports shall not be required with respect to (A) any source material prior to removal from its place of deposit in nature, or (B) quantities of source materials which in the opinion of the Commission are unimportant or the reporting of which will discourage independent prospecting for new deposits.

[(5) Acquisition: The Commission is authorized and directed to purchase, take, requisition, condemn, or otherwise acquire, supplies of source materials or any interest in real property containing deposits of source materials to the extent it deems necessary to effectuate the provisions of this act. Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial, and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property taken, requisitioned, or condemned under this paragraph.]

(5) Acquisition: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to purchase, take, requisition, condemn, or otherwise acquire—

"(A) supplies of source materials or any interest in real property containing deposits of source materials; and

"(B) rights to enter upon any real property deemed by it to have possibilities of containing deposits of source materials and to conduct prospecting and exploratory operations for such deposits.

Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property or interest in property taken, requisitioned, or condemned under this paragraph.

[(6) Exploration: The Commission is authorized to conduct and enter into contracts for the conduct of exploratory operations, investigations, and inspections to determine the location, extent, mode of occurrence, use, or conditions of deposits or supplies of source materials, making just compensation

for any damage or injury occasioned thereby. Such exploratory operations may be conducted only with the consent of the owner, but such investigations and inspections may be conducted with or without such consent.]

(6) Operations on lands belonging to the United States: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to issue leases or permits for prospecting for, exploration for, mining, or removal of deposits of source materials (or for any or all of these purposes) in lands belonging to the United States.

[(7) Public lands: All uranium, thorium, and all other materials determined pursuant to paragraph (1) of this subsection to be peculiarly essential to the production of fissionable material, contained in whatever concentration, in deposits in the public lands are hereby reserved for the use of the United States subject to valid claims, rights or privileges existing on the date of the enactment of this act: *Provided, however,* That no individual, corporation, partnership, or association, which had any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual, corporation, partnership or association took part in such project, if such individual, corporation, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such uranium, thorium, or other materials in the specific lands upon which such location, entry, or settlement is made, and subsequent to the date of the enactment of this act made such location, entry, or settlement or caused the same to be made for his, its, or their benefit. The Secretary of the Interior shall cause to be inserted in every patent, conveyance, lease, permit, or other authorization hereafter granted to use the public lands or their mineral resources, under any of which there might result the extraction of any materials so reserved, a reservation to the United States of all such materials, whether or not of commercial value together with the right of the United States through its authorized agents or representatives at any time to enter upon the land and prospect for, mine, and remove the same, making just compensation for any damage or injury occasioned thereby. Any lands so patented, conveyed, leased, or otherwise disposed of may be used, and any rights under any such permit or authorization may be exercised as if no reservation of such materials had been made under this subsection; except that, when such use results in the extraction of any such material from the land in quantities which may not be transferred or delivered without a license under this subsection, such material shall be the property of the Commission and the Commission may require delivery of such material to it by any possessor thereof after such material has been separated as such from the ores in which it was contained. If the Commission requires the delivery of such material to it, it shall pay to the person mining or extracting the same, or to such other person as the Commission determines to be entitled thereto, such sums, including profits, as the Commission deems fair and reasonable for the discovery, mining, development, production, extraction, and other services performed with respect to such material prior to such delivery, but such payment shall not include any amount on account of the value of such material before removal from its place of deposit in nature. If the Commission does not require delivery of such material to it, the reservation made pursuant to this paragraph shall be of no further force or effect.]

(7) Public lands: No individual, corporation, partnership, or association, which had any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual, corporation, partnership, or association took part in such project, if such individual, corporation, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such uranium, thorium, or other materials in the specific lands upon which such location, entry, or settlement is made, and subsequently to the date of the enactment of this act made such location, entry, or settlement or caused the same to be made for his, or its, or their benefit. In cases where any patent, conveyance, lease, permit, or other authorization has been issued, which reserved to the United States source materials and the right to enter upon the land and prospect for, mine, and remove the same, the head of the department or agency which issued the patent, conveyance, lease, permit, or other authorization shall, on application of the holder thereof, issue a new or supplemental patent, conveyance, lease, permit, or other authorization without such reservation.

APPENDIX

(The act of August 12, 1953 [67 Stat. 539], to which reference is made in S. 3344, is set forth below.)

Public Law 250, 83d Congress, Chapter 405, 1st Session, S. 1397

An act relating to mining claims located on land with respect to which a permit or lease has been issued, or an application or offer for permit or lease has been made, under the mineral leasing laws, or known to be valuable for minerals subject to disposition under the mineral leasing laws, and for other purposes

Be it enacted, etc., That (a) subject to the provisions of this act and to any valid intervening rights acquired under laws of the United States, any mining claim located under the mining laws of the United States subsequent to July 31, 1939, and prior to January 1, 1953, on lands of the United States which were, at the time of such location—

(1) included in a permit or lease issued under the mineral leasing laws; or

(2) covered by an application or offer for a permit or lease which had been filed under the mineral leasing laws; or

(3) known to be valuable for minerals subject to disposition under the mineral leasing laws;

shall be effective to the same extent as if such mining claim had been located on lands which were at the time of such location subject to location under the mining laws of the United States: *Provided, however,* That in order to obtain the benefits of this act, the owner of any such mining claim shall, not later than 120 days after the date of enactment of this act, post on such claim in the manner required for posting notice of location of mining claims and file for record in the office where the notice or certificate of location of such claim is of record an amended notice of location of such claim, stating that such notice is filed pursuant to the provisions of this act and for the purpose of obtaining the benefits thereof.

(b) Labor performed or improvements made upon or for the benefit of such mining claims after the original location thereof shall be recognized as applicable thereto for all purposes to the same extent as labor performed and improvements made upon or for the benefit of mining claims which are not affected by this act.

(c) Any withdrawal or reservation made after the original location of such mining claim affecting land covered by such mining claim is hereby modified and amended so that the effect thereof upon such mining claim shall be the same as if such mining claim had been located upon the lands of the United States, which, subsequent to July 31, 1939, and prior to the date of such withdrawal, were subject to location under the mining laws of the United States.

SEC. 2. Any mining claim given force and effect as provided in section 1 of this act shall be subject to the reservation to the United States of all minerals which, upon the effective date of this act, are provided in the mineral leasing laws to be disposed of thereunder, and the right of the United States, its lessees, permittees, and licensees, to enter upon the land covered by such mining claim to prospect for, mine, treat, store, and remove such minerals, and to use so much of the surface and subsurface of such mining claim as may be necessary for such purposes, and to enter upon such land whenever reasonably necessary for the purpose of prospecting for, mining, treating, storing, and removing such minerals on and from other lands of the United States; and any patent issued for any such mining claim shall contain such reservation.

SEC. 3. The rights under any mining claim given force and effect by this act shall also be subject to the reservation to the United States specified in section 5 (b) (7) of the Atomic Energy Act of 1946, as amended, and, in addition, any reservation or reservations required by any other provision or provisions of law; and any patent issued for such mining claim shall contain such reservations.

SEC. 4. Except as this Act provides for (a) validation of certain mining claims located on lands described in section 1 of this act, and (b) the modification and amendment of certain withdrawals or reservations of land, nothing in this act shall affect any power or authority duly vested in the Atomic Energy Commission or any other agency, department, or officer of the United States to make leases, withdrawals, reservations, or other arrangements with respect to source materials as defined in section 5 (b) (1) of the Atomic Energy Act of 1946, as amended.

SEC. 5. As used in this act, "mineral leasing laws" shall mean the act of October 20, 1914 (38 Stat. 741); the act of February 25, 1920 (41 Stat. 437); the act of April 17, 1926 (44 Stat. 301); the act of February 7, 1927 (44 Stat. 1057); and all acts heretofore or hereafter enacted which are amendatory of or supplementary to any of the foregoing acts.

Approved August 12, 1953.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. MILLIKIN. Mr. President, I too, wish to thank the distinguished Senator from Wyoming for the excellent work he has done previously and has done on the floor of the Senate today in connection with the bill.

Mr. BARRETT. I thank the distinguished Senator from Colorado, but I may say, Mr. President, that the Senator from Colorado is the author of the proposed legislation. He deserves great credit for inducing the conflicting industries of the Western States to get together and to agree to the introduction of the measure which will prove to be in the public interest in the long run.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended so as to read: "A bill to amend the mineral leasing laws and the mining laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes."

AMENDMENT OF MINERAL LEASING ACT OF FEBRUARY 25, 1920, AS AMENDED

Mr. CARLSON. Mr. President, I move that the Senate proceed to the consideration of Calendar 1621, Senate bill 2380, to amend section 17 of the Mineral Leasing Act of February 25, 1920, as amended.

The PRESIDING OFFICER. The clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (S. 2380) to amend section 17 of the Mineral Leasing Act of February 25, 1920, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 2380) to amend section 17 of the Mineral Leasing Act of February 25, 1920, as amended, which had been reported from the Committee on Interior and Insular Affairs with an amendment, to strike out all after the enacting clause, and insert:

That the act of February 25, 1920, as amended (30 U. S. C. 226), is further amended as follows:

(1) Strike out the second paragraph of section 17 and insert the following language in lieu thereof:

"Any lease issued under this act which is subject to termination by reason of cessation of production shall not terminate if within 60 days after production ceases, reworking or drilling operations are commenced on the land under lease and are thereafter conducted with reasonable diligence during such period of nonproduction. No lease issued under the provisions of this act shall expire because operations or production is suspended under any order, or with the consent, of the Secretary of the Interior. No lease issued under the provisions of this act covering lands in which there is a well capable of producing oil or gas in paying quantities shall expire because the lessee fails to produce the same, unless the lessee is allowed a reasonable time, but not less than 60 days after notice by registered mail, within which to place such well on a producing status: *Provided*, That after such status is established production shall continue on the leased premises unless and until suspension of production is allowed by the Secretary of the Interior under the provisions of this act."

(2) Strike out the third paragraph of section 17 and insert in lieu thereof:

"Upon the expiration of the initial 5-year term of any noncompetitive lease maintained in accordance with applicable statutory requirements and regulations, the record titleholder thereof shall be entitled to a single extension of the lease, unless then otherwise provided by law, for such lands covered by it as are not on the expiration date of the lease withdrawn from leasing under this section. A withdrawal, however, shall not affect the right to an extension if actual drilling operations on such lands were commenced prior to such withdrawal becoming effective and were being diligently prosecuted on such expiration date. No withdrawal shall be effective within the meaning of this section until 90 days after notice thereof shall be sent by registered mail, to each lessee to be affected by such withdrawal. A noncompetitive lease, as to lands not within the known geologic structure of a producing oil or gas field, shall be extended for a period of 5 years and so long thereafter as oil or gas is produced in paying quantities. A noncompetitive lease, as to lands within the known geologic structure of a producing oil or gas field, shall be extended for a period of 2 years and so long thereafter as oil or gas is produced in paying quantities. Any noncompetitive lease extended under this paragraph shall be subject to the rules and regulations in force at the expiration of the initial 5-year term of the lease. No extension shall be granted, however, unless within a period of 90 days prior to such expiration date an application therefor is filed by the record titleholder or an assignee whose assignment has been filed for approval, or an operator whose operating agreement has been filed for approval."

(3) Strike out the fifth paragraph of section 17 and insert the following language in lieu thereof:

"Whenever it appears to the Secretary of the Interior that lands owned by the United States are being drained of oil or gas by wells drilled on adjacent lands, he is hereby authorized and empowered to negotiate agreements whereby the United States, or the United States and its lessees, shall be compensated for such drainage, such agreements to be made with the consent of the lessees affected thereby, and the primary term including any extensions thereof of any lease for which compensatory royalty is being paid shall be extended for the period during which such compensatory royalty is paid and for a period of 1 year from discontinuance of such payment and so long thereafter as oil or gas is produced in paying quantities: *Provided*, That the Secretary of the Interior shall report to Congress at the beginning of each regular session, all such agreements entered into during the previous year which involve unleased Government lands."

(4) Strike out the second sentence of the fourth paragraph of section 17 (b) and insert in lieu thereof the following language: "Any other lease issued under any section of this act which has heretofore or may hereafter be committed to any such plan that contains a general provision for allocation of oil or gas, shall continue in force and effect as to the land committed, so long as the lease remains subject to the plan: *Provided*, That production is had in paying quantities under the plan prior to the expiration date of the term of such lease. Any lease hereafter committed to any such plan embracing lands that are in part within and in part outside of the area covered by any such plan shall be segregated into separate leases as to the lands committed and the lands not committed as of the effective date of unitization: *Provided, however*, That any such lease as to the nonunitized portion shall continue in force and effect for the term thereof but for not less than 2 years from the date of such segregation and so long thereafter as oil or gas is produced in paying quantities."

(5) Strike out the words "and regardless of acreage limitations provided for in this act" in the fifth paragraph of section 17 (b) and insert the following sentence at the end of that paragraph: "All leases operated under such approved operating, drilling, or development contracts, and interests thereunder, shall be excepted in determining holdings or control under the provisions of any section of this act."

(6) Strike out the last sentence of section 30 (a) and insert the following in lieu thereof: "Assignments under this section may also be made of parts of leases which are in their extended term because of any provision of this act. The segregated lease of any undeveloped lands shall continue in full force and effect for 2 years and so long thereafter as oil or gas is produced in paying quantities."

(7) Insert the following sentence immediately after the second paragraph of section 31: "Notwithstanding the provisions of this section, however, upon failure of a lessee to pay rental on or before the anniversary date of the lease, for any lease on which there is no well capable of producing oil or gas in paying quantities, the lease shall automatically terminate by operation of law: *Provided, however*, That when the time for payment falls upon any day in which the proper office for payment is not open, payment may be received the next official working day and shall be considered as timely made."

CONSTRUCTION AT MILITARY AND NAVAL INSTALLATIONS

Mr. LONG. Mr. President, I rather doubt that the Senate will reach the consideration of the military construction bill this evening. In order that Senators may understand the motion I intend to make when the bill is called up, I believe I should discuss it, in order that my remarks will appear in the RECORD which will be available tomorrow.

I have had some experience on the Committee on Armed Services. At one time I had the honor of serving on a subcommittee which dealt with military construction. At that time the committee worked very diligently in an effort to find ways of economizing on military spending.

The subcommittee was instrumental in reducing the military construction bill of 1952 by about $700 million, in ways which would not prevent a single plane from flying, a single gun from shooting, or a single ship from sailing.

Having seen the manner in which enormous waste creeps into the military construction program, I have become very much concerned about the military construction authorization bill, which will soon be called up.

The item which concerns me most is an item which the committee turned down at the time when I had an opportunity to serve on the committee. That was an item calling for $100 million of additional barracks, which was rejected 2 years ago on the basis that the Army already had a sufficient number of barracks.

At that time the committee carefully studied the item, and concluded that it was completely wasteful, when there were already plenty of barracks, to proceed with the construction of another $100 million worth of barracks. The only argument which was made at that time in favor of the additional construction was that in the event war broke out, it would be necessary to construct many additional barracks buildings; that there would be such a demand for additional barracks buildings that it would be well if the Government had a large number of empty barracks across the Nation, because, in the event of an emergency, they could be filled immediately, and there would be a head start on a barracks-construction program.

That was not a very compelling argument, because there were so many other things which would be needed besides barracks, in the event a war broke out, and the committee felt that a priority should be established on items which would be more difficult to obtain. Therefore, the item for barracks was removed from the military construction bill of 1952.

Since that time the strength of the Army has been reduced by 20 percent. Army bases are being closed all over the United States. For example, in the State

which I have the honor, in part, to represent, Camp Polk has been closed. At Camp Polk there are barracks facilities sufficient to house around 40,000 men. Camp Pickett, in Virginia, was closed on the same day. Camp Atterbury, in Indiana, has been closed recently. Those camps are good operating bases, having a large amount of barracks space. Congress was told that in closing those bases, great economies would be effected.

Mr. President, I am not opposing the additional $100 million for barracks merely because someone has closed Camp Polk in Louisiana. When I was chairman of the subcommittee, we removed this identical $100 million item from the bill. There is less need now for an additional $100 million worth of barracks than there was then. The military officials have dressed up the argument, but it is the same old wasteful item about which they are arguing today. Now it is said that it is believed there would be a higher rate of enlistments, that more men would be willing to sign up for a second term in the Army, if better barracks were provided for the men to live in. Whom do the military think they are "kidding"? They are going to get the manpower for the Army in the future just as they get it now, by drafting youth of the land. Young men do not intend to reenlist and to face the risk of fighting another Korean type of war, in which there is such inequality of sacrifice; a war in which they will have to go out and face the enemy on the battlefield, while so many others stay at home with their families.

Mr. President, it simply does not make sense to embark upon a program of replacing the barracks of the Nation with new barracks. This is only the first instance. Once a start is made on building new barracks across the Nation, to replace barracks already in existence, old barracks which are adequate today and will be adequate for many years to come, we shall have to replace a billion dollars' worth of barracks. No one knows exactly how many it will be necessary to build.

Better soldiers will not be developed merely by building better barracks buildings.

The construction of additional barracks would be wasteful of funds. I have alerted the distinguished chairman of the subcommittee to the wastefulness of this item, and I am pleased to say that the item has been cut by one-half. We started with about $90 million, and it has been reduced to $45 million. However, when the bill is called up in the Senate, I intend to move to recommit it, with instructions to reduce the amount in the bill by another $45 million, having in mind that this particular item should be reduced.

I know the committee has worked diligently on the problem. I know of no Member of the Senate who is any more diligent or conscientious in trying to avoid waste of public funds than is the distinguished Senator from South Dakota [Mr. CASE], the chairman of the subcommittee. But I believe that in this instance the committee has erred in permitting this item to slip through.

Mr. CASE. Mr. President, will the Senator yield?

Mr. LONG. I yield to the Senator from South Dakota.

Mr. CASE. I appreciate the kind remarks of the Senator from Louisiana. My reason for asking the Senator to yield is that I propose to point out what the Senator from Louisiana perhaps has already pointed out, namely that the bill which we hope will be taken up for consideration, H. R. 9242, does not propose to reconstruct all the barracks in the military installations of the United States. The proposal as submitted really embraces two parts, one of which is what was called the hard core program, which was in the original estimates of the Department of Defense. Subsequently there was a proposal for approximately $96 million worth of barracks replacements.

The bill as it passed the House carried both parts, the so-called hard core program, and also the provision for $96 million worth of authorizations for replacement of barracks. By the term "barracks" was meant not merely enlisted men's barracks, but bachelor officers' quarters.

The Subcommittee on Real Estate and Military Construction of the Senate Committee on Armed Services, in its report and recommendations to the full committee, and now to the Senate, in the bill which will be before the Senate for early consideration, cut that supplementary program approximately in two, leaving, in the recommendations on the bill, one-half of the proposal for the enlisted men's barracks, and one-half of the proposal for bachelor officers' quarters.

I merely point out that fact because, if the record is being made with the thought that it may be available for reading by Members of the Senate, they should know, before conclusion of the debate or consideration of the bill tomorrow, that the bill does not contemplate a complete reconstruction of barracks facilities in the United States, even if all the $96 million were authorized. As reported, there is provided only approximately one-half of the increment recommended in the requests of the Department of Defense.

Mr. LONG. The point I had in mind was that this is the beginning of the program. In his message, the President announced that he intended to start a program to replace barracks throughout the Nation. Here is the first increment asked for, amounting to almost $100 million. That is the beginning of the program. If this amount is granted, we are going to have to grant the rest of the requests as they come along.

I should like to compliment the committee for writing into the bill certain provisions in an effort to guarantee economies which could be effected. For example, on page 71 the committee wrote that the cost for cold storage should not exceed $20 a square foot. I hold in my hand the Senate committee report written in 1952, at a time when I was a member of the subcommittee. I wrote the report. We recommended that the costs for cold storage should not exceed $20 a square foot.

The committee also wrote into the bill the provision that the cost for warehousing should not exceed $6 a square foot. We had also written that recommendation into the committee report accompanying the Naval and Military Construction Act of 1952. The same was true of the recommendation that barracks should not exceed a cost of $1,700 a man, or $1,400 a man for lifetime barracks, and that bachelor officers' quarters should not exceed a cost of $5,000 a man.

I only wish the committee had written into the proposed law an additional provision which was contained in the 1952 act. That was a provision creating in the Department of Defense a Director of Installations. If there were a well qualified Director of Installations in the Office of the Secretary of Defense, I confidently state that the $1 billion bill would have been trimmed down by at least $200 million or $300 million.

All through the bill may be seen evidences of waste. I suspect that there is a lot more waste than just that embraced in the item on barracks.

I regret that neither the committee nor the Congress has available to it adequate advice to enable it to ascertain in what respects items in the bill involve waste. There is one item which I do not propose to touch, because there is not the time to look into it, but there is in the bill a proposed authorization of more than $235 million for additional paving.

If they study the bill, Senators will find that of the proposed item of $235 million for paving for the Air Force, about 50 percent of that amount is for parking aprons. Senators will further find that the amount of concrete used by the Air Force is excessive. The Air Force likes to build parking aprons so that there is an amount 3½ times to the square of the size of the airplane. When personnel of the Air Force park airplanes, they like to be able to drive up to the rear and out front without touching any other airplanes. They like to do that, rather than have the system in effect in commercial operations. I should doubt that the commercial airlines at the National Airport here in Washington have anything like the amount of parking facilities or space that the Air Force insists upon. I have never yet seen a base where the Air Force did not have adequate facilities to park all the airplanes they were using. I have never seen a base where twice as many airplanes could not be parked.

The Marine Corps used a ratio of 1½, instead of 3½, to the square of the size of the airplane in actual, frontline combat fields. It is possible to get by with a lot less concrete in the parking aprons than the Air Force requests.

Mr. CASE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. CASE. Let me say that the Subcommittee on Real Estate and Military Construction of the Senate Armed Services Committee has been very appreciative of the fact that the predecessor committee did establish some unit costs in the various categories which the Senator from Louisiana has mentioned. In the work the subcommittee has been called

upon to do in the past year and a half, we have seen the good results of that action. At the same time, I think it should be pointed out that the proposal to recruit a so-called Director of Installations might be somewhat difficult and might be somewhat overlapping, since, under the present Secretary of Defense, there is now an Assistant Secretary of Defense for Installations. He and his staff, to a certain extent, at least, took the place of the former Director of Installations.

Mr. LONG. I say to the Senator from South Dakota that there never was a more wasteful act done by one stroke of the pen than there was when the President of the United States heeded the advice of high-ranking officers over in the Pentagon and abolished the Office of the Director of Installations. I say that for this reason: The Senator from South Dakota is familiar with the fact that when there was a Director of Installations in the Department of Defense, he recommended to the Secretary of Defense that the services withdraw requests for another $4 billion for defense construction on the bases. That was contained in the statement of Mr. Frank Creedon, when he appeared before the Armed Services Committee a year ago. Not only did the Secretary of Defense require the services to withdraw their request for $4 billion, but representatives of the services were told that if they wanted additional authorizations for construction, they would be authorized such facilities only if the services would surrender at least as much, in dollars, of outstanding authorizations that they could do without.

The distinguished Senator from South Dakota handled the bill in which the services surrendered $700 million of unnecessary authorizations in order to obtain authorizations of $500 million. There resulted a net reduction in authorizations of around $200 million.

I salute the Senator from South Dakota for handling the bill. He handled the bill well, and put many economies into effect. But the reason that was done was that a man named Frank Creedon was Director of Installations and he was the Secretary of Defense on the subject of military construction. He was a man who was familiar with the military construction which the military services needed.

Mr. Creedon went further and testified he saw a need for finding out where there were waste and unnecessary expenditures in military construction. When he did, the high-ranking officers set about to see that his position would be abolished.

They abolished the position; and in the place of the man who had been Director of Installations, they appointed an Assistant Secretary of Defense for Properties and Installations. With all due respect to that good man, I say he did not know what the services were up to; he did not know how the old Army game, the old Navy game, and the new Air Force game operate. So it is that we now see recommended for inclusion in the military and naval construction bill many of the same items that Congress had the good judgment to turn down in the past.

If we had in that position someone with the good, sound, judgment and fortitude that Mr. Kyes had when he was there to advise the Secretary, and with the bold independent judgment of Mr. Creedon, we would not now see the Secretary of Defense recommending the expenditure of $1,100,000,000 for this purpose.

Mr. CASE. Mr. President, will the Senator from Louisiana yield to me?

The PRESIDING OFFICER (Mr. CARLSON in the chair). Does the Senator from Louisiana yield to the Senator from South Dakota?

Mr. LONG. I yield.

Mr. CASE. Mr. President, I had not expected that we would enter upon a free-wheeling debate on the military and naval construction bill, in advance of its consideration by the Senate. However, in view of the presentation the Senator from Louisiana has made, I think the RECORD should contain some additional statements in connection with the matter.

First of all, let me say, regarding Mr. Creedon, that it was our privilege to have the services of Mr. Frank Creedon for the guidance and counsel of the committee a year ago; and I worked with Frank Creedon for 4 or 5 months. So I join the Senator from Louisiana in paying high tribute to Mr. Creedon's ability, integrity, and desire to remove from the estimates any water, so to speak. He did an excellent job, and we had the benefit of his services in connection with the bill which was presented to the Senate a year ago. I would not detract one iota from what the Senator from Louisiana has said respecting Mr. Creedon's ability. However, the fact that Mr. Creedon is an able man and was a very valuable assistant to the committee does not mean that the committee is entirely devoid of help at this time.

The Senator from Louisiana has made a statement regarding the present Assistant Secretary of Defense for Properties and Installations; but I doubt that the Senator from Louisiana would have made the statement if he had had an opportunity to work with the Assistant Secretary of Defense, Mr. Franklin G. Floete, who, in that capacity, has proven himself to be a very able and conscientious person. It is true that he came to the position without the background of military construction that some other persons might have had. However, during his tenure of that office he has had the benefit of the counsel, technical advice, and military knowledge of Admiral Jelley, who has been the righthand man to Mr. Floete during the period when Mr. Floete has been Assistant Secretary of Defense.

Admiral Jelley came to that position after several years as head of the Bureau of Yards and Docks, of the Navy. So, in that team, we have coupled together the desires for economy of Mr. Floete and the benefit of his experience in the construction business, when he was the active head of Wood Brothers, of Lincoln, Nebr., a firm engaged in construction activities, and one that had contracts, I think, along the Mississippi, and at one time in the State of Louisana. In any event, he had construction experience with that firm, and was an experienced businessman. He obtained a law degree from Harvard University Law School. Although I do not know that he ever practiced law, at least he combines the background of practical knowledge as the managing head of a large construction firm and a knowledge of law and a knowledge of banking and finance, and a knowledge of business, as the head of a large business firm at Des Moines, Iowa, for a number of years. Those qualifications of Mr. Floete are combined with the military knowledge and knowledge of military construction held by Admiral Jelley, who for many years was head of the Bureau of Yards and Docks.

So the Assistant Secretary of Defense and his office have not been without knowledge of military defense and its requirements; and as a result of their combined application in connection with the original requests of the Department of Defense, approximately $500 million was cut from the requests of the Department of Defense, as they went to his office, before the requests came to the Congress.

In addition, let me point out that in House bill 9242, as reported by the Committee on Armed Services, we propose the reapplication or reprograming of approximately $435 million of prior authorizations. So this bill is not one which is entirely confined to requests for new funds or new authorizations; but if the Senator from Louisiana will examine the hearings, which fortunately are available to all Members of the Senate—I refer to the green-bound books which now are on the tables beside the pages—he will note that in the hearings on the bill, in every instance the amounts for reprograming or reapplication of funds are set forth. For that matter, they are also stated in the bill itself.

So a total of $435 million, as carried under various items in the bill, is for reapplications or reprograming of funds previously authorized, but not used, and which we believe can be applied to projects of higher priority, in connection with this bill.

Mr. MAYBANK. Mr. President, will the Senator from Louisiana yield to me?

Mr. LONG. I yield.

Mr. MAYBANK. Let me inquire whether we are to understand that the military and naval construction bill is to be voted on at any time during the session today. I ask the question because the Appropriations Committee is in the process of considering the deficiency appropriation bill; and, in addition to having to attend the Appropriations Committee in connection with its consideration of that bill, I must also attend the conference committee in its meeting on the banking bill. Obviously it will be impossible for me to be in all three places at the same time.

Mr. LONG. Let me state that the military and naval construction bill, House bill 9242, is not pending at this time. However, I wish to address myself to the bill at this time, in order to have

this discussion of it available in the RECORD, so that other Senators may be able to examine it tomorrow.

Mr. MAYBANK. I thank the Senator from Louisiana.

Mr. LONG. The Senator from South Carolina is very welcome.

Mr. President, I should like to comment on the statement that the Assistant Secretary of Defense for Properties and Installations has had experience and has the benefit of the advice of Admiral Jelley.

Admiral Jelley was head of the Bureau of Yards and Docks, and he made various proposals of items to be included in the 1952 authorization bill for the Navy. In that bill we found a number of items that should have been reduced in amount, and we did reduce them.

I dislike to criticize the admirals and generals of the armed services. However, I point out that over a long period of time they have found ways and means to obtain the things they wanted for their services. It is the job of the civilian officials of the Government to find ways and means by which those amounts can be reduced. I say with regret that, all too often, the Secretaries and Assistant Secretaries become mere attorneys for the admirals and generals, in seeking to obtain for them what the officers want, rather than in working for the public, in trying to save as much money as can possibly be saved.

Mr. President, it seems to me that two things should be very clear. First, if we wish to prevent the making of unnecessary appropriations and the wasting of public funds, we need to have in the Department of Defense some persons who cannot be controlled by the military, some men who will exercise civilian control, as the Constitution and laws of this country intend, and some men who will see to it that authorizations and appropriations are not requested unless they are absolutely necessary. I say that because I know it is very difficult for Senators to vote against major appropriations if they are to be spent in their own States.

For instance, House bill 9242 calls for the authorization of appropriations in the total amount of $1,100,000,000, some of it to be spent in every State. I know the problem that confronts a member of the committee. When he recommends a reduction in the amount of an item of, let us say, $8 million or $10 million, to be spent in a particular community. He realizes that that item represents prosperity and payrolls in that community, and that if that amount is made available, more money will be in circulation there. Of course, Mr. President, almost all the people of a community so involved will ask their Members of Congress to fight for every last dime of such items, even though the items might be very wasteful ones. In short, Senators will find that their constituents are strongly in favor of economy, so long as it does not affect their communities. When they find that the economy affects them, many of them say, "Senator, here is a vital item which we must have."

I recall that after working to try to trim down one of these installation bills some public-spirited citizens come to see me from a town which had a base. Those people, after listening to me discuss the various reductions and savings which had been made, running to approximately $700 million, said, "Inasmuch as the service is going to waste so much money anyway, why can you not get it to waste some of it in our home town?" Senators are familiar with that problem.

One Senator came to me and told me that the reductions which were made were going to give him some very special problems. The citizens of a community where a particular base was located were going to be resentful of the fact that we had taken out every cent, to the extent of millions of dollars, of the money proposed to be spent on that particular base during that year.

The easiest way to effect economies is not for the Congress to find where excessive funds have been requested and take them out, but for the services not to request such funds in the first place. The best way to prevent that situation from arising is to place a man in the Office of Secretary of Defense to advise him where economies can be effected.

I recall that about 2 years ago, when I was serving on the Armed Services Committee, I was engaged in holding up construction funds for the North African airbases. Since that time the Secretary of Defense and the President of the United States have shown good judgment in not permitting those additional bases to be constructed. The net saving was in excess of $100 million.

At that time a letter was written by one of the under secretaries. Senators would read that letter with interest. It contained the implication that the junior Senator from Louisiana, in taking the lead to hold up some of the funds which the service desired released, was undermining the defense of the country. The Under Secretary was saying, in effect, that he must decline to take the responsibility for what might happen if war should break out the next day. Those are the pressures to which Members of Congress are subjected when they try to insist on economies in the services.

Upon the advice of Mr. Creedon, Mr. Lovett, who was then the Secretary of Defense, proceeded to tell the services that they need not come back after an additional $4 billion authorization which they had informed us they would request in 1953. Mr. Lovett was fully convinced, after the Director of Installations had made a study, that the additional authorization was not necessary. Mr. Creedon came before the Armed Services Committee and gave us a very well-prepared statement showing that, far from needing more money, the services had enough money to carry them in some instances for as many as 4 years, so far as authorizations were concerned.

The then Secretary of Defense realized that those expenditures were excessive, that the appropriations were excessive, and that the authorizations were excessive. He informed Congress that he would not ask for more of them, except when he could surrender back unused authorizations of equal or greater amount.

When the new Secretary of Defense, Mr. Wilson, went into office he proposed approximately $5 billion of economies in the Air Force; and approximately $1,400,000,000 of those economies were the economies which Mr. Creedon had already been studying and recommending to Mr. Lovett, while Mr. Lovett was Secretary of Defense.

It seems to me that our committee has worked hard on this bill. I know that if it were the will of Congress that some additional items be taken out of the bill because the bill was believed to be excessive, the committee would do a workmanlike job in trimming the bill down, to the extent of eliminating many unnecessary barracks buildings authorized.

The Congress should add an amendment to recreate the Office of Director of Installations, and require, just as Congress required 2 years ago, that the person who holds the office of Director of Installations should have the qualifications which would make him familiar with military construction, and give him some familiarity with the method of operation of the military. Such a man should be in the Office of the Secretary of Defense, not under the thumb of the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force. He should owe no greater loyalty to one service than another. He should have a small staff, as Mr. Creedon had. Mr. Creedon had a staff of 23 men, and they kept up with a program running into billions of dollars every year.

I believe that Congress should further write into the legislation a provision which would not only recreate the Office of Director of Installations, in an effort to keep down unnecessary expenditures for our military construction, but provide that this office shall not be abolished by a reorganization plan. We should stop the practice of members of the Armed Forces using their influence first in one direction, and then in another, until they finally abolish the position of one whom they find it most difficult to move when they want to spend money unnecessarily.

AMENDMENT OF SECTION 17 OF MINERAL LEASING ACT OF FEBRUARY 25, 1920, AS AMENDED

The Senate resumed the consideration of the bill (S. 2380) to amend section 17 of the Mineral Leasing Act of February 25, 1920, as amended.

Mr. BARRETT. Mr. President, the Leasing Act of 1920 was enacted for the purpose of promoting in an orderly manner the development of mineral resources, particularly oil and gas, in the public-land States of the West. When the Congress passed the Leasing Act it was an experiment in that field of legislation. Many changes have been made over the years as indicated by experience in the administration of the act. The last major revision of the act took place in 1946.

Senate bill S. 2380 is designed and intended to bring the provisions of the Leasing Act into line with present day conditions. S. 2380 has been approved by the Secretary of the Interior and by

the Bureau of the Budget. Hearings were held and attended by various officials of the Government agencies concerned and by all segments of the oil and gas industry, including small independent operators. Many of the changes in existing law were proposed by the Department itself, and policy-making officials of the Department of the Interior, as well as by spokesmen for all groups active in oil and gas production on the public lands, testified as to the need for this legislation.

The bill in its final form, together with the report and the printed hearing, was widely distributed, and no opposition to the legislation has come to my attention. According to the testimony from all the witnesses, including those from the Department, the strict construction of some of the provisions of the Leasing Act has caused undue hardship on oil and gas operators and has tended to retard oil and gas development operations on the public domain.

I can best explain the bill, Mr. President, by summarizing its provisions section by section.

I

(A) Makes it clear that a lease upon which production ceases will not expire if drilling operations are commenced within 60 days and carried on continuously until oil or gas is encountered.

This provision is necessary because of a ruling by the solicitor that a lease will terminate whenever production ceases during the secondary term of the lease unless drilling operations are being carried on at that time. That harsh position is changed by giving the operator 60 days within which to commence actual drilling operations.

(B) If the lease has a well capable of producing but shut in it must be placed on a producing basis within 60 days after notice or the lease will be terminated. If a discovery is made during the secondary term and the well is shut in because of lack of transportation or market under the solicitor's rule, it is subject to termination. This section gives the operator 60 days after notice to put his well on a producing basis.

II

This section provides that if the lessee applies for an extension of his lease within 90 days of its termination he shall be entitled to an extension (A) for 5 years if on termination date it is found that the lease is not within a known geologic structure or (B) 2 years if within a known geologic structure. This provision is necessary for the reason under existing law the Government could declare on the last day of a lease that it covers land within a known geological structure and the operator could not perform and would lose his lease. Under the bill the operator would have 2 years within which to drill his well.

III

This section extends the term of a lease as long as compensatory royalties are paid and 1 year thereafter, and as long as there is production. This section is made necessary by reason of a ruling that a lease terminates during the secondary term when compensatory royalties are discontinued. Under the bill the operator is given 1 year to drill and get production in order to maintain lease. Compensatory royalty is paid when oil or gas is drained by wells on lands adjacent to United States lands.

IV

Under present interpretation of the law noncompetitive leases in a unit will be extended if production is encountered in the unit during the first 5 years of the lease. Under this provision all leases within the unit will be extended during the secondary term, when production is encountered within the unit; also 2 years to drill upon lands outside the unit when segregated.

V

This section applies mainly in New Mexico. The Secretary of the Interior may approve a special drilling contract, and the lands are excluded from acreage limitations. Under rulings only the operator can take advantage of this arrangement. Accordingly this provision makes it possible for the lessees not a party to the contract to also take the same advantage and provides that their acreage shall not be charged in the limitation.

VI

Under present law assignments of partial interests can be made during the secondary term only when the lease is extended by reason of production. This provision makes it possible, no matter what the reason, to extend the lease.

VII

Under present law the Secretary is required to give 30 days notice of cancellation for failure to pay rental (A) 90 days in advance of the date the rentals are due if there is no bond, or (B) 30 days before if covered by bond.

This provision simply provides for cancellation without notice if rentals are not paid when due.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend the Mineral Leasing Act of February 25, 1920, as amended."

DEVELOPMENT OF OIL AND GAS ON THE PUBLIC DOMAIN

Mr. CARLSON. Mr. President, I move that the Senate proceed to the consideration of calendar 1622, Senate bill 2381.

The PRESIDING OFFICER (Mr. CRIPPA in the chair). The Secretary will state the bill by title for the information of the Senate.

The CHIEF CLERK. A bill (S. 2381) to amend section 27 of the Mineral Leasing Act of February 25, 1920, as amended, in order to promote the development of oil and gas on the public domain.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Interior and Insular Affairs with an amendment, to strike out all after the enacting clause and insert:

That section 27 of the act of February 25, 1920, as amended (30 U. S. C. 184), is further amended as follows:

(1) Strike out all of the language preceding the semicolon of the second sentence of section 27, and insert the following in lieu thereof: "No person, association, or corporation, except as herein provided, shall take or hold at one time oil or gas leases exceeding in the aggregate 46,080 acres granted hereunder in any one State, except that in the Territory of Alaska no person, association, or corporation, except as herein provided, shall take or hold at one time oil or gas leases exceeding in the aggregate 100,000 acres granted hereunder;".

(2) Strike out sentences 5 and 6 of section 27 and insert the following in lieu thereof: "The interest of an optionee under a nonrenewable option to purchase or otherwise acquire one or more oil or gas leases (whether then or thereafter issued), or any interest therein, shall not, prior to the exercise of such option, be a taking or holding or control under the acreage limitations provisions of any section of this act. No such option shall be entered into for a period of more than 3 years, without the prior approval of the Secretary of the Interior, and no person, association, or corporation shall hold at one time such options of more than 200,000 acres in any one State.".

Mr. BARRETT. Mr. President, the purpose of S. 2381 is to modernize certain provisions of the Leasing Act of 1920 in order to conform with changing conditions affecting oil and gas exploration on the public domain. This bill has been approved by the Secretary of the Interior and the Bureau of the Budget. Hearings were had and spokesmen for the oil and gas industry representing every segment including the small independent operators appeared and supported the bill. Fourteen or fifteen witnesses appeared before the committee. Officials of the Department appeared in support of the bill and in fact, the committee has not been advised of any opposition to the bill.

This bill would make the following changes in the Leasing Act:

First. Increase acreage holdings any one person could hold under lease in any one State from 15,360 to 46,080 acres. In Alaska the figure is set at 100,000 acres.

Second. It would increase the area held under option from 100,000 to 200,000 acres in any one State.

Third. It would extend the terms of options from 2 to 3 years.

It amends the law to permit options to be taken for any legitimate purposes.

Let me call attention, Mr. President, to the fact that about 300 million acres of public lands in the West are subject to the provisions of this bill. And, furthermore, it must be remembered that only 3 percent of the Federal lands presently under lease are on a producing basis and that production from these leases account for only 5 percent of our total production.

It is significant to note there is no limitation on the acreage that may be held on State lands and that there is no longer any limitation on Indian lands that may be held under lease. Of course, there is no limit on the acreage one can

hold in those States where the Federal Government does not own the minerals.

One might think that the liberalization of acreage limitations might benefit the large operator only. Such is not the case. The small operator has a limited force and facilities and needs more time to make his geological studies or arrange for financing and conducting exploratory work. An independent who is planning an expensive wildcat well for a deep test that may cost upward of a half million dollars will need sufficient acreage to justify such a venture.

Conclusive evidence was presented at the hearings showing that under present-day conditions and modern methods of oil exploration liberalization of the laws governing the leasing of the public lands is necessary for fuller development of their resources. Depths to which drilling must be carried to make new discoveries are constantly increasing with a tremendous corresponding rise in costs. Modern exploration and drilling equipment also is far more expensive. Under present-day conditions increased acreage and more time are necessary to protect the huge investments now needed to maintain rates of discovery.

The Secretary of the Interior stated the case for increasing the acreage limitation in a very forcible manner in his report on this bill, as follows:

> The proposal to increase the maximum acreage which may be held under oil and gas lease in any one State would, if enacted, undoubtedly encourage many lessees of public lands who are in a position to explore and develop larger areas than can be held under the existing statutory limitations. With the passage of time in the country's history of mineral development, it has become increasingly difficult to discover undeveloped mineral resources of the Nation and increasingly expensive to conduct up-to-date exploratory and developmental operations. Because of the importance of minerals to the Nation's economy, it is very important that every feasible measure be adopted to encourage the discovery of new sources for minerals and their development.

Mr. President, I favor unit agreements because I believe the end result generally is the conservation of our oil and gas resources.

However, acreage committed to a unit agreement approved by the Secretary of the Interior is exempt from the acreage limitations of the Leasing Act. It is a notorious fact, Mr. President, that many operators are forced to file unit agreements merely because of the present restrictive acreage limitations on leases and options. To administer these applications for unit agreements costs the Government thousands of dollars. This legislation would correct that situation.

Mr. President, the case for this bill has been stated in an admirable manner by a spokesman for the industry in the following language:

> The industry is able to handle a larger volume of acreage in the public-domain States than it is now handling, as is evidenced by its greater activity in other areas, but it is prevented from doing so by the present acreage limitations. These limitations put a ceiling on the total effort which any one operator may expend by limiting the amount of acreage which he may have under lease or under option at any one time. Thus, with industry's present potential for exploratory activity, acreage limitations are actually retarding development of the public domain.
>
> The successful and continual exploration and development, which is the only insurance against depletion of underground reserves, depends on a reserve of prospective drilling acreage. The ratio between dry holes and successful wildcat wells is too great to gamble with single-shot operations; that is, taking one prospective block and confining all efforts looking toward production on such block before blocking up another prospect.
>
> The purpose of the Leasing Act, as explained in its title and reemphasized in every amendment thereof, is to promote the development of the oil and gas resources of the public domain. The present limitations are having exactly the opposite effect.

Mr. SMATHERS. Mr. President, will the Senator yield?

Mr. BARRETT. I am glad to yield to the distinguished Senator from Florida.

Mr. SMATHERS. I should like to ask the Senator why it was necessary to increase the limitation on the number of acres which any one operator may hold, from 15,360 to 46,080 acres?

Mr. BARRETT. I may say to the distinguished Senator from Florida that the conditions with respect to the production of oil have changed materially in the past 20 years. All the structures which were discernible from the surface of the ground have been drilled, and it is now necessary to drill very, very deep wells, sometimes 2 or 3 miles deep, in order to get production. It is much more expensive today. It calls for a great deal of work, and the average costs are $200,000, $300,000, or $500,000 for the drilling of a well, depending on the depth to which it is necessary to go. Therefore it is essential to have a much larger area, so that if any mistake is made in the geophysical work an operator will still have a chance to recovering his expenditure.

Mr. SMATHERS. Did the committee give any consideration to whether such an amendment might result in a concentration of oil leases in the hands of only a few big concerns, or in the hands of 2 or 3 individuals?

Mr. BARRETT. I may say to the distinguished Senator from Florida that that question was considered very carefully by the committee. I should like to give the Senator some figures on that point. In the State of Wyoming, the Federal Government owns outright 32 million acres. In addition, it owns the minerals under at least 10 million more acres. Considering only the relationship between the 32 million acres and the 62 million acres, which comprise the area of Wyoming, I should like to give the Senator another figure.

A single individual or company, if either could get a lease for the maximum acreage under the bill, would have only 0.0015 of 1 percent of the public land area of Wyoming.

Therefore the Senator can see how infinitesimal it is.

I should like to give the Senator some other figures. At the present time, we have production on about only 3 percent of the Federal land. About 300 million acres of public land are in the Western States. Less than 5 percent of our total production comes from Federal lands.

If the Senator wishes, I can show him that the leases and the options that could be granted under the pending bill would take only an infinitesimal portion of the area of any of the Western States.

Mr. SMATHERS. I thank the Senator. The Senator himself is satisfied, then, that the amendment would not result in a monopoly or in any kind of concentration of oil rights and mineral rights in the hands of 1 or 2 individuals or 1 or 2 corporations. The Senator is satisfied that that will not be the case?

Mr. BARRETT. I am satisfied that that will not be the case. I may say that the Assistant Secretary of the Interior, Mr. Orme Lewis, testified that that would not be the case.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. BARRETT. I am glad to yield to the distinguished Senator from New Mexico.

Mr. ANDERSON. Is it not true that in the Western States there are large areas of State-owned lands on which there is no restriction whatever?

Mr. BARRETT. That is correct.

Mr. ANDERSON. They have found no difficulty because of that fact.

Mr. BARRETT. That is correct.

I ask unanimous consent to have printed in the RECORD at this point in my remarks a computation showing the effect of the proposed legislation with reference to the percentages that might be held by any one operator in any one State.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

State	Present law: 1 operator may hold under lease—		New bill: 1 operator may hold—		Present law: 1 operator may hold under option—		New bill: 1 operator may hold—	
Colorado	0.0006	6/10,000 of 1 percent	0.0018	1.8/1,000 of 1 percent	0.0040	4/1,000 of 1 percent	0.0080	8/1,000 of 1 percent.
Wyoming	.0005	5/10,000 of 1 percent	.0015	1.5/1,000 of 1 percent	.0031	3.1/1,000 of 1 percent	.0062	6.2/1,000 of 1 percent.
Montana	.0004	4/10,000 of 1 percent	.0012	1.2/1,000 of 1 percent	.0029	2.9/1,000 of 1 percent	.0058	5.8/1,000 of 1 percent.
Idaho	.0004	4/10,000 of 1 percent	.0012	1.2/1,000 of 1 percent	.0029	2.9/1,000 of 1 percent	.0058	5.8/1,000 of 1 percent.
Utah	.0004	4/10,000 of 1 percent	.0012	1.2/1,000 of 1 percent	.0027	2.7/1,000 of 1 percent	.0054	5.4/1,000 of 1 percent.
Nevada	.00025	2.5/10,000 of 1 percent	.00075	7.5/10,000 of 1 percent	.0017	1.7/1,000 of 1 percent	.0034	3.4/1,000 of 1 percent.
Total	.00006	6/100,000 of 1 percent	.00018	1.8/10,000 of 1 percent	.00044	4.4/10,000 of 1 percent	.00088	8.8/10,000 of 1 percent.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

COMMISSION ON AREA PROBLEMS OF THE GREATER WASHINGTON METROPOLITAN AREA

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H. R. 2236) for the establishment of a Commission on Area Problems of the Greater Washington Metropolitan Area, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SCHOEPPEL. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. SCHOEPPEL, Mr. BUTLER, and Mr. JOHNSON of Colorado conferees on the part of the Senate.

LEAVE OF ABSENCE

On his own request, and by unanimous consent, Mr. HOLLAND was excused from attendance on the sessions of the Senate for the remainder of this week and until Wednesday night of next week.

GROUP LIFE INSURANCE FOR CIVILIAN OFFICERS AND EMPLOYEES IN THE FEDERAL SERVICE

Mr. CARLSON. Mr. President, I move that the Senate proceed to consider the bill (S. 3681) to authorize the Civil Service Commission to make available group life insurance for civilian officers and employees in the Federal service, and for other purposes.

The PRESIDING OFFICER. The clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (S. 3681) to authorize the Civil Service Commission to make available group life insurance for civilian officers and employees in the Federal service, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. CARLSON. Mr. President, before I begin my remarks, I ask unanimous consent—and I have discussed this matter with the majority leader and the minority leader—that Mr. Warren B. Irons, a member of the staff of the Civil Service Commission, be given the privilege of the floor during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CARLSON. Mr. President, the Senate has now proceeded to consider S. 3681 to authorize the Civil Service Commission to make available group life insurance for civilian officers and employees in the Federal service. As chairman of the Post Office and Civil Service Committee, charged with consideration of this bill, I wish to outline its principal provisions and discuss briefly the plan and necessity therefor.

This important proposal results from studies by a subcommittee of the Cabinet, formed last winter to explore how the administration could best provide the necessary elements of a well-rounded personnel program for the Federal service. Last February, President Eisenhower included group life insurance in a statement of the administration's legislative program for Federal personnel management.

Briefly, the group insurance program authorized by the bill would cover nearly all civilian employees in the executive, legislative, and judicial branches of the United States Government, including Members of Congress, Federal judges, and employees of the District of Columbia Government. The Commission could, by regulation, exclude persons whose coverage would be administratively impracticable such as part-time or intermittent employees. Noncitizen employees with permanent duty station outside a State or the District of Columbia would be excluded from coverage.

Each eligible employee, without medical examination, would be automatically covered unless he elects to the contrary. Therefore, participation in the plan would be entirely voluntary.

Each covered employee would be insured for a sum equal to his annual compensation raised to the next higher multiple of $1,000, with a maximum of $20,000 in any case. Double indemnity in event of accidental death, and dismemberment insurance would also be provided. The amount of insurance would be reduced by 2 percent a month after the individual attains age 65, subject to a maximum reduction of 75 percent.

As his share of premium cost, there would be withheld from the employee's salary an amount not exceeding 25 cents bi-weekly for each $1,000 of life insurance. This rate would not fluctuate with the age of the employee. The Government would contribute from existing agency appropriations an amount not exceeding one-half the sum withheld from the employee. This premium cost and its distribution between the employee and the Government conforms to the usual practice in private industry.

Payment of premiums would end at age 65, or earlier if the employee retires for disability or retires for other reason after at least 15 years' civilian service. Otherwise, separation from service would terminate the group insurance protection. At separation, however, the individual would be able, without medical examination, to purchase an individual policy at a rate applicable to his attained age. This particular feature is of real importance to the officer or employee who could not otherwise obtain insurance at regular rates because of his physical condition.

Payment of the insurance upon death would be made in the same order of precedence as now provided for lump-sum death payments in the Civil Service Retirement Act and the Federal Employees Leave Act.

The Commission would purchase from one or more companies meeting specified qualifications a policy or policies to provide the insurance benefits. These companies would establish a single administrative office to assure the utmost economy in the operation of the plan. Such companies would be required to reinsure portions of the total insurance, in accordance with a stated formula, with such other companies which elect to participate. Thus there would be nationwide company participation in a fair and equitable manner.

The Commission would determine the premium rates to be charged by insurance companies on a basis consistent with the lowest rates charged large employers for group life and accidental death and dismemberment insurance. Adjustment of rates would be made as experience requires. Companies would be required to make annual reports accounting for all income and expenses under the policies.

A special fund would be set up in the Treasury in which would be deposited employee and Government contributions. The fund would be available for premium payments to the insurance companies and for administrative expenses. I am assured and believe that the total administrative cost would not exceed 2 percent of the total premiums and that no additional appropriation would be necessary for administrative expense.

The Commission would act to protect the rights of separated or retired employees now insured through nonprofit associations of Federal employees, provided the insurance was granted prior to January 1, 1954, and the association terminates all its life insurance agreements and turns over assets sufficient, if possible, to cover the liabilities involved.

The bill creates an Advisory Council on Group Insurance consisting of the Secretaries of the Treasury and Labor and the Director of the Bureau of the Budget to review the program and advise the Commission on policy matters. A committee of five insured employees would be appointed by the Commission to advise regarding matters of concern from the viewpoint of the employees.

The Commission would be required to report annually to the Congress on all phases of the operations.

The Commission would establish an effective date for the insurance and contributions.

I feel that enactment of this proposal will establish a most worthwhile improvement in the Federal personnel program. It will increase the employee's sense of family security, and provide an inducement to continue service. On the other hand, many real advantages will accrue to the Government in the form of increased employee productivity and decrease in wasteful turnover.

Passage of this bill would adapt to the use of the Government an administrative practice which has proven its value in progressive private business.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That this act may be cited as the "Federal Employees' Group Life Insurance Act of 1954."

SEC. 2. (a) Except as provided in (b) of this section, each appointive or elective officer or employee (hereinafter called employee) in or under the executive, judicial, or legislative branch of the United States Government, including a Government owned or controlled corporation (but not including any corporation under the supervision of the Farm Credit Administration of which corporation any member of the board of directors is elected or appointed by private interests), and of the municipal government of the District of Columbia shall, at such time and under such conditions of eligibility as the Civil Service Commission (hereinafter called the Commission) may by regulation prescribe, come within the purview of this act. Such regulations may provide for the exclusion of employees on the basis of the nature and type of employment or conditions pertaining thereto such as, but not limited to, short-term appointments, seasonal or intermittent employment, part-time employment, and employment of like nature, and shall be issued only after consultation with the head of the department, establishment, agency, or other employing authority concerned: *Provided*, That no employee or group of employees shall be excluded solely on the basis of the hazardous nature of employment.

(b) This act shall not apply to noncitizen employees whose permanent duty station is located outside a State of the United States or the District of Columbia, nor shall it apply to commissioned officers and enlisted personnel on active duty in or with the Army, Navy, Air Force, Marine Corps, or Coast Guard of the United States, who have indemnity coverage under the Servicemen's Indemnity Act of 1951 (65 Stat. 33).

SEC. 3. (a) Each employee to whom this act applies shall be eligible to be insured for an amount of group life insurance approximating his annual compensation not exceeding $20,000 plus an equal amount of group accidental death and dismemberment insurance, in accordance with the following schedule:

If annual compensation is—		The amount of group life insurance shall be—	The amount of group accidental death and dismemberment insurance shall be—
Greater than	But not greater than		
0	$1,000	$1,000	$1,000
$1,000	2,000	2,000	2,000
2,000	3,000	3,000	3,000
3,000	4,000	4,000	4,000
4,000	5,000	5,000	5,000
5,000	6,000	6,000	6,000
6,000	7,000	7,000	7,000
7,000	8,000	8,000	8,000
8,000	9,000	9,000	9,000
9,000	10,000	10,000	10,000
10,000	11,000	11,000	11,000
11,000	12,000	12,000	12,000
12,000	13,000	13,000	13,000
13,000	14,000	14,000	14,000
14,000	15,000	15,000	15,000
15,000	16,000	16,000	16,000
16,000	17,000	17,000	17,000
17,000	18,000	18,000	18,000
18,000	19,000	19,000	19,000
19,000	------	20,000	20,000

(b) Subject to the conditions and limitations of the policy or policies purchased by the Commission under this act, as may be approved by the Commission, the group accidental death and dismemberment insurance shall provide payments as follows:

Loss	Amount payable
For loss of life.	Full amount shown in the schedule in (a) of this section.
Loss of one hand or one foot or loss of sight of one eye.	One-half the amount shown in the schedule in (a) of this section.
Loss of two or more such members.	Full amount shown in the schedule in (a) of this section.

For any accident the aggregate amount of group accidental death and dismemberment insurance that may be paid shall not exceed the amount shown in the schedule in (a) of this section.

(c) The Commission shall by regulation provide for the conversion of other than annual rates of compensation to an annual basis, and shall further specify the types of compensation to be included in annual compensation.

(d) Each of such amounts of insurance shall be reduced by 2 percent thereof at the end of each full calendar month following the date the employee attains age 65, subject to minimum amounts prescribed by the Commission, but not less than 25 percent of the insurance in force immediately preceding the first reduction provided herein: *Provided*, That the amounts of insurance in force from time to time on an employee who becomes insured under this act after having attained the age of 65 shall be the same as would be in force had he been insured at age 65, and shall be based on the lesser of his annual compensation (1) at the time he becomes so insured, or (2) at age 65, provided he was eligible at that time to be insured under this act.

SEC. 4. Any amount of group life insurance and group accidental death insurance in force on any employee at the date of his death shall be paid, upon the establishment of a valid claim therefor, to the person or persons surviving at the date of his death, in the following order of precedence:

First, to the beneficiary or beneficiaries as the employee may have designated by a writing received in the employing office prior to death;

Second, if there be no such beneficiary, to the widow or widower of such employee;

Third, if none of the above, to the child or children of such employee and descendants of deceased children by representation;

Fourth, if none of the above, to the parents of such employee or the survivor of them;

Fifth, if none of the above, to the duly appointed executor or administrator of the estate of such employee;

Sixth, if none of the above, to other next of kin of such employee entitled under the laws of domicile of such employee at the time of his death.

If any person otherwise entitled to payment under this section does not make claim therefor within 1 year after the death of the employee, or if payment to such person within that period is prohibited by Federal statute or regulation, payment may be made in the order of precedence as if such person had predeceased the employee, and any such payment shall be a bar to recovery by any other person.

SEC. 5. (a) During any period in which an employee under age 65 is insured under a policy of insurance purchased by the Commission as authorized in section 7 of this act, there shall be withheld from each salary payment of such employee, as his share of the cost of his group life and accidental death and dismemberment insurance, an amount determined by the Commission, but not to exceed the rate of 25 cents biweekly for each $1,000 of his group life insurance: *Provided*, That an employee who is paid on other than a biweekly basis shall have an amount so withheld, determined at a proportionate rate, which rate shall be adjusted to the nearest cent.

Any policy of insurance purchased by the Commission as authorized in section 7 of this act shall provide that all employees eligible under the terms of this act will be automatically insured thereunder commencing on the date they first become so eligible: *Provided*, That any employee desiring not to be so insured shall, on an appropriate form to be prescribed by the Commission, give written notice to his employing office that he desires not to be insured. If such notice is received before the employee shall have become insured under such policy, he shall not be so insured; if it is received after he shall have become insured, his insurance under the policy will cease effective with the end of the pay period during which the notice is received by the employing office.

(b) For each period in which an employee is insured under a policy of insurance purchased by the Commission as authorized in section 7 of this act, there shall be contributed from the respective appropriation or fund which is used for payment of his salary, wage, or other compensation (or, in the case of an elected official, from such appropriation or fund as may be available for payment of other salaries of the same office or establishment) a sum computed at a rate determined by the Commission, but not to exceed one-half the amount withheld from the employee under this section.

(c) The sums withheld from employees under subsection (a) and the sums contributed from appropriations and funds under subsection (b) shall be deposited in the Treasury of the United States to the credit of a fund which is hereby created. Said fund is hereby made available without fiscal-year limitation for premium payments under any insurance policy or policies purchased as authorized in sections 7 and 10 of this act, and for any expenses incurred by the Commission in the administration of this act within such limitations as may be specified annually in appropriation acts: *Provided*, That appropriations available to the Commission for salaries and expenses for the fiscal year 1955 shall be available on a reimbursable basis for necessary administrative expenses of carrying out the purposes of this act until said fund shall be sufficient to provide therefor. The income derived from any dividends or premium rate adjustments received from insurers shall constitute a part of said fund.

SEC. 6. Each policy purchased under this act shall contain a provision, in terms approved by the Commission, to the effect that any insurance thereunder on any employee shall cease upon his separation from the service or 12 months after discontinuance of his salary payments, whichever first occurs, subject to a provision which shall be contained in the policy for temporary extension of coverage and for conversion to an individual policy of life insurance under conditions approved by the Commission, except that if upon such date as the insurance would otherwise cease the employee (a) retires on an immediate annuity, and (b) unless retired for disability, has had 15 years of creditable civilian service, as determined by the Commission, his life insurance only may, under conditions determined by the Commission, be continued without cost to him in the amounts for which he would have been insured from time to time had his salary payments continued at the same rate as on the date of cessation.

SEC. 7. (a) The Commission is authorized, without regard to section 3709 of the Revised Statutes as amended, to purchase from one or more life insurance companies, as determined by it, a policy or policies of group life

and accidental death and dismemberment insurance to provide the benefits specified in this act: *Provided*, That any such company must meet the following requirements: (1) Be licensed under the laws of 48 of the States of the United States and the District of Columbia to transact life and accidental death and dismemberment insurance, and (2) the amount of its employee group life insurance on the most recent December 31 for which information is available to the Commission shall on that date equal at least 1 percent of the total amount of employee group life insurance in the United States in all life insurance companies.

(b) The life insurance company or companies issuing such policy or policies shall establish an administrative office under a name to be approved by the Commission.

(c) The Commission shall arrange with the life insurance company or companies issuing any policy or policies purchased under this act to reinsure, under conditions approved by it, portions of the total amount of insurance under the policy or policies, determined as provided in subsection (d) of this section, with such other life insurance companies as may elect to participate in such reinsurance.

(d) The Commission shall determine a formula so that the amount of insurance in force to be retained by each issuing company after ceding reinsurance and the total amount of reinsurance ceded to each reinsuring company shall be in proportion to the total amount of each such company's group life insurance in force in the United States on December 31, 1953: *Provided*, That in determining such proportions, that portion of any company's group life insurance in force on December 31, 1953, which is in excess of $100 million shall be reduced by 25 percent of the first $100 million of such excess, 50 percent of the second $100 million of such excess, 75 percent of the third $100 million of such excess, and 95 percent of any excess thereafter: *Provided further*, That the amount retained by or ceded to any company shall not exceed 25 percent of the amount of that company's total life insurance in force in the United States on December 31, 1953: *Provided further*, That if, at the end of one year following the date of enactment of this act, in the case of any issuing company or reinsurer which insured employees of the Federal Government on December 31, 1953, under policies issued to an association of Federal employees, the amount which results from the application of this formula is less than the decrease, if any, in the amount of such company's insurance under such policies, the amount allocated to such company shall, upon the first reallocation as provided in subsection (e) of this section, be increased to the amount of such decrease: *And provided further*, That any fraternal benefit association which is licensed under the laws of a State of the United States or the District of Columbia to transact life insurance and is engaged in issuing insurance certificates on the lives of employees of the Federal Government exclusively shall be eligible to act as a reinsuring company and may be allocated an amount of reinsurance equal to 25 percent of its total life insurance in force on employees of the Federal Government on December 31, 1953.

(e) The companies eligible to participate as reinsurers, and the amount of insurance under the policy or policies to be allocated to each issuing company or reinsurer may be redetermined by the Commission for and in advance of any policy year after the first, on a basis consistent with subsections (c) and (d) of this section, with any modifications thereof it deems appropriate to carry out the intent of such subsections, and based on each participating company's group life insurance in force, excluding that under any policy or policies purchased under this act except in the case of companies covered in the third proviso of subsection (d), in the United States on the most recent December 31 for which information is available to it, and shall be so redetermined in a similar manner not less often than every 3 years or at any time that any participating company withdraws from participation.

(f) The Commission may at any time discontinue any policy or policies it has purchased from any insurance company.

SEC. 8. (a) Each policy or policies purchased under this act shall include, for the first policy year, basic tables of premium rates as follows:

(1) For group life insurance, a schedule of basic premium rates by age which the Commission shall have determined on a basis consistent with the lowest schedule of basic premium rates generally charged for new group life insurance policies issued to large employers, this schedule of basic premium rates by age to be applied, except as otherwise provided in this section, to the distribution by age of the amounts of group life insurance under the policy at its date of issue to determine an average basic premium rate per $1,000 of life insurance, and

(2) For group accidental death and dismemberment insurance, a basic premium rate which the Commission shall have determined on a basis consistent with the lowest rate generally charged for new group accidental death and dismemberment insurance policies issued to large employers.

Each policy so purchased shall also include provisions whereby the basic rates of premium determined for the first policy year shall be continued for subsequent policy years, except that they may be readjusted for any subsequent year, based on the experience under the policy, such readjustment to be made by the insurance company or companies issuing the policy on a basis determined by the Commission in advance of such year to be consistent with the general practice of life insurance companies under policies of group life and group accidental death and dismemberment insurance issued to large employers.

(b) Each policy so purchased shall include a provision that, in the event the Commission determines that ascertaining the actual age distribution of the amounts of group life insurance in force at the date of issue of the policy or at the end of the first or any subsequent year of insurance thereunder would not be possible except at a disproportionately high expense, it may approve the determination of a tentative average group life premium rate, for the first or any subsequent policy year, in lieu of using the actual age distribution. Such tentative average premium rate shall be redetermined by the Commission during any policy year upon request by the insurance company or companies issuing the policy, if experience indicates that the assumptions made in determining the tentative average premium rate for that policy year were incorrect.

(c) Each policy so purchased shall contain a provision stipulating the maximum expense and risk charges for the first policy year, which charges shall have been determined by the Commission on a basis consistent with the general level of such charges made by life insurance companies under policies of group life and accidental death and dismemberment insurance issued to large employers. Such maximum charges shall be continued from year to year, except that the Commission may redetermine such maximum charges for any year either by agreement with the insurance company or companies issuing the policy or upon written notice given by it to such companies at least 1 year in advance of the beginning of the year for which such redetermined maximum charges will be effective.

(d) Each such policy shall provide for an accounting to the Commission not later than 90 days after the end of each policy year, which shall set forth, in a form approved by the Commission, (1) the amounts of premiums actually accrued under the policy from its date of issue to the end of such policy year, (2) the total of all mortality and other claim charges incurred for that period, and (3) the amounts of the insurers' expense and risk charges for that period. Any excess of the total of item (1) over the sum of items (2) and (3) shall be held by the insurance company or companies issuing the policy as a special contingency reserve to be used by such insurance company or companies for charges under such policy only, such reserve to bear interest at a rate to be determined in advance of each policy year by the insurance company or companies issuing the policy, which rate shall be approved by the Commission as being consistent with the rates generally used by such company or companies for similar funds held under other group life insurance policies: *Provided*, That, if and when the Commission determines that such special contingency reserve has attained an amount estimated by it to make satisfactory provision for adverse fluctuations in future charges under the policy, any further such excess shall be deposited in the Treasury of the United States to the credit of the fund. If and when such policy is discontinued, and if after all charges have been made, there is any positive balance remaining in such special contingency reserve, such balance shall be deposited in the Treasury of the United States to the credit of the fund, subject to the right of the insurance company or companies issuing the policy to make such deposit in equal monthly installments over a period of not more than 2 years.

SEC. 9. The Commission shall arrange to have each employee insured under such policy receive a certificate setting forth the benefits to which the employee is entitled thereunder, to whom such benefits shall be payable, to whom claims should be submitted, and summarizing the provisions of the policy principally affecting the employee. Such certificate shall be in lieu of the certificate which the insurance company or companies would otherwise be required to issue.

SEC. 10. (a) The Commission is authorized to arrange with any nonprofit association of Federal employees for the assumption by the fund of any existing life insurance agreements of such association with its members retired or otherwise separated from the Federal service and to insure the obligations assumed with any company or companies meeting the requirements of section 7 (a).

(b) Any such arrangement shall provide that payments by such insured members for life insurance only shall thereafter be made at the same rates to the fund, under such conditions as the Commission may prescribe.

(c) Any such arrangement shall further provide that there be transferred to and deposited in the fund the lesser of the following amounts:

(1) The total assets of the life insurance fund of such association; or

(2) The amount required to meet the liabilities under life insurance agreements assumed, taking into account the payments as provided in paragraph (b). The determination of this amount shall be based on an actuarial valuation satisfactory to the Commission, procured by the association without expense to the Commission.

(d) The arrangements authorized by this section shall be made only with those associations which terminate life insurance agreements with all of their members within 1 year after the date of enactment of this act, and such arrangements shall apply only to life insurance granted to any member by any such association before January 1, 1954.

(e) In any case in which the fund assumes a liability for life insurance as provided in this section in respect to a person who (1) subsequently becomes eligible to be insured as an employee under this act, and (2) does not give notice, as provided in section 5 (a),

of his desire not to be so insured, the life insurance provided under this section shall terminate as of the date such person becomes insured as an employee.

SEC. 11. Except as otherwise provided herein, the Commission is hereby authorized to promulgate such regulations as may be necessary and proper to give effect to the intent, purposes, and provisions of this act.

SEC. 12. (a) There is hereby established an Advisory Council on Group Insurance consisting of the Secretary of the Treasury as Chairman, the Secretary of Labor, and the Director of the Bureau of the Budget, who shall serve without additional compensation. The Council shall meet once a year, or oftener at the call of the Commission, and shall review the operations of this act and advise the Commission on matters of policy relating to its activities thereunder.

(b) The Chairman of the Commission shall appoint a committee composed of five employees insured under this act, who shall serve without compensation, to advise the Commission regarding matters of concern to employees under this act.

SEC. 13. The Commission shall report annually to Congress upon the operation of this act.

SEC. 14. The district courts of the United States shall have original jurisdiction, concurrent with the Court of Claims, of any civil action or claim against the United States founded upon this act.

SEC. 15. The insurance provided by this act and the withholdings and contributions for that purpose shall become effective when directed by the Commission.

MODERNIZATION AND IMPROVEMENT OF CERTAIN MERCHANT-TYPE VESSELS

Mr. CARLSON. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1656, Senate bill 3546, to provide an immediate program for the modernization and improvement of such merchant-type vessels in the reserve fleet as are necessary for national defense.

The PRESIDING OFFICER. The clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (S. 3546) to provide an immediate program for the modernization and improvement of such merchant-type vessels in the reserve fleet as are necessary for national defense.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to, and the Senate proceeded to consider the bill, which had been reported from the Committee on Interstate and Foreign Commerce with amendments.

Mr. BUTLER. Mr. President, S. 3546 is known as the emergency ship repair bill. I introduced it in cosponsorship with a number of other Senators, after 2 days of hearings, which were held for the purpose of ascertaining the extent of the plight of our shipyards. Companion bills were introduced promptly in the House of Representatives. I can assure Senators that, in my opinion, one of the most urgent needs in the maritime industry today is the passage of this bill.

The bill would authorize the Secretary of Commerce to enter into contracts with private shipyards on the Atlantic, Pacific, and gulf coasts, the Great Lakes, and other inland waterways, for the repair, modernization, and improvement of certain carefully selected strategic merchant vessels in the laid-up National Defense Reserve Fleet. The Maritime Administrator testified at our hearing that after consultation with the Department of Defense, he was sure that there were at least 205 vessels of a top-priority nature in our reserve fleet which would need at least $45 million worth of repair before they could be put into active service.

Senators will notice in the bill that the Secretary of Commerce is authorized to enter into contracts on other than a competitive bid basis whenever such action is deemed by him to be necessary to carry out the purpose of this act. The reason for that provision, as our report makes clear, is that we believe that the Secretary of Commerce must be authorized to exercise a certain amount of discretion as to where the work will go, in order to protect the defense potential of those yards, upon which the Department of Defense is placing great reliance in its mobilization day planning. This is particularly important because of the fact that some of the reserve fleets are much closer to certain yards than to others on the same coast. The difference in towing charges from reserve fleet to bidding yard might well result in the yard nearest the fleet being able to get a disproportionate share of the available work unless the bill were worded as it is.

According to the Maritime Administrator, 92 of the ships in question are presently located in the reserve fleet on the east coast, 32 on the gulf coast and 81 on the west coast.

While this bill will not aid those yards devoted entirely to shipbuilding, it should prove of great value to the combination shipbuilding and ship repairing yards and to those which are devoted solely to ship repairing.

I might say that this is not the first time a program of this nature has been considered. In 1950 Congress appropriated $18 million for the same purpose but the funds were diverted to emergency repairs on cargo vessels which were used in the Korean lift.

Mr. LONG. Mr. President, will the Senator from Maryland yield?

Mr. BUTLER. I yield.

Mr. LONG. Mr. President, I wish to congratulate the Senator from Maryland for being the principal sponsor of this measure. It is very much needed, and this is a good time for us to be putting our laid-up fleet into such shape that it can be used almost immediately in the event of an emergency.

I have studied the bill, of which I am cosponsor with the Senator from Maryland, and it seems to me there should be an amendment to assure that the Secretary of Commerce and the maritime administrator will take advantage of the split-bidding practice when that practice is in the Nation's interest. I was somewhat concerned about some language in the committee report which indicated that that might not be the case. I have an amendment at the desk which I hope the Senator from Maryland will accept, which would assure continuation of the practice of inviting split bids. At this time I should like to ask unanimous consent that the clerk may state the amendment which is at the desk.

The PRESIDING OFFICER. The Chair would suggest that the Senator withhold his request until action is taken on the committee amendments.

The clerk will state the committee amendments.

The amendments of the Committee on Interstate and Foreign Commerce were on page 2, line 14, after the word "within", to strike out "six" and insert "twelve", and in line 22, after the word "States", to insert "and on the Great Lakes or other inland waterways", so as to make the bill read:

Be it enacted, etc., That this act may be cited as the "Emergency Ship Repair Act of 1954."

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this act in the interests of national defense to provide for the immediate improvement and modernization of needed merchant-type vessels in the reserve fleet under the jurisdiction of the Secretary of Commerce, and thereby to provide a much needed stimulus to the shipbuilding and ship repair industries of the Nation.

RESERVE FLEET MODERNIZATION AND REPAIR PROGRAM

SEC. 3. The Secretary of Commerce shall, after consulting the Secretary of Defense, formulate and carry out to the extent authorized under the provisions of this act a program of repairing, modernizing, or converting such merchant-type vessels in the national defense reserve under the jurisdiction of the Secretary of Commerce as may be necessary to provide for the purpose of national defense an adequate and ready reserve fleet of merchant and auxiliary vessels.

CONTRACTING AUTHORIZATION

SEC. 4. The Secretary of Commerce shall, within 12 months after the date of the enactment of this act, enter into such contracts for the repair, modernization, and conversion of vessels as may be necessary to carry out the provisions of this act. Such contracts (1) may provide for the expenditure by the United States of not more than $45 million, (2) shall be with private shipbuilding or ship repair yards on the Atlantic, Pacific, and gulf coasts of the United States, and on the Great Lakes or other inland waterways, (3) shall be entered into in accordance with applicable provisions of the Federal Property and Administrative Services Act of 1949, and (4) may be negotiated without competitive bidding whenever such action is determined by the Secretary of Commerce to be necessary to carry out the purpose of this act.

AUTHORIZATION OF APPROPRIATION

SEC. 5. There are hereby authorized to be appropriated such sums not in excess of $45 million as may be necessary to carry out the provisions of this act.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

The amendments were agreed to.

The PRESIDING OFFICER. The Clerk will now state the amendment offered by the Senator from Louisiana [Mr. LONG].

The LEGISLATIVE CLERK. On page 3, line 3, after the numerals "1949", it is proposed to insert "and (4) in entering into such contracts the Secretary of Commerce shall not alter the present Maritime Administration policy of inviting split bids for drydock and nondrydock work. Bids on any such con-

tract shall include any towage and insurance costs involved."

Mr. BUTLER. I shall be very happy to accept the amendment offered by the Senator from Louisiana.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. WILLIAMS. Mr. President, on page 2, beginning with line 25, I observe that the bill reads:

and (4) may be negotiated without competitive bidding whenever such action is determined by the Secretary of Commerce to be necessary to carry out the purpose of this act.

I think that is against the principle outlined in the testimony given in connection with the bill, when representatives of the various agencies, speaking on behalf of the bill, endorsed it, saying that they intended to carry out the principle of competitive bidding. Therefore, I wish to offer an amendment to strike out the language to which I have referred. I hope the Senator from Maryland will accept the amendment.

Mr. BUTLER. As I understand, the amendment would be on page 2, line 25, to place a period after "1949" and to strike out the language beginning with the word "and" and continuing through line 3, on page 3.

Mr. WILLIAMS. That is correct.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from Delaware.

The LEGISLATIVE CLERK. On page 2, line 25, after "1949", it is proposed to insert a period instead of a comma and to strike out:

and (4) may be negotiated without competitive bidding whenever such action is determined by the Secretary of Commerce to be necessary to carry out the purpose of this act.

Mr. BUTLER. I shall be very happy to accept the amendment. I think it is clearly reflected in the hearings that it is the intention of the Secretary of Commerce to ask for competitive bids. Under the law and the practice of the General Accounting Office, if it is absolutely essential that bids be negotiated, I think the Secretary would have a right to do so. Nevertheless, I shall be happy to accept the amendment.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. SALTONSTALL. The Senator from Delaware and I have been interested in this subject, pro and con, in connection with several different bills and on several different occasions.

I wish to ask the Senator from Maryland if my proposal would not cover what the Senator from Delaware seeks to accomplish, at least, in part—in fact, in great part—without striking out or taking to conference that section. In subparagraph (4) I propose the following language:

May only be negotiated without competitive bidding when such action is determined by the Secretary of Commerce to be necessary to carry out the purposes of this act and in the interest of national defense.

In other words, my amendment would not eliminate entirely the right of the Secretary of Commerce to act without obtaining competitive bids.

Mr. BUTLER. I think the Senator from Massachusetts has proposed excellent language. I shall be happy to accept it.

I may also say to the Senator from Massachusetts, that I think, under existing law, and I know under the present practice of the General Accounting Office, if the Secretary of Commerce negotiated a bid, it would not be disturbed.

Mr. SALTONSTALL. I have made the suggestion, which is not quite so violent as the amendment offered by the Senator from Delaware, because, as one of the sponsors of the bill, I believe the purpose is to get ships into condition. It is also the purpose, generally speaking, to spread the business.

As both the Senator from Delaware and the Senator from Maryland know, in the repair and modernizing of some ships, it is very difficult to obtain definite, flat bids, because the situation is not the same as it is in the building of a new ship. In this instance, it is the taking a ship apart and putting it together again, to a certain degree. If there is to be insistence on competitive bids, a bid may be obtained which will be very much higher than an amount which might be submitted under a negotiated arrangement, as the work proceeds.

If the language "in the interest of national defense" is included, the Secretary of Commerce is confined, after studying the matter very carefully, to making a negotiated arrangement without competitive bidding only when such action will carry out the purposes of the act in the interest of the national defense.

Mr. BUTLER. I think the amendment offered by the Senator from Massachusetts is an excellent one. I hope the Senator from Delaware will accede to the request of the Senator from Massachusetts.

Mr. WILLIAMS. I do not see the necessity for such language. First, there is nothing violent about competitive bidding—at least, not where I come from.

In reading the testimony of representatives of the various agencies which favor the bill, every one of them, to my knowledge—if I am in error, I am certain the Senator from Maryland will correct me—testified that it was intended to use the process of competitive bidding. Therefore, all I am proposing is to strike out the language which indicates that competitive bidding should not be used. I do not say that it must be used. The Government agencies can still operate under existing law, but we will not be spelling out the additional authority. Certainly they have had the authority to do such things in the past, and they have gone a little far afield.

All I am seeking to do is to strike out the language which suggests that contracts may be negotiated without competitive bidding. There is nothing against that under existing law. The bill would contain the same provision with respect to bidding under which every agency of the Government is already acting.

Mr. BUTLER. I think that in the national interest, the Government can negotiate a bid, it need not accept the lowest bid.

Mr. WILLIAMS. If the Senator from Maryland is confident that that is the law, then, of course, this paragraph becomes much less valuable, and I would be much less worried about it.

Mr. BUTLER. I am satisfied that under existing law and under the existing practice of the General Accounting Office, if the Secretary of Commerce negotiated a bid, no question would be raised, if such was found to be in the national interest.

Mr. WILLIAMS. I am not trying to enter into a discussion from the standpoint of the interpretation of the law, because I am not a lawyer; but I understand that in a case where there is a competitive bid which is lower than a bid which the Secretary of Commerce can negotiate with another bidder, it is necessary to accept the lower bid. I think that is the existing law.

Mr. BUTLER. I do not think that is correct.

Mr. WILLIAMS. My amendment would not change the existing law. It would strike from the bill the provision which would indicate that contracts may be negotiated without competitive bidding. The representatives of the Government who testified before the committee indicated that they intended to abide by the present law.

Mr. BUTLER. If I were not satisfied that under existing law there was reasonable leeway, I would not accept the amendment of the Senator from Delaware, because there are two parts to the joint resolution. The first is to keep the strategic yards in operation, so that they will be available as a defense potential. Second, it is necessary to have the ships which are vitally necessary to the war effort, if a war should come, ready to sail on a moment's notice.

Mr. SMATHERS. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. SMATHERS. I voted for this particular bill in the committee. I thoroughly approve of it and of the purposes for which the Senator from Maryland has stated it was introduced. However, I should like to have the Senator emphasize, for the purpose of the legislative history, that the bill is not supposed to be, in any way, a sort of regional unemployment bill, in the sense that this particular work is not all supposed to go into one area.

Mr. BUTLER. I can assure the Senator from Florida that that is not the purpose of the bill. The purpose of the bill, as I have stated, is to keep the vital yards in existence, ready to do war work, if it becomes necessary to do so; and also to put in class, so to speak, the ships which will be needed in time of emergency.

Mr. SMATHERS. I thank the Senator from Maryland.

With respect to the amendment offered by the Senator from Delaware, I think it is important that provision be made for competitive bidding, because without it,

it seems to me, the Secretary of Commerce might conceive it to be his obligation and his duty, since he comes from New England, and has great pride in that region, to place most of the business in the shipyards of New England, which, of course, other Senators, who come from the provinces, would not feel was being quite fair.

Mr. BUTLER. I have no objection to the amendment offered by the Senator from Delaware. I do not think it will harm the bill. I think it will carry out the purposes which the distinguished Senator from Massachusetts has in mind.

Mr. SALTONSTALL. I think, as the Senator from Florida has said, that this discussion will help the legislative history of the bill.

I have one more suggestion. I should like to have subparagraph (4) remain in the bill. I think it helps to carry out the purpose and intention of the bill.

Mr. BUTLER. I say to the Senator from Massachusetts it does help, in that it reemphasizes the importance of keeping these vital facilities in a standby position, ready for an emergency.

Mr. SALTONSTALL. If I may have the attention of the Senator from Delaware and the Senator from Maryland, would it meet with their approval if subparagraph 4 read as follows:

> May only be negotiated without competitive bidding, in accordance with existing laws, and when such action is determined by the Secretary of Commerce to be necessary to carry out the purposes of this act, and in the interest of national defense.

In other words, that language would provide that such orders could not be issued without competitive bidding, except under existing laws, and then only when in the national interest.

Mr. BUTLER. I think that is an excellent suggestion. It ought to please the Senator from Delaware.

Mr. SALTONSTALL. I hope the suggestion will satisfy the Senator from Delaware, although he is very exacting in matters relating to the subject now under discussion. The suggested language would write into the bill an indication that we are trying to repair these ships, and that there may be some instances in which, in accordance with existing law, contracts cannot be let on a competitive-bid basis.

Mr. BUTLER. Also, we would not want the Secretary to do anything which he cannot now do.

Mr. SMATHERS. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. PAYNE in the chair). Does the Senator from Massachusetts yield to the Senator from Florida?

Mr. SALTONSTALL. I am happy to yield.

Mr. SMATHERS. I hope the Senator from Delaware will stand fast on his proposed amendment, because if there were written into the bill a provision which would require competitive bidding, I think possibly some other legislation could be utilized in the event of some sort of emergency, which would allow the Secretary to negotiate, if it were deemed to be in the national interest.

Mr. BUTLER. The Senator from Florida is correct.

Mr. SMATHERS. If the amendment of the Senator from Delaware were adopted, it would mean that in most instances there would be competitive bidding, which is the practice that should be followed, and there would be less criticism in the future.

Mr. WILLIAMS. All my amendment would do would be merely to spell out that the provisions of the bill would be carried out by the Secretary of Defense in exactly the same manner as I understand he testified before the committee he intended to, anyway.

Mr. BUTLER. That is correct.

Mr. WILLIAMS. The bill would not call upon the Secretary of Defense to do anything he has not already stated he is going to do. Assuming that to be true, as I do, my proposal would merely spell out that he shall not do otherwise. Much as I should like to agree with the proposal offered by the Senator from Massachusetts, I cannot accept his modification.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Delaware [Mr. WILLIAMS].

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there is no further amendment to be offered, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The question now is on the final passage of the bill.

The bill (S. 3546) was passed, as follows:

Be it enacted, etc., That this act may be cited as the "Emergency Ship Repair Act of 1954."

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this act in the interests of national defense to provide for the immediate improvement and modernization of needed merchant-type vessels in the reserve fleet under the jurisdiction of the Secretary of Commerce, and thereby to provide a much-needed stimulus to the shipbuilding and ship repair industries of the Nation.

RESERVE FLEET MODERNIZATION AND REPAIR PROGRAM

SEC. 3. The Secretary of Commerce shall, after consulting the Secretary of Defense, formulate and carry out to the extent authorized under the provisions of this act a program of repairing, modernizing, or converting such merchant-type vessels in the national defense reserve under the jurisdiction of the Secretary of Commerce as may be necessary to provide for the purpose of national defense an adequate and ready reserve fleet of merchant and auxiliary vessels.

CONTRACTING AUTHORIZATION

SEC. 4. The Secretary of Commerce shall, within 12 months after the date of the enactment of this act, enter into such contracts for the repair, modernization, and conversion of vessels as may be necessary to carry out the provisions of this act. Such contracts (1) may provide for the expenditure by the United States of not more than $45 million, (2) shall be with private shipbuilding or ship repair yards on the Atlantic, Pacific, and gulf coasts of the United States, and on the Great Lakes or other inland waterways. (3) shall be entered into in accordance with applicable provisions of the Federal Property and Administrative Services Act of 1949, and (4) in entering into such contracts the Secretary of Commerce shall not alter the present maritime administration policy of inviting split bids for drydock and nondrydock work. Bids on any such contract shall include any towage and insurance costs involved.

AUTHORIZATION OF APPROPRIATION

SEC. 5. There are hereby authorized to be appropriated such sums not in excess of $45 million as may be necessary to carry out the provisions of this act.

SALE OF WAR-BUILT PASSENGER-CARGO VESSELS

Mr. CARLSON. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1756, which is House Joint Resolution 534.

The motion was agreed to; and the Senate proceeded to consider the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes.

Mr. BUTLER. Mr. President, House Joint Resolution 534 would authorize the Secretary of Commerce to sell to the American President Lines, Ltd., the passenger-cargo vessels *President Cleveland* and *President Wilson*. That company has been chartering those vessels since they were built in 1947 and 1948, respectively, and has been using them on its trans-Pacific passenger service.

The bill was introduced at the request of the Department of Commerce, and its passage is recommended by the Maritime Administration and the General Accounting Office. The Bureau of the Budget believes it should be enacted.

Both vessels were available for sale under the Ship Sales Act. In view of the fact that the American President Lines had lost so much of its tonnage during the war—17 vessels—section VII of the Ship Sales Act gave that company a preference in purchasing these two vessels. However, due to two sets of circumstances, in large measure beyond APL's control, it did not offer to buy them before the Ship Sales Act terminated on January 15, 1951. Those circumstances were, first, extensive litigation concerning ownership of the company; and, second, inability of the Maritime Administration and APL to determine the details of APL's subsidy.

In any event, the fact is that no other company sought to buy the vessels. Now, after months of negotiations, APL has offered a price for the vessels which the Secretary of Commerce, the Comptroller General, and other agencies mentioned, believe is fair, proper, and should be accepted in the best interest of the Government.

Last year APL offered $5,363,866 for each of the vessels. The General Accounting Office refused to approve that transaction on the ground that the price was too low. Subsequent negotiations participated in by the Department of Commerce, the Maritime Administration, the General Accounting Office, and APL resulted in an understanding that APL would pay $6,500,000 per vessel, less

depreciation of $1,225 per day, per vessel from April 1, 1954, to the date of the execution of the contract of sale. It is on that basis that H. J. Res. 534 is drawn.

A well-publicized public hearing was held by the Water Transportation Subcommittee, at which no opposition was heard from any quarter. Labor and shipping industry representatives urged the enactment of this bill. The Shipbuilders' Council stated that it does not oppose it.

Aside from the unanimous conclusion that the price was fair, probably the factor which was most stressed during the hearings was that the sale of these vessels to the American President Lines was in keeping with the spirit of the Ship Sales Act and other merchant-marine laws, all of which are designed to encourage and foster the maintenance and operation of a privately owned merchant marine.

The three main questions the subcommittee considered were: First, should the Government sell these ships? Second, if so, should they be sold on the negotiated price basis contained in the bill? Third, is the price agreed upon fair?

The conclusions reached were:

First. That the Government should sell these ships, on the ground that the proposed sale is in keeping with basic merchant-marine policy, and would have been made under the Ship Sales Act but for circumstances beyond APL's control.

Second. That sale on a negotiated price basis is proper and in keeping with the practice under the Ship Sales Act. There was no competitive bidding under that statute, prices being set by law.

Third. That the testimony of the GAO, the Bureau of the Budget, and the Department of Commerce shows beyond doubt that the price is fair.

Mr. President, during the course of the hearings certain questions were asked. I have stated those questions and have prepared answers to them. I ask unanimous consent to have printed in the body of the RECORD at this point in my remarks the questions as propounded and the answers to them.

There being no objection, the questions and answers were ordered to be printed in the RECORD, as follows:

Question. Why is legislation necessary?

Answer. There has been no satutory authority to sell vessels such as these since the Merchant Ship Sales Act of 1946 expired on January 15, 1951. Without this legislation the Government must continue to own, and American President Lines to charter, these vessels into the indefinite future.

Question. Why didn't APL buy the vessels under the 1946 Ship Sales Act?

Answer. The Merchant Ship Sales Act of 1946 permitted the sale of the *Cleveland* and *Wilson* at any time in the period March 8, 1946 to January 15, 1951. No application to purchase these vessels was made by anyone.

APL could not buy the vessels during the life of the act because:

(a) Its postwar operating-differential subsidy contract, without which the vessels could not be operated, was not awarded for this service until September 25, 1952.

(b) About 92 percent of its voting stock was held by the Government and was the subject of bitter and complex litigation by its former owners. Until this was compromised and the stock was sold on November 6, 1952, the line had no identifiable owner.

Question. Why does APL want to buy the vessels now?

Answer. American President Lines wishes to buy the *Cleveland* and *Wilson* for the following reasons:

(a) It is required by its operating-differential subsidy contract to own its vessels.

(b) It wants to continue its program of substantial betterment of the vessels, which is more prudently done on owner than on chartered vessels.

(c) It is in the steamship business, and is prepared to take the risk of substantial loss in order to obtain in normal times the lower cost of ownership as compared to charter.

Question. Why should the United States care to sell the vessels if APL will continue to charter?

Answer. The United States is glad to sell these vessels rather than to continue their charter because:

(a) The policy of the Congress, as expressed in the basic Merchant Marine Acts, and of this administration, is to encourage private rather than Government ownership.

(b) Charter hire at the current rate if continued over the remaining 14 years life would be about 30 percent higher than the sale price plus interest on deferred payments. But under the charter the vessel can be handed back to the Government on 90 days notice whenever APL should choose.

(c) The operator will make more improvements on owned vessels and will more surely keep them in service in this critical area than if chartered.

Question. What safeguards are in the bill?

Answer. (a) The vessels are sold on an "as-is where-is basis" insuring that the Government is not responsible for class repairs or inventory deficiencies.

(b) The deferred payments, over the 25 percent down, under the traditional ship sales terms, are secured by a first mortgage on the vessels.

(c) The book-value ceiling upon just compensation in the event of Government requisition is taken from the Merchant Marine Act of 1936; it is not applicable to the many vessels sold under the Merchant Ship Sales Act of 1946, but is imposed here.

(d) United States-flag documentation is required for the remainder of the 20-year economic life of the vessels, this requirement running with the title.

(e) American President Lines is required to act promptly, for authority to sell the vessels lapses after 6 months.

(f) No witness before the committee suggested any further safeguard which might be included.

Question. Why should not the vessels be offered for competitive bidding?

Answer. There are many reasons why the vessels should not be put up for sale under competitive bid:

(a) The policy of the 1920 act, of the 1936 act, and of the Merchant Ship Sales Act of 1946 has uniformly been against competitive sale of Government-owned vessels, as it has always been considered more important to get them into the right hands on the right route.

(b) No other operator has expressed an interest in the vessels.

(c) The price was a negotiated price and would in fairness have to be lowered if it were after the agreement converted into an upset price for a competitive sale.

(d) APL lost all but 3 of its 20 vessels in the war, and all 3 of its newly built vessels in the Korean hostilities. The equitable policy of the Ship Sales Act, giving a preference to the applicant with the largest wartime losses, should also be applied here.

(e) The Government couldn't sell these vessels, which can't be operated without subsidy, without in effect also offering for sale a subsidy contract.

(f) If the vessels were sold for operation anywhere else, the vital Pacific area would be left with only one passenger liner in operation. This would jeopardize defense and Asian evacuation plans in the event of emergency.

Question. Is the price adequate?

Answer. The price is believed to be fair and to be adequate for the Government because:

(a) The General Accounting Office, having blocked a lower price of $5,340,000, participated in the further negotiations and has specifically approved the present price of $6,500,000 per vessel.

(b) Frank S. Martin & Co., a leading ship surveyor, in February 1954 appraised the vessels for insurance purposes at $6 million. This was done independently, without any knowledge of the sale negotiations.

(c) The $6,500,000 price as of April 1, 1954, represents the depreciated equivalent of $7,944,544 as of January 15, 1951, the last day of the Ship Sales Act. That $7,944,544 is the so-called floor price, or 35 percent of the actual cost of the vessels. This floor price is much the highest, in relation to the prewar domestic cost fixed for each vessel, of any vessel priced under the Ship Sales Act. The floor price averaged 92 percent of the statutory sales price; the *Cleveland-Wilson* floor price is 144 percent of the statutory sales price.

(d) The floor price, which APL is paying as of January 15, 1951, was so high because the vessels were tail-end construction in an expensive yard, with the job interrupted both by the redesign from troopers and by a lengthy strike.

(e) The only concession given APL for this abnormally high price was to recognize that the vessels have been depreciating, and that APL has been paying the Government depreciation, since the authority to sell the vessels lapsed on January 15, 1951.

Question. Why is depreciation allowed since April 1, 1954?

Answer. American President Lines is paying charter hire on these vessels which covers depreciation. The depreciation after April 1 is more than offset by the charter hire. If, for example, the price is reduced by about $150,000 because sale is as of August 1, the Government will have received over $200,000 in charter hire for this period.

If the price had not been fixed at a given date, the Government and APL would in effect have each been gambling on whether a long or short period intervened between the agreement and enactment and sale.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. BUTLER. I am very happy to yield to the Senator from Delaware.

Mr. WILLIAMS. I understand that since the bill has been on the calendar the Senator from Maryland has obtained an opinion from the Legislative Counsel to the effect that the accelerated amortization provisions of H. R. 8300 would not be applicable to this particular case. Is my understanding correct?

Mr. BUTLER. The is true. I have in my hand an opinion signed by Harry B. Littell, Assistant Counsel, which I ask unanimous consent to have printed in the body of the RECORD at this point in my remarks.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM FOR SENATOR BUTLER

You have requested our opinion with respect to the applicability of the new depreciation provisions contained in the proposed new Internal Revenue Code of 1954 to the vessels to which Senate Joint Resolution 161 pertains.

The new depreciation provisions, found in section 167 of the proposed new Internal Revenue Code of 1954 apply only to new property acquired or constructed after December 31, 1953.

The limitation on the use of this new method is contained in subsection (c) of section 167 which, as amended by the Senate, reads as follows:

"(c) Limitations on use of certain methods and rates: Paragraphs (2), (3), and (4) of subsection (b) shall apply only in the case of property (other than intangible property) described in subsection (a) with a useful life of 3 years or more—

"(1) the original use of which commences after December 31, 1953, and commences with the taxpayer, and

"(2) the acquisition, construction, reconstruction, or erection of which is made or completed after such date."

You may also be interested in the statement contained on page 25 of the report of the Senate Committee on Finance accompanying H. R. 8300 which reads as follows:

"Your committee accepted, with some modifications, the basic provisions of the House bill liberalizing depreciation allowances, primarily through the extension of the use of the declining-balance method at double the corresponding straight-line rate, applicable to new property acquired or constructed after December 31, 1953."

Inasmuch as the provisions of section 167 as passed by the House and as amended by the Senate both restrict the applicability of the new depreciation provisions to new property acquired after December 31, 1953, it would not be within the power of the conference committee on this bill to apply such provisions to any other property (without thereby subjecting the conference report to a point of order).

Respectfully,

HARRY B. LITTELL,
Assistant Counsel.

Mr. BUTLER. I may say to the Senator from Delaware that I understand that the opinion expressed by Mr. Littell is concurred in by Colin Stam.

Mr. WILLIAMS. That is my understanding. I further understand that the committee report so indicates.

Mr. BUTLER. Yes.

Mr. WILLIAMS. Mr. President, I wish to ask a further question of the Senator from Maryland. I notice that this sale is being made effective as of April 1, 1954.

Mr. BUTLER. That is true.

Mr. WILLIAMS. In the bill depreciation charges are allowed to the company, retroactive as of that date, which pinpoints the date of the sale as being April 1, 1954. However, on page 2, in spelling out the rate of the interest charges which will be paid, we find they are not retroactive. I wonder whether the Senator from Maryland will agree to have adopted an amendment which will make the interest charges on this sale retroactive likewise to the same date, namely, April 1, 1954.

Mr. BUTLER. Yes, I think that should be done. If there is to be a settlement date, everything should be adjusted as of that date.

Mr. WILLIAMS. Either that, or the depreciation charges should likewise be carried forward.

Mr. BUTLER. That is correct.

Mr. WILLIAMS. Then, Mr. President, I offer the following amendment: On page 2, in line 8, after the words "per annum", strike out the period and insert a comma and the words "such interest charges to be retroactive to April 1, 1954."

Mr. BUTLER. Mr. President, I accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Delaware [Mr. WILLIAMS].

The amendment was agreed to.

Mr. SMATHERS. Mr. President, will the Senator from Maryland yield, in order that I may ask several questions?

Mr. BUTLER. Certainly.

Mr. SMATHERS. Did the Senator state, in the course of his remarks, how much it cost to build the ships?

Mr. BUTLER. They originally cost $20 million and $22 million, respectively; but the price, as established under the Ship Sales Act, was $7,900,000.

Mr. SMATHERS. Is there in the law previously passed a provision requiring that if the ships are disposed of, they must be disposed of to this particular line?

Mr. BUTLER. No; there is no such provision of law.

Mr. SMATHERS. Did the Senator from Maryland or did the committee give any thought, then, as to why these ships were not offered to some of the other lines?

Mr. BUTLER. They were offered for a number of years, under the Ship Sales Act. The hearings were widely publicized. We received no objection from anyone; and everyone interested approved of the sale on a negotiated basis.

Mr. SMATHERS. Then is it the belief of the Senator from Maryland that the other ship lines, which might or might not have been interested, at least had notice that the ships were to be disposed of?

Mr. BUTLER. That is correct.

Mr. SMATHERS. And that they did have an opportunity to bid, if they wished to bid?

Mr. BUTLER. That is correct.

Mr. SMATHERS. Is the Senator from Maryland and is the committee convinced that the Federal Government and the taxpayers are not losing an inordinate amount of money by means of the disposal of the ships to this particular line?

Mr. BUTLER. They are getting exactly what they would have gotten under the Ship Sales Act; and this company would have bid for the ships under that act, had it not been that the company was involved in litigation regarding the ownership of the company, and was not able to get together with the Government on the terms of its subsidy contract.

Mr. SMATHERS. I thank the Senator.

Mr. BUTLER. In the meantime, the company paid in excess of $10 million charter-hire.

Mr. SMATHERS. Am I further to understand that this entire transaction has been approved by the Comptroller General and the various other agencies of the Government that have been contacted about it?

Mr. BUTLER. Yes, that is correct.

Mr. SMATHERS. Did the Department of Justice give its approval to the transfer?

Mr. BUTLER. The Department of Justice answered the committee inquiry by saying that it had no interest in the matter.

Mr. SMATHERS. I thank the Senator.

The PRESIDING OFFICER. The joint resolution is open to further amendment.

If there is no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the joint resolution.

The amendment was ordered to be engrossed, and the joint resolution to be read a third time.

The joint resolution (H. J. Res. 534) was read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate joint resolution 161 is indefinitely postponed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had insisted upon its amendment to the bill (S. 2408) to amend the Merchant Marine Act, 1936, to provide a national defense reserve of tankers and to promote the construction of new tankers, and for other purposes, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing vote of the two Houses thereon, and that Mr. TOLLEFSON, Mr. ALLEN of California, Mr. SEELEY-BROWN, Mr. BONNER, and Mr. SHELLEY were appointed managers on the part of the House at the conference.

The message also announced that the House had passed the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes, with an amendment; that the House insisted upon its amendment to the bill, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MCCONNELL, Mr. GWINN, Mr. SMITH of Kansas, Mr. BARDEN, and Mr. KELLEY of Pennsylvania were appointed managers on the part of the House at the conference.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 4854) to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek division of the Chief Joseph Dam project, Washington, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. D'EWART, Mr. RHODES of Arizona, Mr. HOSMER, Mr. ENGLE, and Mr. ASPINALL were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 8247) to

provide for the restoration and maintenance of the United States ship *Constitution* and to authorize the disposition of the United States ship *Constellation*, United States ship *Hartford*, United States ship *Olympia*, and United States ship *Oregon*, and for other purposes.

The message further announced that the House had severally agreed to the amendment of the Senate to the following bills of the House:

H. R. 4496. An act to authorize and direct the conveyance of certain lands to the Board of Education of Prince Georges County, Upper Marlboro, Md., so as to permit the construction of public educational facilities urgently required as a result of increased defense and other essential Federal activities in the District of Columbia and its environs; and

H. R. 7125. An act to amend the Federal Food, Drug, and Cosmetic Act with respect to residues of pesticide chemicals in or on raw agricultural commodities.

AMENDMENT OF VOCATIONAL REHABILITATION ACT

Mr. SMITH of New Jersey. Mr. President, the House passed, with an amendment in the nature of a substitute, the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes. I ask that the amendment of the House and the message from that body be laid before the Senate.

The PRESIDING OFFICER (Mr. PAYNE in the chair) laid before the Senate the following amendment of the House of Representatives to the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes, together with a message from the House insisting upon its amendment and requesting a conference with the Senate thereon:

Resolved, That the bill from the Senate (S. 2759) entitled "An act to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes," do pass with the following amendment:

Strike out all after the enacting clause, and insert:

That this act may be cited as the "Vocational Rehabilitation Amendments of 1954."

AMENDMENTS TO THE VOCATIONAL REHABILITATION ACT

SEC. 2. The Vocational Rehabilitation Act (29 U. S. C. ch. 4) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS FOR GRANTS; PURPOSES FOR WHICH AVAILABLE

"SECTION 1. For the purpose of assisting the States in rehabilitating physically handicapped individuals so that they may prepare for and engage in remunerative employment to the extent of their capabilities, thereby increasing not only their social and economic well-being but also the productive capacity of the Nation, there are hereby authorized to be appropriated for the fiscal year ending June 30, 1955, the sum of $30 million, for the fiscal year ending June 30, 1956, the sum of $45 million, for the fiscal year ending June 30, 1957, the sum of $55 million, for the fiscal year ending June 30, 1958, and each fiscal year thereafter, the sum of $65 million, for grants to carry out the purposes of this act. The sums so appropriated for any fiscal year shall be available for—

"(1) grants to States under section 2 to assist them in meeting the costs of vocational rehabilitation services;

"(2) grants to States under section 3 to assist them in initiating projects for the extension and improvement of their vocational rehabilitation services; and

"(3) grants to States and to public and other nonprofit organizations and agencies under section 4 to assist in meeting the costs of projects for research, demonstrations, training and traineeships, and special projects, which hold promise of making a substantial contribution to the solution of vocational rehabilitation problems common to a number of States, including temporary assistance in initiating a substantial nationwide expansion of vocational rehabilitation programs in the States.

The portion of such sums which shall be available for each of such three types of grants shall be specified in the act appropriating such sums, except that the first $23 million of the aggregate sums so appropriated for any fiscal year shall be available for grants to States under section 2 to assist them in meeting the costs of vocational rehabilitation services.

"GRANTS TO STATES FOR VOCATIONAL REHABILITATION SERVICES

"SEC. 2. (a) (1) From the sums available for any fiscal year for grants to States to assist them in meeting the costs of vocational rehabilitation services, each State shall be entitled to an allotment of an amount which bears the same ratio to such sums as the product of (A) the population of the State and (B) the square of its allotment percentage (as defined in section 11 (h)) bears to the sum of the corresponding products for all the States.

"(2) The allotment to any State for any fiscal year, as computed under paragraph (1) which is less than such State's base allotment, shall, notwithstanding such provisions, be increased to the amount of such base allotment.

"(3) For the purposes of this section, a State's base allotment is an amount equal to the amount allotted to such State for expenditures, under its State plan approved under this act, for the fiscal year ending June 30, 1954 (which, in the case of the District of Columbia, shall be the amount appropriated to the Secretary for such fiscal year for providing rehabilitation services in the District of Columbia), increased by a uniform percentage which, if applied to the amounts so allotted to all the States, would increase the total of such allotments to $23 million.

"(4) The allotment to any State, as computed under the provisions of paragraph (1) for any fiscal year, which is greater than such State's base allotment by a percentage in excess of 1½ times the percentage by which the sums available for allotments under this section for such year exceed $23 million, shall be reduced by the amount of such excess.

"(5) Sums equal to the reductions effected under paragraph (4) for any fiscal year shall be added to the allotments of other States as computed under paragraph (1) for such years as follows:

"(A) The allotment of any State as so computed which is less than such State's base allotment, shall be increased to the amount of such base allotment.

"(B) The remainder of such sums shall be used to increase by a uniform percentage the allotment of each of the States whose allotments were not subject to reduction under paragraph (4), but with such adjustments as may be necessary to prevent the allotment of any of such States from being so increased as to require reduction under paragraph (4).

"(b) (1) A portion of each State's allotment available under this section for any fiscal year equal to the State's base allotment shall be available for payment to such State of an amount equal to its 1954 Federal share of the cost of vocational rehabilitation services under the plan of such State approved under section 5, including expenditures for the administration of the State plan.

"(2) After such portion has been paid in full, any remaining portions of a State's allotment shall be available for payment to such State of an amount equal to its Federal share (determined as provided in section 11 (i) of such cost for which payments have not been made under paragraph (1)).

"(3) For the purposes of this section, a State's 1954 Federal share means the percentage which (A) the base allotment of such State is of (B) the sum of such allotment and the amount of 1954 State funds. The 1954 State funds for any State shall be the amount of State and other non-Federal funds available for expenditures, under such State's plan approved under this act, for the fiscal year ending June 30, 1954, as estimated by the Secretary for purposes of determining such State's allotment for such year for such expenditures, except that the 1954 State funds for the District of Columbia shall be the amount appropriated for such fiscal year out of the general fund of the District of Columbia for vocational rehabilitation.

"(c) If in any State there is, during the fiscal year ending June 30, 1954, a State agency administering or supervising the administration of the part of the State plan under which vocational rehabilitation services are provided for the blind, separate from the State agency administering or supervising the administration of the remainder of the State plan—

"(1) for each consecutive fiscal year during which there are such separate agencies, the portion of such State's allotment which is equal to such State's base allotment shall be divided between the two agencies in the same proportion as the amount allotted to the State under this act for expenditures during the fiscal year ending June 30, 1954, was divided between such agencies;

"(2) for each such consecutive fiscal year, separate Federal shares shall be established for such agencies for purposes of subsection (b) (1), and for such purposes—

"(A) the 1954 Federal share for each shall be the percentage which (i) the portion of the State's allotment for the fiscal year ending June 30, 1954, which was made available to each, is of (ii) the portion of the sum of such allotment and the amount of 1954 State funds available to each for expenditures, under the State plan approved under this act, during such year; and

"(B) the portion of the allotment referred to in subsection (b) (1) for each shall be the portion of the State's allotment allocated to each pursuant to paragraph (1) of this subsection.

"GRANTS TO STATES FOR EXTENSION AND IMPROVEMENT PROJECTS

"SEC. 3. (a) (1) From the sums available for any fiscal year for grants to States to

assist them in initiating projects for the extension and improvement of vocational rehabilitation services, each State shall be entitled to an allotment of an amount bearing the same ratio to such sums as the population of such State bears to the population of all the States. The allotment to any State under the preceding sentence for any fiscal year which is less than $5,000 (or such other amount as may be specified as a minimum allotment in the act appropriating such sums for such year) shall be increased to that amount, the total of the increases thereby required being derived by proportionately reducing the allotments to each of the remaining States under the preceding sentence, but with such adjustments as may be necessary to prevent the allotment of any of such remaining States from being thereby reduced to less than that amount.

"(2) From each State's allotment available for such purpose for any fiscal year, the Secretary shall pay to such State a portion of the cost of approved projects for the extension and improvement of vocational rehabilitation services (including their administration) under the State plan. The Secretary shall approve any project for purposes of this section only if the plan of such State approved under section 5 includes such project or is modified to include it and only if he finds the project constitutes an extension or improvement of vocational rehabilitation services under the State plan or will contribute materially to such an extension or improvement.

"(b) Payments under this section with respect to any project may be made for a period of not to exceed two years beginning with the commencement of the first fiscal year for which any payment is made with respect to such project from an allotment under this section. To the extent permitted by the State's allotment under this section, such payments wih respect to any project shall be equal to 75 percent of the cost of such project, except that, at the request of the State, such payments may be less than such percentage of the cost of such project.

"(c) No payment may be made from an allotment under this section with respect to any cost with respect to which any payment is made under section 2.

"GRANTS FOR SPECIAL PROJECTS

"SEC. 4. (a) From the sums available therefor for any fiscal year, the Secretary shall make grants to States and public and other nonprofit organizations and agencies (1) for paying part of the cost of projects for research and demonstrations, projects for the establishment of special facilities and services, which, in the judgment of the Secretary, hold promise of making a substantial contribution to the solution of vocational rehabilitation problems common to all or several States, and (2) for planning, preparing for, and initiating, during the fiscal year ending June 30, 1955, and the fiscal year ending June 30, 1956, a substantial nationwide expansion of vocational rehabilitation programs in the States, including training and traineeships for individuals for a period of not to exceed 12 months for any one individual. Any grant of funds under this section which will be used for direct services to physically handicapped individuals or for establishing facilities which will render direct services to such individuals must have the prior approval of the appropriate State agency.

"(b) Payments under this section may be made in advance or by way of reimbursement for services performed and purchases made, as may be determined by the Secretary; and shall be made on such conditions as the Secretary finds necessary to carry out the purposes of this section.

"GRANTS FOR TRAINING OF HOMEBOUND HANDICAPPED PERSONS

"SEC. 5. (a) There is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, the sum of $5 million for the fiscal year ending July 1, 1955, and $2 million annually thereafter, and, from the amounts hereunder appropriated the Secretary is authorized and empowered, on the recommendation of State agencies, to make grants to local school boards and local nonprofit educational groups providing special services to handicapped; organized with the objective of affording a means of teaching and training handicapped persons, commonly known as shut-ins, whose disabilities confine them to their homes or beds.

"Such grants shall be made for the purpose of providing general ameliorative and vocational training in addition to that now provided by law for such handicapped persons. The total grants to school boards or educational groups in any one State shall bear the same ratio to the total grants, made, pursuant to this section, as the population of the State bears to the total population of the United States: *Provided*, That not less than 20 percent of all grants in any fiscal year shall be made to groups functioning in rural areas. ('Rural areas' are to be defined by the Secretary.)

"STATE PLANS

"SEC. 6. (a) To be approvable under this act, a State plan for vocational rehabilitation services shall—

"(1) designate the State agency administering or supervising the administration of vocational education in the State, or a State rehabilitation agency (primarily concerned with vocational rehabilitation), as the sole State agency to administer the plan, or to supervise its administration in a political subdivision of the State by a sole local agency of such political subdivision, except that where under the State's law the State blind commission, or other agency which provides assistance or services to the adult blind, is authorized to provide them vocational rehabilitation services, such State blind commission or other State agency may be designated as the sole State agency to administer the part of the plan under which vocational rehabilitation services are provided for the blind (or to supervise the administration of such part in a political subdivision of the State by a sole local agency of such political subdivision) and the State vocational education agency or the State rehabilitation agency shall be designated as the sole State agency with respect to the rest of the State plan;

"(2) provide that the head of the vocational rehabilitation bureau, division, or other unit of a State vocational educational agency designated pursuant to paragraph (1), shall be subject only to the supervision and direction of such agency or its executive officer;

"(3) provide for financial participation by the State, and provide that the plan shall be in effect in all political subdivisions of the State;

"(4) show the plan, policies, and methods to be followed in carrying out the work under the State plan and in its administration and supervision, and in case vocational rehabilitation services cannot be provided all eligible physically handicapped individuals who apply for such services, show the order to be followed in selecting those to whom vocational rehabilitation services will be provided;

"(5) provide such methods of administration, other than methods relating to the establishment and maintenance of personnel standards, as are found by the Secretary to be necessary for the proper and efficient administration of the plan;

"(6) contain (A) provisions relating to the establishment and maintenance of personnel standards, including provisions relating to the tenure, selection, appointment, and qualifications of personnel, and (B) provisions relating to the establishment and maintenance of minimum standards governing the facilities and personnel utilized in the provision of vocational rehabilitation services, but the Secretary shall exercise no authority with respect to the selection, method of selection, tenure of office, or compensation of any individual employed in accordance with such provisions;

"(7) provide that, in addition to training, maintenance, placement, and guidance, physical restoration services will be provided under the plan;

"(8) provide that the State agency will make such reports, in such form and containing such information, as the Secretary may from time to time reasonably require to carry out his functions under this act, and comply with such provisions as he may from time to time find necessary to assure the correctness and verification of such reports;

"(9) provide for cooperation by the State agency with the State agency administering the State's public assistance program, the State's workmen's compensation agency, and the Bureau of Old-Age and Survivors Insurance (Department of Health, Education, and Welfare) and other Federal, State, and local public agencies providing services relating to vocational rehabilitation services, and provide for the utilization of the services of such agencies insofar as practicable;

"(10) provide for entering into cooperative arrangements with the system of public employment offices in the State and the maximum utilization of the job placement and employment counseling services and other services and facilities of such offices; and

"(11) provide that vocational rehabilitation provided under the State plan shall be available to any civil employee of the United States disabled while in the performance of his duty on the same terms and conditions as apply to other persons.

"(b) The Secretary shall approve any plan which the Secretary finds fulfills the conditions specified in subsection (a) of this section.

"(c) Whenever the Secretary, after reasonable notice and opportunity for hearing to the State agency administering or supervising the administration of the State plan approved under this section, finds that—

"(1) the plan has been so changed that it no longer contains any provision required by subsection (a) of this section to be included in the plan; or

"(2) in the administration of the plan there is a failure to comply substantially with any such provision;

the Secretary shall notify such State agency that no further payments will be made to the State under section 2 or 3 (or, in his discretion, that further payments will not be made to the State for projects under or parts of the State plan affected by such failure), until he is satisfied that there is no longer any such failure. Until he is so satisfied the Secretary shall make no further payments to such State under section 2 or 3 (or shall limit payments to projects under or parts of the State plan in which there is no such failure).

"(d) If any State is dissatisfied with the Secretary's action under subsection (c) of this section, such State may appeal to the United States district court for the district where the capital of such State is located and judicial review of such action shall be on the record in accordance with the provisions of the Administrative Procedure Act.

"METHOD OF COMPUTING AND MAKING PAYMENTS

"SEC. 7. The method of computing and paying amounts pursuant to section 2 or 3 shall be as follows:

"(1) The Secretary shall, prior to the beginning of each calendar quarter or other period prescribed by him, estimate the amount to be paid to each State under the provisions of such section for such period, such estimate to be based on such records of the State and information furnished by

it, and such other investigation, as the Secretary may find necessary.

"(2) The Secretary shall pay, from the allotment available therefor, the amount so estimated by him for such period, reduced or increased, as the case may be, by any sum (not previously adjusted under this subsection) by which he finds that his estimate of the amount to be paid the State for any prior period under such section was greater or less than the amount which should have been paid to the State for such prior period under such section. Such payments shall be made prior to audit or settlement by the General Accounting Office, shall be made through the disbursing facilities of the Treasury Department, and shall be made in such installments as the Secretary may determine.

"ADMINISTRATION

"SEC. 8. (a) In carrying out his duties under this Act, the Secretary shall—

"(1) make studies, investigations, demonstrations, and reports with respect to abilities, aptitudes, and capacities of physically handicapped individuals, development of their potentialities, and their utilization in gainful and suitable employment;

"(2) cooperate with and render technical assistance to States in matters relating to the vocational rehabilitation of physically handicapped individuals;

"(3) provide, during the fiscal year ending June 30, 1955, and the fiscal year ending June 30, 1956, training and instruction in technical matters relating to vocational rehabilitation services, including the establishment and maintenance of such research fellowships and traineeships, with such stipends and allowances (including travel and subsistence expenses), as he may deem necessary, except that no such training or instruction (or fellowship or scholarship) shall be provided any individual for a period in excess of 12 months; and

"(4) disseminate information as to the studies, investigations, demonstrations, and reports referred to in paragraph (1) and other matters relating to vocational rehabilitation services, and otherwise promote the cause of rehabilitation of physically handicapped individuals and their greater utilization in gainful and suitable employment.

"(b) The Secretary is authorized to make rules and regulations governing the administration of this act, and to delegate to any officer or employee of the United States such of his powers and duties, except the making of rules and regulations, as he finds necessary in carrying out the purposes of this act.

"PROMOTION OF EMPLOYMENT OPPORTUNITIES

"SEC. 9. The Secretary of Labor and the Secretary of Health, Education, and Welfare shall cooperate in developing, and in recommending to the appropriate State agencies, policies and procedures which will facilitate the placement in employment of handicapped individuals who have received rehabilitation services under State vocational rehabilitation programs, and, together with the Chairman of the President's Committee on Employment of the Physically Handicapped, shall develop and recommend methods which will assure maximum utilization of services which that Committee, and cooperating State and local organizations, are able to render in promoting job opportunities for such individuals.

"UNITED STATES EMPLOYMENT SERVICES

"SEC. 10 (a) The first sentence of subsection (a) of section 3 of the act of June 6, 1933, as amended (29 U. S. C., 1946 edition, sec. 49–491), is hereby amended by inserting between the words 'gainful occupations' and the words 'to maintain', a comma, and the following: 'including employment counseling and placement services for handicapped persons.'

"(b) Section 8 of the act, as amended, is further amended by inserting after the first sentence thereof a new sentence to read as follows: 'Such plans shall include provision for the promotion and development of employment opportunities for handicapped persons and for job counseling and placement of such persons, and for the designation of at least one person in each State or Federal employment office, whose duties shall include the effectuation of such purposes.'

"REPORTS

"SEC. 11. Annual reports shall be made to the Congress by the Secretary as to the administration of this act.

"AUTHORIZATION OF APPROPRIATION FOR ADMINISTRATION

"SEC. 12. There are hereby authorized to be included for each fiscal year in the appropriations for the Department of Health, Education, and Welfare such sums as are necessary to administer the provisions of this act.

"DEFINITIONS

"SEC. 13. For the purposes of this act—

"(a) The term 'vocational rehabilitation services' means diagnostic and related services (including transportation) incidental to the determination of eligibility for and the nature and scope of services to be provided; training, guidance and placement services for physically handicapped individuals; and, in the case of any such individual found to require financial assistance with respect thereto, after full consideration of his eligibility for any similar benefit by way of pension, compensation, and insurance, any other goods and services necessary to render such individual fit to engage in a remunerative occupation, including remunerative homebound work, including the following physical restoration and other goods and services—

"(1) corrective surgery or therapeutic treatment necessary to correct or substantially modify a physical or mental condition which is stable or slowly progressive and constitutes a substantial handicap to employment, but is of such a nature that such correction or modification may reasonably be expected to eliminate or substantially reduce such handicap within a reasonable length of time;

"(2) necessary hospitalization in connection with surgery or treatment specified in subparagraph (1);

"(3) such prosthetic devices as are essential to obtaining or retaining employment;

"(4) maintenance, not exceeding the estimated cost of subsistence, during rehabilitation;

"(5) tools, equipment, initial stocks and supplies (including equipment and initial stocks and supplies for vending stands), books, and training materials, to any or all of which the State may retain legal title, and capital advances not to exceed $500 for vending stand operators licensed under the act of June 30, 1936, as amended (20 U. S. C., ch. 6A); and

"(6) transportation (except where necessary in connection with determination of eligibility or nature and scope of services) and occupational licenses.

Such term also includes—

"(7) the acquisition of vending stands or other equipment and initial stocks and supplies for use by severely handicapped individuals in any type of small business the operation of which will be improved through management and supervision by the State agency; and

"(8) the establishment of public and other nonprofit rehabilitation facilities to provide services for physically handicapped individuals and the establishment of public and other nonprofit workshops for the severely handicapped.

"(b) The term 'physically handicapped individual' means any individual who is under a physical or mental disability which constitutes a substantial handicap to employment, but which is of such a nature that vocational rehabilitation services may reasonably be expected to render him fit to engage in a remunerative occupation.

"(c) The term 'rehabilitation facility' means a facility operated for the primary purpose of assisting in the rehabilitation of physically handicapped individuals—

"(1) which provides one or more of the following types of services:

"(A) testing, fitting, or training in the use of prosthetic devices;

"(B) prevocational or conditioning therapy;

"(C) physical or occupational therapy;

"(D) adjustment training; or

"(E) evaluation or control of special disabilities; or

"(2) through which is provided an integrated program of medical, psychological, social, and vocational evaluation and services under competent professional supervision: *Provided*, That the major portion of such evaluation and services is furnished within the facility and that all medical and related health services are prescribed by, or are under the formal supervision of, persons licensed to practice medicine or surgery in the State.

"(d) The term 'workshop' means a place where any manufacture or handiwork is carried on and which is operated for the primary purpose of providing remunerative employment to severely handicapped individuals who cannot be readily absorbed in the competitive labor market.

"(e) The term 'nonprofit', when used with respect to a rehabilitation facility or a workshop, means a rehabilitation facility and a workshop, respectively, owned and operated by a corporation or association, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual and the income of which is exempt from taxation under section 101 (6) of the Internal Revenue Code.

"(f) Establishment of a workshop or rehabilitation facility means—

"(1) in the case of a workshop, the expansion, remodeling, or alteration of existing buildings, necessary to adapt such buildings to workshop purposes or to increase the employment opportunities in workshops, and the acquisition of initial equipment necessary for new workshops or to increase the employment opportunities in workshops; and

"(2) in the case of a rehabilitation facility, the expansion, remodeling, or alteration of existing buildings, and initial equipment of such buildings, necessary to adapt such buildings to rehabilitation facility purposes or to increase their effectiveness for such purposes (subject, however, to such limitations as the Secretary may by regulations prescribe in order to prevent impairment of the objectives of, or duplication of, other Federal laws providing Federal assistance to States in the construction of such facilities) and initial staffing thereof (for a period not exceeding 1 year).

"(g) The term 'State' includes Alaska, the District of Columbia, Hawaii, the Virgin Islands, and Puerto Rico, and for purposes of section 4, includes also Guam.

"(h) (1) The 'allotment percentage' for any State shall be 100 percent less that percentage which bears the same ratio to 50 percent as the per capita income of such State bears to the per capita income of the continental United States (excluding Alaska), except that (A) the allotment percentage shall in no case be more than 75 percent or less than 33⅓ percent, and (B) the allotment percentage for Hawaii shall be 50 percent, and the allotment percentage for Alaska, Puerto Rico, and the Virgin Islands shall be 75 percent.

"(2) The allotment percentages shall be promulgated by the Secretary between July 1 and August 31 of each even-numbered year,

on the basis of the average of the per capita incomes of the States and of the continental United States for the 3 most recent consecutive years for which satisfactory data are available from the Department of Commerce. Such promulgation shall be conclusive for each of the 2 fiscal years in the period beginning July 1 next succeeding such promulgation: *Provided*, That the Secretary shall promulgate such percentages as soon as possible after the enactment of the Vocational Rehabilitation Amendments of 1954, which promulgation shall be conclusive for the 3 fiscal years in the period ending June 30, 1957.

"(i) (1) The 'Federal share' for any State for any fiscal year (other than the fiscal year ending June 30, 1954) shall be 100 percent less that percentage which bears the same ratio to 38 percent as the per capita income of such State bears to the per capita income of the continental United States (excluding Alaska), except that (A) the Federal share shall in no case be more than 72 percent or less than 52 percent, and (B) the Federal share for Hawaii and Alaska shall be 64 percent, and the Federal share for Puerto Rico and the Virgin Islands shall be 72 percent. In computing the Federal share of a State for a year, the Secretary shall use the same figures for per capita incomes of the States and of the United States as he used in computing the allotment percentage of such State for such year.

"(j) The population of the several States shall be determined on the basis of the latest figures furnished by the Department of Commerce.

"(k) The term 'Secretary,' except when the context otherwise requires, means the Secretary of Health, Education, and Welfare.

"TRANSITION PROVISIONS

"SEC. 14. (a) In the case of any State which, immediately prior to July 1, 1954, was carrying on a vocational-rehabilitation program under a State plan approved under this act, such State plan shall be deemed to be a State plan approved under section 5 of this act until (1) the Secretary finds, after reasonable notice and opportunity for a hearing to the State agency, that such plan has been so changed that it no longer complies with any provision required to be included in such plan under this act as in effect prior to the enactment of the Vocational Rehabilitation Amendments of 1954, or in the administration of such plan there is a failure to comply substantially with any such provisions, or (2) the plan is superseded by a plan approved under section 5 of this act, or (3) July 1, 1955, whichever occurs first.

"(b) Sums appropriated for grants to States for the fiscal year ending June 30, 1955, pursuant to the Vocational Rehabilitation Act in effect prior to the enactment of the Vocational Rehabilitation Amendments of 1954 (including the portion of sums made available to the Secretary for rehabilitation services in the District of Columbia) shall be deemed to have been made available for grants to States under section 2 of this act. Payments made from such sums to a State (including payments made or obligated from such sums for vocational rehabilitation services in the District of Columbia) prior to the enactment of the Vocational Rehabilitation Amendments of 1954 shall be deemed to have been paid under this act from the State's allotment under such section 2.

"SHORT TITLE

"SEC. 15. This act may be cited as the 'Vocational Rehabilitation Act'."

VOCATIONAL REHABILITATION PROGRAM IN THE DISTRICT OF COLUMBIA

SEC. 3. (a) The personnel, property, and records which the Director of the Bureau of the Budget determines relate primarily to the provision of vocational rehabilitation services in the District of Columbia or the performance of functions of a State licensing agency under the act of June 20, 1936 (20 U. S. C., ch. 6A), shall be transferred, within 90 days after the enactment of this act, from the Department of Health, Education, and Welfare to the municipal government of the District of Columbia for use in providing such services and performing such functions in the District of Columbia.

(b) The Board of Commissioners of the District of Columbia is hereby authorized, within available appropriations and allotted funds, to take such action as may be necessary to secure for the District of Columbia the benefits of the Vocational Rehabilitation Act, as amended by this act, and the act of June 20, 1936 (20 U. S. C., ch. 6A).

(c) Notwithstanding anything to the contrary in section 2 or any other provision of this act, the Secretary of Health, Education, and Welfare is authorized to continue the performance of functions relating to the provisions of vocational rehabilitation services in the District of Columbia until completion of the transfer provided in subsection (a) in like manner as such functions were being performed by such Secretary immediately prior to the enactment of this act.

AMENDMENTS TO THE RANDOLPH-SHEPPARD VENDING STAND ACT

SEC. 4. (a) The first section of the act entitled "An act to authorize the operation of stands in Federal buildings by blind persons, to enlarge the economic opportunities of the blind, and for other purposes," approved June 20, 1936, as amended (20 U. S. C., sec. 107), is amended to read as follows: "That for the purpose of providing blind persons with remunerative employment, enlarging the economic opportunities of the blind, and stimulating the blind to greater efforts in striving to make themselves self-supporting, blind persons licensed under the provisions of this act shall be authorized to operate vending stands on any Federal property where such vending stands may be properly and satisfactorily operated by blind persons. In authorizing the operation of vending stands on Federal property, preference shall be given, so far as feasible, to blind persons licensed by a State agency as provided in this act; and the head of each department or agency in control of the maintenance, operation, and protection of Federal property shall, after consultation with the Secretary, and with the approval of the President, prescribe regulations designed to assure such preference (including assignment of vending machine income to achieve and protect such preference) for such licensed blind persons without unduly inconveniencing such departments and agencies or adversely affecting the interests of the United States."

(b) (1) Section 2 (a) of such act of June 20, 1936, as amended (20 U. S. C., sec. 107a), is amended by striking out "in Federal and other buildings" where it appears in paragraph (1) and inserting in lieu thereof "on Federal and other property," and by amending paragraph (4) to read as follows:

"(4) Designate as provided in section 3 of this act the State commission for the blind in each State, or, in any State in which there is no such commission, some other public agency to issue licenses to blind persons who are citizens of the United States and at least 21 years of age for the operating of vending stands on Federal and other property in such State for the vending of newspapers, periodicals, confections, tobacco products, articles dispensed automatically or in containers or wrapping in which they are placed before receipt by the vending stand, and such other articles as may be approved for each property by the department or agency in control of the maintenance, operation, and protection thereof and the State licensing agency in accordance with the regulations prescribed pursuant to the first section: *Provided*, That (A) effective 4 years after the enactment of the Vocational Rehabilitation Amendments of 1954, in any State having an approved plan for vocational rehabilitation pursuant to the Vocational Rehabilitation Act, the licensing agency to be designated hereunder shall be the State agency designated pursuant to section 5 (a) (1) of such act as the sole State agency with respect to vocational rehabilitation of the blind; and (B) prior to such time, no license shall be granted except upon certification by a vocational rehabilitation agency that the individual is qualified to operate a vending stand."

(2) Paragraph (5) of such subsection is amended by inserting "including the issuance of rules and regulations," after "steps."

(c) Section 2 (b) of such act of June 20, 1936, as amended, is amended by striking out the third sentence thereof.

(d) Section 2 (c) of such act of June 20, 1936, as amended, is amended to read as follows:

"(c) The State licensing agency designated by the Secretary is authorized, with the approval of the head of the department or agency in control of the maintenance, operation, and protection of the Federal property on which the stand is to be located but subject to regulations prescribed pursuant to the first section, to select a location for such stand and the type of stand to be provided."

(e) Section 3 of such act of June 20, 1936, as amended (20 U. S. C., sec. 107b), is amended to read as follows:

"SEC. 3. A State commission for the blind or other State agency desiring to be designated as the licensing agency shall, with the approval of the chief executive of the State, make application to the Secretary and agree—

"(1) to cooperate with the Secretary in carrying out the purpose of this act;

"(2) to provide for each licensed blind person such vending stand, equipment, and adequate initial stock of suitable articles to be vended therefrom, as may be necessary: *Provided, however*, That such equipment and stock may be owned by the licensing agency for use of the blind, or by the blind individual to whom the license is issued: *And provided further*, That if ownership of such equipment is vested in the blind licensee, (A) the State licensing agency shall retain a first option to repurchase such equipment and (B) in the event such individual dies or for any other reason ceases to be a licensee or transfers to another vending stand, ownership of such equipment shall become vested in the State licensing agency (for transfer to a successor licensee) subject to an obligation on the part of the State licensing agency to pay to such individual (or to his estate) the fair value of his interest therein as later determined in accordance with regulations of the State licensing agency and after opportunity for a fair hearing.

"(3) that if any funds are set aside, or caused to be set aside, from the proceeds of the operation of the vending stands such funds shall be set aside, or caused to be set aside, only to the extent necessary for and may be used only for the purposes of (A) maintenance and replacement of equipment; (B) the purchase of new equipment; (C) management services; and (D) assuring a fair minimum return to operators of vending stands for a period of not to exceed 1 year following (i) the date of approval of the State's application submitted under this section, as amended by the Vocational Rehabilitation Amendments of 1954, or (ii) the initial establishment of the stand, whichever occurs later: *Provided, however*, That in no event shall the amount of such funds to be set aside from the proceeds of any vending stand exceed a reasonable amount which shall be determined by the Secretary;

"(4) to make such reports in such form and containing such information as the Secretary may from time to time require and to comply with such provisions as he may from time to time find necessary to assure the correctness and verification of such reports;

"(5) to issue such regulations, consistent with the provisions of this act, as may be necessary for the operation of this program;

"(6) to provide to any blind licensee dissatisfied with any action arising from the operation or administration of the vending stand program an opportunity for a fair hearing."

(f) Section 6 of such act of June 20, 1936, as amended (20 U. S. C., sec. 107e), is amended by adding at the end thereof the following new subsections:

"(d) The term 'Federal property' means any building, land, or other real property owned, leased, or occupied by any department or agency of the United States, or any instrumentality wholly owned by the United States, or by any department or agency of the District of Columbia or any Territory or possession of the United States.

"(e) The term 'Secretary' means the Secretary of Health, Education, and Welfare."

(g) Such act of June 20, 1936, as amended is amended by renumbering section 7 as section 8, and by inserting immediately after section 6 the following new section:

"SEC. 7. In the case of any State which, immediately prior to July 1, 1954, was performing the functions of a State licensing agency pursuant to an application for designation approved under this act, such application shall be deemed to be an application approved under section 3 of this act, as amended by the Vocational Rehabilitation Amendments of 1954, until (1) the Secretary finds, after reasonable notice and opportunity for a hearing to the State licensing agency, that the provisions contained in such application have been changed so that it no longer complies with any provisions required to be included in such application under this act, as in effect prior to July 1, 1954, or that in the administration of the program there is a failure to comply substantially with any such provision, or (2) the application is superseded by an application approved under section 3 of this act after July 1, 1954, or (3) July 1, 1955, whichever first occurs."

SEC. 5. The joint resolution entitled "Joint resolution authorizing an appropriation for the work of the President's Committee on National Employ the Physically Handicapped Week," approved July 11, 1949 (63 Stat. 409), is amended by striking out "$75,000" and inserting in lieu thereof "$225,000."

SEC. 6. The amendments made by this act shall become effective July 1, 1954.

Mr. SMITH of New Jersey. Mr. President, I move that the Senate disagree to the amendment of the House, agree to the request of the House for a conference with the Senate on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. SMITH of New Jersey, Mr. PURTELL, Mr. GOLDWATER, Mr. HILL, and Mr. LEHMAN conferees on the part of the Senate.

EXECUTIVE SESSION

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to consider executive business for action on nominations which appear on the Executive Calendar under the heading "New Reports."

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGE REFERRED

The PRESIDING OFFICER (Mr. PAYNE in the chair) laid before the Senate a message from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. SALTONSTALL, from the Committee on Armed Services:

Maj. Gen. Earle Standlee, Army of the United States (brigadier general, Medical Corps, U. S. Army), to be major general, Medical Corps, in the Regular Army of the United States; and

Brig. Gen. Paul Irwin Robinson, Army of the United States (colonel, Medical Corps, U. S. Army), to be brigadier general, Medical Corps, in the Regular Army of the United States.

By Mr. SMITH of New Jersey, from the Committee on Labor and Public Welfare:

Charles R. Ferguson, of Pennsylvania, to be a member of the Federal Coal Mine Safety Board of Review.

NOTICE OF HEARING ON CERTAIN JUDICIAL NOMINATIONS

Mr. LANGER. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Friday, July 16, 1954, at 10 a. m., in room 424, Senate Office Building, upon the nominations of Elbert Parr Tuttle, of Georgia, to be United States circuit judge, fifth circuit, to fill a new position; and David John Wilson, of Utah, to be judge of the United States Customs Court, vice William P. Cole, Jr., elevated. At the indicated time and place all persons interested in the nominations may make such representations as may be pertinent. The subcommittee consists of myself, chairman, the Senator from New Jersey [Mr. HENDRICKSON], and the Senator from Missouri [Mr. HENNINGS].

THE CALENDAR—NEW REPORTS

The PRESIDING OFFICER. If there be no further reports of committees, the clerk will state the nominations under the heading "New Reports."

FEDERAL POWER COMMISSION

The Chief Clerk read the nomination of Frederick Stueck, of Missouri, to be a member of the Federal Power Commission for the term of 5 years, expiring June 22, 1959.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

UNITED STATES COAST GUARD

The Chief Clerk read the nomination of Capt. Frank A. Leamy to have the permanent rank of rear admiral, from November 1, 1954.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Capt. William K. Kenner to have the permanent rank of read admiral, effective upon confirmation by the Senate.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. KNOWLAND. Mr. President, I ask that the President be immediately notified of these confirmations.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. KNOWLAND. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

CONSTRUCTION AT MILITARY AND NAVAL INSTALLATIONS

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1719, House bill 9242, authorizing construction at military and naval installations and for the Alaska communications system.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 9242) to authorize certain construction at military and naval installations and for the Alaska communications system, and for other purposes, which had been reported from the Committee on Armed Services, with amendments.

Mr. CASE obtained the floor.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Louisiana?

Mr. CASE. First, Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, with the understanding that such action will not foreclose any Senator from offering amendments to them.

Mr. KNOWLAND. Mr. President, I believe I thoroughly understand what the Senator from South Dakota wishes to have done. In other words, it is his desire to have the committee amendments adopted en bloc, so that the parliamentary situation then will be that the bill, including the committee amendments, will be treated as a new bill, and thus subject to amendment.

Mr. CASE. That is correct.

The PRESIDING OFFICER. The Chair understands that the request of the Senator from South Dakota is that the committee amendments be considered and agreed to en bloc, so that the bill as thus amended will be considered as the original text of the bill and will be open to further amendment. Is that correct?

Mr. CASE. That is correct.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Dakota? Without objection, it is so ordered; and without objection, the committee amendments are agreed to, en bloc.

The committee amendments, as agreed to en bloc, are as follows:

On page 2, line 8, to strike out "$2,071,000" and insert "$1,579,000"; after line 12, to insert:

"Black Hills Ordnance Depot, S. Dak.: Post engineer facilities, ammunition maintenance facilities, utilities, $811,000."

On page 3, line 3, after the word "housing", to strike out "$1,967,000" and insert "$983,000"; in line 24, to strike out "$3,780,000" and insert "$2,290,000"; on page 4, line 5, after the word "housing", to strike out "$5,479,000" and insert "$2,739,000"; in line 8, to strike out "$1,835,000" and insert "$785,000"; in line 19, after the word "housing", to strike out "$2,297,000" and insert "$1,314,000"; on page 5, line 2, after the word "housing", to strike out "$2,028,000" and insert "$1,014,000"; in line 5, after the word housing", to strike out "$8,199,000" and insert "$4,264,000"; in line 9, after the word "facilities", to strike out "$6,259,000" and insert "$3,470,000"; in line 11, after the word "facilities", to strike out "$7,066,000" and insert "$3,623,000"; in line 13, after the word "housing", to strike out "$13,453,000" and insert "$7,875,000"; in line 17, after the word "facilities", to strike out "$10,182,000" and insert "$7,063,000"; in line 19, after the word "facilities", to strike out "$3,692,000" and insert "$2,216,000"; in line 22, after the word "facilities", to strike out "$7,491,000" and insert "$3,582,000"; in line 24, to strike out "$7,413,000" and insert "$4,036,000"; on page 6, line 3, to strike out "$11,744,000" and insert "$6,268,000"; on page 12, line 12, after the word "facilities", to strike out "$1,500,000" and insert "$1,254,000"; on page 13, line 10, after the word "acquisition", to strike out "$11,096,000" and insert "$10,060,000"; on page 16, line 6, after the word "utilities", to strike out "$4,245,000" and insert "$4,197,000"; on page 17, line 7, after the word "facilities", to strike out "and land acquisition, $412,000" and insert "$212,000"; after line 9, to insert:

"Naval ammunition depot, Fallbrook, Calif.: Ordnance facilities, $278,000."

In line 21, after the word "acquisition", to strike out "$519,000" and insert "$304,000"; on page 18, line 7, after the word "facilities", to strike out "$2,888,000" and insert "$1,444,000"; in line 9, after the word "facilities", to strike out "$5,564,000" and insert "$1,664,000"; on page 19, after line 3, to insert:

"Naval Petroleum Reserve No. 1, Elks Hill, Calif.: Pipeline facilities, including easements and land acquisition, $8,000,000."

In line 9, to strike out "$4,669,000" and insert "$3,384,000"; in line 19, after the word "facilities", to insert "site preparation for family housing"; in line 20, after the word "utilities", to strike out "$6,550,000" and insert "$9,976,000"; on page 20, line 19, after the word "facilities", to insert "site preparation for family housing, land acquisition"; in line 21, after the word "utilities", to strike out "$6,520,000" and insert "$8,791,000"; on page 25, line 17, after the word "facilities", to strike out "$3,558,000" and insert "$3,663,000"; on page 29, line 21, after the words "total of", to strike out "$12,565,000" and insert "$12,085,000"; in line 23, after the word "and", where it occurs the second time, to strike out "$12,338,000" and insert "$11,858,000"; on page 32, line 2, after the words "total of", to strike out "$19,835,000" and insert "$19,408,000"; in line 4, after the word "and", where it occurs the second time, to strike out "$19,145,000" and insert "$18,718,000"; in line 12, after the word "facilities", to strike out "$14,079,000" and insert "$13,785,000"; on page 35, line 2, after the word "facilities", to strike out "$7,588,000" and insert "$6,494,000"; on page 43, line 22, after the word "facilities", to strike out "$506,000" and insert "$502,000"; on page 54, line 10, after the word "of", to strike out "$10,542,000" and insert "$10,170,000"; in line 12, after the word "and", where it occurs the second time, to strike out "$8,305,000" and insert "$7,933,000"; on page 56, line 4, after the words "total of", to strike out "$16,565,000" and insert "$14,645,000"; in line 6, after the word "and", where it occurs the second time, to strike out "$10,138,000" and insert "$8,218,000"; on page 65, line 25, after "SEC. 302", to insert "(a)"; on page 66, line 1, after the word "authorized", to strike out the comma and "without regard to the provisions of section 407 of Public Law 534,"; in line 9, after the word "Law", to strike out "534" and insert "155"; after line 9, to insert:

"(b) Section 302 of the act approved September 28, 1951 (65 Stat. 336), is hereby amended by striking the figures '$1,071,638,000' and inserting in lieu thereof '$1,007,963,000'."

In line 18, after the word "and", to strike out "three-tenths" and insert "three-hundredths"; on page 68, line 4, to strike out "SEC. 501."; in line 13, after "3 percent", to insert "per annum"; in line 15, after the word "options", to insert a colon and "*Provided further*, That for each semiannual period beginning July 1, 1954, during which a military department procures any option under the authority of this section, the Secretary of such military department shall render to the Armed Services Committees of the Senate and House of Representatives a report as to the options procured during such period"; on page 69, line 1, after the word "States", to strike out "$162,909,000" and insert "$121,865,000"; in line 4, after the word "of", to strike out "$269,873,000" and insert "$228,829,000"; in line 6, after the word "States", to strike out "$109,165,000" and insert "$109,069,000"; in line 7, after the word "States", to strike out "$30,796,000" and insert "$36,493,000"; in line 9, after the word "of", to strike out "$203,319,000" and insert "$208,920,000"; in line 11, after the word "States", to strike out "$393,607,000" and insert "$389,125,000"; in line 13, after the word "of", to strike out "$403,436,000" and insert "$398,954,000"; in line 19, after the word "by", to strike out "10 percent" and insert "5 percent in the case of projects within continental United States and 10 percent in the case of projects outside the continental United States"; at the top of page 71, to insert:

"SEC. 508. None of the authority contained in titles I, II, and III of this act shall be deemed to authorize any building construction project within the continental United States at a unit cost in excess of—

"(a) $20 per square foot for cold-storage warehousing;

"(b) $6 per square foot for regular warehousing;

"(c) $1,700 per man for permanent barracks;

"(d) $1,400 per man for 10-year-life barracks; or

"(e) $5,000 per man for bachelor officer quarters,

unless the Secretary of Defense determines that, because of special circumstances, application to such project of the limitation on unit costs contained in this section is impracticable."

And after line 13, to insert:

"SEC. 509. (a) The first sentence of section 501 (b) of the act entitled 'An act to authorize certain construction at military and naval installations, and for other purposes,' approved September 28, 1951 (65 Stat. 336), is amended to read as follows: The Secretary of the Army, the Secretary of the Navy, and the Secretary of the Air Force are respectively authorized, to the extent administratively determined by each to be fair and reasonable under regulations approved by the Secretary of Defense, to reimburse the owners and tenants of land, used by such owners and tenants for residential or agricultural purposes, acquired by their departments pursuant to the provisions of this act for expenses and other losses and damages incurred by such owners and tenants, respectively, in the process and as a direct result of the moving of themselves and their families and possessions because of such acquisition of land, which reimbursement shall be in addition to, but not in duplication of, any payments in respect of such acquisition as may otherwise be authorized by law: *Provided*, That the total of such reimbursement to the owners and tenants of any parcel of land shall in no event exceed 25 percent of the fair value of such parcel of land as determined by the Secretary of the military department concerned. No payment in reimbursement shall be made unless application therefor, supported by an itemized statement of the expenses, losses, and damages so incurred, shall have been submitted to the Secretary of the military department concerned within 1 year following the date of such vacating.

"(b) The first sentence of section 401 (b) of the act entitled 'An act to authorize certain construction at military and naval installations, and for other purposes,' approved July 14, 1952 (66 Stat. 606), is amended to read as follows: 'The Secretary of the Army, the Secretary of the Navy, and the Secretary of the Air Force are respectively authorized, to the extent administratively determined by each to be fair and reasonable, under regulations approved by the Secretary of Defense, to reimburse the owners and tenants of land, used by such owners and tenants for residential or agricultural purposes, to be acquired for any public-works project of the military department concerned for expenses and other losses and damages incurred by such owners and tenants, respectively, in the process and as a direct result of the moving of themselves and their families and possessions because of such acquisition of land, which reimbursement shall be in addition to, but not in duplication of, any payments in respect of such acquisition as may otherwise be authorized by law: *Provided*, That the total of such reimbursement to the owners and tenants of any parcel of land shall in no event exceed 25 percent of the fair value of such parcel of land as determined by the Secretary of the military department concerned.'

"(c) The amendments made by this section shall apply only with respect to land acquired subsequent to the date of enactment of this act."

Mr. CASE. Mr. President, let me state that the clerk of the committee is preparing several amendments which are more or less technical in nature; they relate to corrections in totals. As soon as those amendments are ready, I shall make a request regarding them.

Mr. President, in addressing myself to the bill as reported to the Senate, let me say that I believe almost all Members of the Senate are familiar with this military and naval installations authorization bill and its purpose and the way in which the corresponding bills have been presented to the Senate in recent years.

This bill provides for the development of Army camps, Air Force fields, and Navy shore establishments.

The total amount of the authorizations recommended by the Senate committee is $837,165,600. That amount is to be compared with the amount of $896,976,600 recommended by the Department of Defense, and the amount of $877,090,600, as approved by the House of Representatives.

Mr. President, I ask unanimous consent to have printed at this point in the

RECORD a table illustrating the totals by military departments, as the bill was recommended by the Department of Defense, and as the bill passed the House of Representatives, and as the bill is recommended by the Senate committee.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	Recommended by Department	Approved by House	Recommended by Senate committee
Army	$256, 773, 000	$269, 873, 000	$228, 829, 000
Navy	207, 239, 000	203, 319, 000	208, 920, 000
Air Force	432, 502, 000	403, 436, 000	398, 954, 000
Alaska system	462, 600	462, 600	462, 600
Total	896, 976, 600	877, 090, 600	837, 165, 600

Mr. CASE. Mr. President, from the table it is to be noted that the House of Representatives reduced the departmental request by approximately $19 million, and that the Senate committee has voted reductions totaling almost $40 million. Actually, the reductions made by the House of Representatives amounted to substantially more than $19 million; but certain other desirable changes offset to some extent those reductions. For example, the House found that the Air Force authorization for aircraft control and warning systems could be obtained from unused existing authorization, instead of by making a new authorization. That reduction of approximately $110 million was largely offset, however, by the addition of an authorization totaling $73,500,000 for the Arnold Engineering Development Center, at Tullahoma, Tenn.

The Department of Defense had not completed its study of the new authorization needed at the Arnold Engineering Development Center when the draft of the military public-works bill was forwarded to the Congress, but in the course of House consideration of the pending bill, the Department recommended $73,,500,000 for this purpose. That authorization, however, has subsequently been considered, and it is incorporated in the bill as reported.

Furthermore, the House recommended that at four bases construction be accomplished on a 25-year-life basis instead of on the basis of 10-year construction. To put it in layman's language, it means that these four bases would be built henceforth with a so-called permanent type of construction, rather than a temporary type.

Mr. LONG. Mr. President, will the Senator yield?

Mr. CASE. I yield.

Mr. LONG. Can the Senator tell us where those four bases are?

Mr. CASE. Those four bases are: The Myrtle Beach Airport in South Carolina; the base at Alderson, Okla.; the base at Columbus, Miss., and the base at Charleston, S. C.

The difference in authorization for giving these four bases the characters of permanent construction is not substantial and the Senate committee has been inclined to concur in this recommendation in the thought that permanent construction may represent a saving in the long run.

In the same manner, reductions made by the Senate Committee on Armed Services have been offset to some extent by additions of a few significant items that the House had omitted or that the Department of Defense requested subsequent to House action. Among the items in this category are a pipeline that would be necessary to accommodate increased production from the Naval Petroleum Reserve No. 1 pursuant to a joint resolution of the Congress during a national emergency, two items for site preparation for family quarters in the Philippine Islands, and some construction at the Naval Ammunition Depot at Fallbrook, Calif., that were deferred by the House because of some question of water rights that was unresolved at the time the House acted on the bill.

In connection with the naval petroleum reserve, it was the feeling of the committee that the time to build pipelines is when pipe is available, and not during a national emergency. If we were to wait to build the pipeline for Naval Petroleum Reserve No. 1 in California until we had an emergency, we would then be confronted with high priorities on material, and would no doubt be operating under a controlled-materials plan. Therefore, the committee thought that we should create the authorization for building the pipeline at this time. It is obvious that if we were ever to use the reserve, we would want the pipeline in being. Therefore, we thought we ought to have the authorization established at this time, so that the installation could be accomplished when the pipe was available, without competing for such a critical material as pipe during the existence of a national emergency.

I believe it is fair to state that this bill has been more soundly conceived and better presented by Defense representatives than some which have been presented to the Congress in prior years. This observation is substantiated by comments from the Bureau of the Budget and the House Committee on Armed Services that are mentioned in the committee report.

That was mentioned in the committee report. At this time I suggest that Members of the Senate who are interested in the details of the bill will find the report quite useful. The staff, headed by Mr. William Darden, has been most helpful to the committee, and has prepared an excellent report. The report embraces considerable detailed information which would be helpful in analyzing the bill.

Among the tables in the report which are useful is one which appears at the end of the report, beginning with page 19. There Senators will find a list of the projects by States, and, under each State, the classification—whether it is Army, Air Force, or Navy. Opposite the line item for the particular installation will be found figures indicating whether it is a reauthorization or an authorization for new funds. The total for each State is shown. So it is possible to determine at once, with respect to any particular project in which Senators are interested, whether or not an authorization is carried in this bill, and its character.

The report also contains tables showing a breakdown as to the amounts inside continental United States, outside continental United States, and classified installations. It shows, on page 7, the reductions in the Navy title, and the additions to the Navy title.

On page 9, it shows the distribution of the program under the several commands of the continental United States Air Force, and also overseas, as to the program proposed for the fiscal year 1955, both for prior authorizations and for new authorizations.

As I stated earlier in the colloquy with the Senator from Louisiana [Mr. LONG], the committee has very carefully distinguished between new authorizations and prior authorizations. Prior authorizations for the Air Force, which are reprogramed in the language of the bill, total $435 million. I should not say that that $435 million represents a complete saving, but it does represent sounder programing, and it represents substantial savings. The $435 million will be used from prior authorizations and prior fundings by appropriations, and will be applied to projects of high priority, as proposed in the bill, whereas without such action the $435 million might have been applied to projects of lesser priority, or to projects which are outdated by the present concept of the missions of the several branches at particular installations.

Notwithstanding a realization that this bill is merely an authorization and that there will be further review of the items by the Appropriations Committee, the committee has felt a responsibility of attempting to find items that might be deferred or slowed down without impairing the national defense. This action was motivated by the realization that the national debt is closely approaching the legal limitation and by the realization that taxes have been substantially reduced in a series of bills over the past few months and years.

That is why the bill is presented to the Senate with a reduction of some $40 million below the House figure, notwithstanding the fact that we restored to the authorizations the sum of $8 million in projects for the Navy, largely covering the pipeline item to which I have previously alluded, and also the initial work for some housing at strategic installations in the Philippine Islands.

In applying these reductions the committee has been governed by a group of so-called ground rules, or priority list, appearing on page 2 of the committee report. The categories are listed in descending order of priority. No reductions have been made in—

First. Research and development.

Second. Tacan, a new navigational aid.

Possibly a little later I shall say something about what Tacan means.

Third. Strategic weapons.

Fourth. Strategic defenses, including NIKE and A. C. and W., that is, airways control and warning systems.

Fifth. Operational shortages, including runway extensions, control towers, fuel storage, and fire-fighting equipment.

Sixth. Personnel facilities, which are desirable for welfare morale purposes and to increase the reenlistment rate.

Seventh. Family housing, and

Eighth. Quarters for technical personnel.

Beginning with the ninth item, enlisted barracks, and continuing through item 10, auxiliary warehouses and augmentation of service facilities, and item 11, land acquisition, the committee has applied some reductions.

At this point, Mr. President, I should like to refer to the classification of operational shortages, which includes runway extensions and aprons. The Senator from Louisiana, earlier during the day, pointed to the large amount of money which is proposed in this authorization for the extension of runways, and of aprons, in particular.

The extension of runways and the building of larger apron areas has been occasioned, and is justified in the committee's judgment, by the switchover from conventional aircraft to jet aircraft. We find that jet aircraft require longer runways.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. CASE. I shall yield in a moment. Jet aircraft, particularly the new jet bombers, require longer runways than conventional type aircraft. The aprons are required of a larger size and to a larger extent because of the tremendous blasts which are emitted in the operation of jet aircraft, which sweep up gravel and fine cinders and other material, and create a stream or blast which is very detrimental to the operation of jets.

Consequently, the testimony is to the effect that, in the interest of sound operation and economic operation, and to avoid a high rate of deterioration, jet aircraft require aprons that can be free of the gravel and cinders which are found when taxiways and aprons are so limited that grime and gritty material are swept into the succeeding plane. I now yield to the Senator from Louisiana.

Mr. LONG. Did the Senator make any effort to determine how the service went about calculating the amount of parking aprons they would need?

Mr. CASE. The Senator from South Dakota would like to call attention to the fact, as he has earlier, that the review by the Assistant Secretary of Defense for Installations resulted in a reduction of approximately $550,400,000 in the requests made to Congress, and that of that amount 9 percent was a reduction in parking areas due to design changes. I submit that figure indicates that there was some screening of the requests.

Mr. LONG. I should like to ask the Senator if the committee undertook to determine how the Air Force arrived at its requirements for parking areas?

Mr. CASE. We did, in this respect, that we went through each proposal for each installation, and we called attention to the amount which was requested for aprons and for runway extensions, and the whole category of concrete pavements. I may say that we were somewhat bothered by the fact that approximately $236 million, if my memory serves me correctly, in authorizations proposed for the Air Force was for concrete pavements. We were also disturbed by the fact that the estimates for paving showed such great variation in different sections of the country.

The Senator might note that at page 13 of the committee report there are three different items in which specific reductions in the proposed authorizations for paving were made, because we felt that the unit cost per yard of paving was too high on the record that had been established during the questioning of witnesses. In those three specific instances, namely, at Plattsburg, N. Y., Portsmouth, N. H., and the Bismarck-Minot, N. Dak., area, we proposed specific reductions ranging from $214,000 at Portsmouth to $1,094,000 in the North Dakota area with respect to that particular item.

Mr. LONG. I should like to suggest to the Senator that he will find he has not been getting the full story on the requirements of the parking areas. This is an important subject. I believe the Senator will find that more than 50 percent of the $235 million allocated for concrete is for parking areas. So far as I am concerned, the service can have runways as long as they would like to have them, but I believe that if the Air Force wants to spend millions of dollars on parking areas, someone should look into the necessity for them.

Unless I miss my guess, the Senator will find that most of this amount is for parking areas. The Senator will find that the Air Force determines its requirements for parking areas in this way. They take a square area measured by the width of a plane from wingtip to wingtip, and multiply that distance by the length of the plane from the propellor to the tail. Then they multiply the result by 3½. If every plane were placed wingtip to wingtip, they would still have 3½ times the space they would need, even without the planes overlapping one another. On training bases the Air Force uses a ratio of 5 to 1.

It has been my experience in working with this problem that the Air Force never stated any difference in requirements, whether it was asking for parking areas for use by jets or by conventional aircraft. The Air Force used the same parking ratio, namely, 3½ to 1 for their operational bases, and 5 to 1 for their training bases.

It appeared to me, as I believe it would appear to any person, that the Air Force request was excessive in asking for enormous seas of concrete. Of course, the Air Force could operate with much less concrete. Under actual fighting conditions, they do operate with much less concrete. For example, the Marine Corps informs me that during the war the Marine Corps, under actual fighting conditions, where it would be desirable to spread out their planes, used a ratio of 1½ to 1, instead of the 3½ to 1 the Air Force is using.

If the Air Force were willing to use a little dolly to move airplanes, as airline planes are moved into position, and methods that many people use in commercial parking areas, it could get along with a great deal less concrete, and would not require this enormous sea of concrete.

I have visited many airbases, and I have yet to find one where there was not this enormous surplus of parking areas.

That is one of the largest items in the bill. I do not have amendments prepared on parking areas, but I suspect that that is one place where the services might be requested to limit themselves to what is absolutely necessary. I should like to suggest to the distinguished chairman of the subcommittee that in his study of these matters he attempt to determine whether it is necessary to have this enormous amount of concrete. I know he will find that the Air Force in its testimony admits that this enormous amount of concrete does not increase the security of the base, and it does not increase the safety of the airplanes. Their testimony shows that if a match were set to one of those planes it would explode, and it would be impossible to get any of the other airplanes off the parking apron, because the flames would spread too rapidly from one plane to another.

The Senator will probably find that overseas we tried to separate these aprons, while in the United States there is one big, continuous apron where a single hit igniting one plane would burn up all the rest of them.

Mr. CASE. Obviously, on the floor of the Senate I do not think one can go into the details of all these installations, but I can assure the Senator from Louisiana that the committee was concerned with the question of paving and with the great amount that is incorporated in the authorization, but we were also impressed with the fact that we were dealing with a new situation in the United States. When we talk about the development of bases in the United States we have to assume that there may be combat conditions affecting the operations of bases even in the United States.

I have before me a breakdown of justifications on some of these bases. I shall not identify it, because I do not think a particular installation should be identified in the record, but it is one of the new fighter bases. The total amount requested for paving aggregates $3,213,000. $1,430,000 of that, almost 50 percent of it, is for the main runway. The taxiways account for another million dollars. Then there are some warmup pads and some other items, but the amount for aprons is approximately 20 percent of the total amount. The amount for parking aprons is less than 10 percent of the total. In one instance the cost of the apron was approximately $300,000.

Mr. LONG. Is that an existing base?

Mr. CASE. It is a brand new base.

Mr. LONG. I shall be glad to make some comparisons for the Senator, because it is my impression that, generally speaking, the parking aprons will cost more than will the runways. I shall be glad to acquire some information on the subject and make it available to the Senator.

Mr. CASE. The Senator is welcome to inspect the breakdown if he cares to do so.

Mr. LONG. The Senator is referring to one particular base. I do not quarrel with his judgment in that particular instance. However, I believe I can find for the Senator many examples where the cost of parking areas greatly exceeds the cost of the runway.

Mr. CASE. The Senator may be able to do that. With the percentages, we have a concrete picture of the various items.

Mr. President, at this point I ask unanimous consent to have placed in the RECORD a letter dated June 16, 1954, from Franklin G. Floete, Assistant Secretary of Defense, which is addressed to me, in response to a request which I made during the time he was testifying before the committee. I should like to read the first paragraph:

During my testimony before your subcommittee on June 1, 1954, concerning the Department of Defense public works authorization bills (S. 3260 and H. R. 9242), you requested that information be furnished covering the items totaling approximately $550,400,000 which were deleted during my review of the original programs submitted by the three services.

There is in the letter a breakdown showing the various categories in which deletions were made.

A study of the letter will support, I think, what I said earlier, that the review by the Assistant Secretary of Defense and his staff resulted in some definite reductions in the program as submitted to the Congress. The review by the committee accomplished a further reduction.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ASSISTANT SECRETARY OF DEFENSE,
Washington, D. C., June 16, 1954.

Hon. FRANCIS CASE,
United States Senate.

DEAR SENATOR CASE: During my testimony before your subcommittee on June 1, 1954 concerning the Department of Defense public-works authorization bill (S. 3260 and H. R. 9242), you requested that information be furnished covering the items totaling approximately $550,400,000 which were deleted during my review of the original programs submitted by the three services.

The greater portion of this sum ($444,500,000) consisted of: (1) limitations in the scope of various Air Force projects in order to attain maximum utilization of existing structures, and to assure that facilities were not programed in excess of firm requirements; (2) the deferral of construction not vitally needed at this time; (3) the elimination of projects considered infeasible from an engineering or economic standpoint; and (4) other necessary changes in the Air Force program. A breakdown reveals that the major categories comprising this $444,500,000 total are: warehousing—15 percent (arrangements are being made to meet a portion of the storage requirements by transferring to the Air Force excess Army storage space); hangars and shops—14 percent (the provision of less expensive type hangars, and increased utilization of maintenance facilities previously provided); utilities—13 percent (deletion of unnecessary roads, and elimination of water and electric services programed for structures deleted from the bill); airfield pavements—9 percent (reduction of parking areas due to design changes); community, recreational and administrative items—9 percent (deletion of projects not considered essential under conditions of ordinary austerity); special Air Defense Command projects—9 percent (savings due to use of existing bases in lieu of proposed new installations, and other program revisions). Reductions and deferrals of miscellaneous projects for medical, operational, and communication facilities, together with other required changes make up the remaining 31 percent of the $444,500,000 total.

The reduction of the Navy program from the original submission amounted to approximately $103,619,000. Similar to the reductions in the Air Force program it consisted, for the most part, of reductions to attain and assure that facilities were not in excess of firm requirements, deferrals of items not considered vitally needed at this time, deletion of projects infeasible from an economic standpoint, and reductions in estimate not in consonance with current policies. Of this reduction of $103,619,000, 21 percent are research and development facilities (deleted or deferred for further planning); 24 percent are fleet-shore facilities (deferred for further planning); 11 percent are Marine Corps facilities (considered not vitally needed at this time); 10 percent aviation overhaul facilities, 7 percent airfield pavements, and 6 percent storage facilities (considered in excess of firm requirements or not vitally needed at this time); 6 percent utilities (considered in excess of requirements); together with miscellaneous reductions amounting to 15 percent.

The reduction in the Army program initially submitted amounted to $2,281,000, resulting for the most part from estimating adjustments. The only items specifically deleted were a project for family housing at Killeen Base, Tex., estimated cost $496,000; a project for road construction at Sandia Base, N. Mex., estimated cost $54,000; and a utility item at Fort George G. Meade, Md., estimated cost $70,000.

Sincerely yours,

FRANKLIN G. FLOETE.

Mr. LONG. Mr. President, will the Senator from South Dakota yield?

Mr. CASE. I yield.

Mr. LONG. The Senator referred to a parking apron costing around $300,000. I should like to refer the Senator to the 1952 bill, where the cost of the parking apron requested at Lake Charles, La., was $3 million, which is 10 times the cost of the apron to which the Senator has referred. It indicates what I have stated, that at many bases the cost of the aprons runs into the millions of dollars. They are more expensive than are the runways.

Mr. CASE. The committee will be glad to make a specific investigation of it. The committee was disturbed by the great variation in the unit costs. It found them running all the way from $7 a yard up to $25 a yard. We found in some instances that the engineers based the unit cost upon a history of recent contracts, and in many cases they were round figures. The $25 cost concerned the committee a great deal, and we took some special testimony on that subject. We found that in that instance a heavier base was required than that which was required at some other places, and the cost of excavation was higher. We admonished the Department of Defense that we shall expect closer estimating in any subsequent presentation, and that we shall expect them to accomplish such savings as can be had through calling for competitive bids.

Mr. MAYBANK. Mr. President, will the Senator from South Dakota yield?

Mr. CASE. I yield.

Mr. MAYBANK. Mr. President, I send to the desk an amendment on behalf of myself and the senior Senator from Delaware [Mr. WILLIAMS] and ask that it be printed and lie on the table.

The PRESIDING OFFICER. The amendment will be received, be printed, and lie on the table.

Mr. CASE. Mr. President, I have no objection to the amendment being printed and lying on the table, but I understand from the majority leader that it is his purpose to complete action on the bill this evening.

Mr. MAYBANK. Mr. President, if the Senator will accept the amendment, I shall appreciate it. Will the Senator permit me to call it up?

The PRESIDING OFFICER. There is no amendment pending at the present moment.

Mr. MAYBANK. Mr. President, I should like to call up my amendment.

Mr. CASE. Mr. President, I had not completed my statement. I should like to complete it before considering the Senator's amendment.

If it would be of any particular assistance to the Senator from South Carolina to consider the amendment at this time, I have no objection to interrupting my remarks for that purpose.

Mr. SMATHERS. Mr. President, may we have the amendment read?

The PRESIDING OFFICER. Does the Senator from South Dakota yield for the purpose of having the amendment read at this time?

Mr. CASE. I yield.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from South Carolina for himself and the Senator from Delaware [Mr. WILLIAMS].

The CHIEF CLERK. It is proposed to insert at the proper place in the bill the following:

None of the funds appropriated in this act shall be used except that, so far as practicable, all contracts shall be awarded on a competitive basis to the lowest responsible bidder.

Mr. KNOWLAND. Mr. President, will the Senator from South Dakota yield, with the understanding that he will not lose the floor?

Mr. CASE. I yield.

Mr. KNOWLAND. It is now approaching 7 o'clock. It is not my desire to keep the Senate in session beyond that hour. If the distinguished Senator from South Dakota would be prepared to finish his opening statement, it would be printed in the RECORD and would be available for the information of all Senators tomorrow. I shall then propose that the Senate recess until 12 o'clock noon tomorrow.

Of course, if there are insertions to be made in the RECORD or speeches to be made, the Senate will be held in session for that purpose. But I give assurance to the Senate that there will not be any voting tonight, nor will there be any quorum calls for the purpose of voting on motions or amendments.

I understand that upon the conclusion of the discussion of the amendment now under consideration, the Senator from Louisiana desires to speak for about 5 minutes.

Mr. CASE. Speaking for myself, I would have no objection to the amendment which the Senator from South Carolina has offered, provided it be modified in one or two respects. Instead of using the word "fund," I suggest, since this is an authorization bill, that the word "authorization" he used.

I also suggest the insertion of the clause: "and so long as the national security shall not be impeded," following the phrase "so far as practicable."

Would the Senator from South Carolina agree to modifying the amendment which he has offered for himself and on behalf of the Senator from Delaware?

Mr. MAYBANK. I appreciate the Senator's suggestion. I shall ask that the amendment be changed so as to substitute the word "authorization" for the word "fund." I had intended to offer the amendment to an appropriation bill, because hearings are being held on a deficiency appropriation bill.

Mr. CASE. The amendment then will be consistent with the assurance which was received from representatives of the Department of Defense, during the consideration of the bill, that it was their intention to use competitive bidding so far as was practical, and so far as it did not impede the national security.

Mr. MAYBANK. Mr. President, will the Senator yield?

Mr. CASE. I yield.

Mr. MAYBANK. This is a construction bill. It is not a bill relating to atomic energy or to other matters about which we are not at liberty to speak. As the Senator from South Dakota has said, I see no reason why the amendment is not acceptable.

Mr. CASE. I may say that the bill contains items for about $68 million of highly classified projects, as to which no printed testimony will be found. Some of the projects are to be located overseas.

Mr. MAYBANK. I read the report which the able Senator made.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. CASE. I yield.

Mr. SALTONSTALL. I hope and trust that the Senate will accept the amendment as now offered, containing the language, "so far as practicable and if the interest of the national security shall not be impeded thereby."

If that language is included, I, as chairman of the committee, with the approval of the Senator from South Dakota, shall gladly accept the amendment. I feel that that language should be included, because authorizations relating to national security are contained in the bill.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. CASE. I yield.

Mr. WILLIAMS. I might say to the Senator from Massachusetts that the words "so far as practicable" would take care of cases which I pointed out, in which a contract related to some highly classified material. I see no reason to modify the language further than as the amendment has been written, and as it is now at the desk. It was accepted by the Senate, and was adopted overwhelmingly last year.

The import of the language, likewise, is contained in all the testimony I have read. I think the Senator from South Dakota will bear out my statement that the representatives of the various departments have indicated that what the amendment provides is what they intend to do anyway.

If the suggestion of the Senator from Massachusetts is adopted, it will not be practicable to solicit bids, in that Congress will have determined that in certain cases bids will not be practicable. I think the language as submitted will cover the situation.

Mr. SALTONSTALL. As I see it, the words "national security" are extremely important, simply for the reason that the Department of Defense and everyone else who has anything to do with the matter will have knowledge that competitive bidding should be carried out in every instance, unless the national security is involved in some way.

For instance, I know of some bases which are now being built, as to which it will be necessary to have 3 or 4 different contractors combine to form a new company, so that they can go forward with the bidding. The words "so far as practicable" may be sufficient, but I cannot see how the words "in the interest of national security" will hurt the bill in any way. They add a little, and they hurt in no way whatsoever.

I hope the Senate will accept the amendment in that form. If the amendment shall be agreed to, I shall gladly fight for its acceptance in conference.

Mr. CASE. The phrase suggested was "national security," not "national defense."

The PRESIDING OFFICER. Does the Senator from South Dakota desire to have the amendment restated?

Mr. CASE. I should like to have the amendment restated.

The CHIEF CLERK. On page 73, after line 18, it is proposed to add the following new section:

SEC. 510. All contracts entered into by the United States pursuant to the authorization contained in this act shall be awarded, so far as practicable, and if the interest of the national security shall not be impaired thereby, on a competitive basis to the lowest responsible bidder.

Mr. SALTONSTALL. Do I understand that the amendment as just read is acceptable?

Mr. CASE. It is agreeable to the committee.

Mr. MAYBANK. And the phrase will be "national security," not "national defense"?

Mr. CASE. That is correct.

Mr. MAYBANK. The Senator from Delaware and I wish to protect the national security, as do the Senator from South Dakota and the Senator from Massachusetts.

Mr. SALTONSTALL. Certainly; that is all we want to do.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. CASE. I yield to the Senator from Mississippi, our colleague on the committee, and a very useful member of the committee.

Mr. STENNIS. Speaking simply as a member of the subcommittee, I believe the amendment to be very timely. I think the legislative history which is being made makes very clear what is intended, and that it is necessary to have the words relating to the national security included in an amendment of this kind. I hope the Senator from Delaware and the Senator from South Carolina are entirely satisfied, because I am heartily in favor of the amendment.

Mr. WILLIAMS. If it is agreeable to the Senator from South Carolina to accept the change in the wording, I am willing to accept the amendment.

Mr. MAYBANK. The amendment is agreeable to me, for the reason that the words "national security" mean something much different than the words "national defense."

Mr. WILLIAMS. That is correct.

Mr. MAYBANK. If Air Force bases, shipyards, or forts are necessary for the national defense, that is a different question.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, offered by the Senator from South Carolina for himself and on behalf of the Senator from Delaware.

The amendment, as modified, was agreed to.

Mr. CASE. Mr. President, I shall now decline to yield further until I have completed by statement, in accordance with the observation made by the distinguished majority leader.

The largest single reduction was made in a program for the replacement of temporary barracks at BOQ's at several Army installations throughout the country. This program was presented to the Congress as a result of the President's budget message to the Congress and his state of the Union message, in which he pointed out that adequate housing would contribute to the improvement of morale and the maintenance of the high professional character of our military services. Almost $97 million of the Army program is intended for this purpose. While the committee is sympathetic with the objective of improving existing housing, it has recommended a lesser, yet substantial, program for the replacement of temporary barracks and bachelor officer quarters. When it is important to limit our military expenditures, the committee believes that this replacement program can be spread over a longer period of time. In taking this action, the committee was mindful that the barracks and BOQ replacement program was added to an earlier hard-core program of $158 million that was evolved under the initial guidance furnished by the Secretary of Defense.

TITLE I—ARMY

The Army would be authorized $228,829,000 by this bill. Of this total, $121 million is authorization within the Continental United States, $19 million is outside Continental United States and $87 million is for classified installations and facilities.

Of the total Army authorization, $87,700,000, or 38 percent, is for the continuation of the so-called NIKE program for defense of the United States and of installations outside the United States; $54,600,000, or 24 percent of the program is to provide replacement of temporary

troop housing and bachelor officer quarters; $26,900,000, or 12 percent of the program, is for an improvement to the national ammunition production and movement base; $19,200,000, or 8 percent of the program, is for continuation of construction in Alaska, Okinawa, the Pacific area, and Iceland; and the remainder, $26,900,000, or 18 percent of the program, is for urgent research and development and operational construction requirements within the United States.

TITLE II—NAVY

The pending bill would authorize the Navy to construct public works totaling a cost of $208,920,000. Of this total, $109,069,000 is to be used inside the continental United States, $36,493,000 outside the continental United States, and $63,358,000 for classified installations and facilities.

The Navy program is based on a continuing shore station improvement plan to support the current and planned force levels. The facilities requested are necessary to meet strategic requirements, to keep abreast of technological advancement in materials and weapons, to replace deteriorated facilities, and to conduct research to meet operational needs of the fleet. For shipyard facilities, the Navy is authorized almost $11 million to develop facilities within the United States for the repair and revision of the *Forrestal* type carrier, for modernizing shop facilities, for the replacement of badly deteriorated waterfront facilities, and for improving research facilities in the mine field.

Fleet facilities would be granted new authorization of $11,320,000 to keep abreast of technological advances in underseas weapons, and to develop installations used directly in support of fleet operations.

The largest category in the Navy program is for aviation facilities, which would be authorized almost $70 million in the bill, approximately 49 percent of the Navy program. This authorization is intended to continue the development of the master jet airfields and their auxiliaries, to provide operational facilities for modernizing several air-training stations, and to provide additional research and development facilities to keep pace with modern advancements in aircraft and weapons.

Supply facilities would receive $9,660,000 in new authorization, largely for bulk storage of fuels, cold-storage facilities, and fire-protection facilities.

The Marine Corps would receive an authorization in the amount of $3,330,000 to correct deficiencies in existing training installations and logistic support installations of the Marine Corps.

Ordnance, service school, medical, and communication facilities make up the remainder of the program, in a total of some $38 million. These authorizations provide improvements to ammunition storage and handling facilities and safety devices at ordnance depots, correction of deficiencies in training facilities, and improvement of living conditions for uniformed personnel at several continental training installations, and augmentation of an installation in the Pacific which is a link in the worldwide naval communications system.

Sixty-three million three hundred and fifty-eight thousand dollars of the Navy authorization is for classified installations, which will not be further discussed at this time for obvious reasons.

TITLE III—AIR FORCE

The fundamental purpose of the construction authorization contained in title III of the bill is to provide, by the end of fiscal year 1957, the minimum facilities required for sustained operation of the 137-wing Air Force which is presently planned and programed.

Of the total construction authorization for the Air Force of $834,827,000 proposed by this bill, only $398,954,000 represents new monetary authorization. By a method of reapplying existing unfunded authorization against the total new requirements, 40 percent of the construction required in this year's program will be accomplished without new authorization. At all the stations requiring additional construction, the Air Force determined the amount of unfunded authorization presently available. This amount of unfunded authorization was applied against the total requirements now existing at the station so that the net effect of the action is to reduce the new authorization required by reprograming unused monetary authorization with the necessary changes in authorizing language. The pending bill readjusts the language to conform to the current program while retaining the monetary authorization.

The Air Force construction authorization contains approximately $26 million in authorization for personnel facilities. This term includes items such as enlisted men's clubs, chapels, educational buildings, and swimming pools. Past experience has indicated that such items are the ones which are likely to suffer in review, both within the Department of Defense and in the course of congressional consideration. From personal inspections of bases in the United States and overseas, the committee is of the opinion that facilities of this type have a measurable effect on morale and reenlistment rates. In their appearances before the Armed Services Committee, the top ranking civilian and military officials of the Department of Defense have stressed time and again that the problem of securing and retaining military personnel of the desired caliber is probably the chief problem with which those officials must deal.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. CASE. I yield for a question.

Mr. LONG. Will the Senator tell us what the reenlistment rate in the Army is today among enlisted personnel?

Mr. CASE. I am sorry I cannot give that figure exactly at this time. However, I shall obtain it for the Senator from Louisiana. The figure varies in the different services. Eighty-two percent of the officer personnel in the Air Force is in the Reserve category. The committee was impressed by a statement made to it, both in the hearings and in our inspection of bases, that the operational efficiency of aircraft is seriously impaired by the difficulty of retaining trained mechanics in the Air Force.

Mr. LONG. I should like to suggest to the Senator that the way to keep mechanics in the Air Force is by hiring them as civilians, and requiring such civilians to have reserve status, in order that, in the event of an emergency, they may be called into service immediately. Most of our air bases are here in the United States. If mechanics at those bases were to be hired on a civilian status, it would be much easier to obtain mechanics who are needed for the service, and they could be available as reserves. They could be called into service immediately in the event of war.

It seems to me that would be a much better arrangement than the idea of trying to provide enormously costly fringe benefits. I have not made an attempt to determine what the total cost of all the fringe benefits would be, but I am sure the cost would amount to an enormous figure. Even if fringe benefits are provided, there will still be a great majority of service personnel whom no one expects or desires to have re-enlist. For example, in the Army, most of the manpower is obtained by drafting young men. Most of the young men will leave that branch of the service when their period of service expires, regardless of the fringe benefits provided.

There is only a small percentage of the total service personnel that it is desired to retain in the service. It seems to me the best way to assure retaining them in the service is to employ them as civilians and require that they have a reserve status. Certainly that could be done with regard to mechanics stationed at bases in this country.

Mr. CASE. The question of whether or not that would be a more successful method than the present one is, of course, a matter of opinion. A study has been made by the Secretary of Defense recently——

Mr. LONG. I am sure the solution I have suggested is not one which would be particularly palatable to a commanding officer who likes to have his men under his command 24 hours a day, subject to his orders at all times, rather than have civilian employees who would work only 8 hours a day. However, I think the Senator will find that at many of the bases most of the highly qualified persons working in the servicing of aircraft are civilians in various capacities.

Mr. CASE. The Senator from South Dakota is of the opinion that in some places solutions may be found by the employment of trained mechanics; but I heard a commander at one station make a statement, which was not very comforting, that he was bothered at times about the condition of his aircraft because trained mechanics had been taken away from him by competition in civilian life. What the bill provides is necessary if we are to hold some of the trained mechanics, when they obtain skills that command a high wage in civilian life, and have families that wish to move into civilian communities. It is hard to retain such mechanics at times when they are needed. That is a personnel problem. It is a little outside the immediate jurisdiction of the Subcommittee on

Real Estate and Military Construction, although it is related to the problem of providing these facilities, which we hope will result in an increase in the reenlistment rate.

We are impressed by the argument that the primary responsibility for determining whether the Defense Establishment will seek to obtain its mechanics by employment from civilian life, rather than by enlistment, is one for the entire Committee on Armed Services, rather than to have the decision reached as a matter of policy on the basis of recommendations made by the Subcommittee on Real Estate and Military Construction.

Mr. President, at this time I should like to complete my statement on the bill:

From the realization that the cost of losing trained personnel and of training their replacements is likely to exceed by many times the relatively modest authorization for personnel facilities included in this bill, and because the committee is inclined to the view that there is a relationship between the existence of these facilities and reenlistment rates, the personnel facilities program has been recommended in substantially the same amount as was presented to the committee.

The largest single category of construction authorized for the Air Force is airfield pavements, which category represents approximately 31 percent of the total authorization, or some 235 millions of dollars. Modern bombers, fighters, and transports are larger, heavier, and faster than their predecessors. Since the modern plane is larger, more paved area is needed for parking purposes; since it is faster, more paved area is required for longer runways, for landings, and for takeoffs; since it is heavier, the weight on the wheels is increased, thus requiring the strengthening of existing pavements, to support the added load.

The great preponderance of the Air Force authorization is for existing bases. Exceptions to this observation are the reactivation of the Strategic Air Command bases at Clinton-Sherman Airport, Okla., and Columbus Air Force Base, Miss.; the initiation of construction at Seymour-Johnson Air Force Base, N. C., and Myrtle Beach Airport, S. C.; and seven new bases required to strengthen the air defense of the United States. Bases in the latter category are the Bismarck-Minot area, North Dakota; the Fargo area, North Dakota—and the committee understands that to mean the Fargo-Grand Forks area, North Dakota—the Glasgow-Miles City area, Montana; K. I. Sawyer, Mich.; Klamath Falls, Oreg.; the southern California area; and the Traverse City area, in Michigan.

In conclusion, Mr. President, I wish to say the committee spent a great deal of time on the hearings; and the committee submits its recommendations in the belief that they represent a constructive program, with the emphasis placed upon research and development of the facilities for handling strategic weapons, and on such defense activities as NIKE; A. C. and W. systems; installations of Tacan, about which I may say something further tomorrow; and personnel facilities.

We commend the bill to the consideration of the Senate, and we hope it will be passed in substantially the form in which it is reported.

Mr. SALTONSTALL. Mr. President, will the Senator from South Dakota yield to me?

Mr. CASE. I yield.

Mr. SALTONSTALL. Let me say that the Armed Services Subcommittee headed by the Senator from South Dakota [Mr. CASE], the other members being the Senator from Pennsylvania [Mr. DUFF] and the Senator from Mississippi [Mr. STENNIS], worked more than a month on the bill, and went into it very thoroughly. I wish to commend them for the conscientiousness with which they studied this massive bill.

Mr. CASE. Mr. President, I certainly appreciate the kind remarks of the chairman of the Armed Services Committee. I can assure the Senate that my colleagues on the subcommittee—the Senator from Pennsylvania [Mr. DUFF] and the Senator from Mississippi [Mr. STENNIS]—have been faithful in their attendance and in their work on the subcommittee.

Mr. President, at this time I desire to submit, for printing, a few amendments which are largely technical in nature. They relate to the titles and also to a correction and to an addition. These amendments have been prepared by the clerk, and I ask unanimous consent that they be printed and be available as one amendment, for consideration tomorrow.

The PRESIDING OFFICER. Without objection, the amendments will be received, printed, and lie on the table.

Mr. SALTONSTALL. Mr. President, if the amendments are merely technical in nature, I am sure there will be no objection to adopting them at this time—if they are merely for the purpose of making corrections.

Mr. CASE. I should say that in one instance they correct one application of the ground rule on the deletion of enlisted men's barracks; and in another instance they include authorization for a land acquisition at Paine Air Force Base, Wash.—which was a special request, and it was the intent of the committee to include it in the recommendations. The amendments can be considered as committee amendments.

Therefore, Mr. President, I now ask unanimous consent that the amendments be considered at this time, and be considered en bloc.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Dakota?

Without objection, the amendments will be considered en bloc, and will now be stated.

The CHIEF CLERK. On page 4, in line 6, it is proposed to strike the figures "$2,739,000" and insert in lieu thereof "$3,400,000."

On page 5, line 24, strike the figures "$4,036,000" and insert in lieu thereof "$3,871,000."

On page 40, line 5, strike the figures "$489,000" and insert in lieu thereof "$1,214,000."

On page 69, line 1, strike the figures "$121,865,000" and insert in lieu thereof "$122,361,000."

On page 69, line 4, strike out the figures "$228,829,000" and insert in lieu thereof "$229,325,000."

The PRESIDING OFFICER. The question is on agreeing en bloc to the amendments offered by the Senator from South Dakota [Mr. CASE].

The amendments were agreed to.

Mr. SALTONSTALL. Mr. President, pursuant to the request of the majority leader, it was planned to have the Senate take a recess at this time. However, I understand that the Senator from Louisiana [Mr. LONG] wishes to make a few remarks. I now yield to him for that purpose.

Mr. LONG. Mr. President, I wish to congratulate the subcommittee for the very diligent work that has been done both by the chairman of the committee, the distinguished senior Senator from South Dakota [Mr. CASE], and by the Senator from Mississippi [Mr. STENNIS], and the Senator from Pennsylvania [Mr. DUFF], who also served on the subcommittee.

At one time I had the pleasure of serving on the same subcommittee with the distinguished junior Senator from Mississippi [Mr. STENNIS]. I must say it was a great pleasure to serve with him; and I found nim to be extremely diligent, and he made every effort to economize where worthwhile economies could be put into effect.

I approached the members of the subcommittee when I heard they were going to conduct hearings on the bill. I told them that it seemed to me there was considerable waste in the bill, and I particularly called their attention to the item on Army barracks, because we had previously turned down the item, and I felt that we were very correct in turning it down. When we turned it down, 2 years ago, the Army was 20 percent larger than it is today. Yet here is what the Army said, 2 years ago, when the same proposal was submitted for the same barracks—but with a slightly different argument to back it up. I shall read now from page 6 of the committee report (No. 2078) submitted on House bill 8120 in the 82d Congress, 2d session:

ARMY BARRACKS

The committee heard testimony from the Army in some detail with respect to the rather large number of barrack spaces which it requested. At many installations substantial numbers of barrack spaces were requested, although existing facilities were more than enough to house the present strength and any foreseeable increase. As a general rule the barracks facilities available are of a permanent or semipermanent type.

The justification of the Army for this request is that it has calculated its construction capabilities in the event of full-scale mobilization, and finds that the demands upon its capabilities in the early stages of such mobilization will be in excess of its capabilities. It, therefore, proposes to take up this slack at the present time by the construction of barracks of a permanent type. Had the Army suggested that the slack be taken up in the heavy construction fields, such as ordnance production and other industrial facilities, it would have appeared more logical to the committee. The

fact is that temporary housing represents the most simple type of construction, and could be constructed promptly when required.

In the opinion of the committee, living quarters for our military men can be provided very quickly when the need arises, and should not be constructed perhaps years in advance of their requirement. At bases where there is not sufficient troop housing space, sufficient barracks have been allowed to make up the deficiency.

Mr. President, since that time the strength of the Army has been reduced 20 percent. On the floor of the Senate we had a fight because some Senators did not want the size of the Army reduced by 20 percent. I was one of those who supported the economy recommendations of the President, in order to find ways to reduce the expense of our Defense Establishment and to try to make our dollars obtain the largest possible amount of defense for the Nation that could be obtained for the money.

But certainly it would seem that a 20-percent reduction in the requirements for housing should not necessitate authorizations for housing in an amount that the committee wisely turned down when the services were much larger than they are today.

I should like to call the attention of Senators to the fact that this is only the beginning of a program to replace the existing barracks with new construction. It is somewhat uncomfortable for young men to live in old barracks. New barracks would be more atractive, but there is a limit to the extent to which we should tax the American people to provide facilities which do not measurably contribute to better defense of the Nation. A fighting man who lives in one of the old barracks is just as good a fighting man as though he were living in one of the new barracks. As a matter of fact, the old barracks were constructed at a higher unit cost than the barracks proposed to be authorized under this bill. I am sure that in every respect they are adequate to meet the needs.

I point out further that there has been a great deal of hypocrisy in the economy program so far as the Army is concerned. I am willing to accept good economy when it can be seen, and when good economy is needed; but in the State of Louisiana recently a large base was closed, at Camp Polk, La. We were told that closing that base would effect an economy of $7 million a year. Those troops were moved to other bases across the country. Now we see that troop housing is being requested by the Department of Defense at all those other bases, runing to an aggregate of $100 million. We are told further that this is only the beginning.

A request is being made for $7 million at one of the bases. Upon inquiry the Representative from the particular district involved was informed that this was the beginning of what was hoped would be a $50 million construction program on that one base. Before we go into this program, would it not be well to look and see how much we could save by saying, "Use the old barracks. Make the existing barracks do. They are adequate."

When the Army proposed these same barracks 2 years ago it did not say that there was anything wrong with the old barracks. There is a committee report to support that statement. I shall be glad to produce the hearings. The Army said it would like to get a head start on barracks construction, in the event the Nation should be forced into war.

I am sure that the President was in all respects sincere when he recommended this item, believing that it was absolutely necessary. This is the kind of thing which gets into bills because the Secretary of Defense is so busy with his manifold responsibilities that he cannot keep up with every item and every detail of every program.

The admirals and generals did not like it when there was a Director of Installations in the Pentagon, because the Director of Installations made them surrender $700 million of excess authorizations in order to get the $500 million which they felt they needed to a greater degree.

What did they do? Word came from here and there that one of these days the position of Director of Installations would be abolished; and after awhile it was abolished. A very fine gentleman, a respectable businessman from the Midwest, was appointed to be Under Secretary for Installations, to replace the man who had been Director of Installations in the Department of Defense.

The Director of Installations had been appointed under a statute which required that the Director have major experience in the same type of construction in which the services were engaged when building their bases.

Mr. Frank Creedon, who had worked in the construction of the atomic-bomb plant at Oak Ridge, had been named Director of Installations, and he did a job of trimming down excess authorizations and preventing enormous requests for billions of dollars being sent to Congress.

In 1952 representatives of the services had testified that they were asking for $3 billion that year, and that they were going to have to ask for another $4 billion the next year, in additional authorizations. Instead of asking for the additional authorizations, upon the recommendation of Mr. Creedon they withdrew the request for the additional $4 billion, and they were willing to live within the authorizations they already had.

There is no doubt in my mind that this is a wasteful item, but I realize the political appeal of the expenditure of money in one's own district. I believe I am one of the few Senators who have ever gone to a member of the Armed Services Committee and pointed out that requests for expenditures in my State were wasteful and should be reduced. It is not popular with the local chambers of commerce to suggest to some member of the Armed Services Committee that, instead of spending $50 million in one's own State, the services should spend only $30 million. I believe Senators should be consistent. If they are for economy, they should be willing to accept economies in their own States as well as economies in other areas.

This bill illustrates very well why we appropriate such excessive amounts for defense. Everyone gets something. An appropriation of $1,100,000,000 provides something for every State. All 48 States plus Alaska have money in this bill in large amounts.

A considerable number of States will be affected by the motion which I propose to make to eliminate items for new barracks. I suppose the motion would affect barracks in California, Colorado, Georgia, Kansas, Kentucky, Maryland, Massachusetts, New York, North Carolina, Oklahoma, Texas, Virginia, and Washington. That is a considerable number of States. Considering all those States, together with the strength of the Armed Services Committee, if the committee stands together against the motion which I propose to make, there is no prospect of carrying it. I only hope that Senators from States which would be affected by the reduction of these excessive authorizations and appropriations will join with me tomorrow when I move to recommit the bill with instructions to the committee to reduce the amount in the bill by about $45 million. It would amount to stopping a program which, over a long period of time, would cost a great deal more than $45 million. I believe it would prevent us from embarking on a program which would cost many times that amount. This would be a good time to insist again in the United States Senate that we have economy in the construction of military bases.

RECESS

Mr. SALTONSTALL. Mr. President, I move that the Senate stand in recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 7 o'clock and 28 minutes p. m.) the Senate took a recess until tomorrow, Friday, July 9, 1954, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate July 8 (legislative day of July 2), 1954:

In the Air Force

The following-named persons for appointment in the Regular Air Force, in the grades indicated, with dates of rank to be determined by the Secretary of the Air Force, under the provisions of section 506, Public Law 381, 80th Congress (Officer Personnel Act of 1947); title II, Public Law 365, 80th Congress (Army-Navy-Public Health Service Medical Officer Procurement Act of 1947); and section 307 (b), Public Law 150, 82d Congress (Air Force Organization Act of 1951), with a view to designation for the performance of duties as indicated:

To be majors, USAF (Medical)

Charles E. Cook, Jr.
Ernest F. Daniel, Jr.

To be captains, USAF (Medical)

Richard P. Bland, AO663121.
Kay R. Cutler, AO763962.
John S. Metcalf, Jr., AO1912481.
Ralph E. Williams

To be captains, USAF (Dental)

Charles A. Brown, AO930197.
Robert P. Chappell, AO1040105.

To be first lieutenants, USAF (Medical)

Robert W. Anderson
Peter J. Fennel

Louis E. Fitzsimons, Jr.
John P. Holbrook, AO2261370.
Charles F. Krecke
John A. Moore, AO2261384.
Kenneth G. Rosenow
John L. Shaw
Paul A. Stagg
Glenn E. Wilhite, AO2254862.

To be first lieutenants, USAF (Veterinary)

Warren E. Collins, AO1765424.
Herbert C. Holk, AO2260816.
Douglas F. Moe, AO1745985.
George D. Smith, AO2239977.

To be first lieutenants, USAF (Medical Service)

Gino P. Grillo, AO2214001.
Ronald G. Hansen, AO1850376.
James E. Yearty, AO2049440.

To be second lieutenants, USAF (Medical Service)

Neil B. Hadley, AO2219518.
Jerry C. Pollak, AO3007091.
Merrill Taub, AO2246978.

The following-named persons for appointment in the Regular Air Force, in the grades indicated, with dates of rank to be determined by the Secretary of the Air Force, under the provisions of section 101 (c), Public Law 36, 80th Congress (Army-Navy Nurses Act of 1947), as amended by section 5, Public Law 514, 81st Congress, and Public Law 37, 83d Congress; with a view to designation for the performance of duties as indicated under the provisions of section 307, Public Law 150, 82d Congress (Air Force Organization Act of 1951):

To be first lieutenants, USAF (Nurse)

Ernestine L. Boylan, AN804543.
Diana M. Cica, AN2243782.
Pauline A. Eisele, AN2214575.
Sarah N. Graham, AN2244341.
Genevieve D. Guitrau, AN779279.
Margaret J. Hoyme, AN2244189.
Betty J. Hurley, AN2241653.
Louise A. Marshall, AN1912722.
Eva C. Nixon, AN2241655.
Janet Veitch, AN2244090.
Mary E. Wallace, AN2243665.
Ella E. Welborn, AN2243781.
Edith Wood, AN1865747.
Robbie J. Zirkle, AN2242281.

To be second lieutenant, USAF (Nurse)

Jean A. Corrigan, AN2242234.

The following-named persons for appointment in the Regular Air Force, in the grades indicated, with dates of rank to be determined by the Secretary of the Air Force, under the provisions of section 506, Public Law 381, 80th Congress (Officer Personnel Act of 1947), and section 307 (b) Public Law 150, 82d Congress (Air Force Organization Act of 1951), with a view to designation for the performance of duties as indicated:

To be captains, USAF (Judge Advocate)

Robert E. Commins, AO2061219.
Joseph F. Corrigan, AO722823.

To be first lieutenants, USAF (Judge Advocate)

Ricardo R. Alvarado, AO2217668.
Charles F. Bennett, AO731442.
Bruce A. Berlin, AO429878.
Arnold C. Castle, AO720781.
Edward R. Dellinger, Jr., AO875197.
Stephen M. Forrest, AO1858580.
Chester J. Halicki, AO2080899.
Vincent A. Jordan, AO2000225.
Neil Kasdan, AO2234006.
Roy D. Sexton, AO566683.
Clyde M. Thomas, AO2248881.
Melvin C. Thompson, AO2253269.
Donald A. Williams, AO695788.
Felix J. Zaniewski, AO448125.

To be first lieutenants, USAF (Chaplains)

Francis E. Jeffery, AO2240500.
Thomas McIntyre, AO2249173.
B. C. Trent, AO522898.

The following-named persons for appointment in the Regular Air Force, in the grade indicated, with dates of rank to be determined by the Secretary of the Air Force, under the provisions of section 506, Public Law 381, 80th Congress (Officer Personnel Act of 1947); section 301, Public Law 625, 80th Congress (Women's Armed Services Integration Act of 1948); and section 307 (b) Public Law 150, 82d Congress (Air Force Organization Act of 1951), with a view to designation for the performance of duties as indicated:

To be first lieutenants, USAF (Judge Advocate)

Edith R. Gardner, AL1853883.
Jean E. Morris, AL2228951.

The following-named persons for appointment in the Regular Air Force, in the grades indicated, with dates of rank to be determined by the Secretary of the Air Force, under the provisions of section 506, Public Law 381, 80th Congress (Officer Personnel Act of 1947):

To be first lieutenants

Charles S. Aldrich, AO1908982.
Jean J. Andrews, AO1856286.
David A. Austin, AO686965.
Dan E. Babcock, AO1903732.
Oscar Bayer, AO2089174.
Robert H. Beebe, AO1909681.
Paul E. Bell, AO2078410.
William J. Benke, Jr., AO1903052.
J. T. Bennington, AO2221595.

The following-named persons for appointment in the Regular Air Force, in the grade indicated, with dates of rank to be determined by the Secretary of the Air Force, under the provisions of section 506, Public Law 381, 80th Congress (Officer Personnel Act of 1947); and section 301, Public Law 625, 80th Congress (Women's Armed Services Integration Act of 1948):

To be second lieutenants

Mary E. Ashe, AL2234193.
Norma E. Brown, AL2219146.
Jean E. Phillips, AL2234159.

CONFIRMATIONS

Executive nominations confirmed by the Senate July 8 (legislative day of July 2), 1954:

FEDERAL POWER COMMISSION

To be a member of the Federal Power Commission

Frederick Stueck, of Missouri, for the term of 5 years, expiring June 22, 1959.

UNITED STATES COAST GUARD

To be rear admirals with permanent rank, effective as indicated

Capt. Frank A. Leamy, effective from November 1, 1954.

Capt. William W. Kenner, effective from date of confirmation.

HOUSE OF REPRESENTATIVES

THURSDAY, JULY 8, 1954

The House met at 12 o'clock noon.

Rev. Eugene Stone, D. D., general secretary, International Society of Christian Endeavor, Columbus, Ohio, offered the following prayer:

Let us pray.

Almighty God, our Father, help us to be very conscious of Thy presence and to be aware of the strength and sustaining power that comes from Thee.

We seek Thy favor upon our President, our Speaker, and all the Members of this House of Representatives. As these, our leaders, feel the weight of their responsibilities and sense the tremendous importance of their deliberations and actions, grant to them, O God, clear minds, sound judgment, and bold courage.

Keep all of us especially mindful of young America—the children and youth of our land. May we by our words and acts help make our country and the world a better place in which they may live.

Set us on fire for righteousness and give us a new passion to serve Thee and mankind so that men may know more abundant living and enjoy freedom and peace.

We pray in the name of Jesus Christ, our Redeemer, the Prince of Peace. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Hawks, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On June 30, 1954:

H. R. 848. An act for the relief of Nicholas Katem, Theodosia Katem, Basil Katem, and Josephine Katem;

H. R. 2421. An act for the relief of Frank L. McCartha;

H. R. 2678. An act for the relief of Carl A. Annis, Wayne C. Cranney, and Leslie O. Yarwood;

H. R. 3413. An act to grant oil and gas in lands and to authorize the Secretary of the Interior to issue patents in fee on the Fort Peck Indian Reservation, Montana, to individual Indians in certain cases;

H. R. 4030. An act to repeal section 4 of the act of March 2, 1934, creating the Model Housing Board of Puerto Rico;

H. R. 4919. An act for the relief of Ralph S. Pearman and others;

H. R. 5025. An act for the relief of Paul G. Kendall;

H. R. 6196. An act for the relief of Duncan M. Chalmers, and certain other persons;

H. R. 6487. An act to approve the repayment contract negotiated with the Roza Irrigation District, Yakima project, Washington, and to authorize its execution, and for other purposes;

H. R. 7258. An act for the relief of the Willmore Engineering Co.;

H. R. 7709. An act to continue until the close of June 30, 1955, the suspension of certain import taxes on copper;

H. R. 8367. An act making appropriations for civil functions administered by the Department of the Army for the fiscal year ending June 30, 1955, and for other purposes;

H. R. 8790. An act to authorize certain veterans' benefits for persons disabled in connection with reporting for final acceptance, induction, or entry into the active military or naval service;

H. R. 8873. An act making appropriations for the Department of Defense and related independent agency for the fiscal year ending June 30, 1955, and for other purposes;

H. R. 9089. An act authorizing the Administrator of Veterans' Affairs to grant an easement to Syracuse University, Syracuse, N. Y.; and

H. R. 9505. An act to continue the effectiveness of the act of December 2, 1942, as amended, and the act of July 28, 1945, as amended, relating to war-risk hazard and detention benefits until July 1, 1955.

On July 1, 1954:

H. R. 685. An act for the relief of Walter Carl Sander;

H. R. 724. An act for the relief of Chester H. Tuck, Mary Elizabeth Fisher, James Thomas Harper, and Mrs. T. W. Bennett;

H. R. 1364. An act for the relief of Richard A. Kurth;

H. R. 3623. An act for the relief of Willard Chester Cauley;

H. R. 8488. An act to restore eligibility of certain citizens or subjects of Germany or Japan to receive benefits under veterans' laws;

H. R. 8680. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1955, and for other purposes;

H. R. 9474. An act to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended; and

H. R. 9517. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1955, and for other purposes.

On July 2, 1954:

H. R. 8067. An act making appropriations for the Departments of State, Justice, and Commerce, and the United States Information Agency, for the fiscal year ending June 30, 1955, and for other purposes;

H. R. 9203. An act making appropriations for the legislative branch and the judiciary branch for the fiscal year ending June 30, 1955, and for other purposes;

H. R. 9447. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related independent agencies, for the fiscal year ending June 30, 1955, and for other purposes; and

H. J. Res. 458. Joint resolution to authorize and direct the Secretary of Agriculture to quitclaim retained rights in a certain tract of land to the Board of Education of Irwin County, Ga., and for other purposes.

On July 5, 1954:

H. R. 9315. An act to provide for an extension on a reciprocal basis of the period of the free entry of Philippine articles in the United States.

On July 6, 1954:

H. R. 2231. An act to authorize the negotiation and ratification of separate settlement contracts with the Sioux Indians of the Lower Brule and the Crow Creek Reservations in South Dakota for Indian lands and rights acquired by the United States for the Fort Randall Dam and Reservoir, Missouri River development, to authorize a transfer of funds from the Secretary of Defense to the Secretary of the Interior and to authorize an appropriation for the removal from the taking area of the Fort Randall Dam and Reservoir, Missouri River development, and the reestablishment of the Indians of

the Yankton Indian Reservation in South Dakota;

H. R. 3038. An act for the relief of Mrs. Olympia Cuc;

H. J. Res. 552. Joint resolution making temporary appropriations for the fiscal year 1955, and for other purposes; and

H. J. Res. 553. Joint resolution to amend the act of June 30, 1954 (Private Law 495, 83d Cong.).

On July 8, 1954:

H. R. 2636. An act for the relief of George Japhet;

H. R. 5436. An act for the relief of David Hanan; and

H. R. 6465. An act to amend paragraph 1530 of the Tariff Act of 1930 with respect to footwear.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed without amendment bills and a concurrent resolution of the House of the following titles:

H. R. 9008. An act to provide for the deposit of savings of enlisted members of the Army, Navy, Air Force, and Marine Corps, and for other purposes;

H. R. 9232. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, to extend until June 30, 1955, the period during which disposals of surplus property may be made by negotiation; and

H. Con. Res. 251. Concurrent resolution to authorize certain technical corrections in the enrollment of the bill H. R. 6342.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2759. An act to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes.

The message also announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 1999. An act to provide for the recovery, care, and disposition of the remains of members of the uniformed services and certain other personnel, and for other purposes;

S. 2370. An act to authorize the sale of certain vessels to Brazil for use in the coastwise trade of Brazil; and

S. 2468. An act to authorize the President to appoint to the grade of general in the Army of the United States those officers who, in grade of lieutenant general, during World War II commanded the Army ground forces, commanded an Army, or commanded Army forces which included a field army and supporting units, and for other purposes.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 2408) entitled "An act to amend the Merchant Marine Act, 1936, to provide a national defense reserve of tankers and to promote the construction of new tankers, and for other purposes"; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BUTLER, Mr. POTTER, Mr. PAYNE, Mr. MAGNUSON, and Mr. SMATHERS to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendment to the bill (H. R. 6788) entitled "An act to authorize the Secretary of Agriculture to cooperate with States and local agencies in the planning and carrying out of works of improvement for soil conservation, and for other purposes," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. AIKEN, Mr. YOUNG, Mr. THYE, Mr. HICKENLOOPER, Mr. ELLENDER, Mr. JOHNSTON of South Carolina, and Mr. HOLLAND to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6342) entitled "An act to amend the Public Buildings Act of 1949 to authorize the Administrator of General Services to acquire title to real property and to provide for the construction of certain public buildings thereon by executing purchase contracts; to extend the authority of the Postmaster General to lease quarters for post office purposes; and for other purposes."

The message also announced that the Vice President has appointed Mr. CARLSON and Mr. JOHNSTON of South Carolina members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 55–1.

VOCATIONAL REHABILITATION AMENDMENTS OF 1954

The SPEAKER. The unfinished business is the final passage of the bill (H. R. 9640) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes.

The question is on the passage of the bill.

Mr. HALLECK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 347, nays 0, not voting 87, as follows:

Hillings	Perkins	Weichel
Hinshaw	Pilcher	Wharton
Jensen	Pillion	Wheeler
Johnson, Calif.	Powell	Willis
Judd	Preston	Wolcott
Kee	Rabaut	Yorty

So the bill was passed.

The Clerk announced the following pairs:

Mr. Harvey with Mr. Carnahan.
Mr. Morano with Mr. Fallon.
Mr. Allen of Illinois with Mr. Metcalf.
Mr. Short with Mr. Chatham.
Mr. Simpson of Pennsylvania with Mr. Fisher.
Mr. Taylor with Mrs. Kee.
Mr. Baker with Mr. Harrison of Virginia.
Mr. McGregor with Mr. Roberts.
Mr. Busbey with Mrs. Sullivan.
Mr. Sadlak with Mr. Shuford.
Mr. Shafer with Mr. Thompson of Louisiana.
Mr. Judd with Mr. Willis.
Mr. Berry with Mrs. Landrum.
Mr. Bonin with Mr. Camp.
Mr. Bow with Mr. Preston.
Mr. Coon with Mr. Bonner.
Mr. Norblad with Mr. Lanham.
Mr. Patterson with Mr. Frazier.
Mr. Ellsworth with Mr. Moulder.
Mr. Scott with Mr. Passman.
Mr. Wolcott with Mr. Perkins.
Mr. Johnson of California with Mr. Roosevelt.
Mr. Dorn of New York with Mr. Heller.
Mr. Curtis of Nebraska with Mr. Buckley.
Mr. Wharton with Mr. Powell.
Mr. Hillings with Mr. Dingell.
Mr. Jensen with Mr. Patman.
Mr. Pillion with Mr. Pilcher.
Mr. Radwan with Mr. Long.
Mr. Harrison of Wyoming with Mr. Lyle.
Mr. Cotton with Mr. Lucas.
Mr. Angell with Mr. Regan.
Mr. Weichel with Mr. Evins.
Mr. Kersten of Wisconsin with Mr. Harris.
Mr. Hinshaw with Mr. Dodd.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The doors were opened.

TRADE AGREEMENTS EXTENSION ACT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 470)

The SPEAKER laid before the House the following message from the President of the United States, which was read by the Clerk, and, together with accompanying papers, referred to the Committee on Ways and Means and ordered printed:

To the Congress of the United States:

Pursuant to the provisions of subsection (b) of section 6 of the Trade Agreements Extension Act of 1951 (65 Stat. 72, 73), I hereby submit to the Congress a report on the inclusion of escape clauses in existing trade agreements.

This report was prepared for me by the Interdepartmental Committee on Trade Agreements.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *July 8, 1954.*

(Enclosure: Report on trade agreement escape clauses.)

AMENDING PART II OF INTERSTATE COMMERCE ACT

Mr. BENNETT of Michigan. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 7468) to amend certain provisions of part II of the Interstate Commerce Act so as to authorize regulation, for purposes of safety and protection of the public, of certain motor-carrier transportation between points in foreign countries, insofar as such transportation takes place within the United States, with a Senate amendment thereto and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 3, line 1, after "operates", insert "and with the Interstate Commerce Commission."

Mr. PRIEST. Mr. Speaker, reserving the right to object, and I shall not, if I understand, the Senate amendment requires filing with the Interstate Commerce Commission in addition to an agent in each State; is that correct?

Mr. BENNETT of Michigan. That is correct; that is all the amendment does.

Mr. PRIEST. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

SPECIAL ORDER GRANTED

Mr. JAVITS asked and was given permission to address the House for 5 minutes today, following any special orders heretofore entered.

AMENDMENT OF ADMINISTRATIVE EXPENSES ACT OF 1946, AS AMENDED

Mrs. CHURCH. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 179) to amend section 7 of the Administrative Expenses Act of 1946, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 7 of the Administrative Expenses Act of 1946 (60 Stat. 806; 5 U. S. C. 73b–3), as amended, is further amended by changing the period at the end thereof to a colon and adding the following: *"Provided further,* That expenses of return travel and transportation, including authorized dependents but excluding household effects, from their posts of duty outside the continental United States to the places of actual residence at time of appointment to such overseas posts of duty, shall be allowed in the case of persons who have satisfactorily completed an agreed period of service overseas and are returning to their actual place of residence for the purpose of taking leave prior to serving another tour of duty at the same overseas post, under a new written agreement entered into before departing from the overseas post: *Provided further,* That expenses of transportation and of the immediate family and shipment of household effects of any employee from the post of duty of such employee outside continental United States to place of actual residence at time of appointment shall be allowed prior to the return of such employee to the United States when the employee has acquired eligibility for such transportation or when the public interest requires the return of the dependents for compelling personal reasons of a humanitarian or compassionate nature, such as may involve physical or mental health, death of any member of the immediate family, or obligation imposed by authority or circumstance over which the individual has no control: *And provided further,* That when an employee returns his immediate family and household goods to the United States at his own expense prior to his return and for other than reasons of public interest, the Government shall reimburse him for proper transportation expenses at such time as he acquires eligibility."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PLEDGE OF ALLEGIANCE TO THE FLAG

Mr. COLE of Missouri. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COLE of Missouri. Mr. Speaker, on June 14, this year, President Eisenhower signed Public Law 396, 83d Congress, a joint resolution that had been adopted by both the House and the Senate without a dissenting vote, which amended the pledge of allegiance to our flag, by inserting the words "under God" after the word "Nation." The pertinent part of this law now reads as follows:

SEC. 7. The following is designated as the pledge of allegiance to the flag: "I pledge allegiance to the flag of the United States of America and to the Republic for which it stands, one Nation under God, indivisible, with liberty and justice for all." Such pledge should be rendered by standing with the right hand over the heart. However, civilians will always show full respect to the flag when the pledge is given by merely standing at attention, men removing the headdress. Persons in uniform shall render the military salute.

This is as it should be. Our success as a nation is due to the fact that we are God-fearing people, and we should let the world know that our Republic is now, and always has been, on God's side.

Mr. Speaker, as I have had many inquiries from my district regarding the present wording of this new pledge of

allegiance to our flag, I am, at my own expense, having reprints made of this speech, in order to make it available to every family in my congressional district.

UNEMPLOYMENT COMPENSATION PROGRAM

Mr. LATHAM. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 614 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of H. R. 9709, a bill to extend and improve the unemployment compensation program, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed 3 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment. No amendment shall be in order to said bill except amendments offered by direction of the Committee on Ways and Means and except that it shall be in order for any member of the Committee on Ways and Means to offer either or both of the proposed amendments printed in the CONGRESSIONAL RECORD of July 7, 1954, and said amendments shall be in order, any rule of the House to the contrary notwithstanding, but said amendments shall not be subject to amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion, except one motion to recommit.

The SPEAKER. The gentleman from New York is recognized for 1 hour.

Mr. LATHAM. Mr. Speaker, I yield 30 minutes of my time to the gentleman from Virginia [Mr. SMITH], and at this time I yield myself such time as I may consume.

Mr. Speaker, this rule makes in order consideration by the House of the bill, H. R. 9709, and provides for 3 hours of general debate. It is a closed rule. It permits amendments to be offered by the committee, and also two specific amendments which were printed in the RECORD yesterday. Points of order are waived.

The bill, H. R. 9709, is one which will improve and bring up to date, and to maturity, the unemployment insurance program of this country, which has not been substantially changed or improved in the past 20 years. The main changes or improvements in that program are as follows:

In the first place, it would extend coverage to employers of 4 or more people in any 20 weeks, whereas under the present law it covers only employers of 8 or more within 20 weeks. This would add 1.3 million people to the coverage under this program.

The second change is that substantially all Federal civilian employees are covered in under the unemployment insurance program.

Third, this bill would extend the merit rating provision benefits to employees based upon a 1-year experience, whereas under the present law it is required that they have 3 years of experience before they are entitled to reductions under the program.

Finally, the quarterly installment provision in the law has been eliminated. The department has found that some 85 percent of the people never took advantage of the quarterly installment provision in any event, and it added considerable or would add under this program considerably to the cost of the administration of the program. That has therefore been eliminated.

This bill was reported out of the Ways and Means Committee, as I understand it, with one dissenting vote. It was based upon the arrangement that at the close of the 3 hours general debate the Members of the House would be given an opportunity to vote on these two specific amendments which have been printed in the RECORD and which, I understand, will be offered by the gentleman from Rhode Island [Mr. FORAND].

Those two amendments, which were not agreed to by the Committee on Ways and Means, if adopted, would for the first time put the Federal Government in the position of dictating to the States the amounts they are to pay in benefits under this program and the number of weeks these benefits would be paid.

This would obviously do violence to the principle that the Federal Government should leave to the States the actual operation of the unemployment insurance program, based upon the very good reason that conditions of labor and employment differ in various States.

There will undoubtedly be opposition to those two amendments. The Members will have an opportunity to vote on them very shortly after the close of the 3 hours general debate.

I hope this resolution will be adopted.

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Indiana [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, the rule on H. R. 9709 now under consideration, will give the Members of Congress an opportunity to act on much needed Federal legislation which will expand and equalize throughout the various States, our unemployment compensation legislation. Under the rule, it shall be in order to accept amendments offered by direction of the Committee on Ways and Means and any member of that committee can offer either or both of the proposed amendments which were inserted and printed in yesterday's CONGRESSIONAL RECORD. Furthermore, under the rule, the amendments which I understand will be offered by our colleague, AIME FORAND, of Rhode Island, shall not be subject to further amendment.

The bill as reported out by the majority members of the Ways and Means Committee, does not provide for necessary increased unemployment compensation benefits either as to amount or as to duration of time. This bill does not comply with the recommendations made by President Eisenhower when he asked that the primary maximum benefits payable in under State unemployment insurance laws should not be less than 66⅔ percent of the State's average weekly wage. The President further said that subject to this maximum, each individual's primary benefit shall not be less than 50 percent of his weekly wages.

The original intention of the supporters of the Social Security Act of 1935 was to provide unemployment compensation payments equal to at least 50 percent of full time weekly wages and up to a maximum of two-thirds of such wages which even at that time was in effect in the compensation laws of a great number of States.

The amendments which will be offered by the minority members of the Ways and Means Committee will also clarify the provisions wherein certain employees have been disqualified from receiving just compensation for personal reasons, misconduct charges, work stoppages, etc. Standards of suitability of work would be spelled out in the proposed amendments along the lines of the standards contained in section 1603 (a) (5) of the Internal Revenue Code. In addition, the amendments would set further general criteria which would have to be taken into account in determining whether the disqualification for refusing or leaving work should be applied. The amendments would further extend the coverage to employers who have one or more individuals in their employ at any time during the taxable year. Furthermore, States would be permitted to provide for uniform rate reductions to all employers as well as individual experience—rated reductions. Further, the proceeds of the Federal unemployment tax will be earmarked in a Federal unemployment insurance account in the Federal Treasury. Such account will be used for paying the Federal and State administrative expenses, including the establishment of a contingency fund and also provide reinsurance grants to certain States which are in financial difficulty because of high rates of unemployment. I am satisfied that after the Members learn, during the 3 hours of debate, the provision set out in the Forand amendments, that the same should be adopted.

Satisfactory and expanded unemployment insurance is our greatest barrier against depression. Unemployment insurance will provide purchasing power for millions throughout the country and that in turn, will aid business and help restore normal prosperity generally. In other words, it is the chief line of defense against recession. In January, the Federal Advisory Council on Unemployment Security supported the President's recommendation on improved weekly benefits. The Council recommended that in each State, the maximum weekly benefit amount should be equal to at least 60 to 67 percent of the States average weekly wage. President Eisenhower further urged that all States provide 26 weeks of benefits uniformly to all eligible

claimants in order to assure that even in a minor business recession, most workers would remain protected by the program until they could find jobs. If these recommendations had been carried out, our economy today would have received a beneficial result and relieved a great deal of unemployment. The 20th National Conference on State Legislation which was called by the Federal Government and to which governors delegates from 41 States unanimously adopted a resolution supporting President Eisenhower's recommendation with respect to unemployment compensation benefit levels and also the extension of uniform weekly payment duration.

A couple of years ago Newsweek magazine, in a splendid article, stated that economically, our country could not hit the far depths of depression like we experienced from 1929 to 1934. In detail, this article stated that legislation passed in the last 20 years like social security, protection of bank deposits, housing, home loan, old age pensions, unemployment insurance, and other measures have provided a cushion of economic stability which would prevent another devastating depression. If the House adopts the Forand amendments to the bill under consideration, it will be a further step to curb the danger of another serious depression. The Congress must realize that they have a responsibility to act now against the threat of unemployment and decreasing buying power throughout the country. This is a national problem that is on our shoulders and we should act now.

Mr. SMITH of Virginia. Mr. Speaker, as the gentleman from New York has stated, this is a closed rule for the consideration of this bill to increase and extend and enlarge the unemployment insurance program. I opposed the rule in the Committee on Rules because I do not think that this bill should have a gag rule. Now, we have gag rules, and we necessarily have to have them on matters pertaining to the revenue act, that is, tax measures. We have them for the reason that it is impossible to write a tax bill on the floor of the House. But, this is an entirely different matter, and it seems to me that the House ought to have the freedom and the opportunity to express itself on this bill, to offer amendments to it, and to work its will on it. For that reason I am opposed to the rule in the form in which it is written.

As to the bill itself, I think serious consideration should be given to the fact that this bill undertakes to cover a number of employees that will make the employer subject to this tax of 3 percent upon his payroll. We have a lot of little struggling businesses in the country that employ 4 or 5 or 6 people. We have a lot of miscellaneous small businesses in this country who are struggling pretty hard now. We have a lot of little sawmill operators; all those little businesses for which we have from time to time expressed our sympathy. I hope we can do something to help them.

What we are doing to help them now, we might as well realize, is that we are putting a 3 percent tax on their payroll in addition to the 4 percent already on those payrolls. I do not know that our people are going to like that too much.

When you hit big business, when you hit the manufacturer, he has somebody here in Washington who knows what is going on and who advises him; and you get their reaction pretty quickly. But the fellow back in the sticks who is running a little sawmill, the fellow who is tending to his small business establishment, who gets up at 4 o'clock in the morning and goes to bed with the chickens at night, because he is too tired to read the newspapers, he does not know what you are doing up here and he does not realize what has been done until after you have done it. You do not get the reaction from him as soon as you get the reaction from the ordinary big businessman. I think you are going to find a good deal of chagrin and regret and opposition to this proposal which will hit your little businessman and your little sawmill operator who are now struggling with about all the tax that they can bear.

I realize that it is a very nice thing to do; it is nice to have these people get some unemployment compensation, but I think we should look at both sides of the picture. I think we should consider the tax burden that you are putting on thousands and thousands of small employers who are now carrying about all the load and paying about all the tax that the traffic will bear.

Mr. Speaker, I have no further requests for time.

Mr. LATHAM. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

Mr. REED of New York. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9709) to extend and improve the unemployment compensation program.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 9709, with Mr. HOEVEN in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. REED of New York. Mr. Chairman, I yield myself 20 minutes.

Mr. Chairman, H. R. 9709 extends the unemployment insurance system to almost 4 million workers to whom this protection is not available today. Thus, the bill provides the first major extension of the unemployment insurance system since its inception in 1935.

With the exception of relatively minor adjustments, the Federal Unemployment Tax Act has remained substantially unchanged in the almost 20 years which have elapsed since its enactment. However, it is no longer appropriate to deny the basic protection of this system to any segment of our working population to whom extension of coverage is demonstrably practical, and to whom coverage can be extended without doing violence to the need for recognition of State and local variations in employment conditions. This objective is achieved by H. R. 9709.

The Ways and Means Committee has recently recommended the extension of the old-age and survivors insurance system to approximately 10 million persons now excluded from that program. While these two proposals for broad extension—first with respect to old-age and survivors insurance and now with respect to unemployment insurance—are in no sense dependent upon each other, our committee conceives of them as part of a broad program to bring our social-security system to maturity.

Historically, unemployment insurance has been primarily a State program. H. R. 9709 continues this basic pattern. While the problem of unemployment must always be one of national concern, geographic variations both in economic conditions and in employment practices make it essential that actual implementation of an unemployment insurance system be carried out by State action. As a result, the Federal Unemployment Tax Act has never concerned itself with the amount of benefits or the duration for which benefits may be paid. These have always been matters for State determination. In his economic report transmitted to the Congress on January 28, 1954, the President described the present level of benefits as inadequate and the duration of benefits as deficient in many States. He urged State action to correct these defects. The Ways and Means Committee agrees with the President that these matters should be left to State determination.

The major purposes of H. R. 9709 may be summarized as follows:

First. The Federal Unemployment Tax Act is extended to employers of 4 or more employees in each of 20 weeks instead of 8 or more in 20 weeks as under the present law. It is estimated that this provision will make unemployment insurance protection available to approximately 1.3 million workers not now covered.

Second. Unemployment insurance is extended to substantially all Federal civilian employees, an addition of approximately 2.5 million workers.

Third. States are authorized to extend experience rating tax reductions to new and newly covered employers after they have had at least 1 year of coverage under the State law instead of 3 years as required today.

Fourth. The bill eliminates the privilege of paying the Federal unemployment tax in quarterly installments.

As I have just pointed out, the bill extends the Federal Unemployment Tax Act to employers who employ four or more employees in each of 20 weeks during the year. The present law limits the tax to employers of 8 or more in the same period, although a number of

States have already lowered their own requirements so as to cover employers with less than 8 employees.

Mr. Chairman, I ask unanimous consent to insert at this point in the RECORD a table of selected data on unemployment compensation. This table which appears on pages 4 and 5 of the committee report sets forth among other things a list of minimum requirements of the respective States for employer coverage.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

(The table referred to is as follows:)

Selected data on unemployment compensation

State	Statutory minimum number of workers and period for employer coverage	Legal range of benefits				Benefits paid in 1953 (in thousands)	Average actual duration in 1953 (weeks)	Federal grants to States, fiscal year 1953 (in thousands)	Federal tax collections, fiscal year 1953 (in thousands)
		Benefits [1]		Weeks duration					
		Minimum	Maximum	Minimum	Maximum				
United States						$962,221	10.1	$196,323	$275,825

Wyoming	1 at any time	$10–$13	$30–$36	8	26	814	7.2	608	376

[1] When 2 amounts are given, higher includes dependents' allowances, except in Colorado where higher amount includes 25 percent additional for claimants employed in Colorado by covered employers for 5 consecutive calendar years with wages in excess of $1,000 per year and no benefits received.

[2] If the benefit is less than $5 benefits are paid at the rate of $5 a week; no qualifying wages and no minimum weekly or annual benefits are specified.

[3] Employers of less than 8 outside the corporate limits of the city, village, or borough of 10,000 population or more are not liable for contributions unless they are subject to the Federal Unemployment Tax Act.

Source: U. S. Department of Labor, Bureau of Employment Security, Division fo Actuarial and Financial Services, June 7, 1954.

Mr. REED of New York. From the standpoint of the individual worker, unemployment insurance protection is as important if he works for a small employer as if he works for an employer of thousands. Moreover, it is as important to maintain the purchasing power of employees of small firms as of large firms. In this connection, the extension of coverage provided by this bill would particularly benefit small communities where a large proportion of workers are employed by small firms. It is believed that the administrative difficulty is no longer a substantial obstacle to extending coverage to small firms. On the other hand, the further coverage is extended into this area, the further the Federal Government is moving into an area where differences in State and local conditions become a significant factor. There is a twilight zone where needed flexibility can only be maintained through State action. It may be appropriate that unemployment protection be extended into this fringe area, but such extension should be left to State determination in the light of local variations in employment patterns. This problem does not exist to any appreciable extent with respect to the extension of coverage to employers of four or more.

Section 2 of H. R. 9709 allows reduced rates for new and newly covered employers. In all States, employers are granted reductions in the unemployment taxes they must pay the State if their unemployment experience meets certain requirements. The Federal Unemployment Tax Act allows employers to credit this reduction against their Federal unemployment tax. In other words, an employer who has received such a reduction is credited with the difference between the amount actually paid and the amount he would have been required to pay if he had not received the reduction. The Federal law grants this additional credit, however, only if the State law requires an employer to have at least 3 years of experience before he can be given a tax reduction. This means that a new or newly covered employer is required to pay the full tax for at least these initial years even though his experience in those years is as favorable as that of an established employer. In many States, this means that new employers carry a very large proportion of current unemployment taxes. They are thus put at a competitive disadvantage with established employers and are required to carry an

extra financial load at a time they can perhaps least afford it.

The President, in his economic report of January 28, 1954, recommended that "Congress allow the shortening from 3 years to 1, of the period required to qualify for a rate reduction." Section 2 of H. R. 9709 carries out this recommendation in its entirety. In effect, during the first 3 years of an employer's coverage, the amendment will permit a State to tie the period of experience required before rate reduction to the period of time the new employer has had experience under the law. In other words, the rate for an employer who has had 1 year's experience may be based on 1 year's experience, the rate for one who has had experience for 2 years on the basis of 2 years' experience.

It would be emphasized that this amendment merely permits a State to extend a rate reduction on the basis of 1 year's experience if it desires to do so. It does not require such State action.

The amendment is not intended to give new and newly covered employers any competitive advantage over established employers, but merely to equalize as much as possible the opportunity for rate reductions between new and established employers. The factors used to measure the experience of employers vary from State to State. Under the amendment, it is intended that the State measure the experience of new and newly covered employers by the same factor or factors that it uses to measure the experience of established employers. For example, one of the most common factors is a reserve balance—the excess of contributions collected over benefits paid and charged to the employer's account. Thus a State which uses a reserve balance for established employers must do so for new employers. However, in some States an employer who does not have 3 years of experience, as the Federal law now requires, could not attain the reserve balance now required of established employers. In these States, therefore, a proportionate reduction would have to be made in this reserve requirement to enable new employers with less than 3 years' experience to take advantage of the permission granted by the bill's new rate-reduction provision. Since the bill does not intend to give new employers any greater advantage than established employers, any difference in reserve requirements granted to new employers would, therefore, have to bear the same proportion to the requirement placed on established employers as the period of coverage required of the two groups. For example, if a 6 percent reserve requirement is required of established employers with 3 years' experience, at least 4 percent must be required of employers with 2 years' experience.

Section 3 of the bill provides for the elimination of the quarterly installment privilege. The bill eliminates the right to pay the unemployment tax in quarterly installments. This amendment is designed to relieve the Government of an existing administrative burden. Moreover, this administrative burden would be somewhat increased if the new employers covered by this bill were permitted to pay their tax in quarterly instalments.

Elimination of this provision should not impose an undue burden on taxpayers. This is indicated by the fact that some 85 percent of the total taxes due are now paid at the time of filing the return without using the installment-payment option. Furthermore, unlike the old-age and survivors insurance tax, the unemployment tax is not due until the year after that in which the taxable wages are paid. The old-age and survivors' insurance tax, on the other hand, is payable in quarterly installments during the year in which the wages are paid.

Section 4 of the bill before the House today provides for coverage of Federal civilian employees.

In his economic report the President stated:

> A worker laid off by a Government agency gets no insurance benefits despite the fact that in many types of Federal jobs he is as vulnerable to layoff or dismissal as the factory worker. It is recommended that Congress include in the insurance system the 2.5 million Federal civilian employees, under conditions set by the State in which they last worked, and that it provide for Federal reimbursement to the State of the amount of the cost, estimated to be about $25 million for the fiscal year ending in 1955.

H. R. 9706 carries out this recommendation. Federal civilian employees as a group are subject to the risk of unemployment on nearly the same scale as nongovernmental workers in the same type of work. In recent years, particularly, several extensive reductions in Federal personnel have demonstrated the real need for extending unemployment benefits to Federal employees. From a wartime peak of well over 3½ million employees in June 1945, Federal employment dropped by a million between 1945 and 1946 and dropped considerably more in the next few years, leveling off at about 2 million in June 1950. After a new increase due to the Korean conflict, Federal employment again fell off by nearly 247,000 between June 1952 and December 31, 1953.

Total annual separations of Federal employees are substantial. They have approximated around half a million each year. Of this total, the percentage which constitute involuntary separations, that is, reductions in force and terminations of temporary appointments, has varied from approximately 17 to 50 percent of total separations.

The Federal Government should not be in the position of providing less favorable conditions of employment than are required of private employers. Yet, since Federal employees now have no unemployment insurance protection, involuntarily separated Federal employees have been forced to rely upon accrued annual leave and refund from their retirement accounts while looking for other jobs. Not only does this defeat the purpose of annual leave, but also, in many cases, the employee may have no such leave accumulation at all. Even where leave has been accumulated, there is evidence that it has been inadequate to cover the duration of Federal workers' unemployment. Moreover, it is believed that withdrawal of an employee's retirement fund accumulations is undesirable and a defeat of the purpose of the retirement program.

H. R. 9706 provides for unemployment insurance for Federal civilian workers, with minor exceptions, who are employed in the United States, including Puerto Rico or the Virgin Islands, and elsewhere, if citizens of the United States. Nearly all of the exceptions to coverage are identical with the categories of Federal workers excluded from the Social Security Act for purposes of old-age and survivors insurance. Unemployment compensation will be payable to such Federal workers who are unemployed after December 31, 1954. A Federal worker's rights to benefits are to be determined under the unemployment compensation law of the State to which his Federal services and wages are assigned. Usually, this will be the State in which the worker had his official station when he became unemployed, or, if he has been in Foreign Service, the State in which he resides when he files his claim. Compensation will not be paid for the period with respect to which accrued annual leave is paid upon separation.

The Secretary of Labor is authorized to enter into agreements with each State, under which the State unemployment compensation agency will make benefit payments as agent for the United States and will be reimbursed by the United States for any additional costs of such payments. If a State does not have such an agreement, the Secretary will make the unemployment compensation payments and will apply the benefit standards and other provisions of the law of such State. Unemployed workers filing a claim in Puerto Rico or the Virgin Islands will be paid according to the benefit standards and other provisions of the unemployment compensation law of the District of Columbia.

Any estimates of the cost of the proposed unemployment benefits for Federal workers must necessarily be rough, since there is no experience in the payments of such benefits to Federal workers upon which to base the estimates. The cost will depend to a great extent upon governmental employment levels and turnover, and to some extent upon the overall economic and employment situation prevailing in the country. The Department of Labor estimates that for the last half of fiscal year 1955 the cost will be approximately $25 million. Thereafter, for a full year of operation, based on estimated separations in 1955 of 145,000, the cost will be approximately $35 million. The relatively larger cost for the first 6 months of operation will be due to a backlog of claimants at the start of operations. The backlog will consist of those Federal workers who have been separated by reduction of force or terminated prior to the date when benefits commence, who are unemployed and still eligible for benefits at that time.

This bill which I have presented to the House today is an administration bill. I think it is a sound bill.

I know many of the Members have perhaps seen what I have seen in my

hometown in small industries where there are only four employees: sometimes they are forced to cut down and lay a man off. He is unemployed. He cannot help it. He goes to his little home, to his wife and family. What happens? He walks in at evening where his wife and his family are there gathered at dinner. He knows that he has to break some very unpleasant news to them. He has been paying on a mortgage to the loan association trying to save his little home, and they are proud of it as good Americans. He is tied to that home. His sons are willing to defend the country in order to protect it. They have been sending one of their sons to college. But the husband is forced to say to his wife: "I am afraid John is going to have to come home to get a job to supplement what we can possibly earn. I cannot get unemployment insurance under existing law. We may lose our home."

Yes, it is a sad and serious thing. The small corporations, the little partnerships should do something to protect the men who are working for them.

The present plan of the administration is expanded coverage so far as possible. I think it is a sound program and I hope the House will not be misled by any amendment which may be offered here to impose Federal standards for increasing benefits, to impose Federal standards for the duration of benefits. I submit to my colleagues in the House that the President has submitted a good program for improving our unemployment insurance program without preempting to the Federal Government any rights that have historically belonged to the States.

Mr. Chairman, I ask unanimous consent to insert a table and also a background history of unemployment insurance.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

(The matter referred to follows:)

BACKGROUND OF UNEMPLOYMENT INSURANCE SYSTEM

Unemployment insurance and employment services are State-Federal systems. They are designed to protect wage earners and their families from wage loss through involuntary unemployment by referring unemployed workers to other suitable jobs and if none is available by paying, for a period, weekly benefits related to their prior wages.

Each State enacts its own unemployment insurance law and operates its own program, and the Federal Government cooperates through grants to the State to pay the cost of administering its system.

As a condition of such grants, the Social Security Act sets up certain minimum specifications designed to assure that payments are made to unemployed workers whose previous earnings or employment entitle them to such payments under the State law, and to safeguard a worker's rights to benefits where he does not take a job that fails to meet certain labor standards.

One of these specifications is that benefits must be paid through public employment offices, at which unemployed workers must first register for work and to which a worker must continue to report regularly for a possible job during the time he is drawing weekly benefit payments. The United States Employment Service, a part of the Bureau of Employment Security in the Department of Labor, administers the Federal aspects of the Public Employment Service system.

Another part of this Bureau, the Unemployment Insurance Service, carries the Federal responsibility for renewing the State laws and their administration to determine whether the States qualify for grants for unemployment insurance administration.

Under the Federal Unemployment Tax Act, a tax is levied upon employers throughout the country and a credit is allowed them (up to 90 percent of this tax) for the contributions they pay to their State unemployment funds or for the amounts they would have contributed to such funds in the absence of experience-rating reductions allowed under the laws of all States. Unemployment benefits are financed by these contributions from employers subject to a State unemployment insurance law (except in Alabama and New Jersey where employees also contribute). Each State determines coverage of its law and sets the contribution rates.

In general, the Federal tax and the State laws cover employment in commerce and industry. Railroad workers are covered under a separate system administered by the Federal Railroad Retirement Board. The Federal Unemployment Tax Act is limited to employers who, within a year, had 8 or more workers in each of 20 weeks. A majority of the State laws cover smaller firms but all but six have some size-of-firm restrictions. About 48 million different workers earned some wage credits toward unemployment benefits under State laws in calendar 1952, and about 39 million had enough credits to be insured.

During the fiscal year 1952–53, 7,318,200 new job applications were filed with the employment services and local employment offices made 15,354,400 placements. Of this total 6,606,900 were on nonfarm jobs. Some 3,989,000 unemployed persons received benefits under the 51 State systems. These payments totaled $912,898,000 representing compensation for 40,850,700 weeks of unemployment at an average rate of $23.32 per week. The average beneficiary drew benefits for 10.2 weeks as against 10.4 weeks in the same period during the preceding fiscal year.

In the fiscal year 1952–53, the States received a total of $194,800,000 (excluding grants for postage) in Federal grants for administration of their unemployment insurance laws. They collected $1,367,806 in contributions, which they deposited to their accounts in the Federal Treasury, and received interest on their accounts totaling $188,536,800. On June 30, 1953, the balance in the trust fund amounted to $8,559,296,700 as compared with $7,907,967,800 on June 30, 1952.

The CHAIRMAN. The gentleman from New York has consumed 20 minutes.

The Chair recognizes the gentleman from Tennessee [Mr. COOPER].

Mr. COOPER. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, the pending bill would extend unemployment insurance protection to about 1.3 million workers in private industry and 2.5 million Federal workers. Coverage would be extended to the 1.3 million workers in private industry by changing the definition of employer so as to make subject to the unemployment tax employers who have 4 or more employees in each of 20 weeks during a year. Under present law, the tax is imposed only on those employers who have 8 or more employees in each of 20 weeks during the year. This, of course, would extend unemployment insurance protection to employees in smaller firms and businesses. The provision would be effective with respect to services performed after December 31, 1954.

With but minor exceptions such as Federal employees receiving a salary of $1,200 or less in a year, unemployment insurance protection would be extended to all Federal employees. This would be done by authorizing the Secretary of Labor to enter into agreements with the States under which the States would administer the program as to Federal employees in accordance with their own laws. If a State does not enter an agreement with the Federal Government, the Secretary of Labor would make unemployment insurance payments under the provisions of the laws of the State where the Federal employee was employed. In most cases the State law which would be applicable in the case of Federal employees would be the one where the Federal worker had his last official station when he became unemployed. A Federal employee would be considered as still being employed until he has used up all of his annual leave. Unemployment insurance benefits would be payable to Federal workers who are unemployed after December 31, 1954.

Under present Federal law, an employer cannot get a so-called experience rating until he has had at least 3 years' experience as an employer. An experience rating is based on the employment record of an employer, and in those cases where this record is a good one, the effect of an experience rating is to reduce an employer's tax. Our committee felt that it is somewhat of an inequity and a competitive disadvantage to new and newly-covered employers to require them to wait for 3 years before they can secure a reduction in their unemployment tax. The effect of this requirement is that during the first 3 years, such employers must pay the full tax of 3 percent, without any offset, regardless of how good their employment record may be. The bill provides that a new or newly covered employer can secure an experience rating after 1 year's employment experience. This provision merely permits a State to extend a rate reduction if it so desires. It is not mandatory on the States to do this.

The bill also eliminates the privilege of employers to pay their tax in quarterly installments. Employers are not required to pay the tax until after the close of their taxable year, and under present law they have the privilege of paying their tax in four quarterly installments. Representatives of the Department of Labor informed our committee that about 85 percent of unemployment taxes are paid when due, without employers exercising the option of paying in quarterly installments. We were also advised that the elimination of the quarterly installment privilege would reduce considerably the administrative burden of the Government, particularly in light of extending coverage to smaller firms—those employing four or more persons.

The improvements in the unemployment insurance program contained in the pending bill, on the whole, are desirable ones.

Mr. COOPER. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. DINGELL. Mr. Chairman, the pending bill is a faltering step of the present administration in meeting one of the most serious problems facing us today. With about 8.5 percent of the labor force either unemployed or voluntarily on short time, the administration has completely sidestepped its responsibility to provide adequate unemployment insurance protection not only for workers but as a means of bolstering the economy of the country as a whole, by pulling the old French protocol stunt of "After you, my dear Alphonse," in that it has expressed its concern about insufficient insurance payments both as to size and duration, but has recommended to the States that they take action to correct the deficiencies. Buck passing in typical Army style comes naturally in this administration and is so different than what used to be the positive policy and practice under Roosevelt and Truman. On President Truman's desk he used to have a sign "Buck passing stops here," and he surely took the bull by the horns with his own hands fearlessly and honestly.

As a practical matter, we who have been interested in an adequate unemployment insurance program over the years know that the States either will not or cannot make the needed improvements. The administration's attitude, of course, is very pleasing to the opponents of an adequate unemployment insurance program, because they not only are in a position of dealing with a national problem at the State level when needed legislation is left up to the States, but also can argue that for competitive reasons their particular State should not provide more adequate benefits.

I fully support the extension of insurance protection to Federal employees and employees in smaller firms. However, I remind you that the present administration has done nothing to bring about basic improvements in the unemployment insurance system. The Eisenhower administration has the opportunity of proving its sincerity and liberalism as we Democrats never did, because we will support every move to benefit the worker in every reasonable motion they will propose. We were always handicapped to a marked degree because of solid reactionary leaning of the Republicans reinforced by a Democratic coalition. This combination was paralyzing at times and compromises at best were inevitable. Now, however, the Republicans can be liberal and sure to carry because the great bulk on the Democratic side of the aisle will support them. Let us cut out the talk, Mr. Chairman; let us act.

We are now faced squarely with the problem of providing an unemployment insurance program which is adequate. The only way we can do this is to meet it head on with improvements that will provide genuine protection to unemployed workers, with the shot in the arm for our vacillating economy which such protection will bring about.

The opponents to an adequate unemployment insurance program always bring up the false argument that more adequate benefits will induce idleness. This is an insult to decent and honorable American workers. Certainly unemployment benefits lasting for a period of 26 weeks, with maximums at two-thirds of a State's average weekly wage and one-half of the individual worker's average weekly wage, can be no temptation for any self-respecting and decent citizen to remain idle. I refuse to believe that any American worker, and particularly one with a wife and children, having obligations to meet each and every week, including mortgage

payments on his home, would remain idle if he can work steadily.

Workers have certain expenses which they must meet daily, weekly, and monthly, and they dread the thought of going into debt. To expect them to exist on the pitiful unemployment insurance payments which are now available is asking too much. Unemployed workers, in order to hold on to their homes, educate their children, and exist, must meet certain minimum expenses at all times. Inadequate unemployment benefits mean that not only do the workers have to endure the sufferings and heartaches of unemployment, but also they must forgo buying sufficient food, clothing, and other essentials. With the cost of living being what it is today, even fully employed workers have trouble enough making ends meet.

The present administration has again met a pressing problem with high-sounding words and exhortations, not with real and effective action. This bill will bring very little solace to the unemployed workers of the country.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. JAVITS].

Mr. JAVITS. Mr. Chairman, I introduced, jointly with my colleague, the gentleman from Wisconsin [Mr. O'KONSKI], as well as a group of Members from the other body, the so-called Forand bill to improve the unemployment-compensation system, and I intend to support the amendments which my colleague, the gentleman from Rhode Island [Mr. FORAND] will offer.

I think that the concrete base of full coverage of social security and unemployment insurance and an adequate national-health program must be fundamental policy in the private economy and is what the Republican Party ought to be devoted to. As we want a strong private economy and that is the great point of this administration, it has to have a strong concrete base. This is the best fortification way to give assurance against the fear of recession.

We just have word that employment is at a high level of 62,098,000 with a sharp contraseasonal drop in the normal May-June increase in unemployment. But we still have an estimated 3,047,000 unemployed and it serves to depict to us the numerical importance of adequate unemployment compensation and the danger of complacency in this field which determines the well-being and tranquillity of our people. The two additional amendments which the gentleman from Rhode Island will offer are very desirable. I would have wished also to support a proposal to cover all establishments with one or more employees, but it will not be before us. By setting as a minimum and maximum, 50 percent and 66⅔ percent of the average State wage for unemployment compensation and also a national standard of 26 weeks of such compensation we avoid the competition between States in this area which is so vital for the working men and women to attract business to them, because they give less benefits in unemployment compensation. I think it is very desirable that there be a fundamental standard, just like the minimum wage—even though it is inadequate under present conditions—for the American workingman. I am very proud that the administration has produced this first revision and liberalization of the unemployment compensation system since 1935. I feel that we are starting on setting a national standard for unemployment compensation by reducing the number of employees in establishments which are covered from 8 to 4. But I feel we can and should do more with the measure before us. I think we should join many of our Democratic colleagues in saying that the added national standards for unemployment compensation, which the gentleman from Rhode Island will propose, together with the bill before us, really represents an important part of that concrete base that can fortify the private economy. We believe in the private economy and the way to make it work is to make it strong. I think the Forand amendments will make this concrete base stronger under the private economy and I shall therefore support them.

Mr. COOPER. Mr. Chairman, I yield 15 minutes to the gentleman from Rhode Island [Mr. FORAND].

Mr. FORAND. Mr. Chairman, I ask unanimous consent that immediately following my remarks, the gentlewoman from Missouri [Mrs. SULLIVAN] may extend her remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. FORAND. Mr. Chairman, the pending bill, H. R. 9709, will bring much needed protection to about 4 million additional persons, but it does nothing at all for the workers who are already covered by unemployment compensation. The country is suffering from serious unemployment at the present time; in fact, the Departments of Labor and Commerce report that 3,447,000 were unemployed early in June, and that is an increase of 42,000 over the month of May.

Now, it seems in all the publicity being given to this subject, the employment figures are played up and the unemployment figures are played down. I am glad to see the number of employed persons as high as we can possibly make it, and we need it in this country. But I am also very much concerned with the large number of unemployed, because while we speak of the present circumstances as either being a mild recession, a readjustment, or what have you, to the individual who is out of a job and who is running out of money so that he has difficulty maintaining his family—I say to you that that person is in a depression. That condition needs remedying and remedying right now. The June employment, they tell us, was at the highest figure since last October; but actually it was 1 million below the employment figure of 63 million in June of 1953. The mid-June unemployment was more than twice that of a year ago and with the exception of 1949 was well above the corresponding period of any previous postwar year. Yet the administration and the Congress are doing nothing to remedy that situation except passing the buck to the States.

The average unemployment insurance payment in this country is less than $25 a week. I do not have to tell you that this is not even sufficient to meet nondeferrable expenses and that the unemployed are being forced to use up what little savings they have and then turn to public assistance, if they can get it. Payments of unemployment compensation benefits have lagged seriously behind the average weekly wage since the unemployment insurance program was established. The original intent in the program was that the payments should equal about 50 percent of the weekly wages. While average weekly wages in covered employment trebled between 1936 and 1953, the dollar ceilings for unemployment insurance payments on the average did not even double. Wages have been outdistancing ceilings continually until we have reached the point where weekly insurance payments represent only about two-fifths of the average weekly earnings of workers compared to the two-thirds in the 1930's. Only about $1 out of each $5 in lost wages and salaries is being replaced by unemployment insurance payments at the present time.

Not only are payments inadequate, but their duration is far too short to carry many workers until they are able to find other jobs. At the present time about 40,000 workers a week are exhausting their rights to payments. So far this year well over one-half million workers have exhausted their benefit rights. The present administration while recognizing that something must be done to increase payments and their duration has shirked its responsibility by suggesting to the States that they take the necessary action to do this. In my opinion, this can hardly be considered part of a dynamic program which we have heard so much about in the last couple of years. Those of us who have sought to bring about realistic and adequate improvements in the unemployment-insurance program over the years know that it is very difficult for the States to increase insurance payments and durations even in those cases where they are willing to, because of the competitive situation with which they are faced. We also know that the opponents of adequate unemployment insurance take full advantage of the situation which the present administration has got itself into by insisting that improvements in payments and their duration should be made at the State levels. Then the opponents turn around and they go to the State legislatures and say, "You should not and cannot provide adequate benefits because if you do our State will be at a competitive disadvantage compared to neighboring States." They have very successfully played both ends against the middle, with the result that insurance benefits have become less and less adequate over the years.

The major reason for the Federal Government's enacting unemployment-insurance legislation in the first place was on account of the competitive situation which would develop if each State proceeded individually to establish an un-

employment-insurance program. Right here I want to say to you that you have heard and probably will hear more that the amendments which I intend to offer in the committee are an invasion of States rights and that we are setting new standards—and, by the way, I intend to offer those amendments and a motion to recommit if the amendments are voted down in the committee, and, of course, I intend to get a rollcall vote on the motion to recommit.

If you will read the original act you will realize that at the very outset certain standards were fixed by the Federal Government when we said to the States, "If you want to come in under this program you will have to submit to us a program that is satisfactory. You will have to meet certain requirements." Therefore, the amendments which I shall offer will only provide perhaps a few additional standards which must be met by all and which the States themselves have failed to take care of, despite the fact that in his economic report the President suggested to the States that they increase the benefit amounts and also the period of benefits, which is all my amendments provide.

Also, the Secretary of Labor in February of this year wrote to the governors of all the States advising them that the President was suggesting that action along those lines be taken, but all of that fell on deaf ears. The States have failed to act. Therefore, I say to you it is the responsibility of this Congress to act to remedy the situation with which we are faced.

We must consider, and consider seriously, I believe, that unemployment compensation benefit payments are very, very important. They do two things: One, they help the unemployed worker by tiding him over, permitting him to feed himself and his family and clothe and house them, meager as the benefit amount is. Secondly, it provides purchasing power which is reflected in the business of every businessman in the community. It is a great help economically, and that has been proven time and again through newspaper articles and statements that have been made by individual businessmen in those areas that were so sadly affected.

The Congress realized that the States were faced with this situation, and I refer now to the competitive situation, and enacted legislation levying a uniform 3 percent tax on all employers throughout the country, there is one of your standards, with a credit provision of 90 percent in those cases where the States have an unemployment insurance program meeting certain basic requirements as to disqualifications, and so on, set forth in the Federal law. In addition, the Federal law permits an experience rating credit based upon the employment record of employers. In my opinion, there would be very few States today with adequate unemployment insurance programs had not the Federal Government taken this action. The very same reasons which impelled the Congress to take the initiative in establishing the unemployment insurance program in the first instance also controls when it comes to maintaining adequate payment both as to size and duration. Minimum requirements had to be established by the Federal Government in this field because unemployment insurance deals with economic problems which are Nationwide and beyond the control of the individual State. It is being claimed that the present administration is making extensive improvements in the Federal-State unemployment insurance program. My friends, the only improvement of any account, which would be provided by the bill now under consideration, is an extension of coverage. Nothing whatever is being done for those workers who are already covered. As a matter of fact. I was the author of a bill in the 82d Congress which was reported to this House, and which provided for coverage of Federal employees. This group makes up the bulk to whom coverage would be extended in the pending bill. For years I have led the fight to improve unemployment insurance, and while I fully support the extension of coverage provided in this bill, I deny any claims that basic improvements are being made in the unemployment insurance program as a result of the bill, H. R. 9709.

The need is urgent to increase the size and duration of payments. The unemployment insurance payments have proved their value to the economy of the country, and particularly to local communities time and again. More adequate benefits during this period of high unemployment and readjustment can do as much to bolster our sagging economy as any other one thing which the Congress can do. The relief which should be provided every family by more adequate benefits from the tragedy resulting from unemployment cannot be measured in dollars. Our whole Nation stands to gain by a more adequate unemployment insurance program. It is my intention when we get into the House to offer two amendments which on yesterday I inserted in the CONGRESSIONAL RECORD.

Mr. LANE. Mr. Chairman, will the gentleman yield?

Mr. FORAND. I yield.

Mr. LANE. I congratulate the gentleman on the very able and forthright statement he has just made to the House. I know he is quite conversant with this subject matter, and I am aware of the fact that over the years he has studied unemployment compensation legislation as a member of the great Committee on Ways and Means of the House. I know the gentleman represents a district in New England which has a great deal of unemployment, as a result of the slump in the textile industry, which is a very, very sick industry today. The gentleman has lived with this problem over the years and knows whereof he speaks. I rise in support not only of the statement that he has made, but in support of the amendments he proposes to offer later in the day. I again congratulate the gentleman on this noble effort to bring this to the attention of the Congress and to the attention of the Nation.

UNEMPLOYED AMERICANS WITHOUT UNEMPLOYMENT COMPENSATION BUY NOTHING

New England has expert knowledge concerning the problems of the unemployed, because we have so many of them concentrated in communities that were once leaders of the textile industry.

Unemployment compensation is the only factor that provides food and energy and keeps up the morale of displaced workers while they search for jobs to give meaning to their lives again.

The present unemployment-compensation formula is too low and too short.

It is like an undersized lifeboat that is guaranteed to save part of the crew and carry them for a while before dumping them overboard to take on others.

Of course, we would prefer to see new industries or the Federal Government itself, come to their aid with substantial help. In the experience of New England, these S O S calls have not been answered. In fact, the Government has been taking the life preservers away from the crew by cutting down employment at Government installations, and by insisting upon policies that are making the weather worse for our fish and textile industries, among others.

Two recent items in the news, puzzle and disturb us.

We cannot escape the conclusion that the Government of the United States appears to have lost touch with the problems of its own people.

The first item informs us that the United States has released almost $14 million to relieve unemployment in West Berlin, which is some distance away from New England.

The second, under date of July 3, quotes the National Planning Association—a private group composed of businessmen, labor-union leaders, economists, and bankers—as predicting that unemployment will nearly double over the next year at the present rate of economic activity.

At this point, I would like to remind the administration that it is failing to promote maximum employment, production, and purchasing power which was stated as the objective of United States policy in the Employment Act of 1946.

When it is taking jobs away from people, or failing to take action that will save the ones that they have, the least it can do under these circumstances is to secure legislation that will increase and extend unemployment compensation benefits.

One or the other.

It cannot default on both and then expect to retain the confidence of the people.

In the absence of positive and constructive leadership, the Congress is determined to press for substantial improvement in unemployment compensation.

We want a benefit ceiling of at least 66⅔ percent, and a floor of 50 percent of wages. Duration must be extended to 39 weeks. Above all, it is necessary to enact a Federal Unemployment Compensation Standards Act, to prevent unfair competition among States and employers.

H. R. 9707 represents a token gain in that it extends coverage to employers of 4 or more persons in place of the prevailing 8 or more.

This does not go far enough.

From the report of the Committee on Ways and Means, I quote:

From the standpoint of the individual worker, unemployment insurance protection is as important if he works for a small employer as if he works for an employer of thousands. Moreover, it is as important to maintain the purchasing power of employees of small firms as of large firms.

H. R. 9707 still sanctions discrimination when it fails to cover employers with 1 to 3 employees.

To be fair, it must cover all.

We in New England take pride in the fact that we try to improve labor standards instead of sabotaging them. We have seen industries lured away from us to other sections where they can evade their social and economic responsibilities. Our burden of unemployment has increased as a result. But we shall never try to hold an industry that practices this form of blackmail. We believe in progress consistent with the national welfare, not cuthroat competition among the States to downgrade the standards and the security of American labor.

H. R. 9709, calling upon all the States to be good fellows about this problem, will not strengthen unemployment compensation for the Nation.

It will not prevent some States from keeping benefits low and brief while adding to disqualifications.

In fact, hypocritical evasions and unfair competition will be encouraged.

We, therefore, insist that the proceeds of the Federal Unemployment Tax Act shall be earmarked in a Federal unemployment account in the Federal Treasury to pay Federal and State administrative expenses and to provide reinsurance grants to those States who are in financial difficulty because of high rates of unemployment. These grants would permit States with unusually heavy unemployment to make adequate payments without raising employer taxes so far above levels in other States as to accelerate the out-migration of industry.

Unemployment is governed by nationwide economic forces and should be dealt with on a nationwide basis.

We urge adoption of the more realistic provisions contained in H. R. 9430, sponsored by the gentleman from Rhode Island [Mr. FORAND]. Any other course would be a cruel deception to millions of unemployed and to all others who live in fear of unemployment.

Mr. FORAND. I appreciate very much the statement made by my good friend, the gentleman from Massachusetts whose district is one of those also suffering extremely under the existing circumstances. I compliment the gentleman for the work he has been doing, and which he has been carrying on in this fight. But this fight, my friends, is not limited to the gentleman from Massachusetts [Mr. LANE] or myself or anyone else individually. That is the reason some 87 Members of the Congress joined together and prepared a bill, working at it for over 2 months, a bill which I introduced in the name of all of us, on June 3 of this year. That bill goes much further than the two amendments I am going to offer. These amendments will provide—1, for an increase in the amount of benefits, and 2, for 26 weeks of benefits. I am restricting my amendments to those which the President of the United States, your President and my President, had recommended to the States that they have their legislatures act upon. If you want to go along with the President, then you will vote for the amendments.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. FORAND. I am glad to yield to the majority leader.

Mr. HALLECK. Have the State legislatures been in session so that they could have an opportunity to respond to that request up to this time?

Mr. FORAND. Several of them have. Many of them have not.

Mr. HALLECK. I think most of them have not been in session. At least I know my State legislature has not had a session since that recommendation was made. That recommendation was made in January of this year, was it not?

Mr. FORAND. The President's recommendation; yes.

Mr. HALLECK. The only point I was making, I do not think the States have had an opportunity to respond to that request of the President.

Mr. FORAND. If you want to pin it down specifically to the request of the President, perhaps the gentleman is right. Not enough of the legislatures have met. Many have failed to act; but over and above that, away beyond the time that the President made his suggestion, the need was there, and we have failed to act.

How anyone can vote against my amendments after considering the following facts is beyond my comprehension.

Here are the facts about the present economic situation as of June 24, 1954:

Over the last year—May to May—total nonagricultural employment has declined 1 million. Agricultural employment is up 400,000, making a total civilian employment decline of 600,000.

Because of a net increase in the labor force of 700,000 and because of an increase in productivity which displaces 1,800,000 workers a year, a total of 2½ million new jobs each year must be provided.

Manufacturing employment over the last 9 months, beginning in September, has declined 1,734,000. Since May of 1953, the decline has been 1,500,000.

In May of this year, there were 10.1 million workers employed for less than 35 hours a week, as compared with 9,300,000 a year ago.

According to the Department of Commerce, 31.6 percent of those currently unemployed have been unemployed for 15 weeks or more. The figure was 15.9 percent a year ago.

In the week ending June 12, 286,069 workers received their first unemployment compensation checks. This is 23,000 more than the preceding week and 116,000 more than a year ago.

During the week of June 12, 2,035,000 workers were receiving unemployment insurance, 70,000 greater than the preceding week; 1,200,000 greater than a year ago.

During the first 5 months of this year, 658,000 workers exhausted their unemployment compensation benefits, as compared to 348,000 in the same period last year.

Steel production currently is running at 72.6 percent of capacity. This means that the current week's production will be 450,000 tons of steel short of the same week a year ago. The New York Times, May 27, reports that Ben Fairless predicted that his company's operating rate would remain for the rest of 1954 at close to the 73 percent. Same article reports that Mr. Grace, of Bethlehem, will be satisfied if Bethlehem's rate could remain at 72 percent.

Auto production is off 15 percent from a year ago. During second half of 1954 auto production is scheduled to drop one-third below first half of 1954.

Industrial production is off 9 percent from a year ago. The reported upturn from April to May is the result of the figure being seasonally adjusted. Actual operating rate for industrial production in May was identical with April.

Weekly hours in May were 39.3. This is 1.4 hours less than a year ago. The reported upturn in May of 0.3 hour per week was due to a comparison with the April figure, which was low because, according to the BLS of the Department of Labor, it reflected the week which included Good Friday.

Business failures in the week of June 12 totaled 206 as compared with 218 business failures the preceding week and 167 in the similar week a year ago. Most of these business failures were among small businesses.

Department store sales for the first 6 months—that is, up to June 12—were 3 percent less this year than last year. For the 4 weeks ending June 12, department store sales were 5 percent less than in the similar 4 weeks a year ago.

Total sales of retail stores were 3 percent below May a year ago and 2½ percent lower for the first 5 months of this year.

JUNE EMPLOYMENT FIGURES

The administration and the press are making much of the fact that unemployment did not rise between May and June by as much as is usual for this season of the year. It rose by only 42,000 this year, whereas the average May-June rise in unemployment has been 367,000 in the postwar years 1946 to 1953.

This less-than-normal rise in unemployment was not due, however, to a more-than-seasonal rise in employment. The employment increase between May and June was also less than is usual at this season. It increased by 979,000, which is half a million below the usual May-June increase of 1,500,000.

The reason why June unemployment showed such a small increase this year, even though employment was increasing less than usual, is that the labor market recorded a subnormal gain in June. Average May-June increase in the civilian labor market in postwar years has been 1,875,000, whereas this year it increased by only 1,020,000. This 855,000 deficit in the June labor market actually represents hidden unemployment, potential jobseekers who fail to get counted as

unemployed because they have been discouraged from job seeking by the prevailing Eisenhower recession.

For the whole period of the seasonal upturn from January to June 1954 compares with the average of other postwar years—1946 to 1953—as follows: The civilian labor market increased 2,600,000—actual, 2,605,000—as compared with the usual 3,600,000—actual, 3,580,000; employment increased 2,300,000—actual, 2,345,000—as compared with the usual 3,600,000—actual, 3,647,000; unemployment increased 260,000, as compared with a normal decrease in unemployment of 67,000.

On a comparison with June 1953, there is little to cheer about in the June employment figures just released.

The civilian labor market increased over the year by 711,000, which falls considerably short of the 971,000 average annual increase that took place in the previous 7 years. Employment is now 1,074,000 less than a year ago. An exceptionally large part of this reduction is in agriculture, 498,000. Nonagricultural employment is 576,000 smaller than a year ago. Unemployment is 1,785,000 greater.

Manufacturing employment declined slightly in June for the eighth month in a row. The June figure of 15,829,000 wage and salary workers in manufacturing is 1,587,000 less than the 17,416,000 so employed in June 1953. Average hours of manufacturing production workers in June were 39.6, compared with 40.7 hours a year ago. This reduction of 1.1 hours a week for 16 million workers is the equivalent of full-time unemployment for an additional 440,000 workers.

Mrs. SULLIVAN. Mr. Chairman, I am grateful to the gentleman from Rhode Island, [Mr. FORAND], for making arrangements for me to have my remarks on the Unemployment Compensation bill placed in the permanent RECORD as part of the debate on the bill. A very sad occasion, a death in the family, required my presence in St. Louis at the time the bill came before the House, and thus it was impossible for me to be present for the debate. But I do want the RECORD to show how deeply disappointed I am in the scope of the bill presented to the House under a title which I think is a misleading title, that is, a bill "to extend and improve" unemployment compensation.

This bill will add very few people to the unemployment rolls in Missouri—only those who work in establishments employing from 4 to 8 people and the comparatively few Federal employees in Missouri, about 45,000. The Federal employees should be covered, of course, but I am afraid this bill does very little for any of those who have already lost their jobs because of reductions in force, since no benefits can be paid to jobless Federal employees under this bill until next year.

I am also disappointed in the failure of this bill to increase benefits in any way whatsoever in any State or jurisdiction. The maximum benefits in Missouri today are $25 a week. That is obviously not enough to keep a family going—not with the cost of living in St. Louis, for instance, more than 2 percent higher than it was a year ago and apparently still rising. The latest Consumer Price Index shows an increase of nearly 1 percent in the cost of food from April to May of this year in St. Louis; it shows meat going up in almost every category and many of the fresh, frozen, and canned fruits and vegetables going up, even such staples as pork and beans, shortening, margarine, lard, sugar, jelly, and so on, and of course the average retail price of coffee on the Consumer Price Index has reached $1.18 a pound. Not only food, but housing, medical care, personal care, transportation, and some apparel items have been going up.

With the cost of living at about a record level, it is wishful thinking to believe that an unemployed worker can keep his family going on $25 a week.

The Forand bill, which I cosponsored along with more than 80 other Democratic Members of the House, would have done a lot to improve the situation if the House Ways and Means Committee had approved it instead of the inadequate bill it did report out. It would have extended the period of coverage for unemployment compensation benefits to a maximum of 39 weeks, and in Missouri it would have meant an increase in the benefits to a top maximum of about $44 a week instead of $25. The formula proposed in the Forand bill would provide benefits equal to half pay based on a worker's normal wage up to a maximum of two-thirds of the State's average weekly wage. So in Missouri that would mean a benefit of $44 a week for any worker who normally earned $88 a week or more, and half pay for anyone whose normal wage was less than $88 a week or more, and half pay for anyone a whole lot more workers now excluded from unemployment compensation by removing many of the present restrictions on the size of a business firm eligible for coverage. In other words, instead of taking in just those additional workers who are now employed in firms hiring from 4 to 8 employees, it would cover in a total of about 153,000 Missourians who work in small firms employing from 1 to 8 persons.

The reason I am so distressed about the inadequacies of the Reed bill is that St. Louis itself is a distressed community, an area of substantial unemployment. The Department of Labor reports that in March unemployment was estimated at 50,400, or more than double the level of a year ago. The Bureau of Employment Security added that further layoffs were expected in autos, primary metals, ordnance and shoes, and that these would offset the expected seasonal buildup in construction, trade, transportation, and food. We know that thousands of Missouri workers who have been unemployed have used up all of their unemployment compensation benefits without finding new employment. All these things taken together make it obvious that the Congress is not "extending and improving" unemployment compensation in any practical manner compared to the frightful economic problems faced by the families of those who have lost their jobs.

I hope the Senate, in considering this same legislation, will approach it in a much more realistic fashion and really improve unemployment compensation by increasing benefits sufficiently to enable people on unemployment compensation to live decently during this difficult period of recession and readjustment. The Democrats on the Ways and Means Committee, in their minority report, stated this problem concisely and accurately when they said that the majority of the Committee on Ways and Means have given to the people on unemployment compensation not bread but a stone.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. CURTIS].

Mr. CURTIS of Missouri. Mr. Chairman, I will not take the 5 minutes. I simply want to state that, of course, I am behind this bill which came out of our committee. Essentially I think it is a good bill and it is perfecting our unemployment-insurance program. I think the test of time has shown that the balance that has been worked out between State and Federal Governments in this field has been a pretty good one. Essentially, the arguments that will be advanced in behalf of the amendment which will be offered by the gentleman from Rhode Island [Mr. FORAND] are the question of whether that balance should be changed and whether or not the Federal Government should be taking a more detailed part in the program instead of letting the States proceed. But the main reason why I took the floor at this time is to call attention to the unemployment situation as it actually exists.

The gentleman from Rhode Island [Mr. FORAND] mentioned the fact that unemployment had increased by about 42,000 in the past month. There is an article which appeared in the July 8 issue of the New York Times on this subject. The headline reads: "Employment Up 989,000—Most of the Increase on Farms."

But in this article it points out this particular thing, and there are a couple of other sections to which I want to refer, and later on I shall ask permission to insert the whole article in the RECORD.

The rise in unemployment is significantly small because seasonal factors usually increase the total 10 to 11 percent in June, as students and graduates enter the labor market. A 10-percent increase in unemployment would have meant a rise of 334,000 unemployed.

So the actual fact that almost 1 million additional people are employed than were employed last month is a significant feature.

Continuing, this article says:

June brought the first break of any significance in the number of relatively long-term unemployed, those without jobs for 15 weeks or more, which had remained at the 1 million mark since March. In June this group dropped by about 200,000—

In other words, that is 20 percent—

to an estimated 850,000.

That is really the significant figure. The conclusion of the article is that it looks like the peak has been passed, and that our unemployment problem has

been met. Incidentally, at no time has it assumed the significant proportions that some people would have us believe. It has nowhere near attained the proportions that we saw in 1949, and of course any attempt to compare it to the 1930's is ridiculous.

In addition to that there is one other figure I want to emphasize, as I have before, our civilian labor market has taken over some 250,000 Government employees who have been let out. It has absorbed those, plus some 600,000 boys who have been in the services, who have been returned to civilian life from the uniform since the end of the Korean war. A gentleman of the opposite party said in a recent public speech, for every boy that is returned from Korea, two have returned from Detroit. Well, aside from being an untrue statement it certainly is filled with cynicism and defeatism.

I say the fact that we are reverting to a peacetime economy is the significant thing, and I think the administration is doing a great job in actually bringing about prosperity with peace. It can be done, and we do not need any war in order to solve the unemployment problem.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Rhode Island.

Mr. FORAND. I would like to hear the gentleman tell us just what the administration is doing to take care of the large unemployment situation, if it is doing such a fine job.

Mr. CURTIS of Missouri. One thing is that it is encouraging private industry for a change, and making it possible for business to go ahead; it is creating new employment opportunities because it is encouraging private business.

Mr. FORAND. Does the gentleman know there are more business failures now than there have been in the past?

Mr. CURTIS of Missouri. I am saying what the unemployment figures show. Never in the history of the country were so many people employed.

Mr. FORAND. Never in the history of the country was the population so large or never was the population increasing at such a rapid rate.

Mr. CURTIS of Missouri. If you will compare these figures on a percentage basis, the percentage of employed to unemployed and to the total population, the result will show that we are in no serious circumstances, particularly when it is realized that we have in less than a year reverted from a wartime economy to a peacetime economy.

[From the New York Times of July 8, 1954]

EMPLOYMENT UP 989,000—MOST OF INCREASE ON FARMS

WASHINGTON, July 7.—Employment rose 989,000 from May to June, most of it on farms. The rise in unemployment was negligible—not more than 42,000. After allowance for seasonable factors, the downtrend in nonfarm employment appeared almost completely halted in June.

The level still was 1,600,000 under the peak for the month attained last year.

The total employed during the survey week early in June was estimated at 62,098,000, compared with 61,119,000 a month earlier.

The unemployed total was estimated at 3,347,000, compared with the May total of 3,305,000.

PAST PATTERNS CHANGE

Neither the employed nor the unemployed totals moved as much as seasonal patterns of the past would indicate. The rise in unemployment was significantly small, because seasonal factors usually increase the total 10 to 11 percent in June as students and graduates enter the labor market. A 10 percent increase in unemployment would have meant a rise of 334,700.

The Census Bureau, which makes the general employment and unemployment estimates, said the number of students entering the labor force between May and June was somewhat smaller than in most other postwar years.

A joint release by the Commerce and Labor Departments said that as June progressed there was a further decrease of unemployment among adult workers.

Some of the other highlights of the month's developments were these:

June brought the first break of any consequence in the number of relatively long-term unemployed (those without jobs for 15 weeks or more), which had remained at the 1 million mark since March. In June, this group dropped by about 200,000 to an estimated 850,000.

New unemployment, as measured by initial claims for State unemployment insurance, continued to decline seasonally during June. By the week ending June 28, the volume had fallen to 265,000, the lowest level for any week since October 1953, and 5 percent less than in May.

CONSTRUCTION WORK RISES

As in the last 2 months, many previously jobless men found employment in construction work, and there was some easing in unemployment in other business areas as well.

The two departments, reporting on new construction, said the seasonal rise in June expenditures made a total of $3,300,000,000 for the month and a 1954 first-half total of $16,600,000,000.

The number of employees on nonfarm payrolls, which excludes the self-employed, domestics, and unpaid workers in family enterprises, rose 142,000 to 48,100,000 in June, while factory employment remained unchanged at 15,800,000.

The workweek of factory production workers averaged 39.6 hours in June, a third of an hour higher than in May, the Bureau of Labor Statistics reported. This June average, however, was 1.1 hours below that of June 1953.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. FORAND. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. KELLEY].

Mr. KELLEY of Pennsylvania. Mr. Chairman, since this discussion has developed into one about employment and unemployment, I wish to say that my congressional district, which is Westmoreland County of Pennsylvania, has been in distress for many months. Unemployment is a serious matter in my district. The miners are idle, steelworkers are idle, electrical workers are idle, and there are idle men in the glass-manufacturing plants. I am therefore interested in the amendment to be offered by the gentleman from Rhode Island [Mr. FORAND], because most of my people who are unemployed have exhausted compensation benefits and are now dependent upon relief or charity and some aid from surplus Government food.

Just recently the Pittsburgh area as defined by the Labor Department has been placed in the No. 4 category as a critical area. That does not indicate that there is any improvement in the situation there in employment; it indicates that it is getting worse.

As long as the steel industry operates at less than 70 percent of capacity, you will never have any prosperity in this country, you cannot have it for basic industry, and that is what it has been for some months now, and it is getting worse.

It is not a recession in my view, it is a depression. It is a depression in my district. My people view it as a depression and not a recession. They are the ones who are suffering, they are the people without employment, and many have been for months.

Mr. Chairman, the people in Westmoreland County, Pa., in the center of Pennsylvania's bituminous coal, steel, and electrical industries, do not believe in beating around the bush. They believe in speaking straight-out.

When some of the Republican newspapers in our county started to apologize away this recession by calling it an "inventory adjustment" and things of that kind, the miners and the steelworkers and electrical workers and our other industrial workers adopted their own phrase for it. They call it "Ike's depression."

They remember the last depression and they remember we had a Republican administration at that time. They tend to associate Republican and depression as words which go together.

Frankly, Mr. Chairman, I cannot blame them, particularly when I see the fraud we are perpetrating on the people through a bill like this which pretends to be an unemployment compensation bill.

Jobless workers in Westmoreland County who have used up their full 26 weeks of benefits and still do not have jobs can starve, as far as this bill is concerned. There is nothing in it for them. Those who are still on unemployment compensation and drawing a meager $30 a week top benefit, trying to feed and care for a family on that, can limp along as best they can for there is nothing in this bill for them either.

I will be happy to join with Congressman FORAND and other Democrats in trying to write into this bill a higher system of benefits—half-pay up to a top of two-thirds of the average weekly wage.

That would raise the top benefit in Pennsylvania to about $44 a week, which is not very much on which to run a household these days but is a whole lot better than the present $30 top.

I am sorry the administration refused to help us to get a better bill than this one now before us. I am sorry it is shutting its eyes to the magnitude of the unemployment problem and the hardships that go with it.

In my county, however, it is just about what the rank-and-file industrial worker would expect from a Republican administration and so there will be no surprises there.

They just call it "Ike's depression" and let it go at that. What burns them up

most, Mr. Chairman, is that they have to wait 2 more years for a chance to vote in a presidential election.

Mr. REED of New York. Mr. Chairman, I yield 8 minutes to the gentleman from Wisconsin [Mr. BYRNES].

Mr. BYRNES of Wisconsin. Mr. Chairman, I intend to support this bill. I voted in the committee to report it to the House. I must say, however, that I am not too pleased with two sections of the bill, and as a result I filed dissenting views with respect to the section on the extension of tax to employers of four or more employees, and that provision relating to experience rating.

It seems to me that when we approach this problem of unemployment compensation we face one basic issue: The matter of States rights. When this program was conceived, the general purpose of the Federal Government coming into the picture at all was to encourage States that at that time had not acted to adopt unemployment compensation plans. The Federal Government gave its stamp of approval to the idea, the theory and the objective of unemployment compensation, and took steps to encourage the States to adopt State plans. Fundamentally, all through the history of unemployment compensation it has been conceived as an area for State legislation with assistance from the Federal Government. We levy a Federal tax and we today collect a Federal tax from employers, not for the purpose of providing a fund from which benefits can be paid but only to provide administrative funds to assist the States in the administration of the State program. But we have always left the fundamental decisions, the details, the benefits, the length of benefits, also the area of the employers to be covered, particularly in that troublesome field of employers in small business, to the States to act on the basis of the conditions existing in the various States.

I do not know why it is that we in the Congress so often take the attitude that we here are so much smarter than are our counterparts in the State legislature, that all the brains rest here in Washington, and that the legislatures and the State administration in the State capitals are absolutely devoid of any reasonable intelligence and that we have to make the decisions. Having served in a State legislature, I would like to say that at least as far as this Member of Congress is concerned, he has a very high respect and a very high regard for the wisdom of the State legislatures in meeting the problems in the various States. To me many things that we meddle with here could much better be done if they were left to the decision and the determination of State legislatures and local communities.

Mr. Chairman, that is what we run into as far as this particular bill is concerned and it is what we run into in connection with the amendments to be offered by the gentleman from Rhode Island [Mr. FORAND]. I know that there has been for a long period of time a great effort on the part of some people to completely federalize the unemployment compensation program. These people feel that we should not leave the decisions to the State. They say: Let us get it all down here in Washington and federalize it, let us disregard the conditions that exist in the various States and let us have a national pattern, that is the only way it can be done. Underneath it all, I suppose, is this idea that all wisdom rests in Washington; which idea, of course, I do not subscribe to at all.

Mr. Chairman, it is this matter of States rights, States prerogatives and the recognition that this program is basically a State program with Federal assistance and Federal encouragement that is at issue when we consider the Forand amendments that are to be offered. Make no mistake about it, those amendments have only one purpose and one objective and that is to federalize the program and take away from the States the right to determine the amount of benefits, the length of benefits and all the various other factors which today and historically we have left to the States.

On that basis I am opposed to the Forand amendments. I think it is on that basis that the President himself has said that some of the provisions of the Forand bill are good provisions but they are provisions that should be adopted by the States and not superimposed from above by the Federal Government.

It is because the extension of the tax encroaches upon the State prerogatives, that I oppose that particular section of the bill.

There is nothing in the Federal law today that says to a State, "You cannot bring employers under the unemployment compensation provision if they employ less than 8 employees." We say the States can go as far as they want to. They can cover employers that have only one employee at any time. In fact, some States have done so. But, is that not the State's right? Is that not up to the State to decide?

Another matter we should recognize is that this bill does not provide for benefits. If you look at section 1 of the bill, it simply imposes a tax. It does not insure any benefits. It imposes a tax on employers of four or more employees. It does not say what benefits the employees are going to get or that they are going to get any benefits. All we do is say we are going to tax employers of four or more employees.

Certainly we assume the States are going to act to cover employers of four or more employees, thus having them pay a certain part of the tax to the State government and get credit against their Federal tax. It is logical and certainly I think we can all assume that that is what is going to happen. But, as far as this section 1 is concerned, it gives benefits to nobody; all it does is impose a 3-percent Federal tax on employers of 4 or more employees.

That matter of what employers should be excluded has been up in the States at various times. Some State legislatures have had bills introduced to lower the standards—"standards" may not be the proper word—but to lower the number of employees in a given plant who will be covered by unemployment compensation. In some States they have adopted lower standards such as one or more employees at any time as the test. Others, however, have turned down legislation or bills introduced in their legislatures to accomplish similar objectives. Is it not right for them to make their own determination? Can they not respond to the needs of their own people and the desires of their own people? It seems to me they can, and it is for that reason that I oppose section 1 of the bill.

The reason I am voting for this bill is the provision in the bill which covers Federal employees. It seems to me that Federal employees should be on a par with employees generally throughout the country. The Federal Government as an employer should have similar responsibilities toward its employees that other businesses have toward theirs, and certainly should have the same responsibility toward its employees that we by law say to private industry they must adopt toward their employees.

So, Mr. Chairman, on the basis of the coverage of Federal employees, I believe this bill is a much-needed piece of legislation. It is only because in my judgment that factor does outbalance the provision which I do not approve of in the bill that I am going to support it. I wish it were possible under the rule to strike out section 1 relating to the extension of the tax on employers of 4 or more employees and also that section which reduces the experience-rating provision to 1 year rather than a 3-year base. Unfortunately, that is not possible.

In closing, Mr. Chairman, I would simply make this one observation: Let us not try to take unto ourselves here in Washington all prerogatives and jurisdiction over matters which we all know in our hearts can much better be done at a State or local level of government. Let us not act in a way which will give rise to the feeling that we here in Washington have lost confidence in the ability, in the integrity, and in the wisdom of our State governments.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Pennsylvania [Mr. EBERHARTER].

Mr. EBERHARTER. Mr. Chairman, I listened with a great deal of attention and with a great deal of respect to the gentleman from Wisconsin [Mr. BYRNES]. He makes a very strong argument, from his point of view, that we should leave this matter entirely to the States; do not let the Federal Government interfere at all.

Mr. Chairman, if that is a good argument, why did the Federal Government in the first place pass an unemployment compensation measure? In other words, if we follow his argument to its logical conclusion, the Federal Government should not at any time or in any instance pass any Federal unemployment compensation legislation. So that when it comes to that, the only thing we have to consider is the matter of degree in the setting of standards by the Federal Government. This bill merely sets up minimum standards with which the States must comply in order that employees will get the benefit of unemployment compensation.

It is a well known fact, known to anybody who has made any study of the subject, that the States have not kept pace with economic conditions, with economic factors. We know that the benefits do not rate nearly as high as they did 8 or 10 years ago or even 5 years ago. We know that the duration of the benefits is not as satisfactory as it was 7 or 8 or 5 years ago or 3 years ago. We know that the States, as a matter of history, have fallen back in this respect and that this measure effects nothing whatsoever for the working men and women in this country.

Everybody admits that the economy is in a better condition than it was 10 years ago. Standards of living are higher. We do not believe any more in unemployment. That used to be accepted as one of the natural results that follow from our economic system. But I think we have advanced in our thinking throughout the country. We have come to believe that we should do something to alleviate the distress that occurs by reason of unemployment.

Let us look at this from the standpoint of the employee. If a man works for a company that has eight employees and he loses his job through no fault of his own, he is entitled to unemployment compensation. But a man or a woman who works for an employer who employs only three people gets no protection whatsoever so far as Federal statutes are concerned.

Some States have seen the inequity of this situation, that if 1 employee who works for a big company is entitled to compensation, why is not an employee who works for a company with only 1 or 2 employees? Is not his unemployment a matter of just as much distress as it would be to an employee who works for a big corporation?

Mr. Chairman, as I see it, the situation is such today that this legislation is entirely inadequate to meet the social thinking of the country and to meet the economic necessities. Why are we including in this measure, forcefully including, if we want to say so, all Federal employees? Because we recognize that when a Federal employee loses his position he is just as much in distress as a man who works for some big corporation. So we include him in this. But they object very, very strenuously to including employees when there are only 2 or 3 employees of a small business. From that standpoint, I do not think this bill is accomplishing nearly what the general public expects. I do not think it is coming anywhere near the recommendations of the President of the United States.

I know it will be broadcast over the land that the forward-looking program and the liberal program of the President takes another step forward, but this bill does nothing whatsoever. One of the main features of the bill is to permit reduction in taxation which goes toward building up these unemployment-compensation funds. It will be a great boon to some businesses, of course. That is a feature which, while I have no particular objection to it, I think some people would have, as was expressed by the gentleman from Wisconsin [Mr. BYRNES] a few minutes ago.

I think it is up to the Federal Government. We embarked on a step of practically compelling all the States of the Union to set minimum standards whereby unemployment compensation would be paid, and now because some of us want to go a little further and increase the minimum benefits there is great objection because we are supposed to be interfering with States rights. To me that does not seem logical at all.

The bill does a little bit of good, of course, by taking in Federal employees, but I cannot see any other benefits from the bill whatsoever. The situation with regard to unemployment is much more serious than most people realize. In the western Pennsylvania area there are great steel mills which have been operating for a number of years at practically 100 percent of capacity. But now, Mr. Chairman, they are operating at 59 percent of capacity, producing 40 percent less steel than they did a few years ago.

The unemployment situation in the Pittsburgh area is 7.9 percent. Thousands upon thousands of employees have practically exhausted their unemployment compensation benefits, thousands upon thousands are suffering loss in take-home pay by reason of working a less number of hours than 40 hours a week. The situation is much, much worse than it is portrayed by the morning newspapers, when a very Pollyanna statement was put out that there are more employees now than there have ever been in the history of this country. Of course, they fail to mention the fact that the population has increased. They fail to mention the fact that there are hundreds of thousands of boys and girls who have graduated from schools and who are now in the position of seeking employment. I might call attention, Mr. Chairman, to the fact that this Pollyanna statement just issued was taking in a period of the first 12 days in June. So it does not take into account the many, many hundreds of thousands of employables who graduated from schools since June 12. So I do not think they should be too happy about the employment situation. Of course, we see, Mr. Chairman, that the stock market is rising, hitting an all-time peak. Profits are getting greater and greater. The incentive for investing in stocks is getting greater and greater. But unemployment is getting greater and greater and hardship and distress is occurring. Fifty-nine areas of the country have been acknowledged and certified to by the President of the United States to be distress areas. What is a distress area? A distress area can mean only one thing, if we take into account the definition of what distress means. That means families including children and wives of workingmen are suffering distress. I am sure it is not because they do not have enough clothing. I think it is because they do not have enough to eat. So I think it is time for the Federal Government to step in and consider those things once and a while. I think this Congress is giving too much attention to the matter of seeing their profits are greater and is worrying too much that business will be taxed, and does not have enough regard to perhaps a reduction in taxes for those people who need a little spending money so as to bring about a greater circulation of money and increase the purchasing power of the great masses of the people. Piling up great fortunes in the hands of a few people is not going to make for the general prosperity and general welfare of this country. The businessmen right now—the small-business men are paying and paying heavily for the folly of many of their policies adopted during the last 2 years. Walk along the streets and talk to the businessmen who cater to the masses of employees and they will tell you how business is. They are not making any profits. They are losing money day after day, giving credit to people whose unemployment compensation has run out, and giving credit to people who are on relief. How are you going to have prosperity? We are not here in this Congress to legislate only for certain types of people and certain types of organizations. Our greatest concern should be the great masses of the people and not just a few.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Ohio [Mr. JENKINS].

Mr. JENKINS. Mr. Chairman, it is a well-recognized fact in our country that the problem of the workingmen, especially those who are ill or who have suffered accidents, has been taken care of and has been considered by the State governments and the Federal Government, and is a matter that should be taken care of. I remember many years ago in our great State of Ohio, we passed what we called the workmen's compensation law and that has proved to be very popular and very necessary. The Federal Government takes cognizance of this problem of unemployment under the unemployment compensation program. This program is a joint Federal-State undertaking.

Pursuant to recommendations made by the President for improvement in our unemployment compensation laws, the Committee on Ways and Means has made an extensive study of the matter. The result of that study is contained in this legislation which is before the House of Representatives today, H. R. 9709. This bill will make four improvements in our unemployment-insurance laws.

These improvements are: First, 1.3 million additional workers would be brought into the system through the extension of unemployment-insurance coverage to employers of 4 or more in 20 weeks. Present Federal law provides for coverage of employers of 8 or more in 20 weeks. I am proud to say that in our great State of Ohio we have for many years had a more far-reaching provision in that we have extended coverage to employers of 3 or more at any time.

The second improvement contained in H. R. 9709 is in the reduction from 3 years to 1 year of the experience-rating

principle to new or newly covered employers. This provision will mean that small business and new businesses will have the advantage of paying reduced tax rates where they have had a favorable employment experience in 1 year. Such business will not have to wait for the 3-year period before being eligible for this tax benefit. It should be pointed out that this reduction in the experience-rating period is optional with the States and merely extends to the States the privilege of taking advantage of this amendment.

The third important change has to do with the method of making tax payments under the program. Because of the expanded coverage it became administratively necessary to eliminate the present quarterly payments and to require annual Federal payments.

The fourth important change was an extension of unemployment insurance coverage to 2½ million Federal workers. A Federal worker out of a job is as much in need of unemployment insurance as a worker who has lost his job in industry. Therefore, the Committee on Ways and Means has deemed it appropriate to permit Federal workers to participate in the program.

These amendments are all proper prerogatives of the Federal Government. Suggestions have been made for Federal legislation to require increased benefit levels and extended periods of benefit payments. The Committee on Ways and Means rejected these proposals because they are matters appropriately within the scope of State determination. It has historically been the States' prerogative to set the minimum and maximum benefit amounts and to establish the duration of such benefit payments. H. R. 9709 would do nothing to deny to the States control over those aspects of the unemployment insurance which have traditionally been a matter of State determination.

I would like to commend my colleagues on the Committee on Ways and Means for this constructive legislation which is before the House today.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. GRANAHAN].

Mr. GRANAHAN. Mr. Chairman, a statement in the next to last paragraph of the minority report on this bill, signed by five of the Democratic members of the Committee on Ways and Means, should be painted on a big billboard outside the Capitol so that every Member of the House could read it every day while going to and from the Chamber. It might have some good effect.

It is this:

> This Congress is about to go home to face millions of unemployed workers. It will go with empty hands, so far as meeting their needs for unemployment-insurance payments adequate as to weekly amounts and number of weeks' duration. They have asked us for bread, paid for on insurance principles; we are about to give them a stone.

Mr. Chairman, in recent weeks we in the Philadelphia area have had the shock of having our city and the surrounding area declared a distressed area. Factory payrolls alone are nearly 8 percent below a year ago. Unemployment in our area is estimated at nearly 7 percent of the total labor force, and is double what it was a year ago.

This is not just for Philadelphia proper, but for Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties in Pennsylvania, and Burlington, Camden, and Gloucester Counties in New Jersey. This is the great Philadelphia metropolitan area—Greater Philadelphia—and it is a distressed area of substantial unemployment.

The unemployed in our area are largely people who have been working in the metalworking industries and in such other factory-type work as apparel, transportation equipment—ship, aircraft, motor vehicle and railroad production—in electrical machinery, textiles, and so on.

More than 17,000 have lost their jobs in the transportation equipment industry, 11,000 in apparel production, and thousands in the other industries.

An unemployment compensation bill—even an adequate bill of that nature—could not by itself solve this great employment problem. But an adequate bill could help to cushion the hardship and suffering which result from involuntary unemployment. This bill before the House today is far from adequate in that respect; actually, it does virtually nothing for the unemployed worker in the Philadelphia area.

It does not raise the present maximum benefits of $30 a week. It does not increase the present maximum duration of benefits of 26 weeks. For the average worker in my State, it does not do a single thing. It does not cover in a single additional non-Federal employee into the system, because we now have wider coverage in Pennsylvania than this inadequate bill proposes.

There is one thing and one thing only that this bill does for any unemployed Pennsylvanian. If he happens to be a Federal employee who has lost his job in a reduction-in-force, he can now be covered into the unemployment compensation system under this bill. That sounds fine, for we have had thousands of Federal employees discharged in the Philadelphia area in the last year and a half, in budget cuts; particularly at the Navy Yard. I have long been urging their inclusion under unemployment compensation.

But I would not advise any of those discharged Navy Yard workers or other Federal employees in my district to get excited too quickly about their prospect of collecting unemployment compensation under this bill. I would not advise them to order anything from the grocery store with a promise to pay it right away with an unemployment compensation check. For under this bill, the unemployed Federal employee will have to wait until next New Year's Day to begin collecting unemployment compensation benefits.

Many of them have been out of work for many months, using up their accrued annual leave, their contributions to the retirement fund which they had to draw out and spend for food and shelter, and then whatever other savings they had accumulated. After that, they went into debt. I do not see how they can hold out until next January 1 to begin collecting unemployment compensation, in case they still have not found employment.

I make this point, Mr. Chairman, because we are dealing with a situation in which workers—no matter how willing—in thousands of cases just cannot find employment. This is particularly true of some of our Federal employees who have spent a lifetime in the Federal career service and are now at an age where industry hesitates to employ them. It is most unfortunate for older women among them—they just cannot find new jobs.

If our economy were booming and new job opportunities were opening up, this would not be such a problem. But the evidence shows the job market in the Philadelphia area and elsewhere among major industrial centers has been shrinking, and with all the youngsters coming out of school and entering the labor force, the situation becomes worse.

I am deeply disappointed, Mr. Chairman, that the majority members of the House Ways and Means Committee refused to approve the bill introduced by Representative FORAND, of Rhode Island, and cosponsored by 85 of us on the Democratic side. As I informed the committee during hearings on that bill and the others which the committee considered, the Forand bill would mean substantially increased unemployment compensation benefits for our workers in the Philadelphia area—up to a top of $44 a week under present conditions, for a maximum of 39 weeks, instead of the present top of $30 a week for 26 weeks.

The Reed bill now before us, on the other hand, does not increase benefits a single cent or increase their duration in Pennsylvania by so much as a single day.

I will support the amendment proposed by Mr. FORAND to this bill to increase benefits along the lines of the formula originally suggested by President Eisenhower in his plea to the individual States—a plea which none of the States has heeded and which the Republican members of the Ways and Means Committee refused to write into this bill. From the temperament of the Republicans in the House, however, it looks very much as if the Forand amendment will fail. If it does, then each Republican Member of this House, as he prepares to go home to campaign for reelection, should remember the words of the minority report on this bill—the words I cited at the start of my talk, that—

> This Congress is about to go home to face millions of unemployed workers. It will go with empty hands, so far as meeting their needs for unemployment insurance payments adequate as to weekly amounts and number of weeks' duration.

Mr. COOPER. Mr. Chairman, I ask unanimous consent that all Members who desire to do so may extend their remarks at this point in the RECORD on this bill.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RODINO. Mr. Chairman, within the last 6 months Congress has noted

with ever growing concern the increasing magnitude of unemployment in these United States. If we are, as statistics seem to show, in the first phases of a recession, we must immediately take steps to assure ourselves that the recession does not automatically turn into a depression and wreck the country on the shoals of economic disaster. Surely, as men on whom the economic destiny of the country has been placed, we have learned sufficient lessons from the past 30 years to avoid that hazard.

Unemployment is not, at this time, a theoretical threat. It is a real and present danger. As of early May, 3,305,000 of the labor force were out of work. The Chairman of the Economic Advisors of the President, Mr. Burns, has indicated just how serious this figure is when he said:

> A level of unemployment which exceeds two or two and a half million is something to be taken very seriously by the Government and the country.

H. R. 9430 is a serious consideration of this problem. It gives due recognition to the fact that unemployment is governed by nationwide economic forces, and should be realt with on a nationwide basis. If we do not take up this matter, if we rely on local responsibility, we shall develop the same bottleneck of labor mobility that the Elizabethan poor laws created, where every laborer, in order to receive benefits, had to stick closely to the parish in which he was inscribed. We are an industrial nation, dependent on labor mobility. We would be the laughing stock of the world, if we borrowed a page from an era that even Adam Smith decried as blocking progress in the 18th century.

According to statistics available as of June 19, 1954, the national average for insured unemployed drawing payments is 5.4 percent for the Nation. At the same time it was 6.3 percent for the State of New Jersey, which is above the national average. This does not include those who have exhausted their benefits, or those who are unemployed but not covered by unemployment insurance. As of May 1954, the city of Newark was in class III, showing a slight labor surplus, chiefly in the fields of electrical machinery, transportation, and shipbuilding. Throughout the Nation there are 51 major areas with anywhere from 6 to 12 percent of unemployment, that is in class IV denoting substantial or very substantial labor surplus.

Percentages are cold figures. What these percentages mean in actual round numbers are such totals as 2,213,000 insured unemployed in the last week of February, and 2,174,000 in March. One hundred and fifty thousand of these benefit claimants exhausted their benefits in March 1954, and to this must be added the 351,000 who had exhausted their benefits previous to that month. We arrive at a figure of those not receiving any compensation that edges above one-half million. Most of these major layoffs were in the mining, manufacturing, and so forth, industries, primary industries, whose slowdowns or shutdowns affect the whole economic tempo of the Nation.

Moreover, as the public members of the Committee on Intergovernmental Relations of the Federal Advisory Council point out:

> Some of the major concerns of the Federal Government in this field seem to be: (1) The instrument of unemployment insurance has become the accepted first line of defense against loss of income due to unemployment and provision should be made that it will be so used in all parts of the country. (2) The investment and liquidation of sizable unemployment insurance reserve funds has a significant impact upon the functioning of the banking system, the security markets, and the fiscal policies of the National Government.

H. R. 9430 is intended as the integrated answer to this problem of unemployment insurance. It also represents the culmination of a total economic program. The House of Representatives in passing the revision of the Social Security Act on June 21, 1954, provided for that segment of the working population which is retired, or some day will retire. It thereby showed intelligent concern for the purchasing power of those no longer in the labor force. Further, Congress has shown its concern with the purchasing power of farm income in passing Public Law 312, which increased the borrowing power of the Commodity Credit Corporation to enable the Corporation to maintain the price-support program entrusted to it. In addition, the Congress is sympathetically considering a further increase in the CCC's borrowing power.

Can we pass such laws and then act as though we had no realization of the necessity of keeping up the purchasing power of the unemployed? Unless we do so, we are going to be in the disastrous and ridiculous position of being a master architect of a two-legged stool. For without improvements to the unemployment compensation system that is all we are.

In taking action on unemployment compensation along lines indicated in H. R. 9430, the Congress provides itself with an unparalleled chance to complete the work already well begun. This bill affords us an opportunity to provide adequate benefits to those members of the labor force faced with a break in their employment record.

I put my emphasis on the word "adequate." And in line with that objective I urge the Congress to pass H. R. 9430, the only bill which has a comprehensive program of strengthening the whole unemployment compensation system. Moreover, in addition to the 86 congressional cosponsors of the bill, persons of good will and interest, particularly those who represent the laboring class, have expressed their approval of its provisions.

One aspect of the situation that must be pointed out, is that we are faced with this problem not on grounds that there are not enough funds in most States, but because of the great reluctance of the States, in economic competition with each other, to be too liberal with their reserves. These reserves have reached a level of almost $9 billion at the end of 1953. Yet only about $1 out of each $3 in lost wages and salaries is being replaced by unemployment-insurance payments. This is not sufficient to ease substantially the impact of unemployment and to avoid its repercussion on the economy of the country as a whole, and particularly in local communities where there is substantial unemployment. A small slump will so greatly impair buying power that ever expanding circles of unemployment will follow. The importance of properly providing aid during this transition period cannot be too emphatically stressed.

The President of the United States has stated:

> Unemployment insurance is a valuable first line of defense against recession. * * * But even as a first defense the system needs reinforcement.

H. R. 9430 provides this needed reinforcement. The Congress has the duty and the responsibility of bringing about these improvements by establishing minimum standards for size of weekly payments, duration of payments, disqualifications and financing. Only by such action can the system be made adequate to carry out its intended purpose of providing basic protection to unemployed workers.

H. R. 9430 proposes three things, each of them simple; each of them of paramount importance for the accomplishment of a genuinely workable system of unemployment insurance. First of all, it would extend unemployment compensation to new categories of workers; secondly, it would set minimum standards with respect to the conditions under which such compensation will be paid as well as to the amount and duration of such compensation; and thirdly, it will make other overall improvements in the structure and administration of the unemployment compensation system. Let us look at each of these in turn:

First. New categories of workers will be brought under the unemployment compensation provisions.

The definition of "employee" is changed to make various persons outside the common-law relationship of employer and employee which presently prevails come within the definition. In fact, the definition is the same as that used in the OASI provisions of the Social Security Act and covers persons who would formerly have had the status of independent contractors because they were employed as agent-drivers, or commission-drivers, full-time life insurance salesmen, persons working according to specifications of an employer but within their own homes, or traveling or city salesmen engaged in full-time solicitation business. The only exceptions are those individuals who have a substantial investment in the facilities used in connection with the performance of services, or persons performing services which are in the nature of a single transaction.

The definition of "employer" is enlarged to include persons having at any time during the taxable year one or more individuals in employment. First of all, this concept of "at any time" does not mean every casual employee who comes along. The act expressly excludes from the concept of employment people who

are not in the regular trade or business of the employer. This means, that to be subject to tax as an employer, you have to be in a trade or business or employ a worker for at least 26 days out of the quarter and pay him at least $50 in that period. The provision will aid in preventing an easy kind of fraud which is carried on at the present time, and that is where an employee receiving unemployment compensation because of separation from a covered job takes a job that is not under unemployment insurance and receives both incomes. Only an extensive, and expensive, field survey can uncover this. With all employers reporting, an easier check could be made and a psychological block erected that would stop many people from trying the scheme.

All these improvements are both realistic and helpful. Do you realize that unemployment insurance covers only about two-thirds of the employees in this country? The fact that the other third is not covered does not mean that they are always employed. In fact, they are in a worse situation than those covered by insurance. When the law was enacted in 1935, the figure 8, as the determining number for covered employment was chosen as a sort of compromise to get the thing started. It was expected to be changed soon. Well, it has not been changed in the years from 1935 to 1953. The body on this insurance jalopy is just the same as it was then. We put a great experiment on the road and let it run on in model T style over 18 years. It does not seem American. It does not make sense. The American way is to improve with time, to make the good things of life available to more and more. Beyond that, commonsense should tell us that having possibly one-third of our employees not covered by insurance leaves us in an exceedingly vulnerable position, economically speaking. For the fall in their buying power, resulting from their being unemployed, is total. The covered employees experience only a partial failure of buying power. Surely, if partial failure is harmful, total failure must be disastrous. The Under Secretary of Labor, Mr. Larson, has stated it succinctly:

> If unemployment insurance is really a good thing for two-thirds of the workers of this country, is it not just that much better a thing for as many more as you can possibly cover administratively?

This piecemeal procedure that we are laboring under at present is liable to produce something we have never yet had in America, and, please God, never will have, and that is first- and second-class workers. But if some employees are covered by insurance and others, whom we could feasibly cover, are left out, what else do you expect? Do you think one family man working for his family has less pride than another? Why do we condemn the one to seek relief then, when he is out of employment, while the other is able to draw unemployment insurance? It is not a just method, and it will leave scars on the minds of those who are discriminated against. If such people turn against Congress because of its gross lack of interest in their well-being, can we blame them?

Second. Minimum standards have been set (a) with respect to the amount and duration of such compensation, and (b) with respect to the conditions under which entitlement accrues.

The responsibility for setting minimum standards for unemployment compensation is definitely on the Federal Government. We cannot agree that the responsibility should be passed on to the States. The competitive aspect among the States both as to the maximum payment amounts, and the tax rates, is too keen. On February 16 of this year, President Eisenhower and his Secretary of Labor, Mr. Mitchell, urged the States to adopt certain minimum standards. To date, only Michigan of the 26 States not having 26 weeks' coverage has acted to meet the President's suggestion and extended its coverage period to 26 weeks. Now, as most of the legislatures of the remaining States have adjourned, no further action is probable. The only way, then, that we can handle the situation, is for the Federal Government to set the standards. Then everyone moves forward together, and there is no competitive disadvantage in tax or anything else. Undoubtedly the States are sympathetic to our suggestions. In fact, 32 of them, by express statement in their own unemployment compensation acts, stand ready to make an automatic extension of coverage at any time that the Federal law requires it.

What minimum standards are we proposing?

First, the maximum benefit under State laws would be not less than 66⅔ percent of the State's average weekly wage. Subject to this maximum, each individual's benefit would be not less than 50 percent of his weekly wages. The average weekly benefit now ranges from $20 to $35. The suggested change in the law would increase this basic amount. With present day prices, this is a needed improvement. Benefits have lagged seriously behind average weekly wage. Since 1935 wages have tripled while the ceilings on weekly benefit payments have hardly doubled. When the unemployment act was passed in 1935, benefits averaged approximately 50 percent of wages. They trail far behind at the present time. The formula, also, is flexible to the base and would prevent such divergency in the future, since an annual revision as of July 1 each year is to be made by the States.

Unemployment compensation is to continue where necessary up to 39 weeks during the benefit year, whether or not there is an exhaustion or reduction of benefit rights or a cancellation of wage credits. This longer duration of the benefit is necessary because, as pointed out in the economic report of the President, the more unemployment increases in amount, the longer it lasts for an individual.

The individual receiving unemployment compensation shall be qualified when he has received during his base period, in accordance with applicable State regulations, either compensation in excess of 30 times the amount of his weekly unemployment compensation, or if his qualification is based on his quarter wages, more than 1½ the amount of such high-quarter wages, or, if the qualification is based on weeks of employment, more than 20 weeks of work in his base period.

One other major point of clarification for the benefit of the workers is the question of disqualification. The States are permitted to set their own standards for this at the present time, and, as a consequence, many of them have set so many disqualifying conditions that they have seriously hampered the purpose of unemployment insurance. Under H. R. 9430, this could not happen. Once persons have come within the scope of the definition of insured worker and are eligible for unemployment compensation because of cessation of work, the State may deny compensation only for the following reasons:

First. The person left his job without good cause or was discharged for misconduct, in such instance the ineligibility may not continue more than 4 weeks.

Second. The person left his job due to a strike which occurred for reasons other than the failure or refusal of the employer to conform to Federal or State collective-bargaining laws, or to maintain for the employees wage rates and other conditions of work equivalent to those prevailing for similar work in the locality. Unemployment compensation may also be disallowed: (a) For the first week of unemployment; (b) for a period not in excess of 12 weeks immediately following the week in which the employee has been found, after a fair hearing, to have obtained compensation by fraud; or (c) for any week in which the person is unable to work or is unavailable for suitable work. In determining whether the work offered is suitable, there shall be taken into consideration the person's capacities, and whether or not the work available is in any place subject to a labor disagreement, paying substandard wages, or would jeopardize his union membership or require him to join a company union.

Third. H. R. 9430 makes other major structural improvements to the unemployment insurance system.

It provides for coverage of all the unemployment taxes into the Federal Unemployment Account. Against this are to be charged all funds for administration of the State laws including contingency amounts which are to be expended only in instances where the Secretary of Labor finds that changes in economic conditions in a State have increased its expenditures in conjunction with the administration of the unemployment compensation laws.

It provides for reinsurance grants to States with unexpectedly severe unemployment. These are to aid such a State in making adequate payment to its unemployed workers without compelling it to raise the level of taxes on industries in the area which are still meeting a payroll. Reinsurance grants will prevent the out-migration of industries which would otherwise be subject to a tax rate that would place them in a burdensome competitive status with industries in other States. These reinsurance grants will be just that, outright grants, and the

States will not be liable to repay them. They are, however, dependent upon meeting the following conditions: In 1955, a State will be certified for a reinsurance grant where the balance remaining in the State compensation fund is less than the amount of compensation paid from such fund during the 6 month period just preceding; for the period 1956 to 1961, the grant will be given where such remaining balance was equal to less than 6 percent of the most recent annual taxable payroll, or less than the amount paid from the compensation fund for the 2 years preceding such date; and for years after 1961, the grant will be made where the State's remaining balance is less than 6 percent of the most recent annual taxable payroll, or less than the amount paid from the compensation fund during the 5 years preceding such date. In the last two cases, the State must have been levying a tax at a minimum rate of 1.2 percent. The grant will be three-fourths of any excess over 2 percent of the taxable payroll for the quarter in which it is made.

Another major structural improvement is to allow the States greater leeway in granting rate reductions in payroll taxes. They can do it, under H. R. 9430, either by the present practice of lowering rates on an individual employer's experience rating, but basing it on 1 year instead of 3, or by a uniform reduction in the levy on all employers.

The advantage of this will be to prevent the unemployment insurance tax from being a burden to employers just starting in business, or to the small employers brought under the act as having one or more employees in their business at any time. Payroll costs are, on the average, 10 percent of the cost of doing business. The unemployment tax at its full rate is 3 percent of this 10 percent. When proper reductions, with the additional credits against tax which they allow, are provided for employers, the adjusted tax rate will be about one and one-half tenths of 1 percent in added costs. This adjustment will ease the imposition of the tax on new categories of employers.

Finally, H. R. 9430 provides that during the interim period before July 1, 1955, before the States have adjusted their laws to conform to the requirements outlined above, any State which wishes to increase its benefits in accordance with the substantive provisions hereof, may enter into an agreement with the Federal Government to receive such additional required amounts as are necessary to accomplish this purpose from the Federal Government. The Secretary of Labor shall make such sums available either in advance upon estimates, or by way of reimbursement to the State for amounts so spent.

H. R. 9430 is the only practical way to implement President Eisenhower's recommendations that payments be increased in amount. It is not a question of partisan politics; it is a question of justice. Let us render justice to those millions of men and women who have paid for it and have every right to it. Let us enact H. R. 9430 and provide an adequate solution to the problems of unemployment insurance confronting us today.

Mr. BYRNE of Pennsylvania. Mr. Chairman, the unemployment compensation program which is before the House of Representatives today represents another milestone in the history of social legislation in this country. It closes a gap which has been open much too long by making eligible for unemployment compensation all civilian Federal employees. Certainly, our Government workers are as well deserving of these benefits as are workers in private industry throughout the country. I am very pleased that the Congress has seen fit to take this action.

It must be pointed out, however, that the present bill leaves something to be desired. The gentleman from Rhode Island, Congressman FORAND, recently introduced legislation, of which I am a cosponsor, which would be more comprehensive than the bill we are presently considering. Unfortunately, the Committee on Ways and Means did not report it out. Mr. FORAND has, therefore, offered on the floor of the House two amendments to the legislation before us and I am proud to be able to give them my wholehearted support. These amendments would provide for unemployment compensation coverage for 26 weeks and would give unemployed persons benefits equal to an amount from 50 percent to 66⅔ percent of the salaries they received while working. It is well known that payments presently being received by unemployed persons are inadequate for maintenance of a decent and just standard of living. I feel that the Forand amendments are vitally necessary and will be well received by all persons who will be affected by this legislation.

An unemployment compensation program is extremely important to my constituents in Philadelphia. I am personally aware of the situation there and very anxious that something be done to alleviate the distressing conditions which are resulting from the increasing numbers of unemployed. It is worth noting that a great proportion of these people were Federal employees. When the cutback in Federal defense contracts took place, their jobs were abolished and they were released. This legislation would be a welcome boon to them as well as to the many others in Philadelphia who are now without work.

It is my sincere wish that this bill become law as soon as possible and I shall continue my efforts in its behalf.

Mrs. BUCHANAN. Mr. Chairman, I rise in support of the amendments offered by the gentleman from Rhode Island [Mr. FORAND].

Without these amendments the present bill is completely inadequate and utterly fails to meet the openly admitted need for higher unemployment benefits and a longer duration for benefits.

I come from a district in which this problem of unemployment is a critical one. Last month the Labor Department announced that Pittsburgh was one of the 31 industrial centers that have been added to the list of areas of substantial unemployment—those having 6 percent to 12 percent of the available labor force unemployed. And a release from the Pennsylvania State Employment Service under date of June 19, 1954 states that 78,000 persons, or 8.3 percent of the total labor force in the Pittsburgh labor market area, were out of jobs during the month of May. Mr. Chairman, I say that the Members of this House, faced with this ugly reality of serious unemployment and its consequences in human tragedy and suffering, should vote for the pending amendments and assume the necessary responsibilities in the vital field of unemployment compensation.

The pending bill places on the States the responsibility to make the obviously needed improvements in the unemployment insurance program. This is a clear evasion of our responsibility in this field.

May I call your attention to the fact that during the year 1953 only eight States amended the provisions of their unemployment insurance laws governing the maximum length of benefit payments. Could there be any clearer proof of the fact that this cannot be left to the States and that the responsibility is here with us?

Mr. Chairman, as a woman, as one who knows what it is to be a housewife, I plead that for a few moments we think of the plight of those unfortunate families forced to exist on the maximum weekly benefit of $30—the plight faced by the families of those 78,000 unemployed in the Pittsburgh labor market. And these benefits, Mr. Chairman, run out after 26 weeks. Is it any wonder that the great majority of those workers are exhausting their benefits before they can find jobs and are forced to rely upon surplus food allotments to even exist?

Let us assume our responsibility to the millions of unemployed workers in America by adopting the amendments offered by the gentleman from Rhode Island.

Mr. STRINGFELLOW. Mr. Chairman, I wish to voice my support of the provisions of H. R. 9709 which would extend unemployment insurance protection to the approximately 2,500,000 civil employees of the Federal Government. By some strange quirk of fate or complete legislative oversight, we have for many years required private employers to provide unemployment compensation benefits for their employees but the Federal Government has not been so beneficent to its own employees.

During the period of rapid expansion caused by World War II and later the Korean conflict, Federal employment was constantly climbing and the need for unemployment coverage for civil-service workers was negligible. With the end of actual hostilities and by virtue of the fact that our Republican administration has been able to reduce the number of civil servants without any appreciable loss of services or benefits to the people of our country, the number of unemployed civil-service workers has continued to spiral upward. For instance in my own State of Utah while private employment has been steadily increasing, the number of Utahans employed by the Federal Government has steadily declined by several thousand.

Fortunately for us in Utah private employment has been able to provide jobs for most of the Federal workers who have received reduction-in-force notices from our defense installations and other Government agencies. However, there is always a period of transition and adjustment required in shifting from one job to another and many Federal workers have been caught in the financial bind created when their jobs were suddenly abolished.

I am frankly of the opinion that we owe a responsibility to our career Federal employees just as much as private employers do to their workers to provide unemployment compensation to help weather the storm in this period of readjustment.

This administration was elected on a platform which promised a reduction in the number of needless Government agencies and elimination of duplication and waste in Federal functions. It is my conviction that in the year and a half the Republicans have been in power we have accomplished a great deal in abolishing thousands of Federal jobs, at a savings of billions to our taxpayers. But we have an obligation to wield our economy ax with prudence and foresight, and not to make displaced civil servants wards of the State or pawns of charitable institutions.

We can accomplish our objectives of providing both opportunity and a measure of security for Federal workers by giving them the reassurance and peace of mind created by a workable self-sustaining system of unemployment compensation. I have always been a stanch defender of States' rights, and any system of unemployment coverage we adopt for Federal workers should take State programs into account and should give full cognizance to the fact that States should have wide discretionary powers in the administration of such a program.

This view is amply supported by the industrial commission in the State of Utah in a letter I received just today. In this letter Chairman Otto A. Wiesley informed me that the advisory council of the department of employment security of the Industrial Commission of Utah resolved its position as follows:

> If a Federal program is enacted for the purpose of providing unemployment insurance to Federal workers, such a program should be devised as to fit the economy of each respective State * * * and should be administered under State standards and coordinated with State programs.

It is my sincere hope that Congress will approve H. R. 9709, and especially those provisions which recognize the unemployment problem of that oft-forgotten segment of our economy, the Federal worker.

Mr. SPRINGER. Mr. Chairman, I am glad to support H. R. 9709. This bill extends the unemployment-insurance system to almost 4 million workers to whom this protection is not available today. This bill provides the first major extension of the unemployment-insurance system since its inception in 1935. All of this is a part of a broad program to bring our social-security system to maturity. In my opinion, one of the most important provisions of the act relates to the provision for unemployment compensation for Federal employees, including postal employees. In his Economic Report, the President several months ago said:

> A worker laid off by a Government agency gets no insurance benefits despite the fact that in many types of Federal jobs he is as vulnerable to layoff or dismissal as the factory worker. It is recommended that Congress include in the insurance system the 2.5 million Federal civilian employees, under conditions set by the States in which they last worked, and that it provide for Federal reimbursement to the State of the amount of the cost, estimated to be about $25 million for the fiscal year ending in 1955.

H. R. 9709 carries out this recommendation. It has been common knowledge that Federal civilian employees as a group are subject to the risk of unemployment on nearly the same scale as nongovernmental workers in the same type of work. In recent years, particularly, several extensive reductions in Federal personnel have demonstrated the real need for extending unemployment benefits to Federal employees. From a wartime peak of well over 3½ million employees in June 1945, Federal employment dropped by a million between 1945 and 1946, and dropped considerably more in the next few years, leveling off at about 2 million in June 1950. After a new increase due to the Korean conflict, Federal employment again fell off by 247,000 between June 1952 and December 31, 1953.

Total annual separations of Federal employees are substantial. They have approximated around one-half million each year over a period of several years. The percentage which constitutes reductions in force and termination of temporary assignments has varied from approximately 17 to 50 percent of total separations. I do believe that the Federal Government should not be in the position of providing less favorable conditions of employment than are required of private employers. Yet, since Federal employees have no unemployment-insurance protection, Federal employees have been forced to rely upon accrued annual leave and refunds from their retirement accounts while looking for other jobs. There is considerable evidence that even where this leave has been accrued, it has in most instances been inadequate to cover the duration of Federal workers' unemployment. In addition to this, it seems to me that the withdrawal of an employee's retirement-fund accumulation is undesirable and defeats the purpose of the retirement program.

A Federal worker's right to benefits will be determined under the unemployment compensation law to the State to which his Federal services and wages are assigned. Usually, this will be in the State in which the worker had his official station when he became unemployed, or if he has been in Foreign Service, the State in which he resides when he files his claim. In fairness to the Government and to the taxpayer, compensation will not be paid for the period with respect to which accrued annual leave is paid upon separation.

This law will greatly relieve the discrimination that has been practiced by the Federal Government against its Federal civilian employees. To even the casual observer, it must be apparent that the law up until this time has been geared to nongovernmental workers. The purpose of the change today is to assure all of our citizens that they will be equally covered should they be so unfortunate as to become unemployed. This is only a fair and reasonable change that is made in the law. I believe every thinking citizen will agree that this change is in the best interest of the country.

Mr. MACHROWICZ. Mr. Chairman, I regret exceedingly that the House Rules Committee, in acting on this important legislation, has seen fit to grant a closed rule, limiting debate on the Forand amendments to a mere five minutes to each side. Surely such an important matter as unemployment compensation deserves greater attention from us and members should not be precluded from fully expressing their opinions.

I am in full support of both Forand amendments. Since they embody the recommendations made by President Eisenhower, it is noteworthy that the Republican majority of the Committee on Ways and Means refused to include them in their bill. It will be interesting to note how the Republicans in the House will support by action their avowed support for the President's program.

Certainly we all agree that unemployment compensation payments are now entirely inadequate and their duration too short. The Forand amendments would increase the minimum benefit to 50 percent of the individual's weekly wages and increase the duration of the benefits to a period of 39 weeks.

My congressional district has been hit very hard by the recent recession. Despite rosy statistics, the cold facts are that the residents of my district still suffer great unemployment and the hardships that go with it as a result of inadequacies in the present laws.

We can no longer afford to ignore the plight of those thousands who have exhausted their unemployment compensation benefits. We must bring the benefits up to an amount which would enable the unemployed to live on at least a minimum fair living standard. Unless we do that, we are not keeping faith with the people of this country.

Mr. FOGARTY. Mr. Chairman, in connection with today's debate on a vital legislative proposal dealing with the question of unemployment, the shocking fact must be stressed that there is a dangerous lack of authoritative and unbiased data on the actual unemployment situation. Moreover, a well organized and systematic effort has been waged by the press and radio for months now to induce the average man to misread and misinterpret such facts as are available on the extent and the severity of the unemployment problem.

It is not my purpose today to present an analysis of the overall facts about unemployment. I shall, however, give

you a crop of verifiable facts about one vitally important section of our economy about which I have necessarily been obliged to study. I refer to the current status of the textile industry. This is an industry which up until about 2 years ago employed probably more persons than any other single basic industry.

There may be some doubts about what is happening in other industries, but there can be no question about what is happening in textiles.

And if any member of this body were to seriously and with an open mind study the tragic facts about textiles, he or she would only conclude that adoption of amendments such as are proposed by Representative FORAND are absolutely and imperatively necessary and thoroughly justified.

Let me stress this simple fact at the outset of my talk. That it may be possible to hoodwink some people into believing that some industries which now are suffering from unemployment will recover quickly and substantially. That is not the case with textiles. Even if the entire economy should recover, textiles will remain depressed and thousands upon thousands of the workers who depend upon this type of manufacture for their living will still not have jobs.

Let us look at the facts.

H. R. 9430 has been introduced by Representative AIME J. FORAND and by almost 90 other Members of the House of Representatives.

I advocate passage of H. R. 9430 both as a very necessary prop for our total economy during this period of mounting unemployment and as a long-delayed measure of social justice. In addition, I would like to point out that there would be a very special value to the roughly 1 million textile workers scattered in some 30 States who have been suffering in varying degrees, depending on the particuar branch of the industry, from a steadily contracting demand for the products which their plants manufacture.

It is not appropriate in this statement to attempt to set forth in any detail the whole range of the problems of the textile industry. I shall merely refer to certain aspects of these difficulties which illustrate the need for prompt improvement both of the average amount of unemployment benefits and on increase in the number of weeks which the unemployed worker may be paid these benefits.

For instance, one important branch of the textiles is suffering critically and simultaneously from a contraction in the demand for its products plus the institution of sweeping technological changes which drastically reduce the number of employees needed to produce a given volume of goods.

Let me call the attention of the Congress to the situation in the rayon section of the textile industry.

In Cumberland, Md., there is a synthetic fiber plant which when first established probably employed a greater number of men and women in one location than any other mill of its kind in the country. Five years ago, this establishment employed a force of 8,000. Today, after new processes have been installed the plan can produce as much, if not more, than it did 5 years ago with a work force of 4,000 or half of the number employed before the most recent technical changes were made.

Textile production declined in the second quarter of 1952 to 78 percent of the first quarter's volume. Man-hours of work shrunk almost as much though employment dropped only 12 percent, since about half the adjustment came through reduction in hours. There was a pickup at the end of 1952 which touched its height in the first half of 1953, when production reached 90 percent of the first quarter of 1951. The rise in man-hours was only slightly less and employment was at about 93 percent of the 1951 level. But the recovery faltered and production declined through the last half of 1953 to 80 percent of the 1951 first quarter. By the end of 1953 employment had dropped more than total man-hours; employment was about 4 percent below the second quarter of 1952 but man-hours were about equal. The overall contraction in production, accompanied by many mill closings, has therefore begun to reflect itself sharply in complete liquidation of textile mill jobs.

Thus the textile industry was operating at a low level at a time when output in other major industries was slowed only by material shortages or other production bottlenecks. In addition, the textile industry had failed to share equally in the growth of consumer demand stemming from the high level of economic prosperity. From 1939 through 1953 our physical national product doubled and the consumer actually enjoyed 70 percent more in services and goods, but the increase in textile yardage was only about 30 percent.

While the total number of workers actually employed in the Nation rose from 45.8 million in 1939 to 62 million in 1953—an increase of 35 percent—the number actually employed in the textile industry dropped by 3 percent, with workers averaging less than 40 hours a week.

As in the 1920's, the textile industry was sick while the rest of the economy flourished. Government, management, and the public, unfortunately, remained oblivious to the fact that this was a harbinger of more far-reaching economic difficulties.

I am not trying to be an alarmist, but I think I would be shirking my responsibility if I failed to call to the attention of the Members of the House certain basic facts which should give us pause. I have always been confident of the future, but I have always been fearful that we can be so blindly confident that we shall fail to take the necessary steps to avoid a development which might well grow to the proportions of a catastrophe.

I have some pertinent statistical information which I wish you would consider. These statistics contain much food for serious thought.

COTTON HAS RECOVERED PART OF THE MARKET PREVIOUSLY LOST TO RAYON

Spinners and weavers of wool, rayon, and acetate have all suffered from the inroads of the new fibers. Although there is no assurance that they will hold their present position, they have seriously upset the industry, especially the older branches, and discouraged consumer buying. Cotton, on the other hand, has recovered part of the market it had previously lost to rayon and acetate.

Percentage distribution of fiber consumption

	1946	1950	1952
Man-made fibers:			
Rayon and acetate	13.5	19.8	18.9
Other	.9	2.1	4.0
Cotton	74.1	68.5	69.6
Wool	11.4	9.5	7.4
Silk	.1	.1	.1
Total	100.0	100.0	100.0

In addition to the displacement of natural fibers by synthetics, the textile industry has suffered from the substitution of nontextiles in various household and industrial uses. Plastic film has made major inroads in the upholstery fabric market and in automobile seat covering and door paneling. When added to the earlier displacement in window and shower curtains and tablecloths, these developments assume major importance.

WOOLEN AND WORSTEDS IN BAD SHAPE

Failure of the woolen and worsted branch of the industry to protect its competitive position stands in marked contrast to the success of the cotton interests in improving their styling, finishing, and merchandising. With Government aid in studying the properties of cotton and its potential uses, growers, and manufacturers cooperated in developing new processes and staging an effective promotion campaign. Research is needed in the wool field to improve its qualities with respect to shrinkage and mothproofing. Fabric design has lagged behind the times as domestic mills generally gave up the initiative to foreign producers. While many woolens have been styled to meet the shift in consumer preference toward casual wear worsteds have not yet been adequately adapted to this trend. Many mills are also unable to compete because of obsolete plant and equipment. The woolen and worsted industry will have to bestir itself to meet the growing challenge of the newer synthetics. Creative answers must be forthcoming to the problems posed by product design, technology, merchandising, and sales promotion.

MILL LIQUIDATIONS

The rate of mill liquidations increased substantially in the last 2 years, leaving a train of ghost towns and some 50,000 jobless workers. Management deficiencies which had been glossed over in the textile booms that followed World War II and the Korean war were glaringly exposed by intensified competition. Companies whose stockholders enjoyed a bonanza in dividends from highly profitable operations in 1946–48 and 1950–51 found that their failure to plow back sufficient funds to modernize plant and equipment left them at a serious disadvantage in

1952–53. The necessity of cutting costs posed financial problems for which they had not prepared themselves and many mills were forced out of business.

DROP IN MAN-HOURS WORKED OVER 28 PERCENT

Mr. Chairman, permit me to offer herewith a very recent statistical compilation showing levels of employment and weekly man-hours worked in 23 principal textile States. This compilation gives the figures on employment in the industry at about the high point in February 1951 as contrasted with the situation in April 1954. I can say definitely that since April the drop in employment has continued.

According to these data, there has been a reduction of employment in textiles in the United States between February 1951 and April 1954 of 21.2 percent. The drop in average weekly man-hours in that same period has been even more severe. The decline in man-hours is 28.2 percent.

Although the economic blight which has overtaken textiles is nationwide, it is painfully clear that certain geographical areas are suffering much worse than others. The fact that the drop in employment and man-hours worked in the six New England States has been so severe is no doubt due largely to the fact that so large a proportion of the woolen and worsted mills of the country are located in that region. The woolen and worsted section by and large is the most badly hit portion of the industry and the type of manufacture which has experienced the most prolonged difficulties.

In the New England States employment has dropped 39.7 percent between February 1951 and April 1954, while man-hours worked have been cut 44.2 percent.

In the 9 most important textile-producing States in the Southeast there has been an 8.5 percent drop in employment between February 1951 and April 1954, while the man-hours worked have been reduced in the same period 18.3 percent.

The table is herewith reproduced in full:

Employment and average weekly man-hours in the textile mill products industry by State, February 1951 and April 1954

State	Employment (wage and salary workers)			Average weekly man-hours		
	February 1951	April 1954	Percent change	February 1951	April 1954	Percent change
United States [1]	*Thousand* 1,365	*Thousand* 1,075	−21.2	*Thousand* 55,692	*Thousand* 39,775	−28.6
New England [2]	286.1	172.4	−39.7	10,268	5,728	−44.2
Maine	27.5	19.8	−28.0	(3)	(3)

[2] Maine and Vermont are not included in man-hour data because they are not available.
[3] Not available.
[4] Employment and man-hour area totals are for those States for which data are available. Maryland and Louisiana, which are included in employment totals are excluded from man-hour totals because data are not available.
[5] April 1954 figures are not available. Figures shown are for March 1954.
[6] Employment and man-hour totals are for those States for which such data are available.
[7] Area totals are for California, the only Far West State which reports such data.

Source: State Departments of Labor and U. S. Bureau of Labor Statistics.

One other statistical table which I believe to be of considerable importance in this connection is one which illustrates the wide variations in the different States in the average contribution rate for unemployment insurance in the textile industry. I have used the latest data available in each case. Whereas in Rhode Island the rate was 2.7 percent, in such competing States as Alabama, Georgia, and South Carolina, average employer contribution rates were respectively 1.02 percent, 1.21 percent, and 1.23 percent in 1952:

Average contribution rates for unemployment insurance in the textile mill products industry

State	Period	Average contribution rate (contributions as a percentage of taxable wages)	Textile taxable wages as percentage of State total
Alabama	1952	1.02	11.51
Arizona	1951	2.73	.02
Colorado	1951 and 1952	1.54	.06
Connecticut	1952	2.19	4.98
Delaware	1952	.85	2.97
Florida	1951 and 1952	1.60	.06
Georgia	1952	1.21	18.90
Indiana	1951 and 1952	.73	.45
Iowa	1951 and 1952	.50	.29
Kansas	1951 and 1952	.97	.01
Kentucky	1952	1.41	.63
Maine	1952	1.91	15.18
Maryland	1951 and 1952	1.99	1.84
Massachusetts	1952	2.70	6.88
Minnesota	1952	.73	.62
Missouri	1951 and 1952	1.32	.33
New Hampshire	1953	2.38	13.59
New Jersey	1952	1.81	4.06
North Carolina	1952	1.51	33.86
Oklahoma	1951 and 1952	1.65	.36
Pennsylvania	1952	1.34	3.88
Rhode Island	1952	2.70	23.74
South Carolina	1952	1.23	38.61
Tennessee	1952	1.84	6.62
Utah	1951 and 1952	.86	.25
Vermont	1953	2.38	5.92
Virginia	1953	.96	7.31
Washington	1951 and 1952	1.63	.10

Source: U. S. Bureau of Employment Security; from table published on p. 111 of Senate Finance Committee hearings on Employment Security Administrative Financing Act, March 1954, and typewritten table dated Apr. 9, 1954.

NOTE.—The "textile mill products industry" is as defined in industry code No. 22 of the Standard Industrial Classification Code.

My purpose in presenting this table is to emphasize my point that, in an industry which is as competitive as textiles, the need for substantial standardization of taxes collected from all establishments, irrespective of location, should be very evident. Moreover, I feel strongly that the great disparity in amount benefits and duration of benefits between the textile States is socially unsound and economically harmful both locally and nationally.

THE HUMAN ASPECT

In all of the above materials dealing with broad statistical trends and the basic economic difficulties of this widespread industry, I have not mentioned the human aspect of this problem.

In Rhode Island in the past few months a well-known institution of learning has made a careful sample study as to what is happening to the men and women who were thrown on the labor market due to the closing of textile mills. The preliminary findings of this survey will be officially released in the next couple of weeks, and the facts I summarize here will be borne out by the formal report.

The investigators interviewed 131 individuals who were laid off over a year ago as a result of mill closings.

Of this number, only 29 percent have found new jobs. This investigation did not inquire into the type of employment

or the rates of pay obtained by this group of workers. But from past experience in similar situations, we can be positive that most, if not all, of these workers are now employed in less desirable jobs and at a lower scale of wages than they earned when they lost out in their former place of employment.

Eighteen percent of the 131 persons in this group have retired from the labor market and are not looking for work. This does not mean that none of these individuals no longer need jobs; it simply means that they have given up the search for reemployment.

Fifty-two percent of the total are today unemployed after having been laid off for longer than 12 months.

Thirty-six percent of these 131 men and women have not been able to find a paid job of any kind for even 1 day during this period of over a year. All of the 52 percent that are still jobless are actively looking for work and have done everything possible to find jobs during all these long weary months since their plant went out of business.

What these figures mean is that a small proportion of the 52 percent that are today idle have picked up occasional jobs during the past year, but that the bulk of those who are seeking work have not earned a cent from any kind of paid employment since they were first thrown on the labor market more than 1 year ago.

DURATION OF BENEFITS MUST BE INCREASED

Surely the Members of Congress must see from these figures, which certainly apply to similar situations in other textile States, that the average duration of employment benefit payments must be increased. Maximum duration of benefits in Rhode Island is 26 weeks. Textile States elsewhere do not even pay for that number of weeks. Therefore, it is painfully evident that practically all of these 52 percent who lost their jobs have had no income whatever, except possibly from relief for a period of at least 6 months. Even assuming that some of these families had savings, it is certain that by now these accumulations have been completely exhausted.

How are these people living? Frankly, I do not know. I do not know that there is suffering and deprivation among this group despite their diligent search for work. The community suffers also from the fact that these people have no purchasing power. Moreover, friends and relatives of such individuals must be stinting themselves and possibly even going into debt to share with those who are absolutely without funds.

Results of this Rhode Island survey are in line with an earlier report along the same lines appearing in Business Week for March 6 of this year. I quote from this article:

When a New England textile mill closes its doors, what happens to the uprooted workers? That's a big question throughout New England today, and one that—so far—has never been adequately answered.

Unemployment figures tell only part of the story. That is clear in Lawrence, Mass., where many more textile jobs have been wiped out in recent years than are shown by jobless data and figures on expanded employment in other industries. What happened to the rest?

TRACKING THEM DOWN

The Bureau of Business and Economic Research of Northeastern University, in Boston, is trying to find out in a survey of displaced workers in Lawrence—part of a broad study launched about a year ago that's now beginning to show some interesting results.

Under the direction of William H. Miernyk, the bureau has so far interviewed 756 workers from 3 liquidated mills in 3 cities—a woolen mill in New Hampshire, a cotton mill in Fall River, Mass., and a cotton mill in Lowell, Mass.

THE GENERAL PICTURE

First findings, which later case studies probably will confirm, show:

Most of those laid off were still in the labor force, either employed or actively seeking employment, though a few of the displaced workers—mostly young married women or very old workers—dropped out within a year.

More men than women had been reemployed, and workers over 45 years of age were having a particularly hard time finding new jobs. Among the job seekers, 80 percent were drawing unemployment compensation when interviewed.

Most of those with new jobs were in other textile mills, in nonmanufacturing work, or in established, relatively static nongrowth industries; comparatively few had found their way into newer, expanding growth industries—machinery, electronics, and the like.

The majority of the reemployed were earning less than before, and many had been downgraded—from skilled to semiskilled, or from semiskilled to unskilled classifications.

Most told interviewers they were unhappy in new jobs, in part because of the lower pay and rating, but also because they had lost seniority and saw little opportunity for advancement.

SHATTERED ILLUSION

According to Miernyk, these findings explode a myth that has gained currency among New England businessmen and many economists in the last few years: That growth industries, particularly electronics, have been taking up a lot of the textile slack in employment. That's not the way it looks, Miernyk says, commenting:

"In view of the recent public statements that New England will gain by the * * * diversification of industry, we feel that these findings are timely. * * * Statements by persons in important positions have created the cruel illusion that new jobs are to be provided for the displaced textile workers."

Diversification helps, but new industries evidently are filling jobs with newcomers in the labor market instead of with displaced textile workers, according to the bureau's findings. Of the first 756 workers checked, only 5 percent found jobs in growth industries.

VARIATIONS

Along with these general conclusions each of the first mills surveyed turned up some interesting sidelights.

In Lowell, younger male workers found new jobs, but those over 45 years of age still were largely unemployed after a year; women in all age groups were having a harder time getting new jobs than men were.

In New Hampshire, the woolen mill closed in a one-factory town with a population of 1,500, miles away from any fair-sized city. The mill closing idled 200 workers. A leather products firm moved into the mill building, and reemployed part of the textile jobless. But 2 years after the shutdown almost a third of the 200 laid off in the woolen mill were still out of work. For the other two-thirds, who got jobs, the average period of unemployment was about 5 months.

The picture of what is happening in the textile industry which I have given here is not a pretty one. Indeed, it is an alarming situation and one that, in the view of the workers in the industry, cannot be further ignored.

The Congress will be utterly delinquent in meeting its responsibilities, if it fails to take at least the one important step to aid unemployed workers, which is embodied in legislation being considered here today.

Mr. LESINSKI. Mr. Chairman, I will be brief on this because the Members here know how I stand. We have hundreds of thousands of jobless automobile workers, hundreds of thousands of jobless steelworkers, and millions of other jobless walking the streets of this Nation desperately looking for work.

Their unemployment compensation checks are not big enough to feed and shelter their families, and they do not last long enough to tide the workers over the period of unemployment. Therefore, they are going deep into debt and going without necessities.

I cosponsored the Forand bill to increase benefits—for example, in Michigan, from a top weekly primary benefit of $30 to about $56 for anyone earning over $112 normally and half-pay for anyone earning less than that—and to extend the period of benefits to 39 weeks. The Republicans in the Ways and Means Committee killed that bill and reported out this one which does not do a thing to raise benefits anywhere in the country. All it does is take in a few more people—and the Forand bill would have gone much further in that regard.

Now all we can do in the House is vote on two amendments which would affect us in Michigan—one amendment is to adopt the Forand bill formula on benefits. I support it. It is vital that it be adopted. I urge the Republican Members here to join us on the Democratic side in writing it into the law. The Republican President once went on record favoring this amendment. But he seems to have run out on it since then—his whole party leadership up here has tried to block it.

Unemployment, Mr. Chairman, means children without proper food or clothing; it means families going without necessities; it means evictions—getting thrown into the street.

We were supposed to have an insurance system to protect against that. But now, with a full-scale recession following the election of the first Republican administration in 20 years, we find the system is not adequate to present-day needs and requirements.

We on the Democratic side automatically react to a situation like that by trying to improve the benefits and bring them up to date to meet the present conditions. But I am afraid the Members on the Republican side seem to react automatically to a situation like that by closing their eyes and doing nothing.

Mr. COOPER. Mr. Chairman, I yield 8 minutes to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, coming from a district in the State of West Virginia that is largely industrial, and speaking for my State as a whole, it is an industrial rather than an agricultural State, I am naturally interested in the provisions of H. R. 9709 and its objec-

tives. I had hoped that this legislation would not only broaden and extend the coverage in this field of unemployment compensation, but would also liberalize it. I fear that H. R. 9709 as presently written does little in the way of liberalizing legislation. It does broaden it by bringing under coverage employers who employ less than 8 individuals, if they are not employing less than 4. I understand that will probably bring 1.3 million additional people under coverage.

I was interested in the remarks of the gentleman from Wisconsin [Mr. BYRNES], who was opposing that provision, and I would like to say that I can see no reason why the protection accorded in the way of unemployment compensation should be any different as between employers who employ 8 people and those who employ only 4 people. I can see that many of those smaller employers might be farm people. I could readily understand that in the remarks of the gentleman from the State of Wisconsin. That is a matter where the reaction is local and does not approach it from the standpoint of national consideration.

Mr. BYRNES of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. BYRNES of Wisconsin. My only point was that each State should be able to make that determination itself. There is nothing to prohibit a State from covering employees and employers in two-man plants, where there is just an employer and one employee. That is the only point I wanted to make. It should be a question for the States. I am not saying at all that some States should not cover, as they do today, employers of one or more employees, but it would seem to me that various areas in the country have different problems, and their State governments should be able to make that determination unrestricted by federally imposed minimums.

Mr. BAILEY. I thank the gentleman for his comments.

Mr. KEAN. Mr. Chairman, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from New Jersey.

Mr. KEAN. I notice in a chart in the hearings that in the gentleman's State of West Virginia they only cover employers of eight.

Mr. BAILEY. That is right.

Mr. KEAN. Your State has been under the control of your party for a great many years. Why has not the State of West Virginia gone out and covered employees of one, as most States do now?

Mr. BAILEY. Let me say to the gentleman from New Jersey that my State was one of the first States to enter the unemployment compensation field. We started off with 26 weeks at $25 a week. Our legislature some years ago changed that to 24 weeks at $30 a week, minimum payment. That is the present rate of pay.

Mr. KEAN. But you still do not cover employers of less than eight, as most of our States do. We in New Jersey are now down to 4 and a bill has passed the Assembly for 1, and I am very much in favor of 1; because a man who is the sole employee is just as much out of a job when he is unemployed as though he were 1 of 5, as the gentleman from Pennsylvania [Mr. EBERHARTER] said.

I am also in favor of the provisions that the President recommended, but I think the States should do it and I was wondering why the State of West Virginia had not done it.

Mr. BAILEY. West Virginia, Mr. Chairman, is more vitally interested in the amount of the weekly payment that is made available to the unemployed. Presently our maximum is $30. Under the proposal which will be offered by the distinguished gentleman from Rhode Island [Mr. FORAND], those weekly payments would be upped to a total of $46 as against $30 in the present payments.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. FORAND. Is it not a fact that one of the principal reasons why the State of West Virginia has not come down to one employee or that the benefits have not been increased or that the benefit period has not been lengthened is because of competition of other States? It is a protection seeking to protect the industry in a given State that keeps the State from broadening out whereas if we had a Federal scale under an act of Congress they all would come under it.

Mr. BAILEY. That is a fact. I appreciate the comments of the gentleman from Rhode Island. Let me say that in a State like my State of West Virginia—and it is true in many others, that there is considerable unemployment at the present time. If there is any excuse for unemployment compensation it is to stabilize the national economy—and I have to bring up a discussion of our trade policies—unemployment is down in the State of West Virginia due to the fact that 5 or 6 of our major industries are affected by foreign imports. We have some hundred thousand or more unemployed, we have 136,000 people getting Federal grants of surplus food. It is a situation in which if $46 a week were made available instead of $30 it would stabilize to a certain extent the purchasing power of those unemployed people; it would tend to make better business for the merchants and other people who are in business in that area by making more purchasing power available. We are very much in favor of the proposal that will be made by the gentleman from Rhode Island in his attempts to liberalize this bill. I regret only that he is not extending the period of weekly payments above the present 21-, 22-, 24-, or 26-week limit, as the case may be, to a greater length of time.

While it looks as though our employment situation in West Virginia is improving it is due to the fact that many unemployed have drawn all their unemployment compensation. Because of this such people are not longer carried as unemployed, although in fact they are and, the unemployment compensation payments have been reduced. But that does not account for the fact that there is still unemployment and that the unemployed have not returned to work.

I am very much interested in lengthening the number of weeks the payments may be made. That is in the bill originally introduced by the gentleman from Rhode Island and of which I am one of the co-sponsors, but it will not be in the two proposals he intends to offer today to the legislation.

I want to associate myself with the gentleman from Rhode Island, and I am sure that the Representatives from all of the States that are vitally affected, as my State of West Virginia is, are interested in bringing some relief to this serious situation.

Mr. COOPER. Mr. Chairman, I yield 7 minutes to the gentleman from Maryland [Mr. GARMATZ].

Mr. GARMATZ. Mr. Chairman, when the people of this country read in the newspapers that we are taking up and debating an unemployment compensation bill, I am sure they will be under the impression that we are actually doing something about the present inadequate benefits.

They will be in for a rude shock if they read down further in the account and see what it is we are actually taking up.

In Baltimore, as in most cities, the people generally know we are in a situation of unemployment crisis. In Baltimore, for instance, we have twice as many people on the unemployment compensation rolls in the city alone as there were last year in the whole State of Maryland. And the Baltimore Sun reported Tuesday that the number of jobs in Baltimore City fell off 2,700 more from April to May, contrary to the usual seasonal upswing.

In other words, instead of unemployment dropping in that period, as it usually does, we saw it increase.

With all of our joblessness, and idle plant capacity, and virtually closed-down shipyards and other installations, however, we in Baltimore are not as badly off as are many of the other major industrial areas of the Nation which recently went on the distressed list. So we can only imagine the extent of the crisis in cities with 6 or 12 or even a higher percentage of unemployment.

And bad as the situation is nationally, we have the forecast from the National Planning Association that if the economy continues at its present level without substantial change or improvement, we shall have anywhere from 5.5 to 6.2 million unemployed in the country by next spring.

This will mean nearly a doubling of present unemployment. And the present level of unemployment has already been described by the Chairman of the President's Council of Economic Advisers, Dr. Arthur Burns, as intolerable. It is hard to find the right adjective to describe a situation twice as bad as intolerable.

Under the circumstances, Mr. Chairman, it is obvious that the administration and the Congress should be taking powerful corrective steps. But nothing of the sort has been undertaken.

Instead, we have here a bill which purports to improve the unemployment compensation system, but an analysis of it will show that it will have practically no effect whatsoever in Maryland or in many other States.

It would cover in under the unemployment compensation program workers in businesses employing four or more persons. In Maryland, and in many other States, we already do at least that well—in Maryland we cover in all employees otherwise eligible, regardless of the number their employer has on the payroll. So that will have no effect in Maryland.

The bill will also cover in Federal employees. That is an improvement I heartily support and which I urged upon the Ways and Means Committee in my testimony on this matter last month. But the bill as it has been reported—and under the rule it cannot be amended from the floor in this particular—specifies that unemployment compensation cannot be paid to jobless Federal employees until after next December 31. I trust that most of the slashing of Federal agencies has already taken place and that most of the employees slated to lose their jobs have already done so by now, so that this, too, would have no effect right now and probably very little effect after January 1.

Otherwise, the bill does nothing for any worker in Maryland. It does not raise benefits for a single unemployed worker. It does not increase the period of benefits.

So I would describe this bill, Mr. Chairman, as a garden hose to use on a three-alarm fire. The unemployment situation is dangerously acute; yet this bill is of no significant value in combating it or in alleviating the hardships of unemployment.

The Republican leadership here in the House must be painfully aware of the pitiful limitations of this measure to have brought it up here under the circumstances it provided for House debate. We have in effect a gag rule—no amendments except two intended to be offered for the Democrats by the gentleman from Rhode Island, Representative FORAND. One would extend the maximum period of benefits to 26 weeks—which is what we already have in Maryland. The other would increase maximum benefits to one-half a worker's regular pay, up to a limit of two-thirds of a State's average weekly wage. In Maryland, this would mean an increase in the top basic benefit of about $11 a week—from $30 to about $41.

Only the second amendment would help unemployed Marylanders. I shall, of course, support both amendments, because I believe all States should be brought up to at least the 26-week standard. I would like to go further and see the maximum period increased to 39 weeks.

That was one of the many additional improvements proposed in the Forand bill, which I and more than four-score other House Democrats joined in cosponsoring. But under the rule imposed upon us for consideration of this bill, we cannot even propose that amendment from the floor.

I object to this kind of gag rule on so important a legislative issue, affecting so many American workers. It is unfortunate that the Republican leadership has imposed such a gag, but as I said, it is understandable. To open up this bill to general amendment from the floor would expose its weaknesses and limitations and show up the inadequacy of the administration's approach to the unemployment problem.

There is nothing dynamic about this bill. It is a bust.

[From the Baltimore Sun of July 4, 1954]

JOBLESS IN UNITED STATES SEEN DOUBLING BY NEXT YEAR—PLANNING GROUP URGES GOVERNMENT TO ACT TO END INEXCUSABLE IDLENESS IN NATION

WASHINGTON, July 3.—The National Planning Association said today unemployment will nearly double over the next year at the present rate of economic activity. It urged the Government to consider action to end inexcusable idleness of part of the Nation's gigantic production machine.

The report said that if the economy runs along over the next 12 months at about the present pace of $25 billion gap will develop between national production and the level of production that would provide full employment.

CONGRESS COULD BE CALLED

The study group, a private association of businessmen, labor union leaders, economists, and bankers, said it assumes the administration is now reexamining defense needs.

"If this reexamination shows (as we anticipate)," the association said, "that national security calls for bigger defense spending, a special session of Congress in the fall could consider legislative authorizations and supplemental appropriations for the additional measures."

If the administration decides there is no urgent need for stepped-up defense spending, the group said, "then measures should be considered to promote expansion" of the economy to "full employment" levels.

SIGNERS ARE NAMED

The report was entitled "Opportunities for Economic Expansion." It was signed by international banker, H. Christian Sonne, chairman of NPA's steering committee and chairman of the board of Amsinck, Sonne & Co.; and by the 10 other members of the steering committee. These included Frank Altschul, chairman of the board of General American Investors Co.; Soloman Barkin, director of research of the Textile Workers Union of America; Clinton S. Golden, executive director of the trade-union program at Harvard University; marketing adviser, Elmo Roper; and New York businessman-economist, Beardsley Ruml, author of the pay-as-you-earn income-tax collection plan now in use. Another signer was Gerard Colm, economist for NPA.

Administration economic advisers asked for comment on the report made no response.

The NPA, which periodically brings out studies on the national economy, based its current report on the assertion that "it is certain we do not have 'maximum employment, production, and purchasing power,' stated as an objective of United States policy in the Employment Act of 1946."

"Involuntary total or partial idleness of a substantial number of workers and underutilization of productive capacity," the report said, "are inexcusable in a perilous world situation."

SEVENTEEN-BILLION-DOLLAR GAP

NPA said that the business downturn which started last midyear—which NPA said has apparently run its course—reduced the Nation's total annual production of goods and services from the $367 billion of 1953 to a rate of $358 billion in the first quarter of this year. The $367 billion gross national production of last year, NPA said, was the full-employment level for the Nation's labor resources at that time. But population growth and increased use of more productive machinery raised the full-employment level by the first quarter of this year to an annual national production rate of $375 billion, NPA said.

That left a $17 billion gap in January, February, and March, the report said, between what the Nation was producing and what it should produce to utilize its labor resources fully.

NPA calculated that at the present rate of increase in economic activity, national production in the first quarter of next year would be at an annual rate of about $360 billion. The full employment level of economic activity by then, the committee said, would be $385 billion, leaving a $25 billion gap.

Virtually standing still economically, the committee said, would boost unemployment next year from the 3,305,000, or about 5 percent of the labor force, to about 8 or 9 percent of the labor force. Colm told a news conference on the report that an addition of about 1 million to the labor force could be expected during the year. The committee was, therefore, estimating that, if the economy remains at virtually the present level over the next 12 months, unemployment would rise by next spring to between 5,500,000 and 6,200,000.

The committee attributed the recent recession to the failure of private demand to rise in accord with the rise in productive capacity at a time when Government spending and business spending for expansion began to level off.

The committee pronounced itself unfit to pass on defense needs or national strategy. But, it said, unless four questions it posed could all be answered "yes" it felt security outlays should be stepped up. And, the committee said, "with actual production running about $15 billion below capacity and with some idle resources in men, plants, and materials, it simply makes no sense to contend that national defense programs must be reduced for economic reasons."

Administration spokesmen say frequently that they are trying to reduce defense spending to avoid putting an undue strain on the economy.

Mr. GARMATZ. Mr. Chairman, I ask unanimous consent to revise and extend my remarks at this point in the RECORD, and include an article.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. REED of New New York. Mr. Chairman, I yield 4 minutes to the gentleman from Kansas [Mr. REES].

Mr. REES of Kansas. Mr. Chairman, I take this time, if I may, to propound 2 or 3 questions in respect to this proposed legislation, particularly with regard to the Federal employees. As I understand this legislation, you are putting about 2.5 million Government employees under this law that have never been covered before. Is that correct?

Mr. REED of New York. That is correct.

Mr. REES of Kansas. What are we going to do with Federal employees who work for short periods of time? Suppose someone is employed in my office or anywhere else in the Federal Government and works for 2 or 3 or 4 up to 6 months. Does he come under this law and does he get any benefits under it?

Mr. REED of New York. If he is out of employment.

Mr. REES of Kansas. How do you figure out how much you are going to pay him?

Mr. REED of New York. Well, it is covered by the State law. Under the bill the Federal workers' benefits are determined under the unemployment-compensation law of the State where they were last employed.

Mr. REES of Kansas. In other words, if someone who comes from the State of Ohio works for me in my office and becomes unemployed, what becomes of him?

Mr. REED of New York. The bill does not apply to elective legislative officers.

Mr. REES of Kansas. If a person who worked for the War Department, who came from Ohio, became unemployed, he would possibly then get different compensation than if he came from New York; is that right?

Mr. REED of New York. No. That would be based on the law of the District of Columbia.

Mr. REES of Kansas. Because he was employed in the District of Columbia?

Mr. REED of New York. That is right.

Mr. REES of Kansas. Even though he worked for the Federal Government?

Mr. REED of New York. That is right.

Mr. REES of Kansas. The fact that he worked in the District of Columbia determines the question of compensation that he gets?

Mr. REED of New York. That is the criterion.

Mr. BYRNES of Wisconsin. Mr. Chairman, if the gentleman will yield, I think it might be made clear to the gentleman from Kansas that it depends on where the Federal employee is working. The employee that came from Kansas, let us say, and worked for the Federal Government here in Washington would be paid on the basis of the District of Columbia unemployment compensation law, but if that same employee went from Kansas to Wisconsin and was employed in Wisconsin, let us say, in the Veterans' Administration office there and then became unemployed, he would get his unemployment compensation on the basis of the Wisconsin law.

Mr. REES of Kansas. As I understand the chairman of the committee, then, a person who works in a congressional office or legislative office is not included under this act. Is that right?

Mr. REED of New York. He is included unless he is an elected official.

Mr. REES of Kansas. Are there other exceptions for Federal employees?

Mr. REED of New York. There are minor exceptions.

Mr. REES of Kansas. Otherwise, they are all included?

Mr. REED of New York. Yes.

Mr. REES of Kansas. The 2.5 million Government employees?

Mr. REED of New York. Yes.

Mr. REES of Kansas. Wherever they are?

Mr. REED of New York. Yes.

Mr. REES of Kansas. Whether in the United States or in foreign countries as well?

Mr. REED of New York. That is right but the worker cannot file for benefits unless he is in the United States.

Mr. Chairman, we have no more requests for time.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Michigan [Mr. RABAUT].

Mr. RABAUT. Mr. Chairman, I take this time to make it known that I am in favor of the amendments to be offered by the gentleman from Rhode Island [Mr. FORAND]. I understand that the first amendment is to fix nationwide the benefits to be paid the unemployed; the maximum to be 66⅔ percent of the State average weekly wage and the minimum not less than 50 percent of the individual worker's weekly wage. The second amendment is to fix the duration of benefits at 26 weeks.

There is nothing new in these amendments of the gentleman from Rhode Island [Mr. FORAND], so far as the administration is concerned, because we had it on the President's own testimony, in the Economic Report, where it says:

> Unemployment insurance is a valuable first line of defense against recession. * * * But even as a first defense, the system needs reinforcement.

Among specific proposals, under "Benefits" it says further:

> It is suggested that the States raise these dollar maximums so that the payments to the great majority of the beneficiaries may equal at least half their regular earnings.

Further, as to "Duration," it specifies 26 weeks.

The Secretary of Labor in the Republican administration, Mr. Mitchell, in his letter to the State Governors under date of February 16, said, on the subject of benefits:

> At its most recent meeting in January the Federal Advisory Council on Employment Security took action supporting the President's recommendations on improving weekly benefits. The Council recommended that in each State, the maximum weekly benefit amount should be equal to at least 60 to 67 percent of the State's average weekly wage.

With reference to duration he recommended the same period, 26 weeks.

The Assistant Secretary of Labor, Mr. Ciciliano, in a letter to the heads of the State unemployment compensation agencies, dated February 16, said:

> As also pointed out in the letter to your Governor a recent recommendation of the Federal Advisory Council, in line with the President's Economic Report, suggests as a ceiling on weekly benefits that weekly maximums be equal to 60 to 67 percent of the State's average weekly wage.

As to the matter of duration, he makes the same recommendation, 26 weeks.

When the President was asked what he intended to do about advising the governors in the matter of calling the State legislatures into session to implement his own recommended program, he said that he had no intention to urge them. He said he did not think he would do it. Now he is going to meet with the governors in July. He made this statement in his press release, I think it was on June 16. Now the country has an announcement from the first industry in the United States of America, the automobile industry, that in the second half of this year they intend to cut production, that production is going to be cut, it is understood, 33⅓ percent. If that takes place, and I want my colleagues from Michigan on the Republican side to listen to me, it is going to put on the unemployment rolls in Michigan alone 300,000 people. It is well enough for the people here in the House to say this is a State problem. We had a governor that grabbed the ball with the President of the United States, and he is a Democratic governor, G. Mennen Williams, in the State of Michigan, and he went down the field for a goal. But when the Republican legislature of our State acted they used an eyedropper when it came to putting some more funds in the compensation bill. A $3 increase, that is what they gave. Three dollars in a man's family life in the economy of today is something that does not need much explanation to anybody in this House who deals with the money problems of this country.

The legislatures of several States have met, but only three have acted—Virginia, California, and Michigan. Michigan has done the best by her unemployed, but it was not enough. We have the record—in my own State—providing a 26-week period—but there is a jigger in it—requiring that work be performed for 39 weeks in the current year. I do not know how they are figuring the short week period in that 39 weeks for several of the big industries of Michigan are on a 3-day short week.

Mr. EBERHARTER. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I yield to the gentleman from Pennsylvania.

Mr. EBERHARTER. I noticed an item in one of the newspapers in Washington yesterday where a survey was made of the dealers in the automobile industry throughout the country and it was the consensus that the dealers recommended to the producers a further reduction in the production of automobiles; so evidently the dealers are overstocked now with too great an inventory, so we can look for further reductions.

Mr. RABAUT. I thank the gentleman for bringing that to my attention. Auto production in the second half of the year will be at least 33⅓ percent below the present rate. The new-car inventory was 638,000 as of May 31 comparted to 430,000 as of the same date in 1953.

Do the Members of this House who are going out in the fall to give an accounting of their stewardship intend to use the television so they will be away from the voters while they make their appeal, or do they intend to dress themselves up with a mask and a chest protector of a baseball outfit to walk among the people? This is going to be serious. The automobile business is the largest business in this country. Mr. Fairless and Mr. Grace, of the steel industry, say that they are optimistic, that the 72 percent production of today will continue. How is it going to continue with this fall-off that was announced by the automobile industry, the cutback of 33⅓ percent? The auto industry is the best steel customer in the United States of America and no one denies that.

Mr. EBERHARTER. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I yield.

Mr. EBERHARTER. I remarked before that today steel production is only 59 percent of capacity. A few years ago is was 100 percent production.

Mr. RABAUT. You know we get these figures. They are handed to us and we are supposed to take them. We take them for what they are worth, but the figure was given to me that steel production is running 72 percent of capacity. If it is lower than that, the result is going to be worse.

Do not think when I speak to you, ladies and gentlemen of the House, that I am addressing only the people in Michigan. The automobile has affected every section of America. It is important to your district. You know it as well as I do. It is time we did something here until these State legislatures act. It is time we took charge of the situation. It has been recommended by a Republican President. It has been written about by a Republican Secretary of Labor. It has been encouraged to the State unemployment compensation agencies by the Assistant Secretary of Labor. Why should we not do something about it? We ought to get behind this Forand amendment; and if you do, you will be assisting the unemployed and benefiting the economy of our Nation.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Chairman, if I may have the attention of the gentleman from New York [Mr. REED]: in the colloquy which the gentleman recently had with the gentleman from Kansas [Mr. REES] I understood the gentleman from New York to state that the employees in the legislative branch of the Government were not included. I wonder if that was an inadvertent statement.

Mr. REED of New York. That was an inadvertent statement. Legislative employees are covered by the bill. The exclusion which I had reference to is as to elected officials.

Mr. SMITH of Virginia. Then the employees in the legislative branch are included under the bill? I wonder if the gentleman would know how long they have to be in the employ of the Federal Government before they become eligible under the terms of the bill?

Mr. REED of New York. That depends on the State law.

Mr. SMITH of Virginia. And as to those who are residents of the District of Columbia, it would depend upon the law of the District of Columbia?

Mr. REED of New York. That is right.

Mr. SMITH of Virginia. I thank the gentleman.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. RHODES].

Mr. RHODES of Pennsylvania. Mr. Chairman, the district I represent includes the city of Reading and the county of Berks in Pennsylvania. It is an industrial area with a diversified economy, but with its base in manufacturing. It has been badly hit by a decline in defense contracts, and by the general slump in fabricating industries which the whole country is experiencing.

Mr. Chairman, a year ago my district was still economically healthy. Some industries were experiencing economic hardship, but employment was high. In this past year there has been a drop in factory employment of 10 percent. The worst information that can come to a district like mine is that the United States Department of Labor has declared it a so-called group IV area. Reading was classified group IV in May. The designation "group IV" means that over 7 percent of the total nonagricultural work force is out of jobs and looking for work. It signifies an area of substantial labor surplus. The Department of Labor has no classification which signifies greater hardship.

These are more than mere statistics. Behind the figures are thousands of families whose income has been cut by two-thirds or three-fourths or more. They represent husbands and wives and children who do not know whether they can meet the next rent payment, who know that if illness strikes, they cannot meet their medical expenses. The number of families who have been forced to go on relief has increased, and as those in this Chamber know, relief payments are far below the minimum requirements for a reasonable standard of living.

The fall in the purchasing power of these people will be felt far beyond their own doorsteps, Mr. Chairman. The fact that these people do not have money with which to buy the things they need will inevitably affect the small-business men and farmers of the community. Then, it will further affect the adverse employment situation in industries manufacturing semidurable and durable goods.

It is essential for the economic well-being of my district, as well as for the whole country, that improvement be made in the unemployment insurance benefits available to unemployed persons. There is nothing in the bill before us which would meet this urgent need. The amendments to be offered later today by the gentleman from Rhode Island [Mr. FORAND] would raise maximum primary benefits in Pennsylvania from $30 a week to $44 a week. This is a small enough benefit for a man who has to live, who wants to work, but who cannot work because no jobs are available. Mr. Chairman, I shall support the Forand amendments.

Mr. BYRNE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Pennsylvania. I yield.

Mr. BYRNE of Pennsylvania. The gentleman is aware that the State Unemployment Compensation Commission in Pennsylvania has issued an order, just last week, that they were going to cut the relief from 26 weeks to 20 weeks, and the payments from $30 to $20. This amendment to be offered by Mr. FORAND will take care of that, will it not?

Mr. RHODES of Pennsylvania. It certainly will.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. EBERHARTER. Mr. Chairman, I yield 5 minutes to the gentleman from Kansas [Mr. MILLER].

Mr. MILLER of Kansas. Mr. Chairman, I come from a district and a State that will not be so greatly concerned at the present time with the provisions of this bill. But as I have listened to the arguments it occurred to me that we are doing nothing in the way of prevention. When some years ago it was permissible to mention China without any apologies, we heard that over there they had nothing but preventive medicine. They hired physicians to keep them well rather than to make them well. I am wondering whether our economic situation does not need some preventive medicine rather than curative medicine, such as we are discussing today.

There seems to be at the present time considerable unemployment, and there seems to be fear that it will become worse. In this Nation where there is so much to do, it seems this Congress is taking the attitude that all we can do when a man is out of a job is to pay him until he can find a job of similar kind in similar employment. That is all we can do about it.

I would like to ask the chairman of the committee, the gentleman from New York [Mr. REED], if this bill contains any provision by which pains are taken to find jobs for these men rather than simply to pay them while they are out of work?

Mr. REED of New York. Let me tell you something that I would like you to relay to your people and tell everybody: We have just sent a bill to conference which, if it is passed, will greatly increase employment throughout the country, and that is the bill H. R. 8300. Many telegrams and telephone calls are coming in to the office, the effect of which is that as soon as the House bill H. R. 8300 is passed we will put 10,000 people to work. That is something that will help labor. It is not in this bill; it is in that bill.

Mr. MILLER of Kansas. I thank the gentleman very much. I do not know what the nature of that bill is, but I have in mind personally some things that could be done. Not too many days ago we passed a bill through this House appropriating a good many hundreds of millions of dollars for soil conservation and flood control, but we made very little provision for implementing such programs. That is the most important legislation that could possibly be before this House with the exception of immediate national defense.

I introduced a bill into this body when I first came here over a year ago requesting that this House create a commission under the direction of the President to study and provide a program of soil conservation so that at any time we have slack employment there will be a place to put these men to work where they will be doing something for the good of the country for all time.

I thank the Members for the attention you have given me and I hope that what I have said here will remain in the minds of the present Congress, for I do assure you that we are rapidly losing the best soil that we have in this country—400,-

000 acres destroyed every year—enough to feed 150,000 people.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from New Jersey [Mr. HOWELL].

Mr. HOWELL. Mr. Chairman, unless we adopt the Forand amendment to increase the maximum benefit payments under unemployment compensation, this bill before us today will not mean a thing in New Jersey, except to those Federal employees who lose their jobs after next January. Otherwise, the bill is a zero. It proclaims as its purpose the revising of the unemployment-compensation laws, but it would do so by completely ignoring the unemployed and the problems of the unemployed.

Its effect will be exactly the same as in New Jersey—zero—in Arizona, Arkansas, California, Connecticut, Delaware, the District of Columbia, Alaska, Hawaii, Idaho, Kentucky, Louisiana, Maryland, Massachusetts, Minnesota, Montana, Nevada, New Hampshire, New Mexico, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Utah, Washington, and Wyoming.

In other words, in half of the States and in the District, Alaska, and Hawaii, it will have absolutely no effect whatsoever. And in other States it will have a very minor effect by bringing in under unemployment compensation employees in businesses employing 4 to 3 workers.

I very much favor covering Federal employees under the program, and I also favor covering in workers in small business, but I would be ashamed to vote for such a bill as this under any impression it is a bill to help the unemployed.

What we need, of course, in a situation such as we face today in our industrial centers is a bill like the Forand bill, which more than 80 of us on the Democratic side joined in introducing. This bill was completely ignored by the Ways and Means Committee which voted out instead on strict party lines the inadequate Reed bill now before us.

The Forand bill would have done the following:

First, it would have increased the maximum period of benefits to 39 weeks instead of the present hit-and-miss programs of the individual States ranging from 16 to 26 weeks.

Second, it would have covered-in the workers of even the smallest businesses employing one or more people.

Third, it would have increased benefits to a maximum of one-half a worker's regular wage up to a top of two-thirds of the average weekly wage in his State. In New Jersey, for instance, this would have meant a top benefit of $50 a week for those normally earning $100 a week or more, and half-pay for every unemployed worker whose normal wage was less than $100. Our present maximum is only $30.

While we are prevented under the rule laid down by the House Rules Committee from submitting the Forand bill as a substitute for this inadequate measure before us, we are permitted to submit two specific amendments, and I shall support both of them.

One would increase the maximum duration of benefits to 26 weeks in those States which do not already have such a period of benefits. This would bring other States at least up to the present New Jersey standard.

Why the administration did not propose this itself in the Reed bill, I do not and cannot understand. But it has failed to do so and the Republicans on the Ways and Means Committee refused to agree to it in committee, and so the only way we can get even that modest improvement into the bill is through a Democratic amendment from the floor.

The same situation obtains with the second amendment we are to be permitted to make. That one incorporates the benefit provisions of the original Forand bill, establishing a maximum of half-pay up to two-thirds of the average weekly wage in a particular State.

Here again, as in the case of the amendment dealing with the duration of benefits, we on the Democratic side are trying to write into the law a provision President Eisenhower has personally endorsed—but he insists it be left up to the individual States. The formula on benefits laid down in the Forand amendment is exactly the same as the one President Eisenhower's Secretary of Labor recommended to the States for adoption. Not a single State has adopted it, however, and so no good has come of it and no good can come of it unless the Democrats write it into this bill today, as we intend to try to do.

It is indeed a sorry situation, Mr. Chairman, that the only way the President's legislative recommendations appear able to get into law is if the minority party in the Congress seizes the initiative and writes them into law. And it is an even sorrier situation that when we try to do so, we usually have to fight most of the members of the President's own party and his Cabinet advisers as well. In this instance, we even have to fight the President himself in order to try to write into law a provision he supposedly endorses wholeheartedly. Certainly if he recommended that the States adopt the half-pay formula on unemployment compensation, he must believe in it. Then why has he failed to back us up in getting it into the basic Federal law?

The only answer I can surmise to that question is that lets his good intentions be sidetracked by the die-hard reaction so rampant in his own party here in the Congress. Time after time last year and this year he has backed down from his own legislative recommendations when the Republican leadership in the Congress said "boo" and made faces about them.

So in this instance, as in many more which have occurred these past 2 years, we on the Democratic side have found ourselves fighting the President's own party in behalf of things the President himself presumably wants.

If he really wanted them, I believe he would put up more of a fight himself to get them. We can surmise, then, that his support for these measures is lukewarm and casual. But I can't be lukewarm and casual about this situation when we have mass unemployment in New Jersey and a steadily increasing downward trend in our important manufacturing industries. The latest figures I have received show that while total nonagricultural employment in New Jersey is down only 3.7 percent from a year ago, in manufacturing it is down nearly 10 percent and in durable goods manufactures it is even worse—down 11½ percent. Furniture production employment is down 18½ percent, aircraft employment down 21.7 percent, transportation equipment employment down 15 percent, and so on.

Hardest hit of all is employment in some branches of the apparel industry, with jobs down 28.4 percent from a year ago.

These are startling statistics, Mr. Chairman, and indicative of the vast economic dislocation in my State and in most of the other industrial States of the Nation.

In view of the great unemployment and the sadly inadequate unemployment compensation benefits now available to the jobless, it is vital not only to the unemployed themselves but to our national economy and well-being to provide more decent benefits to these people so that they can buy the necessities of life without going on relief.

It is tragic that the administration would not get behind its own proposals made to the States and help us to draft more adequate Federal unemployment compensation standards. It is a shame that we are considering today not the Forand bill but a meaningless thing with no substance to it.

Let us salvage at least something out of this mess by approving the Forand amendment to increase benefits in a realistic manner—an amendment which would have the effect of lifting unemployment compensation benefits in every State in the Union.

The times are much too serious for half-hearted half measures which do very little good for an infinitesimal number of unemployed workers, and nothing whatsoever for the great bulk of them.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. WIER].

Mr. WIER. Mr. Chairman, I wish to take this means to advise the Members of the House that I too favor and intend to support not only this amendment offered by the gentleman from Rhode Island [Mr. FORAND] but likewise I intend to support a second amendment to be offered by Congressman FORAND to this unemployment compensation bill, recently reported out of the Ways and Means Committee and now before the House for sadly needed improvement, some of which the committee failed to heed and apply to the legislation now before us.

It should hardly be necessary for me to stand here today and express or tell you, after our recent and present threat and experience, that unemployment is not at this time an idle threat that should or could be brushed aside or postponed until tomorrow. It is very positive even today in what can happen to our faltering economy.

Approximately 8.5 percent of the labor force is now out of work. This is a real and present danger. The American Trade Union movement asks that Congress amend the Social Security Act, to

do a better job of taking care of the unemployed as follows:

First. Benefits: The maximum primary benefits payable under State laws should not be less than two-thirds of the average weekly wage of covered employment within the State. Each individual's primary benefit shall not be less than two-thirds of his average weekly earnings.

Second. Duration: Benefits shall be payable to all eligible unemployed persons for a period of not less than 26 weeks.

Third. Disqualifications: The States should be required to limit their disqualifying provisions to those actually designed to prevent payment of benefits to any workers who are not genuinely involuntarily unemployed. The period of disqualification should be limited to such duration as corresponds to the period of time during which the individual's unemployment can properly be considered a result of his disqualifying act. The AFL suggests that 4 weeks represents a realistic period.

Fourth. Coverage should be made coextensive with the coverage of the Federal old-age and survivors' program. In addition, protection should immediately be extended to the employees of the Federal Government.

The act should further be amended to provide means which would permit States to provide for uniform rate reductions to all employers, as well as individual experience-rated reductions.

The basic changes recommended by the AFL were in the bill introduced by Representative Aime J. Forand and some 80 co-sponsors in the House and Senate.

The AFL supports this measure as offering by far the most genuinely constructive approach to the problems of developing an adequate defense against unemployment that has been put before this Congress.

I earnestly urge this committee to approach this serious problem of unemployment in the bold, constructive, and comprehensive manner indicated by H. R. 9430.

Mr. COOPER. Mr. Chairman, I ask unanimous consent that all Members may have permission to revise and extend their remarks on the pending bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. SHELLEY].

Mr. SHELLEY. Mr. Chairman, I am wholeheartedly in support of the Forand proposals which should be included in the pending bill. The contention advanced by sponsors of this inadequate bill that to write into it a set of minimum standards as to amount of weekly payments to the unemployed and the duration of those payments would be an invasion of the rights of the States has little or no merit. The Social Security Act as originally passed and as now in force contains a clear recognition of the obligation of the Federal Government to insure compliance by State laws and by the State administrative agencies with certain minimum standards. Although the law does not now deal specifically with amounts and duration of payments, the evidence is clear that present Federal standards must be extended into that field in order to let the unemployment insurance program do the job it was intended to do. The best evidence of the need for such standards is found in the table inserted in the RECORD by the distinguished chairman of the Ways and Means Committee showing how widely the benefits provided vary among the States. Although the laws of my own State, California, are fairly liberal in comparison with the treatment given the unemployed in the more backward States, I cannot sit back and permit this bill to go through without protesting denial of equal rights to the needy jobless in other States—and as we all know, there are far too many of them now.

Since the outset of the Federal Unemployment Insurance Tax Act, it has always been assumed that the purpose was not merely to provide a depository for State funds, as well as money for costs of administration of the State programs, but also to establish certain minimum standards to insure that the employers in the various States would not be able through control of their State legislatures to set up phony unemployment insurance laws—laws designed to give them the full allowable tax credit offset of 2.7 percent with respect to any State taxes that might be imposed under such type of program over and above the 3 percent Federal tax, while providing no real benefits to the unemployed.

At the time of the enactment of the Federal program, and the subsequent enactment of the various State programs, it was obvious that these various programs were founded upon the concept that they were part of a national program, were being created as part of a national program and would continue in existence only so long as the national program itself continued. In fact, many of the States in enacting them specifically provided to this effect, including my own State of California.

It is clear accordingly that at all times since the commencement of this program the underlying concept has been that unemployment is national in scope and transcends State lines and can be effectively reached through a so-called insurance program only if there is an overall Federal program with certain fundamental Federal standards.

Any argument at the present time that moves to improve the Federal standards are invasions of States rights are belated to say the least. That argument was disposed of when the original act was enacted into law and the propriety of that contention was resoundingly rejected at that time. The question accordingly is not the problem of States rights but rather whether the existing standards are adequate to accomplish the objectives of the program and to insure minimum conditions in the various States, consonant with a sound program.

In that regard, and as the committee chairman's own table shows, mere reference to the conditions prevailing in the various States as to the amount and duration of benefits will itself suffice to constitute the most persuasive argument. The benefits are as varied as the number of States, with some States paying as low as $3 and others paying maximums only of $20. It is evident that if such conditions continue unabated the program will soon destroy itself. Merely to bring a few additional employees under coverage as this bill does is not enough. The benefits to our jobless must also be geared to present-day standards rather than those which prevailed in 1935. The States have proven themselves unwilling to shoulder that responsibility. It is up to the Congress to insist that this be done. Past experience proves that employer-controlled State legislatures will not listen to a meek recommendation, either on the part of the Congress or the President. Such lipservice to great liberal principles sounds good in newspaper headlines or in campaign oratory, but as has been proved on issue after issue in this session, unless the administration and its congressional leadership give positive support to definite action these promised dynamic programs remain promises without performance. By supporting the Forand amendments to set a floor on weekly unemployment compensation payments and to require a reasonable minimum period of 39 weeks during which such payments shall continue, this House now has the opportunity to force action on at least one of the glib promises we have heard.

Mr. Chairman, I do not base my position on this problem on hearsay or theory. I take this stand because through my 8 years of experience in the California State Senate, during all of which I served on the Social Welfare Committee which handles this type of legislation, I know what influences are brought to bear on the State legislatures when action on unemployment insurance laws is up for consideration and I know how hard it is for the laboring man who is most affected to be heard. I, therefore, support and ask for the adoption of the amendments proposed by the distinguished gentleman from Rhode Island [Mr. FORAND].

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from Minnesota [Mr. BLATNIK].

Mr. BLATNIK. Mr. Chairman, I wish to express my frank opinion on the bill now under consideration—H. R. 9709—to change the Federal-State unemployment insurance system. In my estimation this bill is somewhat of a phoney—on one hand it extends unemployment compensation benefits to possibly as many as 4 million employees not now covered, but on the other hand it does absolutely nothing to increase the now inadequate unemployment compensation benefits to those already covered.

If the majority leaders were really interested in passing a sound unemployment compensation bill, they would have reported out H. R. 9430, a bill introduced by the gentleman from Rhode Island [Mr. FORAND], 85 other Congressmen, including myself, the first week in June.

It is my hope that the House will substitute the language of H. R. 9430 for that of H. R. 9709 and pass the bill as amended. Anyone familiar with the facts of life as they relate to unemployment compensation must recognize that

the provisions of the Forand bill offer logical solutions to repair the basic weaknesses of the present unemployment insurance system. What does the Forand bill propose? I will enumerate. Firstly, the Forand bill would extend the maximum duration of benefit payments under the unemployment insurance system to 39 weeks as against 26 weeks in about half the States today. Secondly, the Forand bill provides that the maximum primary benefit payable under State laws to unemployed workers shall be not less than two-thirds of the State's average weekly wage—this would mean a substantial increase over benefits payable under existing law; and finally, the Forand bill would extend the coverage of unemployed compensation to nearly every employee in America. In short, Mr. Chairman, the Forand bill proposes to extend the period during which unemployment compensation is payable, to substantially increase the amount of benefits payable, and to extend the coverage of the Federal-State unemployment system to virtually every worker in America.

Compared with the Forand bill, the majority bill which we are now debating is a sorry piece of legislation. As I said before, all it does is extend coverage to less than 4 million more workers and does nothing about the period of payments or the amount.

This is a typical piece of Republican legislation. The majority leadership does a great deal of talking about the legislation they are going to pass and have passed, but when we examine the record we find that there has been much noise, but little substance to their legislative program. As I said before, H. R. 9709 is pretty much of a phoney—it is being proposed to give the majority party something to talk about during a campaign year and to fool the people into believing that they are getting something in the way of unemployment compensation when the facts show otherwise.

Mr. Chairman, the purpose of unemployment compensation is twofold. First, it has humanitarian objectives in that it protects those who are unfortunate enough to become unemployed in times of recession, and two, it is a practical economic program of distributing needed purchasing power to offset recessionmaking trends.

May I suggest to my friends on both sides of the aisle that there is no better time than now to enact a sound unemployment compensation to give a measure of security to every American worker. It is no secret that there are over 3 million workers now completely unemployed and another 1½ million or 2 million partly unemployed. Moreover, responsible economists are today saying that unless the present economic trends are reversed, we may have as many as 5 million fully unemployed by fall and another 3 million partly unemployed.

Since we are faced with this problem of such magnitude, you would think that the Congress would waste no time in adopting the Forand bill, but in its usual stumble, fumble, stumble approach the majority party comes forward with this so-called unemployment compensation bill which does nothing to repair the basic weaknesses or meet the most pressing needs of the unemployment insurance system. H. R. 9709 does not represent an unemployment compensation program, but is the smokescreen to cover the lack of a program and the failure of the Republican Party in the field of sound legislation.

It is my sincere hope that the House will substitute the Forand bill for H. R. 9709 and thus give the Federal Government an effective weapon against rising unemployment.

However, important though this issue of unemployment compensation may be, at the best it is only a stopgap measure providing on a very short-term basis a bare minimum of income to sustain the unemployed worker and his family. But looming beyond and far above this is the basic problem of the whole overall economic picture, and my good friend and distinguished colleague from Kansas [Mr. MILLER] focused attention to the crux of the whole matter a few minutes ago when he pointed out that the responsibility which is ours lies far beyond merely providing unemployed compensation, the big challenge is what action should we take to provide employment for all willing and able to work. I think it of the utmost importance that before this Congress adjourns it discuss and debate fully the entire economic picture so we and the country will know exactly what predicament we are in. The distinguished gentleman from Baltimore, and my very good personal friend [Mr. GARMATZ], made reference to the story carried in last Sunday's Baltimore Sun, on July 4, about the report made by the National Planning Association—a research and economic survey group composed of prominent and reliable businessmen, labor researchers, and economic statisticians and fiscal experts. The report forewarns of a much more serious unemployment situation for next year with as high as 5 to 6 million expected to be unemployed. Even though the present levels of economic activity maintain, just the normal increase in population and increase in productivity in industry will result in that employment. The economic health of our country is everything, not only for our improved well-being at home, but to enable us to carry out our responsibilities of world leadership in this trying time. Yet I must confess, I am deeply disturbed that so little time has been given to a complete and full discussion of our true economic picture—a sort of economic diagnosis—to be then followed by a remedial series of steps not only to avoid a serious economic setback, but to further improve our entire economic structure.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Chairman, as cosponsor of the Forand bill, H. R. 9430, I shall support the efforts of the gentleman from Rhode Island [Mr. FORAND] to include the provisions of that bill in this one. I believe it will go far to make it a better bill.

Unemployment insurance not only helps the recipient but it also helps the community merchant. The traditional butcher, baker and, in lieu of the candlestick maker, the public utility company that sells gas and electricity.

Insurance coverage should be extended to cover all employed and self-employed people.

If it is good for one segment of society, it is good for all.

I am happy that this bill extends coverage, particularly, to those who work for the Federal Government.

Extension and liberalization of this phase of our social-security system is highly desirable at this time when tremors that could forewarn of a catastrophic wave of unemployment are being felt. It will cushion the shock if it comes.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. GREEN].

Mr. GREEN. Mr. Chairman, as one of the cosponsors of the Forand amendments I certainly shall support them and hope that they will be included in the pending bill.

When President Eisenhower spoke of bright spots in the economy, he must have been wearing his rose-colored specs. He certainly was not looking at the Philadelphia metropolitan labor area.

That is the area comprising Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties in Pennsylvania, and Burlington, Camden, and Gloucester Counties across the river in New Jersey.

Unemployment in the Philadelphia area has gone up 110½ percent between March 1953 and March 1954. In March 1953 we had 54,700 jobless. By March 1954 the figure was 115,000.

In Philadelphia County alone, unemployment compensation claims jumped 175 percent between April 1953 and April 1954. The 1953 figure was 19,000 and the 1954 figure was 52,400.

Shipbuilding along the Delaware is at a standstill. In that industry, workers have exhausted their unemployment compensation benefits, and I am informed that most of them are on relief.

Employment in the nonferrous plants is down 50 percent from 1953 peaks. Federated Metals, a division of American Smelting, is a good example. From its normal force of 125 it is now down to 30, and the prospect is of a complete shutdown by June or July.

Employment in the transportation equipment field is off by 22 percent as a whole. At the Budd plant, where 10,000 were employed 2 years ago, only 4,900 are at work now, and more than 750 Budd workers are on relief. ACF-Brill had 1,800 workers 2 years ago, has only 800 now.

In textiles, employment is down by 18½ percent. Within the year Delta Finishing Co. closed down, making 600 jobless. Walther shut, with a loss of 250 jobs. The closing of Collins & Aikman meant 2,000 jobs, and at Keystone Worsted 100 lost their jobs. In hosiery the drop has been 35 percent. The closing of Apex Hosiery alone cost 700 people their livelihood. Surpass Leather closing put 700 more out of work, not to mention the layoffs in the Frankford Arsenal as a result of stupid planning by the Defense Department.

The electrical industry has been hard hit. Between May 1953 and May 1954 employment at Electric Storage Battery has dropped from 2,600 to 1,300, and those remaining are working a 35-hour week. At Philadelphia Insulated Wire, the drop has been 41 percent; at International Resistance, plant relocation has brought a drop from 1,400 jobs to 450. At Philco the work force of 8,000 has been cut to 6,000, a drop of 25 percent. At Proctor Electric the force of 560 is now down to 290, a drop of 48 percent.

For electrical machinery as a whole employment has dropped 7.7 percent; for machinery other than electrical, the drop has been 4.9 percent.

In chemicals the drop has been 5 percent. So it goes, down the line. Only in three categories—apparel, tobacco, and furniture—is employment any higher than a year ago, and even in these fields, the gain has been negligible.

Obviously, the economy is in trouble. Just as obviously, the Eisenhower administration is doing nothing, when so much needs to be done. The administration could increase personal tax exemptions; it could pass legislation for a higher minimum wage; it could increase social security benefits; it could start plans for building much-needed homes, schools, and hospitals. It could build needed roads and flood-control projects.

The States could vote more liberal unemployment compensation benefits. And industry could grant the unions' demand for a guaranteed annual wage.

Here are the comparative figures on manufacturing employment for the Philadelphia area, March 1953 and March 1954:

	1953	1954	Up	Down
Total employment	622,400	576,600	----	45,800
Textile	60,500	49,300	----	11,200
Electrical machinery	60,700	56,000	----	4,700
Machinery, other	49,400	47,100	----	2,300
Transportation equipment	63,700	49,500	----	14,200
Apparel	61,900	62,400	500	----
Chemicals	37,500	35,600	----	1,900
Food	45,200	43,900	----	1,300
Tobacco	7,000	7,200	100	----
Lumber	3,700	3,400	----	400
Furniture	5,800	5,900	100	----
Paper	21,500	21,300	----	200
Printing, publishing	33,900	33,500	----	400
Petroleum, coal products	23,500	22,600	----	900
Rubber	5,500	5,300	----	200
Leather	10,400	9,500	----	900
Stone, clay, and glass	13,100	12,300	----	800
Primary metals	37,200	35,100	----	2,100
Fabricated metal products	48,600	45,700	----	2,900
Instruments	16,400	16,000	----	400
Miscellaneous	16,900	15,000	----	1,900

The CHAIRMAN. If there are no further requests for time, under the rule the bill is considered as having been read for amendment. No amendments are in order to the bill except amendments offered by direction of the Committee on Ways and Means and either or both of the proposed amendments printed in the CONGRESSIONAL RECORD of July 7, 1954, page 9980.

The bill is as follows:

Be it enacted, etc., That, effective with respect to services performed after December 31, 1954, section 1607 (a) of the Internal Revenue Code is hereby amended by striking out "eight or more" and inserting in lieu thereof "four or more".

SEC. 2. Effective with respect to rates of contributions for periods after December 31, 1954, section 1602 (a) of the Internal Revenue Code is hereby amended by adding after paragraph (3) the following:

"For any person (or group of persons) who has (or have) not been subject to the State law for a period of time sufficient to compute the reduced rates permitted by paragraphs (1) (2), and (3) of this subsection on a 3-year basis, the period of time required may be reduced to the amount of time the person (or group of persons) has (or have) had experience under or has (or have) been subject to the State law, whichever is appropriate, but in no case less than 1 year immediately preceding the computation date."

SEC. 3. Effective with respect to the taxable year 1955 and succeeding taxable years—

(1) section 1605 (c) of the Internal Revenue Code is hereby amended to read as follows:

"(c) Time for payment: The tax shall be paid not later than January 31, next following the close of the taxable year."; and

(2) section 1605 (d) of the Internal Revenue Code is hereby amended by striking out "or any installment thereof" each place it appears.

SEC. 4. (a) The Social Security Act, as amended, is further amended by adding after title XIV thereof the following new title:

"TITLE XV—UNEMPLOYMENT COMPENSATION FOR FEDERAL EMPLOYEES

"DEFINITIONS

"SEC. 1501. When used in this title—

"(a) The term 'Federal service' means any service performed after 1952 in the employ of the United States or any instrumentality thereof which is wholly owned by the United States, except that the term shall not include service performed—

"(1) by an elective officer in the executive or legislative branch of the Government of the United States;

"(2) as a member of the Armed Forces of the United States;

"(3) by foreign service personnel for whom special separation allowances are provided by the Foreign Service Act of 1946 (60 Stat. 999);

"(4) prior to January 1, 1955, for the Bonneville Power Administrator if such service constitutes employment under section 1607 (m) of the Internal Revenue Code;

"(5) outside the United States by an individual who is not a citizen of the United States;

"(6) by any individual as an employee who is excluded by Executive order from the operation of the Civil Service Retirement Act of 1930 because he is paid on a contract or fee basis;

"(7) by any individual as an employee receiving nominal compensation of $12 or less per annum;

"(8) in a hospital, home, or other institution of the United States by a patient or inmate thereof;

"(9) by any individual as an employee included under section 2 of the act of August 4, 1947 (relating to certain interns, student nurses, and other student employees of hospitals of the Federal Government; 5 U. S. C., sec. 1052);

"(10) by any individual as an employee serving on a temporary basis in case of fire, storm, earthquake, flood, or other similar emergency;

"(11) by any individual as an employee who is employed under a Federal relief program to relieve him from unemployment; or

"(12) as a member of a State, county, or community committee under the Production and Marketing Administration or of any other board, council, committee, or other similar body, unless such board, council, committee, or other body is composed exclusively of individuals otherwise in the full-time employ of the United States.

"For the purpose of paragraph (5) of this subsection, the term 'United States' when used in a geographical sense means the States, Alaska, Hawaii, the District of Columbia, Puerto Rico, and the Virgin Islands.

"(b) The term 'Federal wages' means all remuneration for Federal service, including cash allowances and remuneration in any medium other than cash.

"(c) The term 'Federal employee' means an individual who has performed Federal service.

"(d) The term 'compensation' means cash benefits payable to individuals with respect to their unemployment (including any portion thereof payable with respect to dependents).

"(e) The term 'benefit year' means the benefit year as defined in the applicable State unemployment compensation law; except that, if such State law does not define a benefit year, then such term means the period prescribed in the agreement under this title with such State or, in the absence of an agreement, the period prescribed by the Secretary.

"(f) The term 'Secretary' means the Secretary of Labor.

"COMPENSATION FOR FEDERAL EMPLOYEES UNDER STATE AGREEMENTS

"SEC. 1502. (a) The Secretary is authorized on behalf of the United States to enter into an agreement with any State, or with the agency administering the unemployment compensation law of such State, under which such State agency (1) will make, as agent of the United States, payments of compensation, on the basis provided in subsection (b) of this section, to Federal employees, and (2) will otherwise cooperate with the Secretary and with other State agencies in making payments of compensation under this title.

"(b) Any such agreement shall provide that compensation will be paid by the State to any Federal employee, with respect to unemployment after December 31, 1954, in the same amount, on the same terms, and subject to the same conditions as the compensation which would be payable to such employee under the unemployment compensation law of the State if the Federal service and Federal wages of such employee assigned to such State under section 1504 had been included as employment and wages under such law.

"(c) Any determination by a State agency with respect to entitlement to compensation pursuant to an agreement under this section shall be subject to review in the same manner and to the same extent as determinations under the State unemployment compensation law, and only in such manner and to such extent.

"(d) Each agreement shall provide the terms and conditions upon which the agreement may be amended or terminated.

"COMPENSATION FOR FEDERAL EMPLOYEES IN ABSENCE OF STATE AGREEMENT

"SEC. 1503. (a) In the case of a Federal employee whose Federal service and Federal wages are assigned under section 1504 to a State which does not have an agreement under this title with the Secretary, the Secretary, in accordance with regulations prescribed by him, shall, upon the filing by such employee of a claim for compensation under this subsection, make payments of compensation to him with respect to unemployment after December 31, 1954, in the same amounts, on the same terms, and subject to the same conditions as would be paid to him under the unemployment compensation law of such State if such employee's Federal service and Federal wages had been included as employment and wages under such law, except that if such employee, without regard to his Federal service and Federal wages, has employment or wages sufficient to qualify for any compensation during the benefit year under the law of such State, then payments of compensation under this

subsection shall be made only on the basis of his Federal service and Federal wages.

"(b) In the case of a Federal employee whose Federal service and Federal wages are assigned under section 1504 to Puerto Rico or the Virgin Islands, the Secretary, in accordance with regulations prescribed by him, shall, upon the filing by such employee of a claim for compensation under this subsection, make payments of compensation to him with respect to unemployment after December 31, 1954, in the same amounts, on the same terms, and subject to the same conditions as would be paid to him under the unemployment compensation law of the District of Columbia if such employee's Federal service and Federal wages had been included as employment and wages under such law, except that if such employee, without regard to his Federal service and Federal wages, has employment or wages sufficient to qualify for any compensation during the benefit year under such law, then payments of compensation under this subsection shall be made only on the basis of his Federal service and Federal wages.

"(c) Any Federal employee whose claim for compensation under subsection (a) or (b) of this section has been denied shall be entitled to a fair hearing in accordance with regulations prescribed by the Secretary. Any final determination by the Secretary with respect to entitlement to compensation under this section shall be subject to review by the courts in the same manner and to the same extent as is provided in section 205 (g) with respect to final decisions of the Secretary of Health, Education, and Welfare under title II.

"(d) The Secretary may utilize for the purposes of this section the personnel and facilities of the agencies in Puerto Rico and the Virgin Islands cooperating with the United States Employment Service under the act of June 6, 1933 (48 Stat. 113), as amended, and may delegate to officials of such agencies any authority granted to him by this section whenever the Secretary determines such delegation to be necessary in carrying out the purposes of this title. For the purpose of payments made to such agencies under such act, the furnishing of such personnel and facilities shall be deemed to be a part of the administration of the public employment offices of such agencies.

"STATE TO WHICH FEDERAL SERVICE AND WAGES ARE ASSIGNABLE

"SEC. 1504. In accordance with regulations prescribed by the Secretary, the Federal service and Federal wages of an employee shall be assigned to the State in which he had his last official station in Federal service prior to the filing of his first claim for compensation for the benefit year, except that—

"(1) if, at the time of the filing of such first claim, he resides in another State in which he performed, after the termination of such Federal service, service covered under the unemployment compensation law of such other State, such Federal service and Federal wages shall be assigned to such other State;

"(2) if his last official station in Federal service, prior to the filing of such first claim, was outside the United States, such Federal service and Federal wages shall be assigned to the State where he resides at the time he files such first claim; and

"(3) if such first claim is filed while he is residing in Puerto Rico or the Virgin Islands, such Federal service and Federal wages shall be assigned to Puerto Rico or the Virgin Islands.

"TREATMENT OF ACCRUED ANNUAL LEAVE

"SEC. 1505. For the purposes of this title, in the case of a Federal employee who is performing Federal service at the time of his separation from employment by the United States or any instrumentality thereof, (1) the Federal service of such employee shall be considered as continuing during the period, subsequent to such separation, with respect to which he is considered as having received payment of accumulated and current annual or vacation leave pursuant to any Federal law, and (2) subject to regulations of the Secretary concerning allocation over the period, such payment shall constitute Federal wages.

"PAYMENTS TO STATES

"SEC. 1506. (a) Each State shall be entitled to be paid by the United States an amount equal to the additional cost to the State of payments of compensation made under and in accordance with an agreement under this title which would not have been incurred by the State but for the agreement.

"(b) In making payments pursuant to subsection (a) of this section, there shall be paid to the State, either in advance or by way of reimbursement, as may be determined by the Secretary, such sum as the Secretary estimates the State will be entitled to receive under this title for each calendar month, reduced or increased, as the case may be, by any sum by which the Secretary finds that his estimates for any prior calendar month were greater or less than the amounts which should have been paid to the State. Such estimates may be made upon the basis of such statistical, sampling, or other method as may be agreed upon by the Secretary and the State agency.

"(c) The Secretary shall from time to time certify to the Secretary of the Treasury for payment to each State sums payable to such State under this section. The Secretary of the Treasury, prior to audit or settlement by the General Accounting Office, shall make payment to the State in accordance with such certification, from the funds for carrying out the purposes of this title.

"(d) All money paid a State under this title shall be used solely for the purposes for which it is paid; and any money so paid which is not used for such purposes shall be returned, at the time specified in the agreement under this title, to the Treasury and credited to current applicable appropriations, funds, or accounts from which payments to States under this title may be made.

"(e) An agreement under this title may require any officer or employee of the State certifying payments or disbursing funds pursuant to the agreement, or otherwise participating in its performance, to give a surety bond to the United States in such amount as the Secretary may deem necessary, and may provide for the payment of the cost of such bond from funds for carrying out the purposes of this title.

"(f) No person designated by the Secretary, or designated pursuant to an agreement under this title, as a certifying officer, shall, in the absence of gross negligence or intent to defraud the United States, be liable with respect to the payment of any compensation certified by him under this title.

"(g) No disbursing officer shall, in the absence of gross negligence or intent to defraud the United States, be liable with respect to any payment by him under this title if it was based upon a voucher signed by a certifying officer designated as provided in subsection (f) of this section.

"(h) For the purpose of payments made to a State under title III, administration by the State agency of such State pursuant to an agreement under this title shall be deemed to be a part of the administration of the State unemployment-compensation law.

"INFORMATION

"SEC. 1507. (a) All Federal departments, agencies, and wholly owned instrumentalities of the United States are directed to make available to State agencies which have agreements under this title or to the Secretary, as the case may be, such information with respect to the Federal service and Federal wages of any Federal employee as the Secretary may find practicable and necessary for the determination of such employee's entitlement to compensation under this title. Such information shall include the findings of the employing agency with respect to—

"(1) whether the employee has performed Federal service,

"(2) the periods of such service,

"(3) the amount of remuneration for such service, and

"(4) the reasons for termination of such service.

The employing agency shall make the findings in such form and manner as the Secretary shall by regulations prescribe (which regulations shall include provision for correction by the employing agency of errors or omissions). Any such findings which have been made in accordance with such regulations shall be final and conclusive for the purposes of sections 1502 (c) and 1503 (c).

"(b) The agency administering the unemployment compensation law of any State shall furnish to the Secretary such information as the Secretary may find necessary or appropriate in carrying out the provisions of this title, and such information shall be deemed reports required by the Secretary for the purposes of paragraph (6) of subsection (a) of section 303.

"PENALTIES

"SEC. 1508. (a) Whoever makes a false statement or representation of a material fact knowing it to be false, or knowingly fails to disclose a material fact, to obtain or increase for himself or for any other individual any payment authorized to be paid under this title or under an agreement thereunder shall be fined not more than $1,000 or imprisoned for not more than 1 year, or both.

"(b) (1) If a State agency or the Secretary, as the case may be, or a court of competent jurisdiction, finds that any person—

"(A) has made, or has caused to be made by another, a false statement or representation of a material fact knowing it to be false, or has knowingly failed, or caused another to fail, to disclose a material fact, and

"(B) as a result of such action has received any amount as compensation under this title to which he was not entitled,

such person shall be liable to repay such amount to the State agency or the Secretary, as the case may be. In lieu of requiring the repayment of any amount under this paragraph, the State agency or the Secretary, as the case may be, may recover such amount by deductions from any compensation payable to such person under this title during the 2-year period following the date of the finding. Any such finding by a State agency or the Secretary, as the case may be, may be made only after an opportunity for a fair hearing, subject to such further review as may be appropriate under sections 1502 (c) and 1503 (c).

"(2) Any amount repaid to a State agency under paragraph (1) shall be deposited into the fund from which payment was made. Any amount repaid to the Secretary under paragraph (1) shall be returned to the Treasury and credited to the current applicable appropriation, fund, or account from which payment was made.

"REGULATIONS

"SEC. 1509. The Secretary is hereby authorized to make such rules and regulations as may be necessary to carry out the provisions of this title. The Secretary shall insofar as practicable consult with representatives of the State unemployment compensation agencies before prescribing any rules or regulations which may affect the performance by such agencies of functions pursuant to agreements under this title.

"APPROPRIATIONS

"SEC. 1510. There are hereby authorized to be appropriated out of any moneys not otherwise appropriated such sums as are necessary to carry out the provisions of this title."

(b) Section 1606 (e) and section 1607 (m) of the Internal Revenue Code are each hereby amended by inserting after "December 31, 1945," the following: "and before January 1, 1955."

The CHAIRMAN. Are there any committee amendments?

Mr. REED of New York. There are none.

The CHAIRMAN. Does any member of the Committee on Ways and Means desire at this time to offer an amendment printed in the RECORD of July 7, 1954?

Mr. FORAND. Mr. Chairman, I offer an amendment, being one of the amendments included in the RECORD of yesterday.

The Clerk read as follows:

Amendment offered by Mr. FORAND: Page 2, after line 9, insert:

"SEC. 3. (a) Effective as of July 1, 1956, section 1603 (a) of the Internal Revenue Code is hereby amended by redesignating paragraph (6) as paragraph (8) and by inserting after paragraph (5) the following new paragraphs:

"'(6) The maximum weekly compensation payable under such law shall be an amount equal to at least two-thirds of the average weekly wage earned by employees within such State, such average to be computed by the State agency of such State on July 1, 1956, and on July 1 of each succeeding year on the basis of the wages, including the amounts excluded therefrom under section 1607 (b) (1), paid during the last full year for which necessary figures are available;

"'(7) The weekly compensation payable to any individual shall be (A) the maximum weekly compensation payable under such law, or (B) an amount (exclusive of any compensation payable with respect to dependents) equal to at least one-half of such individual's average weekly wage as determined by the State agency, whichever is the lesser;'.

"(b) Effective as of July 1, 1956, section 1607 of the Internal Revenue Code is hereby amended by adding at the end thereof the following new subsections:

"'(p) Benefit year: The term "benefit year" means the period prescribed by State law, but not in excess of 52 consecutive weeks, for which an eligible individual may receive weekly unemployment-compensation benefits.

"'(q) Base period: The term "base period" means the period prescribed by State law beginning not prior to the first day of the fifth full calendar quarter beginning prior to the benefit year.

"'(r) High quarter wages: The term "high quarter wages" means, in the case of any individual, the amount of wages (as defined by State law) paid to such individual in the calendar quarter of the base period for which his total wages were highest.

"'(s) Average weekly wage: The term "average weekly wage" means, in the case of any individual, the amount of wages (as defined by State law) paid to such individual during the period used for determining his compensation for a week of total unemployment (1) in case the period used is the calendar quarter in which such individual was paid his high quarter wages, divided by 13; or (2) if some other period is used, divided by the number of weeks, during the period used, in which he performed services in employment (as defined by State law).'"

Renumber the sections of the bill which follow accordingly.

Mr. FORAND (interrupting the reading of the amendment). Mr. Chairman, I ask unanimous consent that the further reading of the amendment be dispensed with and that it be printed in the RECORD at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. FORAND. Mr. Chairman, I think I can save the time of the committee if I just say a few words on the amendment. I will say for the benefit of the members of the committee that this is the first amendment which has been discussed so much this afternoon. It has to do with the fixing of the amount of benefits that would be payable weekly. It provides for a maximum of two-thirds of the State's average weekly wage in the State and a minimum of not less than 50 percent of the average weekly wage of the individual.

I urge adoption of the amendment.

Mr. REED of New York. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the amendment to force the States to increase the amount of benefits was considered and rejected by the Ways and Means Committee.

The administration opposes this amendment as well as the next amendment to be offered.

The President has called the present level of benefits inadequate and has urged the States to take legislative action raising their benefit payments. In the economic report of the President of January 1954, the President stated as follows:

It is suggested that the States raise these dollar maximums—

Referring to benefit levels—

so that the payments to the great majority of the beneficiaries may equal at least one-half their regular earnings.

However, the administration definitely opposes the pending proposal to reach this objective by imposing Federal standards on the States.

This amendment which is now being offered to H. R. 9709 would propose for the first time in the history of the unemployment compensation program a Federal standard for benefit levels under the act. Such a Federal standard would result in the denial to the respective States of the right to determine proper benefit levels for the unemployed in the State. It would deny the States the right to determine benefit amounts based on the economic needs of its citizens and the economic conditions existing within the State. It is my opinon that the Members of the House should vote to defeat this amendment so that the States would continue to have the right to establish appropriate benefit levels. I am confident that, given time, the States will take whatever action is necessary to adopt appropriate improvements in their unemployment insurance programs.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Indiana.

Mr. HALLECK. Mr. Chairman, I think it ought to be understood that this measure that the committee has reported and which is presently before us is a very important part of the administration program. At the same time, I think it should be understood that the amendments that are offered, which would, in effect, federalize the system and remove from the States the powers and rights that they had heretofore had, are not in line with the program. So, I trust that these amendments will be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Rhode Island [Mr. FORAND].

The amendment was rejected.

Mr. FORAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORAND: Page 2, after line 9, insert:

"SEC. 3. Effective as of July 1, 1956, section 1603 (a) of the Internal Revenue Code is hereby amended by redesignating paragraph (6) as paragraph (7) and by inserting after paragraph (5) the following new paragraph:

"'(6) Compensation shall not be denied to any eligible individual for any week of total unemployment during his benefit year by reason of exhaustion or reduction of benefit rights or cancellation of his wage credit until he has been paid unemployment compensation for not less than 26 weeks during such year. For purposes of this paragraph, the term "benefit year" means the period prescribed by State law, but not in excess of 52 consecutive weeks, for which an individual may receive weekly unemployment-compensation benefits.'"

Renumber the sections of the bill which follow accordingly.

Mr. FORAND. Mr. Chairman, this is a very simple amendment. It simply says that we are going to try to carry out the suggestions that the President made to the States. When my friends on the other side of the House tell us that we are trying to federalize the system I say to them that when the original act was written certain standards were written into that act. This is simply another standard. Therefore, if this means federalizing the system, then we federalized it from the beginning.

The fear I have today is that again we are going to continue to procrastinate; we are going to put off; we are going to study; we are going to have other things done; we are going to stall, and stall, and stall. And in the meantime we will be letting the people suffer. If that is the position the opposition wants to take, I say go ahead. For my part, I am doing everything I possibly can to bring about a remedy to a situation that needs attention right as of this moment.

I sincerely hope we shall have a favorable vote on this amendment.

Mr. REED of New York. Mr. Chairman, I rise to express opposition to this amendment which has as its purpose the establishment of Federal standards which prescribe the minimum period during which unemployment compensation benefits will be paid. As was true with respect to the previous amendment which the House has just defeated, the matter of the duration of benefits is one that has historically been left to State determination. The administration op-

poses this amendment. The President has advocated that any action to increase the duration of benefits be taken by the respective States. I will not repeat the argument I made with respect to the other amendment, but merely call the attention of the House to the fact that those arguments are equally applicable here. This amendment is an undue invasion on what has historically been the sovereign right of our respective States, and I urge that the Members vote to defeat the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Rhode Island [Mr. FORAND].

The amendment was rejected.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HOEVEN, Chairman of the Committee of the Whole House on the State of the Union, reported that the Committee having had under consideration the bill (H. R. 9709) to extend and improve the unemployment compensation program pursuant to House Resolution 614, he reported the bill back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

Mr. FORAND. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. FORAND. I am.

The SPEAKER. The gentleman qualifies. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. FORAND moves to recommit the bill H. R. 9709 to the Committee on Ways and Means with instructions to report the same to the House forthwith with amendments as follows:

Page 2, after line 9, insert the following:

"SEC. 3. (a) Section 1603 (a) of the Internal Revenue Code is hereby amended by redesignating paragraph (6) as paragraph (9) and by inserting after paragraph (5) the following new paragraphs:

"'(6) The maximum weekly compensation payable under such law shall be an amount equal to at least two-thirds of the average weekly wage earned by employees within such State, such average to be computed by the State agency of such State on July 1, 1956, and on July 1 of each succeeding year on the basis of the wages, including the amounts excluded therefrom under section 1607 (b) (1), paid during the last full year for which necessary figures are available;

"'(7) The weekly compensation payable to any individual shall be (A) the maximum weekly compensation payable under such law, or (B) an amount (exclusive of any compensation payable with respect to dependents) equal to at least one-half of such individual's average weekly wage as determined by the State agency, whichever is the lesser;

"'(8) Compensation shall not be denied to any eligible individual for any week of total unemployment during his benefit year by reason of exhaustion or reduction of benefit rights or cancellation of his wage credit until he has been paid unemployment compensation for not less than 26 weeks during such year;'

"(b) Section 1607 of the Internal Revenue Code is hereby amended by adding at the end thereof the following new subsections:

"'(p) Benefit year: The term "benefit year" means the period prescribed by State law, but not in excess of 52 consecutive weeks, for which an eligible individual may receive weekly unemployment compensation benefits.

"'(q) Base period: The term "base period" means the period prescribed by State law beginning not prior to the first day of the fifth full calendar quarter beginning prior to the benefit year.

"'(r) High quarter wages: The term "high quarter wages" means, in the case of any individual, the amount of wages (as defined by State law) paid to such individual in the calendar quarter of the base period for which his total wages were highest.

"'(s) Average weekly wage: The term "average weekly wage" means, in the case of any individual, the amount of wages (as defined by State law) paid to such individual during the period used for determining his compensation for a week of total unemployment (1) in case the period used is the calendar quarter in which such individual was paid his high quarter wages, divided by 13; or (2) if some other period is used, divided by the number of weeks, during the period used, in which he performed services in employment (as defined by State law).'

"(c) This section shall take effect as of July 1, 1956."

And renumber the sections of the bill which follow accordingly.

Mr. REED of New York. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. FORAND) there were—ayes 34, noes 91.

Mr. FORAND. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Obviously a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 110, nays 241, not voting 83, as follows:

[Roll No. 98]

Mr. Vursell with Mr. Heller.
Mr. Hinshaw with Mr. Buckley.
Mr. Radwan with Mr. Kilday.
Mr. Norblad with Mr. Wilson of Texas.
Mr. Weichel with Mr. Wheeler.
Mr. Kersten of Wisconsin with Mr. Frazier.

Mr. SMITH of Kansas. Mr. Speaker, I voted "nay." I have a live pair with the gentleman from Montana, Mr. METCALF. I withdraw my vote "nay" and answer "present."

Mr. HOFFMAN of Michigan changes his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

U. S. S. "CONSTITUTION" AND OTHER HISTORICAL VESSELS

Mr. DEVEREUX. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 8247) to provide for the restoration and mainte-

nance of the U. S. S. *Constitution* and to authorize the disposition of the U. S. S. *Constellation*, U. S. S. *Hartford*, U. S. S. *Olympia*, and U. S. S. *Oregon*, and for other purposes, with Senate amendments and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments as follows:

Page 3, line 4, strike out "subsection" and insert "subsections 2 (c) and."

Page 3, line 16, strike out all after "vessel" down to and including "received" in line 18.

Page 5, line 4, strike out "in subsection 4 (a) and."

Page 5, lines 6 and 7, strike out "in his discretion, by sale or by scrapping."

Page 5, line 8, after "Secretary", insert "Any such vessel may be disposed of by sale or by scrapping, in the discretion of the Secretary."

Page 5, line 16, strike out "*Constellation, Hartford, Olympia*" and insert "*Olympia*."

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Senate amendments were concurred in, and a motion to reconsider was laid on the table.

AMENDING FOOD, DRUG, AND COSMETIC ACT WITH RESPECT TO RESIDUE OF PESTICIDE CHEMICALS

Mr. SPRINGER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 7125) to amend the Federal Food, Drug, and Cosmetic Act with respect to residues of pesticide chemicals in or on raw agricultural commodities, with a Senate amendment thereto and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 18, line 19, strike out "section." and insert "section."

"'(o) The Secretary of Health, Education, and Welfare shall by regulation require the payment of such fees as will in the aggregate, in the judgment of the Secretary, be sufficient over a reasonable term to provide, equip, and maintain an adequate service for the performance of the Secretary's functions under this section. Under such regulations, the performance of the Secretary's services or other functions pursuant to this section, including any one or more of the following, may be conditioned upon the payment of such fees: (1) The acceptance of filing of a petition submitted under subsection (d); (2) the promulgation of a regulation establishing a tolerance, or an exemption from the necessity of a tolerance, under this section, or the amendment or repeal of such a regulation; (3) the referral of a petition or proposal under this section to an advisory committee; (4) the acceptance for filing of objections under subsection (d) (5); or (5) the certification and filing in court of a transcript of the proceedings and the record under subsection (1) (2). Such regulations may further provide for waiver or refund of fees in whole or in part when in the judgment of the Secretary such waiver or refund is equitable and not contrary to the purposes of this subsection.'"

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

AMENDMENT TO MERCHANT MARINE ACT, 1936

Mr. TOLLEFSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 2408) to amend the Merchant Marine Act, 1936, to provide a national defense reserve of tankers and to promote the construction of new tankers, and for other purposes, with House amendments, insist on the House amendments and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Washington? [After a pause] The Chair hears none, and appoints the following conferees: Messrs. TOLLEFSON, ALLEN of California, SEELY-BROWN, BONNER, and SHELLEY.

ABOLISHING OFFICES OF ASSISTANT TREASURER AND ASSISTANT REGISTER OF THE TREASURY

Mr. REED of New York. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3605) to abolish the offices of Assistant Treasurer and Assistant Register of the Treasury and to provide for an Under Secretary for Monetary Affairs and an additional Assistant Secretary in the Treasury Department.

The Clerk read the title of the bill.

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to extend an explanation at this point in the RECORD.

Mr. COOPER. Mr. Speaker, reserving the right to object, and I shall not, I simply state that this bill was favorably reported by unanimous vote of the Committee on Ways and Means.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. REED of New York. Mr. Speaker, this legislation has been acted on favorably by the Senate. It was reported to the House by the unanimous vote of the Ways and Means Committee.

Mr. Speaker, S. 3605 would abolish the office of Assistant Treasurer of the United States and the office of Assistant Register of the Treasury. It is pointed out that neither of these offices has been filled under the Eisenhower administration. Based on this experience it has been determined by the Treasury Department that they are unnecessary and the Secretary of the Treasury has requested that they be abolished.

The two primary responsibilities placed on the Secretary of the Treasury by the Congress are, first, the collection of revenue and the preparation of plans for the improvement and management of the revenue; and, second, the support of the public credit. It is desirable that the Secretary have under him two top officials of comparable rank on whom he can rely for assistance on these basic responsibilities. S. 3605 would authorize in the Department a new position of Under Secretary for Monetary Affairs to whom supervision of functions relating to debt management and monetary policies could be assigned. S. 3605 would also establish a new position of Assistant Secretary in addition to the two positions of Assistant Secretary presently authorized. This position is necessary to provide the Secretary of the Treasury with an assistant of sufficient rank to enable him to carry out most effectively a number of related duties recently assigned to the Secretary of the Treasury. These duties include the lending functions under section 302 of the Defense Production Act of 1950, the lending functions under section 409 of the Federal Civil Defense Act of 1950, the liquidation of assets and winding up of the affairs of the Reconstruction Finance Corporation and other similar responsibilities recently assigned to the Secretary of the Treasury.

The Clerk read the bill, as follows:

Be it enacted, etc., That (a) section 303 of the Revised Statutes, as amended (39 U. S. C. 143), establishing the office of Assistant Treasurer of the United States, and the act approved April 9, 1926 (31 U. S. C. 143a), designating the Deputy Assistant Treasurer as Assistant Treasurer, are repealed.

(b) Section 304 of the Revised Statutes, as amended (31 U. S. C. 144), is amended (1) by striking out "Treasurer may, in his discretion, and with the consent of the Secretary of the Treasury, authorize the Assistant Treasurer to act in the place and discharge any or all of the duties of the Treasurer of the United States; and the", and (2) by striking out "both the Treasurer and Assistant Treasurer" and inserting in lieu thereof "the Treasurer."

SEC. 2. Sections 314 and 315 of the Revised Statutes, as amended, and the joint resolution approved December 13, 1892 (31 U. S. C. 164, 165, and 166), establishing the office of Assistant Register of the Treasury, specifying the duties of the office, and providing for the appointment of an Acting Assistant Register, are repealed.

SEC. 3. The provision in the act of February 17, 1922, which established the office of Under Secretary of the Treasury, as amended and supplemented (5 U. S. C. 244), is amended to read as follows:

"There shall be in the Department of the Treasury an Under Secretary and an Under Secretary for Monetary Affairs, each to be appointed by the President, by and with the advice and consent of the Senate. The compensation of the Under Secretary and the Under Secretary for Monetary Affairs shall be at the rate of $17,500 each per annum. They shall perform such duties in the Office of the Secretary as may be prescribed by the Secretary of the Treasury."

SEC. 4. Section 234 of the Revised Statutes, as amended (5 U. S. C. 246), is further amended to read as follows:

"234. There shall be in the Department of the Treasury three Assistant Secretaries of the Treasury, who shall be appointed by the President, by and with the advice and consent of the Senate."

The SPEAKER. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments:

Page 1, line 4, strike out "39" and insert in lieu thereof "31."

Page 3, line 3, strike out "234" and insert in lieu thereof "SEC. 234."

The committee amendments were agreed to.

Mr. JENKINS. Mr. Speaker, I move to strike out the last word so that I might

ask the chairman of the Committee on Ways and Means a question. It is a fact, is it not, that the evidence before the Ways and Means Committee showed that these changes are absolutely necessary and desirable and that they will be an advantage to the Treasury itself and that it will also be to the advantage of the people who might have business with the Treasury or any of its many departments?

Mr. REED of New York. The gentleman is correct.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNOUNCEMENT

Mr. RABAUT. Mr. Speaker, I was in my office this morning and I learn now that on rollcall 97, I am recorded as not being present. There are four people in my office besides myself and none of them heard the bells. I think we must have had a jammed electrical system. If I had been here I would have voted "yea."

COMMITTEE ON THE JUDICIARY

Mr. REED of Illinois. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight to file reports.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

VOCATIONAL REHABILITATION AMENDMENTS OF 1954

Mr. McCONNELL. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That this act may be cited as the "Vocational Rehabilitation Amendments of 1954."

AMENDMENTS TO THE VOCATIONAL REHABILITATION ACT

SEC. 2. The Vocational Rehabilitation Act (29 U. S. C., ch. 4) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS FOR GRANTS; PURPOSES FOR WHICH AVAILABLE

"SECTION 1. For the purpose of assisting the States in rehabilitating physically and mentally handicapped persons so that they may prepare for and engage in remunerative employment to the extent of their capabilities, thereby increasing not only their social and economic well-being but also the productive capacity of the Nation, there are hereby authorized to be appropriated for each fiscal year, beginning with the fiscal year ending June 30, 1955, such sums for grants to carry out the purposes of this act as the Congress may determine. The sums so appropriated for any fiscal year shall be available for—

"(1) grants to States to assist them in meeting the costs of vocational rehabilitation services;

"(2) grants to States to assist them in initiating projects for the extension and improvement of their vocational rehabilitation services; and

"(3) grants to States and to public and other nonprofit organizations and agencies to assist in meeting the costs of projects which hold unique promise of making a substantial contribution to the solution of vocational rehabilitation problems common to a number of States and of projects or measures directed at meeting vocational rehabilitation problems of national significance or concern.

The portion of such sums which shall be available for each of such three types of grants shall be specified in the act appropriating such sums.

"GRANTS TO STATES FOR VOCATIONAL REHABILITATION SERVICES

"SEC. 2. (a) (1) From the sums available for any fiscal year for grants to States to assist them in meeting the costs of vocational rehabilitation services, each State shall, subject to the provisions of paragraph (2), be entitled to an allotment equal to the total of the following: (A) an amount which bears the same ratio to the first $23 million of such sums, plus 80 percent of any excess of such sums over $23 million, as the product of (i) the population of the State, and (ii) the square of its allotment percentage (as defined in section 10 (h)) bears to the sum of the corresponding products for all the States, and (B) an amount which bears the same ratio to the remaining 20 percent of such excess as the population of such States bears to the population of all the States.

"(2) The allotment to any State, as computed under the provisions of paragraph (1) for any year ending prior to July 1, 1959, which is less than such State's base allotment shall, notwithstanding such provisions, be increased to the amount of such base allotment. If the allotment to any State, as computed under the provisions of paragraph (1) for any year ending prior to July 1, 1959, is in excess of such State's base allotment, and the allotment of any other State for such year is increased pursuant to the preceding sentence, such excess shall be reduced by a percentage which, if applied as a uniform percentage reduction to the excesses of all States having such excesses, would produce an amount equal to the total of the increases made pursuant to the preceding sentence for such year.

"(3) For purposes of this subsection, a State's base allotment is an amount equal to the amount allotted to such State for expenditures, under its State plan approved under this act, for the fiscal year ending June 30, 1954, increased by 5.53608 percent, except that if the sums available for any fiscal year for grants to States under this section are less than $23 million, each State's base allotment shall be an amount which bears the same ratio to the amount computed under the preceding provisions of this paragraph as such sums bear to $23 million.

"(4) In the case of any State for which there is a separate State agency administering or supervising the administration of the part of a State plan under which vocational rehabilitation services are provided for the blind, the State's allotment under this section shall be divided between such agency and the State agency administering (or supervising the administration of) the remainder of the State plan in the same proportion as the Secretary estimates, prior to the end of the year, State and other non-Federal funds will be available, during the fiscal year for which the allotment is made, for meeting the cost of vocational rehabilitation services under the two portions of the State plan, except that (A) for any fiscal year ending prior to July 1, 1959, the portion of the allotment to any State, in which there were such separate agencies, equal to such State's base allotment shall be divided in the same proportion as the amount allotted to the State under this act for expenditures during the fiscal year ending June 30, 1954, was divided between such agencies, and (B) for any fiscal year ending after June 30, 1955, and prior to July 1, 1959, there shall be excluded in estimating the State and other non-Federal funds that will be available, during the fiscal year for which the allotment is made, for meeting the cost of vocational rehabilitation services under each portion of the State plan, the amount equal to the amount of State or other non-Federal funds which the Secretary estimates were available for expenditure under each portion of the State plan during the fiscal year ending June 30, 1954.

"(b) (1) From each State's allotment available for such purpose for any fiscal year ending after June 30, 1962, the Secretary shall pay to such State, an amount equal to the Federal share (determined as provided in section 10 (i)) of the cost of vocational rehabilitation services under the plan for such State approved under section 5, including expenditures for the administration of the State plan.

"(2) From each State's allotment available for such purpose for any fiscal year ending prior to July 1, 1962, the Secretary shall make payments to such State, with respect to the cost of vocational rehabilitation services under the plan of such State approved under section 5, including expenditures for the administration of the State plan, determined as follows:

"(A) A portion of such allotment equal to the State's base allotment shall be available for payment to such State of its adjusted Federal share of such cost of vocational rehabilitation services.

"(B) If the Secretary determines, prior to the end of such year, that costs of vocational rehabilitation services during such year, sufficient to entitle the State to full payment of the portion of its allotment specified in subparagraph (A), will be met out of payments under such subparagraph and State and other non-Federal funds available for such purposes, the remainder of such State's allotment for such year shall be available for payment of the following percentages of any additional costs of vocational rehabilitation services during such year: 100 percent of any such additional costs in the case of the fiscal year ending June 30, 1955; 80 percent of any such additional costs in the case of the fiscal year ending June 30, 1956; 65 percent of any such additional costs in the case of the fiscal year ending June 30, 1957; 55 percent or the Federal share, whichever is higher, of any such additional costs in the case of the fiscal year ending June 30, 1958; and the Federal share of any such additional costs in the case of any fiscal year thereafter.

"(3) For purposes of this subsection—

"(A) a State's base allotment shall be determined as provided in subsection (a); and

"(B) a State's adjusted Federal share for any fiscal year means—

"(i) in the case of any fiscal year ending prior to July 1, 1959, the 1954 Federal share for such State; and

"(ii) in the case of the fiscal year ending June 30, 1960, June 30, 1961, or June 30, 1962, the Federal share for such State for such year increased (if it is less than such State's 1954 Federal share) or decreased (if it is greater than such State's 1954 Federal share) by 75 percent, 50 percent, and 25 percent, respectively, of the difference between such Federal share for the year involved and the 1954 Federal share.

"(C) A State's 1954 Federal share means the percentage which (i) the base allotment

of such State is of (ii) the sum of such allotment and the amount of 1954 State funds.

"(D) The 1954 State funds for any State shall be the amount of State and other non-Federal funds available for expenditures, under such State's plan approved under this act, for the fiscal year ending June 30, 1954, as estimated by the Secretary for purposes of determining such State's allotment for such year for such expenditures.

"(4) If in any State there is, during the fiscal year ending June 30, 1954, and during any subsequent fiscal year ending prior to July 1, 1962, a separate State agency administering or supervising the administration of that part of the State plan under which vocational rehabilitation services are provided for the blind, separate adjusted Federal shares shall be established for each such subsequent fiscal year for such agency and for the State agency administering or supervising the administration of the remainder of the State plan, and for purposes of paragraph (2) of this subsection—

"(A) the 1954 Federal share for each shall be the percentage which (i) the portion of the State's allotment for the fiscal year ending June 30, 1954, which was made available to each, is of (ii) the portion of the sum of such allotment and the amount of 1954 State funds available to each for expenditures, under the State plan approved under this act, during such year; and

"(B) the portion of the allotment referred to in subparagraph (A) of such paragraph (2) for each shall be the portion of the State's allotment allocated to each pursuant to clause (A) of subsection (a) (4) (or, in the case of any year ending after June 30, 1959, the portion which would be allocated to each upon application of such clause (A)).

"GRANTS TO STATES FOR EXTENSION AND IMPROVEMENT PROJECTS

"SEC. 3. (a) (1) From the sums available for any fiscal year for grants to States to assist them in initiating projects for the extension and improvement of vocational rehabilitation services, each State shall be entitled to an allotment of an amount bearing the same ratio to such sums as the population of such States bears to the population of all the States. The allotment to any State under the preceding sentence for any fiscal year which is less than $5,000 (or such other amount as may be specified as a minimum allotment in the act appropriating such sums for such year) shall be increased to that amount, the total of the increases thereby required being derived by proportionately reducing the allotments to each of the remaining States under the preceding sentence, but with such adjustments as may be necessary to prevent the allotment of any of such remaining States from being thereby reduced to less than that amount.

"(2) From each State's allotment available for such purpose for any fiscal year, the Secretary shall pay to such State a portion of the cost of approved projects for the extension and improvement of vocational rehabilitation services (including their administration) under the State plan. The Secretary shall approve any project for purposes of this section only if the plan of such State approved under section 5 includes such project or is modified to include it and only if he finds the project constitutes an extension or improvement of vocational rehabilitation services under the State plan or will contribute materially to such an extension or improvement.

"(b) Payments under this section with respect to any project may be made for a period of not to exceed 6 years beginning with the commencement of the first fiscal year for which any payment is made with respect to such projects from an allotment under this section. To the extent permitted by the State's allotments under this section, such payments with respect to any project shall be equal to 75 percent of the cost of such project for the first biennium in such period, 50 percent of such cost for the second biennium in such period, and 25 percent of such cost for the last biennium in such period, except that, at the request of the State, such payments may be less than such percentage of the cost of such project.

"(c) No payment may be made from an allotment under this section with respect to any cost with respect to which any payment is made under section 2.

"(d) In the case of any State for which there is a separate State agency administering or supervising the administration of the part of a State plan under which vocational rehabilitation services are provided for the blind, the State's allotment under this section shall be divided between such agency and the State agency administering (or supervising the administration of) the remainder of the State plan in the same proportion as the Secretary estimates at the beginning of the year State and other non-Federal funds will be available, during the fiscal year for which the allotment is made, for meeting the cost of vocational rehabilitation services under the two portions of the State plan.

"GRANTS FOR SPECIAL PROJECTS

"SEC. 4. (a) From the sums available therefore for any fiscal year, the Secretary shall make grants to States, and public and other nonprofit organizations and agencies for paying part of the cost of projects (including training and traineeships) which, in the judgment of the Secretary, hold unique promise of making a substantial contribution to the solution of vocational rehabilitation problems common to all or several States, and of projects or measures directed at meeting vocational rehabilitation problems of special national significance or concern.

"(b) The Secretary shall be authorized to cooperate in assisting with the financing of a pilot demonstration rehabilitation center in the metropolitan Washington area to be used as a guide for rehabilitation centers which may be set up later in other parts of the country. Sums made available for such a pilot demonstration center in the Washington area shall not exceed $1 million a year to be expended for such services as hospitalization, domiciliary care, and rehabilitation training, including costs of board and room of trainees and other services essential to the program as in the discretion of the Secretary deems desirable. The services of such a pilot demonstration rehabilitation center in the metropolitan Washington area shall be made available to area civil service employees as well as to other patients.

"(c) Payments under this section may be made in advance or by way of reimbursement for services performed and purchases made, as may be determined by the Secretary; and shall be made on such conditions as the Secretary finds necessary to carry out the purposes of this section.

"(d) (1) There is hereby established in the Department of Health, Education, and Welfare a National Advisory Council on Vocational Rehabilitation, consisting of the Secretary, or his designee, who shall be Chairman, and 12 members appointed without regard to civil-service laws by the Secretary. The 12 appointed members shall be leaders in fields concerned with vocational rehabilitation or in public affairs, and 6 of such 12 shall be selected from leading medical, educational, or scientific authorities who are outstanding for their work in the vocational rehabilitation of disabled persons. Three of the 12 appointed members shall be persons who are themselves physically handicapped. Each appointed member of the Council shall hold office for a term of 4 years, except that any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor is appointed shall be appointed for the remainder of such term and except that, of the members first appointed, 3 shall hold office for a term of 3 years, 3 shall hold office for a term of 2 years, and 3 shall hold office for a term of 1 year, as designated by the Secretary at the time of appointment. None of such 12 members shall be eligible for reappointment until a year has elapsed after the end of his preceding term.

"(2) The Council is authorized to review applications for special projects submitted to the Secretary under this section and recommend to the Secretary for grants under this section any such projects or any projects initiated by it which it believes show promise of making valuable contributions to the vocational rehabilitation of disabled persons. The Secretary is authorized to utilize the services of any member or members of the Council in connection with matters relating to the administration of this section, for such periods, in addition to conference periods, as he may determine.

"(3) Appointed members of the council, while attending meetings of the Council or while otherwise serving at the request of the Secretary, shall be entitled to receive compensation at a rate to be fixed by the Secretary, but not exceeding $50 per diem, and shall also be entitled to receive an allowance for actual and necessary traveling and subsistence expenses while so serving away from their places of residence.

"(4) The Secretary shall transmit to the Congress annually a report concerning the special projects initiated under this section, the recommendations of the National Advisory Council on Vocational Rehabilitation, and any action taken with respect to such recommendations.

"STATE PLANS

"SEC. 5. (a) To be approvable under this act, a State plan for vocational rehabilitation services shall—

"(1) designate the State agency administering or supervising the administration of vocational education in the State, or a State rehabilitation agency (primarily concerned with vocational rehabilitation), as the sole State agency to administer the plan or to supervise its administration in a political subdivision of the State by a sole local agency of such political subdivision, except that where under the State's law, the State blind commission, or other agency which provides assistance or services to the adult blind, is authorized to provide them vocational rehabilitation services, such State blind commission or other State agency may be designated as the sole State agency to administer the part of the plan under which vocational rehabilitation services are provided for the blind (or to supervise the administration of such part in a political subdivision of the State by a sole local agency of such political subdivision) and the State vocational education agency or the State rehabilitation agency shall be designated as the sole State agency with respect to the rest of the State plan;

"(2) provide for financial participation by the State, and provide that the plan shall be in effect in all political subdivisions of the State;

"(3) show the plan, policies, and methods to be followed in carrying out the work under the State plan and in its administration and supervision;

"(4) provide such methods of administration, other than methods relating to the establishment and maintenance of personnel standards, as are found by the Secretary to be necessary for the proper and efficient administration of the plan;

"(5) contain (A) provisions relating to the establishment and maintenance of personnel standards, including provisions relating to the tenure, selection, appointment, and qualifications of personnel, and (B) provisions relating to the establishment and

maintenance of minimum standards governing the facilities and personnel utilized in the provision of vocational rehabilitation services;

"(6) provide that, in addition to training, maintenance, placement, and guidance, physical restoration services will be provided under the plan;

"(7) provide that the State agency will make such reports, in such form and containing such information, as the Secretary may from time to time reasonably require to carry out his functions under this act, and comply with such provisions as he may from time to time find necessary to assure the correctness and verification of such reports;

"(8) provide for cooperation by the State agency with, and the utilization of the services of, the State agency administering the State's public assistance program, and the Bureau of Old-Age and Survivors Insurance (Department of Health, Education, and Welfare) and of other Federal, State, and local public agencies providing services relating to vocational rehabilitation services; and

"(9) provide for entering into cooperative arrangements with the system of public employment offices in the State and the utilization of the services of such offices.

"(b) The Secretary shall approve any plan which the Secretary finds fulfills the conditions specified in subsection (a) of this section.

"(c) Whenever the Secretary, after reasonable notice and opportunity for hearing to the State agency administering or supervising the administration of the State plan approved under this section, finds that—

"(1) the plan has been so changed that it no longer complies with the requirements of subsection (a) of this section; or

"(2) in the administration of the plan there is a failure to comply substantially with any such provision;

the Secretary shall notify such State agency that no further payments will be made to the State under section 2 or 3 (or, in his discretion, that further payments will not be made to the State for projects under or parts of the State plan affected by such failure), until he is satisfied that there is no longer any such failure. Until he is so satisfied the Secretary shall make no further payments to such State under section 2 or 3 (or shall limit payments to projects under or parts of the State plan in which there is no such failure).

"(d) (1) If any State is dissatisfied with the Secretary's action under subsection (c) of this section, such State may appeal to the United States Court of Appeals for the circuit in which such State is located. The summons and notice of appeal may be served at any place in the United States. The Secretary shall forthwith certify and file in the court the transcript of the proceedings and the record on which he based his action.

"(2) The findings of fact by the Secretary, unless substantially contrary to the weight of the evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the transcript and record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive unless substantially contrary to the weight of the evidence.

"(3) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in title 28, United States Code, section 1254.

"SEC. 6. Preference for the installation and/or operation of vending machines within Federal buildings shall be given to blind operators of vending stands within same Federal buildings.

"METHOD OF COMPUTING AND MAKING PAYMENTS

"SEC. 7. The method of computing and paying amounts pursuant to section 2 or 3 shall be as follows:

"(a) The Secretary shall, prior to the beginning of each calendar quarter or other period prescribed by him, estimate the amount to be paid to each State under the provisions of such section for such period, such estimate to be based on such records of the State and information furnished by it, and such other investigation, as the Secretary may find necessary.

"(b) The Secretary shall pay, from the allotment available therefor, the amount so estimated by him for such period, reduced or increased, as the case may be, by any sum (not previously adjusted under this subsection) by which he finds that his estimate of the amount to be paid the State for any prior period under such section was greater or less than the amount which should have been paid to the State for such prior period under such action. Such payments shall be made prior to audit or settlement by the General Accounting Office, shall be made through the disbursing facilities of the Treasury Department, and shall be made in such installments as the Secretary may determine.

"ADMINISTRATION

"SEC. 8. (a) In carrying out his duties under this act, the Secretary shall—

"(1) make studies, investigations, demonstrations, and reports with respect to abilities, aptitudes, and capacities of handicapped individuals, development of their potentialities, and their utilization in gainful and suitable employment;

"(2) cooperate with and render technical assistance to States in matters relating to the vocational rehabilitation of disabled individuals;

"(3) provide short-term training and instruction in technical matters relating to vocational rehabilitation services, including the establishment and maintenance of such research fellowships and traineeships, with such stipends and allowances (including travel and subsistence expenses), as he may deem necessary; and

"(4) disseminate information as to the studies, investigations, demonstrations, and reports referred to in paragraph (1) and other matters relating to vocational rehabilitation services, and otherwise promote the cause of rehabilitation of disabled individuals and their greater utilization in gainful and suitable employment.

"(b) The Secretary is authorized to make rules and regulations governing the administration of this act, and to delegate to any officer or employee of the United States such of his powers and duties, except the making of rules and regulations, as he finds necessary in carrying out the purposes of this act.

"REPORTS

"SEC. 9. Annual reports shall be made to the Congress by the Secretary as to the administration of this act.

"AUTHORIZATION OF APPROPRIATION FOR ADMINISTRATION

"SEC. 10. There are hereby authorized to be included for each fiscal year in the appropriations for the Department of Health, Education, and Welfare such sums as are necessary to administer the provisions of this act.

"DEFINITIONS

"SEC. 11. For purposes of this act—

"(a) The term 'vocational rehabilitation services' means diagnostic and related services (including transportation) incidental to the determination of eligibility for and the nature and scope of services to be provided; training, guidance and placement services for disabled individuals; and, in the case of any such individual found to require financial assistance with respect thereto, after full consideration of his eligibility for any similar benefit by way of pension, compensation, and insurance, any other goods and services necessary to render such individual fit to engage in a remunerative occupation, including the following physical restoration and other goods and services—

"(1) corrective surgery or therapeutic treatment necessary to correct or substantially modify a physical or mental condition which is stable or slowly progressive and constitutes a substantial handicap to employment, but is of such a nature that such correction or modification may reasonably be expected to eliminate or substantially reduce such handicap within a reasonable length of time;

"(2) necessary hospitalization in connection with surgery or treatment specified in subparagraph (1);

"(3) such prosthetic devices as are essential to obtaining or retaining employment;

"(4) maintenance, not exceeding the estimated cost of subsistence, during rehabilitation;

"(5) tools, equipment, initial stocks and supplies (including equipment and initial stocks and supplies for vending stands), books, and training materials, to any or all of which the State may retain legal title; and

"(6) transportation (except where necessary in connection with determination of eligibility or nature and scope of services) and occupational licenses.

Such term also includes—

"(7) the acquisition of vending stands or other equipment and initial stocks and supplies for use by severely disabled persons in any type of small business the operation of which will be improved through management and supervision by the State agency; and

"(8) the establishment of public and other nonprofit rehabilitation facilities to provide services for disabled individuals and the establishment of public and other nonprofit workshops for the severely disabled.

"(b) The term 'disabled individual' means any individual who is under a physical or mental disability which constitutes a substantial handicap to employment, but which is of such a nature that vocational rehabilitation services may reasonably be expected to render him fit to engage in a remunerative occupation.

"(c) The term 'rehabilitation facility' means a facility operated for the primary purpose of assisting in the rehabilitation of disabled persons—

"(1) which provides one or more of the following types of services:

"(A) testing, fitting, or training in the use of prosthetic devices;

"(B) prevocational or conditioning therapy;

"(C) physical or occupational therapy;

"(D) adjustment training; or

"(E) evaluation or control of special disabilities; or

"(2) through which is provided an integrated program of medical, psychological, social, and vocational evaluation and services under competent professional supervision: *Provided*, That the major portion of such evaluation and services are furnished within the facility and that all medical and related health services are prescribed by, or are under the formal supervision of, persons licensed to practice medicine or surgery in the State.

"(d) The term 'workshop' means a place where any manufacture or handiwork is carried on and which is operated for the primary purpose of providing remunerative employment to severely disabled individuals who cannot be readily absorbed in the competitive labor market.

"(e) The term 'nonprofit', when used with respect to a rehabilitation facility or a workshop, means a rehabilitation facility and a workshop, respectively, owned and operated by a corporation or association, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

"(f) Establishment of a workshop or rehabilitation facility means—

"(1) in the case of a workshop, the expansion, remodeling, or alteration of existing buildings, necessary to adapt such buildings to workshop purposes or to increase the employment opportunities in workshops, and the acquisition of initial equipment necessary for new workshops or to increase the employment opportunities in workshops; and

"(2) in the case of a rehabilitation facility, the expansion, remodeling, or alteration of existing buildings, and initial equipment of such buildings, necessary to adapt such buildings to rehabilitation facility purposes or to increase their effectiveness for such purpose (subject, however, to such limitation as the Secretary may by regulations prescribe in order to prevent impairment of the objective of, or duplication of, other Federal laws providing Federal assistance to States in the construction of such facilities) and initial staffing thereof (for a period not exceeding 1 year).

"(g) The term 'State' includes Alaska, the District of Columbia, Hawaii, the Virgin Islands, and Puerto Rico, and for purposes of section 4, includes also Guam.

"(h) (1) The 'allotment percentage' for any State shall be 100 percent less that percentage which bears the same ratio to 50 percent as the per capita income of such State bears to the per capita income of the continental United States (excluding Alaska), except that (A) the allotment percentage shall in no case be more than 75 percent or less than 33⅓ percent, and (B) the allotment percentage for Hawaii shall be 50 percent, and the allotment percentage for Alaska, Puerto Rico, and the Virgin Islands shall be 75 percent.

"(2) The allotment percentages shall be promulgated by the Secretary between July 1 and August 31 of each even-numbered year, on the basis of the average of the per capita incomes of the States and of the continental United States for the three most recent consecutive years for which satisfactory data are available from the Department of Commerce. Such promulgation shall be conclusive for each of the 2 fiscal years in the period beginning July 1 next succeeding such promulgation: *Provided*, That the Secretary shall promulgate such percentages as soon as possible after the enactment of the Vocational Rehabilitation Amendments of 1954, which promulgation shall be conclusive for the 3 fiscal years in the period ending June 30, 1957.

"(i) The 'Federal share' for any State for any fiscal year shall be 100 percent less that percentage which bears the same ratio to 45 percent as the per capita income of such State bears to the per capita income of the continental United States (excluding Alaska), except that (A) the Federal share shall in no case exceed 65 percent nor be less than 45 percent, and (B) the Federal share for Hawaii and Alaska shall be 55 percent, and the Federal share for Puerto Rico and the Virgin Islands shall be 65 percent. In computing the Federal share of a State for a fiscal year, the Secretary shall use the same figures for per capita incomes of the States and of the United States as he used in computing the allotment percentage of such State for such year.

"(j) The population of the several States shall be determined on the basis of the latest figures furnished by the Department of Commerce.

"(k) The term 'Secretary', except when the context otherwise requires, means the Secretary of Health, Education, and Welfare.

"TRANSITION PROVISIONS

"SEC. 12. In the case of any State which, immediately prior to July 1, 1954, was carrying on a vocational-rehabilitation program under a State plan approved under this act, such State plan shall be deemed to be a State plan approved under section 5 of this act until (a) the Secretary finds, after reasonable notice and opportunity for a hearing to the State agency, that such plan has been so changed that it no longer complies with any provision required to be included in such plan under this act as in effect prior to the enactment of the Vocational Rehabilitation Amendments of 1954, or in the administration of such plan there is a failure to comply substantially with any such provision, or (b) the plan is superseded by a plan approved under section 5 of this act, or (c) July 1, 1955, whichever occurs first.

"SHORT TITLE

"SEC. 13. This act may be cited as the 'Vocational Rehabilitation Act'."

EFFECTIVE DATE

SEC. 3. The amendments made by section 2 shall become effective July 1, 1954.

VOCATIONAL REHABILITATION PROGRAM IN THE DISTRICT OF COLUMBIA

SEC. 4. (a) The personnel, property, records, and unexpended balances of appropriations, allocations, and other funds (available or to be made available), which the Director of the Bureau of the Budget determines relate primarily to the provision of vocational rehabilitation services in the District of Columbia or the performance of functions of a State licensing agency under the act of June 20, 1936 (20 U. S. C., ch. 6A), shall be transferred, within 90 days after the enactment of this act, from the Department of Health, Education, and Welfare to the Municipal Government of the District of Columbia for use in providing such services in the District of Columbia, but no funds transferred hereunder shall be used for any purposes other than the purposes for which they were appropriated.

(b) The Board of Commissioners of the District of Columbia is hereby authorized, within available appropriations including transferred funds, to take such action as may be necessary to secure for the District of Columbia the benefits of the Vocational Rehabilitation Act, as amended by this act, and the act of June 20, 1936 (20 U. S. C., ch. 6A).

(c) Notwithstanding anything to the contrary in section 2 or any other provision of this act, the Secretary of Health, Education, and Welfare is authorized to continue the performance of functions relating to the provision of vocational rehabilitation services in the District of Columbia until completion of the transfer provided in subsection (a) in like manner as such functions were being performed by such Secretary immediately prior to the enactment of this act.

Mr. McCONNELL. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCONNELL: Strike out all after the enacting clause and insert the provisions of the bill H. R. 9640 as it passed the House.

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. McCONNELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes, with House amendment thereto, insist on the House amendment and ask for a conference with the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. McCONNELL, GWINN, SMITH of Mississippi, BARDEN, and KELLEY of Pennsylvania.

Without objection, the proceedings whereby the bill H. R. 9640 was passed will be vacated and that bill laid on the table.

There was no objection.

CONVEYING CERTAIN LANDS TO BOARD OF EDUCATION OF PRINCE GEORGES COUNTY, UPPER MARLBORO, MD.

Mr. McCONNELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 4496) with Senate amendment thereto and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Page 2, line 12, after "America", insert "(a) all right, title, and interest in and to any and all oil, gas, hydrocarbons, minerals, or other ores, and source of fissionable materials and substance, together with the right to prospect for, mine, extract, and remove the same, and (b)."

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. BAILEY. Mr. Speaker, reserving the right to object, I would like to have the distinguished gentleman explain these amendments.

Mr. McCONNELL. Mr. Speaker, I will be glad to. Our colleague [Mr. SMALL] of Maryland introduced this bill in April of this year. It is a bill to authorize and direct the conveyance of certain lands to the Board of Education of Prince Georges County, Upper Marlboro, Maryland, so as to permit the construction of public educational facilities urgently required as a result of increased defense and other essential Federal activities in that area.

This bill was considered thoroughly by our committee. The gentleman from Texas [Mr. LUCAS] offered an amendment to strike out the part which reserved to the Federal Government the mineral rights under the land. I spoke to him today, and he informed me that he would not object to the mineral reservation being in this particular bill. He said he would not object to that at this time because of the urgency for action. The school district wants to construct additional facilities. In view of the Senate action, and the need for quick action by the school board, he feels he would not wish to continue his objection. Normally, Mr. Lucas disagrees with the insertion of a provision reserving mineral rights to the Federal Government when ground is sold for a

consideration to some purchaser, as in this case, a local board of education. I have talked to the minority leader, and have also talked to the gentleman from North Carolina [Mr. BARDEN], the minority member of our committee, and they have no objection.

Mr. BAILEY. I appreciate having the explanation of the gentleman from Pennsylvania, and I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

ADMINISTRATIVE EXPENSES ACT OF 1946

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent that the proceedings whereby the bill (H. R. 179) to amend section 7 of the Administrative Expenses Act of 1946, as amended, was passed be vacated.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 179) to amend section 7 of the Administrative Expenses Act of 1946, as amended.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 7 of the Administrative Expenses Act of 1946 (60 Stat. 806; 5 U. S. C. 73b–3), as amended, is further amended by changing the period at the end thereof to a colon and adding the following: "*Provided further*, That expenses of return travel and transportation, including authorized dependents but excluding household effects, from their posts of duty outside the continental United States to the places of actual residence at time of appointment to such overseas posts of duty, shall be allowed in the case of persons who have satisfactorily completed an agreed period of service overseas and are returning to their actual place of residence for the purpose of taking leave prior to serving another tour of duty at the same overseas post, under a new written agreement entered into before departing from the overseas post: *Provided further*, That expenses of transportation and of the immediate family and shipment of household effects of any employee from the post of duty of such employee outside continental United States to place of actual residence at time of appointment shall be allowed, prior to the return of such employee to the United States, when the employee has acquired eligibility for such transportation or when the public interest requires the return of the dependents for compelling personal reasons of a humanitarian or compassionate nature, such as may involve physical or mental health, death of any member of the immediate family, or obligation imposed by authority or circumstances over which the individual has no control: *And provided further*, That when an employee returns his immediate family and household goods to the United States, at his own expense prior to his return and for other than reasons of public interest, the Government shall reimburse him for proper transportation expenses at such time as he acquires eligibility."

With the following committee amendments:

Page 1, line 5, strike out "thereof" and insert "of the first sentence."

Page 1, line 7, strike out "return" and insert "round trip."

Page 1, line 7, after "travel", insert "of employee."

Page 1, line 8, strike out "including authorized dependents" and insert "of immediate family."

Page 2, line 2, after "appointment", insert "or transfer."

Page 2, line 7, after "same", insert "or some other."

Page 2, line 10, strike out "and."

Page 2, line 13, strike out "at time of appointment."

Page 2, line 14, insert "not in excess of one time."

Page 2, line 15, after "United States", insert "including its Territories and possessions."

Page 2, line 18, strike out "dependents" and insert "immediate family."

Page 2, line 24, after "United States", insert "including its Territories and possessions."

Page 3, line 5, insert "therefor."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TRANSFER OF CERTAIN PROPERTY OF THE UNITED STATES GOVERNMENT

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 8020) authorizing the transfer of certain property of the United States Government—in Klamath Falls, Oreg.—to the State of Oregon.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. McCORMACK. Mr. Speaker, reserving the right to object, I think the record should show—and I will ask my friend, the gentleman from Michigan, chairman of the committee, if I am not correct—that the Committee on Government Operations unanimously intended that there should be no consideration paid by the county or the political subdivision that will be the beneficiary if this bill becomes law; is that correct?

Mr. HOFFMAN of Michigan. May I say to my very dear and distinguished friend from Massachusetts, for whom I have the greatest admiration and affection, that he is correct.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the General Services Administration be, and is hereby, authorized to transfer to the State of Oregon certain property of the United States Government situated in Klamath Falls, Oreg., and described as follows:

Commencing at the north quarter corner of said section 22, thence, leaving said north quarter corner, south no degrees twenty-one minutes west a distance of one thousand three hundred and forty-three feet to the center line of the county road known as the Joe Wright Road; thence continuing south no degrees twenty-one minutes west a distance of thirty feet to the southerly right-of-way boundary of said county road; thence along said southerly right-of-way boundary, north eighty-nine degrees three minutes west a distance of one hundred fifty-four and six-tenths feet to the true point of beginning; thence leaving said southerly boundary south no degrees twenty-one minutes west, a distance of five hundred and thirty-two feet to a point; thence north eighty-nine degrees three minutes west a distance of two hundred and thirteen feet to a point, thence north no degrees twenty-one minutes east a distance of five hundred and thirty-two feet to said southerly right-of-way boundary; thence along said southerly right-of-way boundary south eighty-nine degrees three minutes east a distance of two hundred and thirteen feet to the true point of beginning and containing an area of two and sixty one-hundredths acres more or less, and shall be conveyed together with all buildings, improvements thereon, and all appurtenances and utilities belonging or appertaining thereto, and the General Services Administration shall execute and deliver in the name of the United States in its behalf any and all contracts, conveyances, or other instruments as may be necessary to effectuate the said transfer: *Provided*, That there shall be reserved to the United States all minerals, including oil and gas, in the lands authorized for conveyance of this section.

There shall be reserved to the United States, in the conveyance of the above-described lands, rights of ingress and egress over roads in the above-described lands serving buildings or other works operated by the United States or its successors or assigns in connection with the Klamath project. There shall be further reserved in said lands all rights-of-way for waterlines, sewer lines, telephone and telegraph lines, powerlines, and such other utilities as now exist, or may become necessary to the operation of said Klamath project.

Such conveyance shall contain a provision that said property shall be used primarily for training of the National Guard or Air National Guard and for other military purposes, and that, if the State of Oregon shall cease to use the property so conveyed for the primary purposes intended, then title thereto shall immediately revert to the United States and, in addition, all improvements made by the State of Oregon during its occupancy shall vest in the United States without payment of compensation therefor.

Such conveyance shall contain the further provision, that whenever the Congress of the United States shall declare a state of war or other national emergency, or the President declares a state of emergency to exist, and upon the determination by the appropriate Secretary that the property so conveyed is useful or necessary for military, air, or naval purposes, or in the interest of national defense, the United States shall have the right, without obligation to make payment of any kind, to reenter upon the property and use the same or any part thereof, including any and all improvements made by the State of Oregon for the duration of such state of war or other national emergency and upon the cessation thereof plus 6 months said property is to revert to the State of Oregon together with any or all facilities and improvements, appurtenances, and utilities thereon or appertaining thereto.

With the following committee amendments:

Page 1, in the title of the bill, strike out "Falls" and insert "County."

Page 1, line 5, strike out "Falls" and insert "County."

Page 1, line 6, after the colon insert "All that portion of SW¼NW¼ and the SE¼ NW¼ of Section 22, Township 39 South,

Range 9 East, Willamette Meridian, Klamath County, Oregon, described as follows."

Page 4, line 13, after "thereto", insert a comma and the following: "other than those hereinabove reserved to the United States.

"SEC. 2. The property herein transferred shall, within the provisions of Title 40, U. S. C. Supp., Chapter 10, titled 'Management and Disposal of Government property,' Subchapter II, Section 484 (k) (2) (D) (40 U. S. C. Supp., 484 (k) (2) (D))."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SPECIAL ORDERS GRANTED

Mr. PHILLIPS. Mr. Speaker, because of the lateness of the hour and the fact that there is still more business to be transacted, I ask unanimous consent that I may vacate the special order reserved for today and make the same reservation for Monday.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. COOPER. Mr. Speaker, I ask unanimous consent that the special order I have following the gentleman from California may be vacated for today and renewed for Monday next, immediately following the gentleman from California.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. VURSELL. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes on Monday next, following any special orders heretofore entered.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

CHIEF JOSEPH DAM

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 4854) dealing with the construction of the Foster Creek Division of Chief Joseph Dam, with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference with the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. D'EWART, RHODES of Arizona, HOSMER, ENGLE, and ASPINALL.

ESPIONAGE AND SABOTAGE ACT OF 1954

Mr. LATHAM. Mr. Speaker, I call up House resolution (H. Res. 619) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9580) to revise and extend the laws relating to espionage and sabotage, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. LATHAM. Mr. Speaker, I yield 30 minutes to the gentleman from Virginia [Mr. SMITH], and at this time I yield myself such time as I may consume.

Mr. Speaker, this rule makes in order H. R. 9580. The resolution provides for 1 hour of general debate. This is an open rule.

The bill, H. R. 9580, was reported unanimously from the Committee on the Judiciary. While this measure contains quite a few pages, it is a relatively simple bill. Much of the language in the bill is a repetition of existing law.

Briefly, here is what the bill purports to do. It brings up to date the terminology in our espionage and sabotage statutes, to include what we might call the more modern techniques of war; germ warfare, atom warfare, hydrogen warfare, and so forth. Language is added to the existing law which would make the statute applicable in the more modern phases of war and espionage activity.

It also makes the espionage statutes applicable both in war and in peace. At present the distinction between a wartime and a peacetime state of affairs is rather shadowy. Sometimes it is a very close proposition as to whether we are at war or peace. So it was felt that these statutes should be made applicable in peacetime. Sabotage committed a week before we are in a war might be just as serious as if it were done a week after.

Also, this bill would eliminate the statute of limitations in espionage cases, which is now 10 years. It would make possible the death penalty in these cases, but does not make it mandatory.

The one other thing which this bill purports to do is to make applicable the Alien Registration Act to people who are trained in espionage in foreign countries who come to this country. They would be required under this bill to register as if they were alien agents who are covered under the existing law.

This bill, then, brings up to date, modernizes, and tightens up the laws providing for the internal security of this country.

I trust the resolution will be adopted.

Mr. SMITH of Virginia. Mr. Speaker, I yield 10 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Speaker, this bill seeks to tighten up existing law with reference to espionage and sabotage. It is on the whole a good bill. However, there is a provision in the bill that I do not quite understand. No doubt the committee will have an explanation for it. That is the provision which will require the registration of those persons who have knowledge of or have received an assignment in the espionage, counterespionage, or sabotage service or tactics of a foreign government or a foreign political party. I doubt very seriously that you can accomplish any good by seeking to require registration of alien saboteurs, or spies, or of alien Communists.

I want at this time to urge the subcommittee to report favorably my bill to outlaw the Communist Party and its various components or subsidiary, auxiliary, and frontal organizations. As I have said upon previous occasions, there is no way to deal effectively with the Communist conspiracy in the United States as long as you recognize its legal entity.

I call your attention to a very significant fact that has been overlooked. When President Roosevelt agreed to recognize the Soviet Union in 1933 he had an agreement with Litvinov, an agreement that was binding on the Soviet Union. Under the terms of that agreement it was agreed "not to permit the formation or residence on its territory—that is, the territory of the United States—of any organization or group, and to prevent the activities on its territory of any organization or group of representatives or officials of any organization or group which has as an aim the overthrow or the preparation for the overthrow or the bringing about by force of a change in the political or social order of the whole or any part of the United States, its Territories or possessions."

In other words, Mr. Speaker, the agreement was to outlaw the Communist conspiracy in the United States. That agreement was made by the Soviet Union. It seems to me, therefore, that we have a perfect right to pass legislation for the purpose of carrying out that understanding.

Our committee made a very careful study of the period from 1919 until 1924, when the Communist Party and its affiliated organizations were outlawed in the United States under wartime legislation. We had before us various witnesses who testified with respect to the effect which the outlawry had upon the Communist activities in the United States. We had some former Communist leaders, and they testified that during that period the Communist Party was innocuous and ineffective, that they could not accomplish anything in the United States, and that it was only after the wartime restrictions were lifted that the Party began its progress and growth in this country. It seems to me that the experiences of those 4 years should convince us that the only way you can deal with the Communist menace is by declaring it unlawful and criminal.

We have spent 25 years investigating communism. We now have some 4 or 5 committees dealing with it. We have, perhaps, obtained and made public more information on communism than any subject in the history of our Nation. It has occupied more time; we have spent more money and there has been more discussion and more controversy and

more publicity dealing with the long investigations and exposures of communism than any other subject that has been under investigation since the beginning of this Republic. We have filled hundreds of file cabinets with information that we have obtained. As a matter of fact, in 1938 and 1939 we seized the records of all the Communist organizations in the United States under subpena duces tecum, and as a result of all those hearings—hearings which occupied the attention of committees and subcommittees in every State and city in every section of the United States, we reached certain conclusions. We have published time and time again the findings and conclusions of the committees. Every committee has agreed in its conclusions. Every committee and court which has considered this question has agreed that the Communist conspiracy is a criminal and a treasonable conspiracy; that Communists preach and practice the planning and perpetration of crime in order to achieve their purpose. In view of all of that, it seems to me that the time has now come when the Congress of the United States ought to spell out in clear and understandable language that this conspiracy is a crime. We certainly characterize theft or murder as a crime. No one contends that that will eliminate those crimes by declaring such actions to be crimes and punishing them as crimes. But when we declare this conspiracy to be a crime, its effect in the United States and throughout the world will be far-reaching. From the very beginning, we have been in an inconsistent attitude. On the one hand, we attempt to deal with the Communists and on the other hand we recognize the legality of the Communist apparatus. If it had not been for that apparatus, they never would have made any progress in this country. It was not what the hard core Communists were able to achieve that constituted the greatest threat to us. It was the fact that they were able to use this legal apparatus as a window dressing in order to deceive gullible and unthinking people. It was the fact that they were able to do what Earl Browder recently said in a statement which was published in New York newspapers—able to enlist the support and aid of prominent people, Government officials, civic leaders all over the United States. That was what gave strength and vitality to the Communist movement in the United States.

Until the time comes that we are willing to face this problem realistically and deal with it courageously and realistically, we can never cope with the Communist menace in this country or abroad. The subcommittee of the Committee on the Judiciary has been conducting hearings for some time under the very able leadership of the gentleman from Pennsylvania [Mr. GRAHAM] and his able subcommittee. They have accorded the privilege to all of the interested parties to appear before the committee and testify. In fact, they have held exhaustive hearings. It seems to me the time has now come for the committee to report out my bill or any bill which will outlaw the Communist Party and which will deprive it of its legal rights and say to the people of our country and to the world, "We regard this as a criminal conspiracy and we will not permit it to exist legally in the United States." When we do that, we will announce to the world that we mean what we say when we say we are opposed to communism.

Mr. Speaker, the Attorney General recommended a bill which he calls a bill to deal with Communist infiltrated organizations, labor organizations. I have read that bill. I think it is a bad bill as now drawn. I think if any bill would jeopardize civil liberties and delegate tremendous Executive power, without adequate safeguards and restriction, that bill would do it. Why do we want to continue to beat around the bush? Why undertake to deal with a cancer by palliatives? Why try to treat symptoms when we can by legislative decree declare that this whole conspiracy was conceived in iniquity, that it is opposed to the Constitution of our country and to the spirit of American freedom?

I urge the subcommittee to do a necessary and constructive thing, regardless of party politics or the views of the Attorney General or anyone else, and bring my bill out to the floor and there will not be a single vote in opposition to it.

The SPEAKER pro tempore. The time of the gentleman from Texas [Mr. DIES] has expired.

Mr. SMITH of Virginia. Mr. Speaker, I have no further requests for time.

Mr. LATHAM. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

Mr. GRAHAM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9580) to revise and extend the laws relating to espionage and sabotage, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 9580, with Mrs. ST. GEORGE in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Pennsylvania [Mr. GRAHAM] will be recognized for 30 minutes, and the gentleman from New York [Mr. CELLER] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Pennsylvania [Mr. GRAHAM].

Mr. GRAHAM. Madam Chairman, I yield myself 30 seconds.

The purpose of this bill is to strengthen the internal security of the United States by amending statutes relative to espionage, sabotage, and the registration of foreign agents.

The CHAIRMAN. The gentleman from New York [Mr. CELLER] is recognized.

Mr. CELLER. Madam Chairman, I yield myself 5 minutes.

Madam Chairman, although I am not satisfied with many provisions of the bill, I am not opposed to its general intent and purpose. I shall not oppose this bill, but I desire solemnly, deliberately, and objectively to make 1 or 2 observations concerning a very important segment of the bill, and that concerns making peacetime espionage a capital offense. For a society which takes pride in the high value it places on human life, we can find little justification for the extension of the death penalty for peacetime espionage. Why do we do this? Do we expect the penalty to act as a deterrent? Yet criminologists, like Barnes, Jonsen, Taft, Schussler, all eminent in the field, together with a host of others, insist that it is not so. The threat of punishment is among the least considered of all factors by those intent upon the commission of crime. That holds good for a political crime.

It has been pointed out again and again that juries are less willing to convict when the possible penalty is death. Those of us who have had wide courtroom experience know this to be so. Hence, what do we hope to accomplish? An act of revenge? Or retribution? This is the death penalty, I beg you to note, for peacetime espionage. This means the heightening of emotionalism in an area where, by all means, good sense and rationality must prevail.

Prof. George B. Vold, of the University of Minnesota, has said:

> In a field in which absolute and exact proof is impossible, the only reasonable inference is that the death penalty does not, and cannot, prevent crime, either specifically in regard to murder or more generally in regard to other kinds of crime.

I am sure when future historians appraise our present era they will note the baneful influence of fear of communism. They will speak of consciousness of the danger of communism but will deplore and severely criticize us for our monomania on the subject of fear of communism. They will say we were often actuated by sensation, not sanity, by passion, not patience. They will charge that the appeal was too often to our adrenal glands. That is why they will challenge our passing this bill making peacetime espionage a capital offense.

Death is final and a mistake in executing an innocent man is irreparable. Juries are not infallible and are certainly open to wider error when dealing with the surcharged climate surrounding espionage. Remember, too, there is no statute of limitation in capital offenses.

I interpose no objection to the purposes of the bill itself. But I have the most serious reservations as to the drastic increase in penalties for peacetime espionage. Will it prevent the commission of the act? Or will it glorify with the halo of martyrdom the executed, knowing as we do the unconscionable propaganda chicanery of Communists, against whose international conspiracy this bill is aimed?

Mr. GRAHAM. Madam Chairman, I yield 10 minutes to the gentleman from Maryland [Mr. HYDE], a member of the committee, who has worked very diligently on this bill.

Mr. HYDE. Madam Chairman, this bill, H. R. 9580, incorporates the provisions of the three bills introduced at the request of the Attorney General. These bills which are incorporated in this one bill are part of the administration program to strengthen internal security and to aid us in our defense against those who would destroy us by subversive activities.

Title I of H. R. 9580 incorporates fully the provisions of H. R. 8749.

The Attorney General has submitted that in view of the technological advance made in scientific research, the possibilities of sabotage by radioactive, biological, or chemical agents have been greatly increased. The sabotage statute as it is presently worded is not geared to keep pace with our technological advances, therefore certain changes in definitions are necessary. These changes in definitions are incorporated in this bill.

As far as title I of the bill is concerned, that is primarily what is done, namely, to make certain changes in definitions to bring the statute up to meet modern technological advances. For example, section 101 of title I adds to the definition of "war material" and "national-defense material," the words "air" and "water" and to the definitions of "war utilities" and "national-defense utilities" the word "air" has been added; also war utilities and national-defense utilities have been redefined to include airfields, airlanes, and fixtures or appurtenances thereto, which, strangely enough, are not in the present statute.

"National defense material" is amended to conform with "war material" in that "forage and forest products and standing timber" have been added to the definition of "national-defense material."

Section 102 of title I provides for the applicability of section 2153, title 18, United States Code, not only in time of war but also in time of national emergency as declared by the President or by the Congress.

Section 102 also recognizes the possibility of bacteriological warfare by including within it the provisions making it a crime to contaminate or infect war material, war premises, or war utilities.

Section 103 makes the sabotage laws effective in time of national emergency as well as in time of war.

Section 2154 of title 18 of the United States Code is by this bill amended by section 103 to make a crime the construction in a defective manner of war premises or war utilities, in addition to war material. Thus it is proposed to make it a crime wilfully to construct in a defective manner an airbase.

Section 104 adds conspiracy provisions to sections 2155 and 2156 of title 18 of the United States Code. In other words, the new provision here is the crime of conspiracy to commit these acts of sabotage as well as the commission of the acts themselves.

Mr. GROSS. Madam Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Iowa.

Mr. GROSS. Section 105, I assume, would apply with equal force to the operator of an industry we will say making munitions or barbed wire, both of which were found to be defective, and I think deliberately so, during the last war; the provisions of that section would apply with equal effect to the operator or owner of a manufacturing plant as well as to workmen; is that true?

Mr. HYDE. Oh, yes; to anyone who is guilty of attempting to injure or interfere with or to obstruct the national defense by sabotage in a plant which has been defined as a national utility or as a national defense premise.

Mr. GROSS. What change has there been in the penalty?

Mr. HYDE. There is no change here in the penalty, not in title I.

Mr. GROSS. I thank the gentleman.

Mr. HYDE. Title II of the bill incorporates the provisions of the original bill, H. R. 9021, and is designed to increase the penalty for peacetime espionage and to correct the deficiencies in sentencing there. That is the title about which the gentleman from New York [Mr. CELLER], just spoke to the House.

Mr. CELLER. The present statute of limitation on peacetime espionage is 10 years?

Mr. HYDE. Yes.

Mr. CELLER. This would remove all statute limitations on espionage?

Mr. HYDE. That is right.

Mr. CELLER. I am not opposed to the bill. I made these observations in passing concerning the penalty with reference to peacetime espionage.

Mr. HYDE. I would like to say to the gentleman from New York that I have a lot of sympathy with the gentleman's point of view. As a matter of fact, one of the difficulties of our society is attempting to define the proper punishment to fit a crime. I might add that we already have in the atomic energy law provision for the death penalty in case of peacetime espionage. It may be that the death penalty is not right in any case, under any circumstances, but it just so happens that our society is at present still struggling with the problem, and we are struggling with that problem as much in connection with this subject as any other.

Mr. CELLER. With reference to atomic energy, you have situations quite different in the facilities than are embodied in this bill. I would not say that those facilities in this bill rise to the importance of atomic energy. Would not the gentleman agree that that is so?

Mr. HYDE. Yes, I would, because that deals with any attempt to communicate any information to a foreign country which would injure the United States. In effect, any person who is engaged in such activity is indirectly thus dealing in murder.

Mr. CELLER. Yes. But there are specific references to "document, writing, code book, signal book, sketch, photograph, photographic negative, blueprint, plan, map, model, note, instrument," which makes the crime very broad.

Mr. HYDE. No. I think the gentleman is aware of the fact that the terms of that particular section—which are not new, incidentally—have been defined by the Supreme Court in several cases, which court decisions justly limit the meaning of those to the intent that Congress intended for them, namely, to protect us in the national defense.

Mr. HALE. Madam Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Maine.

Mr. HALE. Glancing over this bill hastily, I fail to find any provision in any section that makes the death penalty mandatory.

Mr. HYDE. The death penalty is not mandatory.

Mr. HALE. It is death or imprisonment for any terms of years or for life. Is that correct?

Mr. HYDE. That is correct.

Mr. HALE. So that it would seem that juries would not be deterred by the death penalty because it is not mandatory?

Mr. HYDE. I would not think that they would be deterred in view of the fact that it is not mandatory.

Mr. BAILEY. Madam Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from West Virginia.

Mr. BAILEY. Section 104 reads in part:

> Whoever, with intent to injure, interfere with, or obstruct the national defense of the United States, willfully injures, destroys, contaminates or effects, or attempts to so injure—

And so forth.

Mr. HYDE. That is the conspiracy section.

Mr. BAILEY. I would like to ask the gentleman if it is his opinion that if you had an economic strike in progress at one of the defense industries and some Government property was destroyed, that that would be covered by that particular section there, and would the penalty apply.

Mr. HYDE. No. You have to bear in mind that it would have to be a conspiracy to violate section 9, and it must be to interfere with and obstruct the national defense of the United States. If it was an ordinary economic strike, there would be no charge such as the gentleman suggests.

Mr. BAILEY. But there might be some Government property destroyed, and I wonder whether that would be broad enough to invoke the penalty involved here.

Mr. HYDE. No; I think not.

Mr. CELLER. Madam Chairman, if the gentleman will yield further, on page 10, we have these significant words beginning in line 4:

> Whoever, in time of war, with intent that the same shall be communicated to the enemy, collects, records, publishes, or communicates, or attempts to elicit any information—

And so forth. You may remember that some time ago a Chicago newspaper—I think it was the Chicago Tribune—publicized the fact that the Navy had cracked the Jap code. While it was true that the publisher of that newspaper was not certain of his facts, he made that statement, and I understood, of course, that this was during time of war, but suppose that had happened during

time of peace. Could that editor of the newspaper be haled before the court?

Mr. HYDE. No; in the first place, the section the gentleman read applies only in time of war. If such a thing similar to it, should happen, that would come under subsection (a) of section 201. That section has been well defined by the Supreme Court of the United States so that the danger to which the gentleman refers would not arise.

Mr. CELLER. And it must be to the injury of the United States, even though under subsection (a); is not that correct?

Mr. HYDE. That is correct.

Mr. CELLER. And that would be a question for a jury, would it not?

Mr. HYDE. Yes; in a sense it would. But whether or not it had violated this statute, the language of subsection (a), section 201, means what has been defined by the Supreme Court, so that there would be no danger of an innocent newspaper report being construed as being an intent to injure the United States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CELLER. Madam Chairman, I yield the gentleman 2 additional minutes.

Will the gentleman yield to me?

Mr. HYDE. I yield to the gentleman from New York.

Mr. CELLER. What about writers, commentators, who gather a great deal of statistics; naval, military, statistics on logistics, and so forth; they might publish them and come within the toils of the statute. That might be a question for a jury to determine whether or not they had the intent to aid the enemy.

Mr. HYDE. I think in view of the Supreme Court decisions, two of them, on this very section, that there would be no danger of such an interpretation being put on the statute.

Mr. GRAHAM. If the gentleman will yield to me, in the case of *Gorin* v. *United States* (312 U. S. 19), on that very point, it is set out that intent to injure the United States must be proved.

Mr. HYDE. That is correct.

Mr. POFF. Madam Chairman, will the gentleman yield to me for a unanimous-consent request?

Mr. HYDE. I yield.

Mr. POFF. I ask unanimous consent to extend my remarks in the RECORD immediately following the remarks of the gentleman from Maryland [Mr. HYDE].

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HYDE. Madam Chairman, under title II, it is proposed to make espionage a capital offense irrespective of whether it was committed in time of war or in time of peace. It brings it within the purview of title 18, United States Code 3281, which provides that an indictment for a capital offense may be found at any time without limitation. In other words, as has been said, the effect of that would be to remove the statute of limitations on peacetime espionage.

Title III of the bill incorporates the provisions of H. R. 9023 and proposes to repeal certain sections of the Foreign Agents Registration Act of 1938, as amended, and substitute therefor a separate registration statute unconnected with the Foreign Agents Registration Act, and which will require the registration of those persons who have knowledge of or have received an assignment in the espionage, counterespionage, or sabotage service or tactics of a foreign government or a foreign political party, without regard to any present agency status of such persons.

The Attorney General has told us this:

> Since the registration provisions of the Foreign Agents Registration Act make it clear that only those persons who presently or hereafter act as agents of foreign principals are required to register, persons who are agents of foreign principals by definition, but who are not currently acting as such, are not so required. Hence, persons with knowledge of or training in the espionage, counterespionage, or sabotage service or tactics of a foreign government or political party, who have not since the enactment of section 20 (a) acted as foreign agents, appear to be under no obligation to register.

This section will put such persons under an obligation to register.

Mr. DOYLE. Madam Chairman, will the gentleman yield?

Mr. HYDE. I yield.

Mr. DOYLE. I notice that there is no definition in either wartime or peacetime of the term "defense activities." That is in line 9, page 2, and elsewhere. I am wondering why there is no definition of defense activities, as long as the death penalty, for instance, is involved.

Mr. HYDE. The death penalty is not involved in the title to which the gentleman refers.

Mr. DOYLE. I notice on page 3, line 16, the reference to associate nation is limited to wartime. Why does not that definition also cover peacetime?

Mr. HYDE. I suppose because there might be some difficulty in determining who was an associate nation in peacetime.

Mr. DOYLE. There is included a reference to NATO nations, in another part of the bill. Would they be considered associate nations? I am asking the question sincerely, because I think it is important.

Mr. HYDE. As far as I know—I do not know whether I am entirely accurate on this or not—the only reason I can think of at the moment would be the difficulty of determining who was an associate nation in peacetime.

Mr. DOYLE. In other words, the committee had no intent of including any member of the United Nations as an associate nation?

Mr. HYDE. Not under this language.

Mr. CELLER. If the gentleman will yield, I understand the Department of Justice has sent down to the distinguished chairman of the subcommittee, the gentleman from Pennsylvania [Mr. GRAHAM] an amendment as to the very question the gentleman from California has raised just now, namely to include associate nations in there at that very point.

Mr. HYDE. I would have to see what the Department's intention was as to that.

Mr. BROOKS of Louisiana. Will the gentleman yield?

Mr. HYDE. I yield.

Mr. BROOKS of Louisiana. In title II, section 202 refers to the matter of espionage in time of either peace or war. On the preceding page, 8, you are referred to a status which might be considered neither war nor peace, that is, where an emergency has been declared by the President. In that event, would the gentleman construe that under title II to be in war or peace? What I want to know is, Suppose there is an emergency declared by the President which is short of war and there is espionage under title II, would that be espionage in time of peace or war?

Mr. HYDE. Subsection (a) of section 201 of title II applies in time of either peace or war.

Mr. BROOKS of Louisiana. It would be espionage under (a) but not under (b)?

Mr. HYDE. That is right.

Mr. BROOKS of Louisiana. If during the Korean emergency it would be punishable under (b)?

Mr. HYDE. Under (b) it would be in time of war.

Mr. BROOKS of Louisiana. So espionage committed when we were fighting in Korea would not be punishable under (b)?

Mr. HYDE. Any act set out in (b) would not be punishable unless we were officially in war.

Mr. BROOKS of Louisiana. Does not the gentleman think the penalty should be just as severe in the case of Korea as in time of war?

Mr. HYDE. I think that is covered by section (a), if the gentleman will examine it carefully.

Mr. POFF. Madam Chairman, I support wholeheartedly and unreservedly all of the provisions of H. R. 9580, which is a composite of three bills introduced as a part of the Attorney General's overall antisubversive program.

Title I of this act incorporates in full the language of H. R. 8749, which I introduced on April 7, 1954. Its primary purpose is to plug certain loopholes which have, by reason of certain technological developments, recently manfested themselves.

Section 101 of title I of the measure would amend section 2151 of title 18, United States Code, which defines various words used in the chapter. The definitions of "war material," "war utilities," "national defense material," and "national defense utilities" would be amended so as to include air and water among the items enumerated. It is believed that the possibilities of sabotage by radioactive, biological, or chemical agents made such an amendment desirable. Also, "war utilities" is now defined as including various utilities used, or capable of use, in connection with the "military or naval forces" of the United States. The definition of "national defense utilities" also refers to the "military or naval forces." Since the Air Force is a separate and coordinate Department of the military, it would appear appropriate to substitute "installations of the Armed Forces" in both definitions. Similarly, the definitions of "war prem-

ises" and "national defense premises" should be changed in this regard.

The rapid development of aviation requires that the definitions of war utilities and national-defense utilities be further amended so that specific reference is made in them to airfields, air lanes, and fixtures or appurtenances thereof. Another change which is dictated by the growth of aviation is the broadening of these terms so as to apply not only within the limits of the United States or upon the high seas as now provided, but also elsewhere.

War material is defined to include forage, forest products and standing timber. In view of the importance of this natural resource and the fact that sabotage efforts could well be directed toward it, it is recommended that the definition of the peacetime counterpart, national-defense material, should be amended to conform. It should also be made to conform by covering items adapted to, or suitable for use in the conduct of the national defense.

Section 102 of title I would amend section 2153 of the chapter on sabotage—relating to the destruction of war material, war premises, or war utilities—and section 2155—relating to the production of defective war material and other enumerated items—so as to make it a crime to contaminate or infect such items. This proposed amendment, as did the definition amendments discussed above, contemplates the possibility of sabotage by radioactive, biological, or chemical agents.

The bill would also amend sections 2154 and 2156 which relate, respectively, to the willful production of defective war material and defective national-defense material. As presently worded, section 2154 does not appear to protect war premises or war utilities and section 2156 does not appear to protect national-defense premises or national-defense utilities. It is therefore suggested that they be amended in this regard. Such an amendment would, for example, make the section applicable to the defective construction of air bases.

Further, conspiracy subsections would be enacted in sections 2155 and 2156, as is the case with their wartime counterparts, sections 2153 and 2154.

As you know, the Emergency Powers Continuation Act of July 3, 1952 (66 Stat. 330) amended, on a temporary basis, the definition of war material as contained in section 2151, by inserting "or defense activities" immediately before the period at the end of that definition. It likewise amended section 2153 and 2154 by inserting the words "or defense activities" immediately after the words "carrying on the war" wherever they appear in those sections. These amendments were continued on a temporary basis by the later enactment of the act of March 31, 1953 (67 Stat. 18), and the act of June 30, 1953 (67 Stat. 133). It will be noted that the proposal would make these amendments permanent and it is believed that the reasons for doing so are self-evident.

Madam Chairman, the American people are looking to their lawmakers to furnish our Department of Justice with the tools to do its job effectively and thoroughly. All loopholes, however minute, must be plugged. This bill will help to accomplish that purpose. I trust that it will be the will of the Committee of the Whole to express to the world at large our contempt for traitors and saboteurs by passing this bill by a unanimous vote.

Mr. CELLER. Madam Chairman, I yield 1 minute to the gentleman from New York [Mr. DONOVAN].

Mr. DONOVAN. Madam Chairman, I take this time to ask a question of the gentleman from Maryland [Mr. HYDE]. I am thinking of section 2 on page 11. I pose this question: Assume a former member of the British armed forces who perchance had served in some division of the British Army Intelligence in various parts of the world comes to America as an immigrant, lives here the necessary time, makes application for American citizenship, and becomes an American citizen. Does he, too, have to register under this act?

Mr. HYDE. Yes.

Mr. GRAHAM. Madam Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. VELDE], chairman of the Committee on Un-American Activities.

Mr. VELDE. Madam Chairman, as a former FBI agent in the Counterespionage Division during World War II, I cannot impress upon my distinguished colleagues enough the imperative need for our revising and extending the laws relating to espionage and sabotage.

Aside from the numerous refinements that are embodied in H. R. 9580, I should like to go on record as being particularly impressed with the provision that would make espionage a capital offense, irrespective of when committed, in time of peace or war. This would bring espionage in peacetime within the purview of 18 United States Code 3281, which provides that an indictment for a capital offense may be found at any time without limitation.

Our House Committee on Un-American Activities, in line with the obligation to investigate subversive activities and recommend remedial legislation, recommended this in our annual report of February 17, 1952.

I recall during the period when Canada was prosecuting her espionage agents, our own Attorney General at the time was telling us that he would not prosecute because we were not at war with Russia.

When the American people finally woke up to the fact that the Communist conspiracy had gained such a hold in this country through these Russian espionage agents and brought public pressure to bear upon the Justice Department to act, the statute of limitations had expired.

Now we have extended the statute of limitations on peacetime espionage to 10 years and we must go one step further and see to it that we enact a single comprehensive espionage statute applicable to both peacetime and wartime. Practical experience dictates that we do not necessarily have to be engaged with a shooting adversary to be in danger.

I wholeheartedly endorse the proposal that would impose a sentence of death or imprisonment for any term of years or for life. I sincerely hope the House will go along with those of us who have had considerable firsthand experience with the machinations of these espionage agents and spies and want to see them given what is coming to them. You can all play a part by voting for H. R. 9580.

Mr. CELLER. Madam Chairman, I yield 7 minutes to the gentleman from Pennsylvania [Mr. WALTER].

Mr. WALTER. Madam Chairman, the only portion of this bill which changes existing law in any respect is the section relating to punishment during peacetime for espionage. A mere casual examination of the language in this section discloses that it is not mandatory in any case for the sentencing judge to impose the death penalty. I could not imagine a case sufficiently grave in which that would be done during peacetime. However, it is extremely important that peacetime espionage be made a capital offense because by so doing the statute of limitations is eliminated entirely. I take the position that if a person may be convicted of a serious crime provided for and spelled out in this section, then it certainly seems to me that if he is not apprehended, and if a statute of limitations applies, then by permitting that situation to exist, we are putting a premium on the ability to hide. All this statute does is to make it possible to prosecute a spy at any time his crime is discovered, and he is apprehended.

Mr. VORYS. Madam Chairman, will the gentleman yield?

Mr. WALTER. I yield.

Mr. VORYS. I wish the gentleman would tell us about title III which apparently provides for registration of spies and saboteurs.

Mr. WALTER. If the gentleman will pardon me, that is exactly what I was going to discuss.

Madam Chairman, title III in effect is a rewriting of existing law with just one exception. It is not necessary to prove an agency under this new language—and under existing law it is. That in a word is what title III does. At first blush one would say that we are rather naive in expecting somebody trained in espionage to come forward and register. But, when you look at the situation a little more carefully, you will find under this language it is possible to prosecute people for a failure to register when you could not prove the overt acts necessary to be proved in spelling out another offense. If the attorney general has information that a person has been trained in espionage, it would be entirely possible and rather easy to prove that fact plus the fact that he did not register, thereby making it possible to prosecute him for a crime when it would be impossible to prove the other offense.

It seems to me with all of the bills that have been sent up here by the Attorney General, in a sincere desire to cope with what I consider a very serious problem, that there is a better solution. We have experienced great difficulty in drafting some of these bills. Two of the measures now under consideration are susceptible of various interpretations, for which reason it is dangerous to act on them hurriedly.

At this time I want to join with the gentleman from the State of Texas [Mr. DIES] in urging that our subcommittee continue its very serious consideration

of the advisability of outlawing the Communist Party entirely. It is not necessary to do more than to enlarge the authority contained in the second section of the Smith Act. I do not agree with the philosophy of the gentleman from Texas [Mr. DIES], because if we outlaw the Communist Party today it will be called "the peace movement" tomorrow. It seems to me the thing to do is to take the language of the Immigration and Nationality Act, which has been passed on in numerous decisions of the court, and spell out the activities, without attempting to place a title on the people engaged in those activities. By doing that, with one fell swoop we will make it possible to prosecute these 25,000 people whom the Attorney General and the FBI have properly termed "enemies of the United States." There should not be any question in the mind of anybody any longer but what this conspiracy is a crime and should be dealt with as we deal with any other crime.

Mr. GROSS. Will the gentleman yield?

Mr. WALTER. I yield.

Mr. GROSS. I want to commend the gentleman for his statement. On page 14 I notice a reference to "Agreement regarding status of forces of parties of the North Atlantic Treaty." I will ask the gentlemen if in any way a person charged under the terms of this act can be tried in a foreign court?

Mr. WALTER. No. By no possible interpretation of this act could jurisdiction be placed in a foreign court.

Mr. GROSS. I am glad to hear that.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALTER] has expired.

Mr. GRAHAM. Madam Chairman, I yield the gentleman 2 additional minutes.

Mr. JONAS of Illinois. Will the gentleman yield?

Mr. WALTER. I yield.

Mr. JONAS of Illinois. If we are in a quandary about anything, now is the time to ask questions. I am going to support the bill, but I am in a quandary about one statement the gentleman made, and that is whether title III is a part of existing law now, or whether it is new language and is new law.

Mr. WALTER. Well, it is new law, although it contains a part of existing law which is restated, and as it is now defined it is new law. But it is part of existing law and designed to embrace existing law, and then define the offenses that make it necessary to establish the fact that the registrant is acting on behalf of a foreign agent.

Mr. JONAS of Illinois. May I call attention to this fact: I understand that under titles I and II we refer to amendments or corrections, or whatever they are, which are added, to title 18 of the United States Code. Title III has reference to the Internal Security Act, as amended. That is another section that is amended. So, in titles I and II all you do is transpose words and sentences that deal with existing law, but in title III you add a new series of statements or language, to the Internal Security Act.

Mr. WALTER. May I say in that connection I think it is rather dangerous what the Department of Justice is doing here, in attempting to enumerate all of these things, because by the doctrine of exclusion, if they fail to specifically define something, then that is construed to be excluded.

Mr. CELLER. Is it not true that as to this important bill, particularly as to title III, we had no testimony from the Attorney General himself, we had no testimony from the Department of Defense, we had no testimony from any of the departments of the Government; all we had was some of the underlings of the Department of Justice who came down and conferred with us as to language.

Mr. WALTER. That, of course, is true; but that does not disturb me in the least. While these people were underlings, they were in the departments charged with the responsibility of the administration of these particular sections, and I thought they knew what they were talking about. Of course, I may have been mistaken.

Mr. JONAS of Illinois. Madam Chairman, will the gentleman yield further?

Mr. WALTER. I yield.

Mr. JONAS of Illinois. I refer the gentleman to section 306 on page 15 of the bill, to this language:

> The Attorney General may at any time make, prescribe, amend, and rescind such rules and regulations and forms as he may deem necessary to carry out the provisions of this act.

Does that embrace all three sections, 1, 2, and 3, or does this refer to existing law and not to this new section? That becomes very important, in my opinion.

The gentleman from Pennsylvania has just informed me that he has in mind an amendment which will meet that situation.

Mr. WALTER. I think the gentleman from Pennsylvania [Mr. GRAHAM] has an amendment to meet that situation.

Mr. GRAHAM. Madam Chairman, I yield 3 minutes to the distinguished gentlewoman from Michigan [Miss THOMPSON], a member of our committee.

Miss THOMPSON of Michigan. Madam Chairman, I am very happy to recommend H. R. 9580 to the Members of the House. The members of the Committee on the Judiciary, of which I am one, have given a great deal of thought and careful consideration to this bill. I think it is a good bill. I think it is a necessary bill, and I think it is long overdue.

Madam Chairman, I yield back the balance of my time.

Mr. CELLER. Madam Chairman, I yield back the balance of my time.

Mr. GRAHAM. Madam Chairman, I yield 3 minutes to the distinguished gentleman from New York [Mr. KEATING].

Mr. KEATING. Madam Chairman, I want to congratulate the members of this committee on the way they have handled the very difficult task with which they were confronted. As the gentleman from Pennsylvania said, it is not easy to write legislation in this field.

Madam Chairman, H. R. 9580 consolidates several requests from the Attorney General relating to improvements in the laws governing sabotage and espionage. More specifically, it broadens the technical definition of sabotage activities so as to include new techniques which might now be directed at our atmosphere, our water supply, national resources, air defense installations, and so forth, and also to reach vitally important defense facilities whether they are within the limits of the United States or not. It makes espionage a capital offense whether committed in time of peace or time of war. And it will bring out into the open, by compulsory registration, persons who have been trained in spy and sabotage schools abroad and who are now in our midst, whether or not they are making any use of such training. I hope we can act quickly and favorably on the bill.

At the same time, I realize that voting for this bill is a very solemn matter. We are here dealing, Mr. Chairman, with one of the most sweeping and awesome rights of our powerful country. We are relying upon its right of self-defense, and enlarging the powers made available to it for that purpose. Even a private citizen has the most terrible of all rights—the right to take the life of a human being with impunity—in the name of self-defense. Certainly no one will claim that our Nation should have less. And I think we do not have to labor the point that the Communist conspiracy has become intense and pervasive to the point where such fundamentals as self-defense are directly involved. We must free our Government to strike hard and strike true whenever and wherever the vicious plotter is exposed among us.

At the same time, Madam Chairman, I wish to focus the attention of my colleagues and of the people in whose name we are acting upon something very reassuring in this bill. In every provision, including the new provision which will make espionage a capital offense in peacetime, there is carefully preserved the requirements of knowledge and intent. No one will ever be brought to punishment under these drastic laws unless a jury of his peers is satisfied that he knew the implications of his act and that he intended the traitorous consequences. This requirement marks the difference between tyranny and a rule of law. This assures us that, notwithstanding the sweeping and all-inclusive nature of these laws, and the drastic penalties they carry, our fair land will never be degraded by the spectacle of mock trials such as we have witnessed under Communist regimes. These laws will scourge the guilty—the criminally guilty. But they will never lend themselves to being called into play against the innocent.

I think we ought to keep those safeguards clearly in view as we send this bill along its way with the strong support I know it will gather here in this chamber.

The CHAIRMAN. If there are no further requests for time, the Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That this act, divided into titles and sections, may be cited as the "Espionage and Sabotage Act of 1954."

TITLE I—WAR AND DEFENSE MATERIALS, PREMISES AND UTILITIES

SEC. 101. Section 2151 of title 18, United States Code, is amended to read as follows:

"§ 2151. Definitions

"As used in this chapter:

"The words 'war material' include arms, armament, ammunition, livestock, forage, forest products and standing timber, stores of clothing, air, water, food, foodstuffs, fuel, supplies, munitions, and all articles, parts or ingredients, intended for, adapted to, or suitable for the use of the United States or any associate nation, in connection with the conduct of war or defense activities.

"The words 'war premises' include all buildings, grounds, mines, or other places wherein such war material is being produced, manufactured, repaired, stored, mined, extracted, distributed, loaded, unloaded, or transported, together with all machinery and appliances therein contained; and all forts, arsenals, navy yards, camps, prisons, or other installations of the Armed Forces of the United States, or any associate nation.

"The words 'war utilities' include all railroads, railways, electric lines, roads of whatever description, any railroad or railway fixture, canal, lock, dam, wharf, pier, dock, bridge, building, structure, engine, machine, mechanical contrivance, car, vehicle, boat, aircraft, airfields, airlanes, and fixtures or appurtenances thereof, or any other means of transportation whatsoever, whereon or whereby such war material or any troops of the United States, or of any associate nation, are being or may be transported either within the limits of the United States or upon the high seas or elsewhere; and all air-conditioning systems, dams, reservoirs, aqueducts, water and gas mains and pipes, structures and buildings, whereby or in connection with which air, water, or gas is being furnished, or may be furnished, to any war premises or to the Armed Forces of the United States, or any associate nation, and all electric light and power, steam or pneumatic power, telephone and telegraph plants, poles, wires, and fixtures, and wireless stations, and the buildings connected with the maintenance and operation thereof used to supply air, water, light, heat, power, or facilities of communication to any war premises or to the Armed Forces of the United States, or any associate nation.

"The word 'associate nation' means any nation at war with any nation with which the United States is at war.

"The words 'national-defense material' include arms, armament, ammunition, livestock, forage, forest products and standing timber, stores of clothing, air, water, food, foodstuffs, fuel, supplies, munitions, and all other articles of whatever description and any part or ingredient thereof, intended for, adapted to, or suitable for the use of the United States in connection with the national defense or for use in or in connection with the producing, manufacturing, repairing, storing, mining, extracting, distributing, loading, unloading, or transporting of any of the materials or other articles hereinbefore mentioned or any part or ingredient thereof.

"The words 'national-defense premises' include all buildings, grounds, mines, or other places wherein such national-defense material is being produced, manufactured, repaired, stored, mined, extracted, distributed, loaded, unloaded, or transported, together with all machinery and appliances therein contained; and all forts, arsenals, navy yards, camps, prisons, or other installations of the Armed Forces of the United States.

"The words 'national-defense utilities' includes all railroads, railways, electric lines, roads of whatever description, railroad or railway fixture, canal, lock, dam, wharf, pier, dock, bridge, building, structure, engine, machine, mechanical contrivance, car, vehicle, boat, aircraft, airfields, air lanes, and fixtures or appurtenances thereof, or any other means of transportation whatsoever, whereon or whereby such national-defense material, or any troops of the United States, are being or may be transported either within the limits of the United States or upon the high seas or elsewhere; and all air-conditioning systems, dams, reservoirs, aqueducts, water and gas mains and pipes, structures, and buildings, whereby or in connection with which air, water, or gas may be furnished to any national-defense premises or to the Armed Forces of the United States, and all electric light and power, steam or pneumatic power, telephone and telegraph plants, poles, wires, and fixtures and wireless stations, and the buildings connected with the maintenance and operation thereof used to supply air, water, light, heat, power, or facilities of communication to any national-defense premises or to the Armed Forces of the United States."

SEC. 102. Section 2153 of title 18, United States Code, is amended to read as follows:

"§ 2153. Destruction of raw material, war premises, or war utilities.

"(a) Whoever, when the United States is at war, or in times of national emergency as declared by the President or by the Congress, with intent to injure, interfere with, or obstruct the United States or any associate nation in preparing for or carrying on the war or defense activities, or, with reason to believe that his act may injure, interfere with, or obstruct the United States or any associate nation in preparing for or carrying on the war or defense activities, willfully injures, destroys, contaminates or infects, or attempts to so injure, destroy, contaminate or infect any war material, war premises, or war utilities, shall be fined not more than $10,000 or imprisoned not more than 30 years, or both.

"(b) If two or more persons conspire to violate this section, and one or more of such persons do any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be punished as provided in subsection (a) of this section."

SEC. 103. Section 2154 of title 18, United States Code, is amended to read as follows:

"§ 2154. Production of defective war material, war premises, or war utilities.

"(a) Whoever, when the United States is at war, or in times of national emergency as declared by the President or by the Congress, with intent to injure, interfere with, or obstruct the United States or any associate nation in preparing for or carrying on the war or defense activities, or, with reason to believe that his act may injure, interfere with, or obstruct the United States or any associate nation in preparing for or carrying on the war or defense activities, willfully makes, constructs, or causes to be made or constructed in a defective manner, or attempts to make, construct, or cause to be made or constructed in a defective manner any war material, war premises or war utilities, or any tool, implement, machine, utensil, or receptacle used or employed in making, producing, manufacturing, or repairing any such war material, war premises or war utilities, shall be fined not more than $10,000 or imprisoned not more than 30 years, or both.

"(b) If two or more persons conspire to violate this section, and one or more of such persons do any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be punished as provided in subsection (a) of this section."

SEC. 104. Section 2155 of title 18, United States Code, is amended to read as follows:

"§ 2155. Destruction of national-defense material, national-defense premises or national-defense utilities.

"(a) Whoever, with intent to injure, interfere with, or obstruct the national defense of the United States, willfully injures, destroys, contaminates or infects, or attempts to so injure, destroy, contaminate or infect any national-defense material, national-defense premises, or national-defense utilities, shall be fined not more than $10,000 or imprisoned not more than 10 years, or both.

"(b) If two or more persons conspire to violate this section, and one or more of such persons do any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be punished as provided in subsection (a) of this section."

SEC. 105. Section 2156 of title 18, United States Code, is amended to read as follows:

"§ 2156. Production of defective national-defense material, national-defense premises or national-defense utilities.

"(a) Whoever, with intent to injure, interfere with, or obstruct the national defense of the United States, willfully makes, constructs, or attempts to make or construct in a defective manner, any national-defense material, national-defense premises or national-defense utilities, or any tool, implement, machine, utensil, or receptacle used or employed in making, producing, manufacturing, or repairing any such national-defense material, national-defense premises or national-defense utilities, shall be fined not more than $10,000 or imprisoned not more than 10 years, or both.

"(b) If two or more persons conspire to violate this section, and one or more of such persons do any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be punished as provided in subsection (a) of this section."

SEC. 106. The analysis immediately preceding section 2151 of title 18, United States Code, is amended to read as follows:

"Sec.
2151. Definitions.
2152. Fortifications, harbor defenses or defensive sea areas.
2153. Destruction of war material, war premises or war utilities.
2154. Production of defective war material, war premises or war utilities.
2155. Destruction of national-defense material, national-defense premises or national-defense utilities.
2156. Production of defective national-defense material, national-defense premises or national-defense utilities."

TITLE II—DISCLOSURE OF INFORMATION RELATING TO NATIONAL DEFENSE

SEC. 201. Section 794 of title 18, United States Code, is amended to read as follows:

"(a) Whoever, with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation, communicates, delivers, or transmits, or attempts to communicate, deliver, or transmit, to any foreign government, or to any faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States, or to any representative, officer, agent, employee, subject, or citizen thereof, either directly or indirectly, any document, writing, code book, signal book, sketch, photograph, photographic negative, blueprint, plan, map, model, note, instrument, appliance, or information relating to the national defense, shall be punished by death or by imprisonment for any term of years or for life.

"(b) Whoever, in time of war, with intent that the same shall be communicated to the enemy, collects, records, publishes, or communicates, or attempts to elicit any information with respect to the movement, numbers, description, condition, or disposition of any of the Armed Forces, ships, aircraft, or war materials of the United States, or with respect to the plans or conduct, or supposed

plans or conduct of any naval or military operations, or with respect to any works or measures undertaken for or connected with, or intended for the fortification or defense of any place, or any other information relating to the public defense, which might be useful to the enemy, shall be punished by death or by imprisonment for any term of years or for life.

"(c) If two or more persons conspire to violate this section, and one or more of such persons do any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be subject to the punishment provided for the offense which is the object of such conspiracy."

TITLE III—REGISTRATION OF PERSONS TRAINED IN ESPIONAGE AND SABOTAGE

SEC. 301. Section 20 of the Internal Security Act of 1950 is hereby amended by repealing subsection (a) thereof, and by deleting the designation "(b)" which appears in said section.

SEC. 302. Except as hereinafter provided, every person who has knowledge of, or has received instruction or assignment in, the espionage, counterespionage, or sabotage service or tactics of a government of a foreign country or of a foreign political party, shall register with the Attorney General.

SEC. 303. The registration of any person, as required by this act, shall be accomplished by filing with the Attorney General a registration statement in duplicate, under oath, to be prepared and filed in such manner and form, and containing such information as the Attorney General, having due regard for the national security and the public interest, shall by regulations prescribe.

SEC. 304. The registration requirements of section 2 shall not apply to any person—

(a) who has obtained knowledge of or received instruction or assignment in the espionage, counterespionage, or sabotage service or tactics of a foreign government or foreign political party by reason of civilian, military, or police service or employment with the United States Government, the governments of the several States, their political subdivisions, the District of Columbia, the Territories, or the Canal Zone; or

(b) who has obtained such knowledge solely by reason of academic or personal interest not under the supervision of or in preparation for service with the government of a foreign country or a foreign political party; or

(c) who has made full disclosure of such knowledge, instruction, or assignment to officials within an agency of the United States Government having responsibilities in the field of intelligence, which disclosure has been made a matter of record in the files of such agency, and concerning whom a written determination has been made by the Attorney General or the Director of Central Intelligence that registration would not be in the interest of national security; or

(d) whose knowledge of, or receipt of instruction or assignment in, the espionage, counterespionage, or sabotage service or tactics of a government of a foreign country or of a foreign political party, is a matter of record in the files of an agency of the United States Government having responsibilities in the field of intelligence and concerning whom a written determination is made by the Attorney General or the Director of Central Intelligence, based on all information available, that registration would not be in the interest of national security; or

(e) who is a duly accredited diplomatic or consular officer of a foreign government, who is so recognized by the Department of State, while said officer is engaged exclusively in activities which are recognized by the Department of State as being within the scope of the functions of such officer, and any member of the immediate family of such officer who resides with him; or

(f) who is an official of a foreign government, if such government is recognized by the United States, whose name and status and the character of whose duties as such official are of record in the Department of State, and while said official is engaged exclusively in activities which are recognized by the Department of State as being within the scope of the functions of such official, and any member of the immediate family of such official who resides with him; or

(g) who is a member of the staff of or employed by a duly accredited diplomatic or consular officer of a foreign government who is so recognized by the Department of State, and whose name and status and the character of whose duties as such member or employee are a matter of record in the Department of State, while said member or employee is engaged exclusively in the performance of activities which are recognized by the Department of State as being within the scope of the functions of such member or employee; or

(h) who is an officially acknowledged and sponsored representative of a foreign government and is in the United States on an official mission for the purpose of conferring or otherwise cooperating with United States intelligence or security personnel; or

(i) who is a member of a force of a NATO country who enters the United States under the provisions of article III, paragraph (1) of the Agreement Regarding Status of Forces of Parties of the North Atlantic Treaty, or who is a civilian or one of the military personnel of a foreign armed service who has been invited to the United States for training purposes at the request of a military department of the United States; or

(j) who is a person who has been designated by a foreign government to serve as its representative in or to an international organization or is an officer or employee of such an organization or who is a member of the immediate family of, and resides with, such a representative, officer, or employee.

SEC. 305. The Attorney General shall remain in permanent form one copy of all registration statements filed under this act. They shall be public records and open to public examination and inspection at such reasonable hours and under such regulations as the Attorney General may prescribe, except that the Attorney General, having due regard for the national security and public interest, may, in his discretion, withdraw any registration statement from public examination and inspection.

SEC. 306. The Attorney General may at any time make, prescribe, amend, and rescind such rules, regulations, and forms as he may deem necessary to carry out the provisions of this act.

SEC. 307. (a) Any person who willfully violates any provision of this act or any regulation thereunder, or who in any registration statement willfully makes a false statement of a material fact or willfully omits any material fact, shall upon conviction thereof, be punished by a fine of not more than $10,000 or by imprisonment for not more than 5 years, or both.

(b) Any alien who shall be convicted of a violation of any provision of this act or any regulation thereunder shall be subject to deportation in the manner provided by chapter 5, title II, of the Immigration and Nationality Act (66 Stat. 163).

SEC. 308. Failure to file a registration statement as required by this act shall be considered a continuing offense for as long as such failure exists, notwithstanding any statute of limitation or other statute to the contrary.

SEC. 309. Compliance with the registration provisions of this act shall not relieve any person from compliance with any other applicable registration statute.

SEC. 310. If any provision of this act or the application thereof to any person or circumstances is held invalid, the remainder of the act, and the application of such provisions to other persons or circumstances, shall not be affected thereby.

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Page 1, line 9, after the word "definitions", insert a period.

Mr. CELLER. Madam Chairman, I move to strike out the last word.

Madam Chairman, I want to draw the attention of the members of the subcommittee and the members of the Committee of the Whole to page 15, commencing at line 5, section 306, which reads:

The Attorney General may at any time make, prescribe, amend, and rescind such rules, regulations, and forms as he may deem necessary to carry out the provisions of this act.

Mr. GRAHAM. Madam Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Pennsylvania.

Mr. GRAHAM. I have an amendment to correct that.

Mr. CELLER. In what respect?

Mr. GRAHAM. Limiting it to this title.

Mr. CELLER. Even if it is limited to the title wherein it appears, this is what I am driving at. I am reading section 307 (a):

Any person who willfully violates any provision of this act or any regulation thereunder, or who in any registration statement willfully makes a false statement of a material fact or willfully omits any material fact, shall, upon conviction thereof, be punished by a fine of not more than $10,000 or by imprisonment for not more than 5 years, or both.

Mr. GRAHAM. That is covered by the amendment.

Mr. CELLER. But the gentleman says he is amending it so as to make it applicable to titles I and II.

Mr. GRAHAM. That is right.

Mr. CELLER. But it is not made applicable to III.

Mr. GRAHAM. That is right.

Mr. CELLER. As to title III, I gather the following: The Attorney General can make rules and regulations and change them at any time he sees fit, and then anybody who violates the regulation shall be deemed to have been guilty of a crime that carries with it a possible fine of $10,000 or imprisonment for not more than 5 years, or both. That is very drastic. The gentleman from New York stated that the bill was very, very carefully gone over. I wonder whether that is to be deemed gone over carefully when we have a situation where somebody merely violates a rule or regulation of the Attorney General, not the basic fabric of the statute, and goes to jail for quite a stretch. All the person does is to violate a rule set forth by the Attorney General, then he gets in the toils of the law and is guilty of a crime which may involve a penalty of $10,000 or imprisonment. That is not careful consideration. The regulation or rule becomes as important as the statute.

Mr. GRAHAM. Many, many times this Congress has passed bills with this identical language in it.

Mr. CELLER. Not in a bill as drastic as this.

Mr. GRAHAM. In the case of the OPA and other similar acts.

Mr. CELLER. I question that, but if we did, we made a mistake before and should not repeat it.

Mr. GRAHAM. We may have made a mistake, but we did it.

Mr. CELLER. I just want to raise this question, that is all; perhaps the gentleman might want to answer it.

The CHAIRMAN. The question is on the first committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the rest of the committee amendments.

The Clerk read as follows:

On page 3, line 12, strike out the word "word" and substitute "words."

On page 3, line 12, strike out the word "means" and substitute "mean."

On page 5, line 8, after the words "Destruction of" strike out the word "raw" and substitute the word "war".

On page 5, line 9, after the word "utilities", insert a period.

On page 6, line 7, after the word "utilities", insert a period.

On page 7, line 7, strike out the word "material" and substitute the word "materials".

On page 7, line 8, after the word "utilities", insert a period.

On page 7, line 25, after the word "utilities", insert a period.

On page 8, after line 18, on the line beginning "2155. Destruction of" strike out the word "material" and substitute the word "materials".

On page 12, line 21, strike out "(c)" and substitute "(e)".

On page 14, line 17, strike out the word "remain" and substitute "retain."

The committee amendments were agreed to.

Mr. GRAHAM. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GRAHAM: On page 15, lines, 8, 10, 17, and 22, and on page 16, lines 2, 4, and 6, strike out the word "Act" and substitute the word "title."

The amendment was agreed to.

Mr. HYDE. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendments offered by Mr. HYDE: On page 2, line 5, after the word "foodstuffs", insert "petroleum, petroleum products."

On page 2, line 11, after the word "mines", insert "laboratories, research and development facilities."

On page 2, line 11, after the word "being", insert "planned, developed, experimented with."

On page 2, line 15, after the word "camps", insert "air force bases, depots."

On page 2, line 15, after the word "prisons", insert "government or nongovernment real property occupied in whole or in part by any agency or component of the Department of Defense."

On page 2, line 22, after the word "vehicle", strike out the word "boat," and substitute "vessel."

On page 2, line 22, after the word "airfields", strike out the words "air lanes" and substitute "airways, heliports, landing areas, air navigation facilities, navigation equipment (sea), pipelines, traffic control systems, tank farms, air space above the United States, its Territories or possessions."

On page 3, line 4, after the word "pipes", insert "petroleum pipelines."

On page 3, line 5, after the word "water", insert a comma.

On page 3, line 6, strike out the first word "or."

On page 3, line 6, after the word "gas", insert "or petroleum products."

On page 3, line 9, after the word "power", insert "communication facilities, including."

On page 3, line 17, after the word "war", change the period to a comma and add the following "or any nation which is a party to a mutual defense treaty or agreement to which the United States is a party."

On page 3, line 23, after "United States", insert "or any associate nation."

On page 4, line 5, after the word "mines", insert "laboratories, research and development facilities."

On page 4, line 6, after the word "being", insert "planned, developed, experimented with."

On page 4, line 9, after the word "camps", insert "Air Force bases, depots."

On page 4, line 10, after the word "prisons", insert "Government or non-Government real property occupied in whole or in part by any agency or component of the Department of Defense."

On page 4, line 11, after the words "United States", change the period to a comma and add "or any associate nation."

On page 4, line 16, strike out the word "boat" and substitute the word "vessel."

On page 4, line 17, strike out the words "air lanes," and substitute "airways, heliports, landing areas, air navigation facilities, navigation equipment (sea), pipelines, traffic control systems, tank farms, air space above the United States, its Territories or possessions."

On page 4, line 20, after the word "States", insert "or any associate nation."

On page 4, line 23, after the word "pipes", insert "petroleum pipelines."

On page 5, line 1, strike out the first word "or."

On page 5, line 1, after the word "gas", insert "or petroleum products."

On page 5, line 2, after the words "United States", insert "or any associate nation."

On page 5, line 3, after the word "power", insert "communications facilities, including."

On page 5, line 8, after the words "United States", change the period to a comma and add the following "or any associate nation."

On page 7, line 19, strike out the comma after the syllable "ties", and insert "of the United States, or any associate nation."

On page 8, line 12, strike out the comma after the word "utilities", and insert "of the United States, or any associate nation."

Mr. HYDE (interrupting the reading of the amendments). Madam Chairman, I ask unanimous consent that the further reading of the amendments be dispensed with and that they be printed in the RECORD at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

Mr. CELLER. Madam Chairman, reserving the right to object, which amendments does the gentleman refer to?

Mr. HYDE. All of the amendments that I have just offered.

Mr. CELLER. Are these the ones that have just been submitted to us today by the Department of Justice?

Mr. HYDE. By the Department of Defense.

Mr. CELLER. And these are the ones that have not as yet been considered by the subcommittee of the Judiciary Committee or by the Committee on the Judiciary itself?

Mr. HYDE. That is right.

Mr. CELLER. And the amendments that were considered by the Committee on the Judiciary have been adopted?

Mr. HYDE. That is right.

Mr. CELLER. Let me get this straight. These amendments that the gentleman is now asking to be considered as read are amendments given to us at the 11th hour by the Department of Defense?

Mr. HYDE. That is right.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. HYDE. Madam Chairman, these amendments are a series of amendments which have been offered by the Department of Defense. None of these amendments change the purport of the legislation in any respect. Their sole purpose is to further expand the definitions contained in title I. They apply to title I only so as to include such modern facilities as laboratories, Air Force bases, landing areas, pipelines, and so forth, as well as for the protection of defense facilities and defense materials in the United States belonging to allied nations. In other words, such words as these are added to the definition of "war materials"; Petroleum and petroleum products are added to the definition of "war premises." The words "laboratories, research and development facilities" are added.

Mr. WALTER. Madam Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Pennsylvania.

Mr. WALTER. Frankly, I do not know what is in these things. As a matter of fact, what I have before me that came from the Defense Department refers to a bill that is not even the bill under consideration. To "war premises" has been added "laboratories, research, and development facilities."

Mr. HYDE. That is correct.

Mr. WALTER. Under existing law, "war premises" includes all buildings, grounds, mines, or other places wherein such war material is kept. Now, wherein does this amendment adding "laboratories, research, and development facilities" add anything to existing law?

Mr. HYDE. Frankly, I do not see that it adds a great deal, but if it would aid in the clarification of the meaning of "war premises," it would be helpful.

Mr. WALTER. It certainly seems to me that it is not unreasonable to request that the gentleman withdraw his amendments until such time as we can at least read them.

I am not so certain that the boys downtown who prepared this stuff have not actually weakened and watered down the bill to such an extent where the doctrine of exclusion which I mentioned a moment ago might be used in order to defeat the very thing we are trying to do.

Mr. HYDE. I thank the gentleman. Madam Chairman, in deference to the

objections of the gentleman from Pennsylvania [Mr. WALTER], I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland [Mr. HYDE]?

Mr. CELLER. Madam Chairman, reserving the right to object—and I shall not object—this is a clear indication that you cannot write a bill as important as this, as intricate as this, on the floor of the House. Here, at this very 11th hour, we are handed some 30 amendments, very important in detail and import, and asked to swallow them whole without any debate whatsoever. It should not be done. I deplore that kind of action on the part of the Department of Defense.

We did not hear from the Department of Defense on the general import of the bill or the policy involved in the bill. Not a single word did we hear from the Department of Defense. We invited them to come down to explain their bill. But now they want us to change this bill at the very end of our consideration thereof. I think that is most deplorable. It is a clear indication that our committee has, in its haste to get the bill to the floor, sacrificed its usual care and consideration.

Madam Chairman, I withdraw my reservation of objection.

Mr. HYDE. As the gentleman suggested a moment ago to the gentleman from Pennsylvania [Mr. GRAHAM], I think the gentleman from New York [Mr. CELLER], is unduly excited.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland [Mr. HYDE]?

There was no objection.

Mr. ROGERS of Texas. Madam Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROGERS of Texas: On page 5, line 23, after the second comma strike out the remainder of line 23 and all of line 24 and insert in lieu thereof the following: "shall suffer death, or shall be fined not more than $10,000 or imprisoned for any term of years or for life, or shall suffer both such fine and imprisonment."

Mr. ROGERS of Texas. Madam Chairman, I have three other amendments in the same language, to different parts of the bill. I ask unanimous consent that these other amendments be considered with this amendment together.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas [Mr. ROGERS]?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. ROGERS of Texas: On page 8, line 16, after the first comma, strike out all the remainder to the end of the paragraph and insert the following: "shall suffer death, or shall be fined not more than $10,000 or imprisoned for any term of years or for life, or shall suffer both such fine and imprisonment."

On page 7, line 19, after the first comma, strike out all the language to the end of the paragraph and insert in lieu thereof the following: "shall suffer death, or shall be fined not more than $10,000 or imprisoned for any term of years or for life, or shall suffer both such fine and imprisonment."

And on page 7, line 1, after the second comma, strike out all the language to the end of the paragraph and insert in lieu thereof the following: "shall suffer death, or shall be fined not more than $10,000 or imprisoned for any term of years or for life, or shall suffer both such fine and imprisonment."

Mr. ROGERS of Texas. Madam Chairman, this amendment is really very simple. It deals with the penalty in a law that has been written to deal with espionage and sabotage. As this law presently reads, the punishment for acts of sabotage committed during time of war or national emergency would be punishable by not more than 30 years' imprisonment or not more than $10,000 fine, or both. Certain acts of sabotage, occurring at any time, would be punishable by not more than 10 years' imprisonment or not more than $10,000 fine, or both. My amendments merely provide a means by which the court can, but is not required to, give any punishment, including death or life imprisonment. These amendments merely expand or enlarge upon the authority of the courts to deal with offenders in meting out punishment.

I served as a district attorney and I have also represented defendants in criminal cases in both the State and Federal courts, and I think I am qualified to weigh this matter. I have deep and abiding faith in our jury system and in our judicial system, in spite of some recent decisions.

But be that as it may, we are here talking about people who will indulge in acts to destroy this country and everything we stand for. Yet we limit the punishment that may be meted out to those people in some instances to 5 years, in some instances to 10 years, and in some instances to 30 years. This amendment does not say that everyone who violates this law shall be put to death, but it does provide a means whereby the courts of this Nation can deal with these criminal acts when they are called upon to deal with them. Their hands will not be tied and if the circumstances warrant the defendant can be given the death penalty.

Mr. WALTER. Madam Chairman, will the gentleman yield?

Mr. ROGERS of Texas. I yield.

Mr. WALTER. The jury would not have anything to do with any sentences in any crime defined under these sections.

Mr. ROGERS of Texas. Of course, the gentleman is right about that; I should have said courts. If I said juries, I apologize. I was thinking in terms of Texas State courts.

Mr. CELLER. Madam Chairman, will the gentleman yield?

Mr. ROGERS of Texas. I yield to the gentleman from New York.

Mr. CELLER. As I understand, what the gentleman does is step up the penalty to death in all of the titles, titles I, II and III, or 10 years in prison. It is the alternative in every case.

Mr. ROGERS of Texas. My amendments affect title I. They merely provide a means whereby if the circumstances warrant a person can receive the death penalty. The situation I have in mind is simply this, that there is no reason why a court should not have the right to give the death penalty. If a person goes out and contaminates a water utility that is connected with a defense plant, that could result in untold damage and death to many people there should certainly be a penalty to fit the crime.

Mr. CELLER. Does the gentleman think there should be the possibility of a death penalty for violation of a rule or regulation promulgated by the Attorney General?

Mr. ROGERS of Texas. That is a debatable question.

Mr. CELLER. It would be possible under the gentleman's amendment.

Mr. ROGERS of Texas. No. I do not think so, as my amendments have to do only with title I. As to the rules or regulations situation, I do not think the rules or regulations should have the same effect as law. That is a subject that is very complex, that you could debate for hours. I think we have gone entirely too far in permitting administrative agencies to make rules and regulations.

Mr. HYDE. Madam Chairman, will the gentleman yield?

Mr. ROGERS of Texas. I yield to the gentleman from Maryland.

Mr. HYDE. The gentleman has not offered that amendment to title III, it is just to title I?

Mr. ROGERS of Texas. It is just title I, that is correct.

Mr. HYDE. So it does not come in the rules and regulations business about which the gentleman from New York is concerned?

Mr. ROGERS of Texas. No, it does not. It is only to title I. It merely provides a means by which that penalty can be exacted. In the State of Texas a man can receive the death penalty for robbery with firearms. Maybe he does not even pull the trigger, maybe he does not even get anything of value, but he can go to the electric chair. Still, that same man could do something to try to destroy this Government, and under this law what would he get? At most he would get 30 years. After all is said and done we are dealing with a proposition that has to do with the perpetuation of our way of life and I think the court should have the authority at least to give the death penalty or to give a long term of years as punishment for acts deliberately committed in an effort to destroy us and to defeat our country.

Mr. CELLER. For clarification, as I understand it, the gentleman's amendment applies only to title I and not to titles II and III?

Mr. ROGERS of Texas. That is right.

Mr. GRAHAM. Madam Chairman, I move that all debate on the pending amendments, and all amendments thereto, do now close.

The motion was agreed to.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Texas [Mr. ROGERS].

The question was taken; and on a division (demanded by Mr. ROGERS of Texas), there were—ayes 29, noes 67.

So the amendments were rejected.

Mr. VURSELL. Madam Chairman, I move to strike out the last word.

(By unanimous consent, Mr. VURSELL was given permission to speak out of order.)

Mr. VURSELL. Madam Chairman, today I have the disturbing news from the Carmi Daily Times, of Carmi, Ill., with a streamer across the top of the paper which reads, "No Market for Oil for New County Wells." The news story points out that one of the big pipelines serving White County is not buying oil on new leases. White is one of the leading oil counties of southern Illinois, and may I say that, while Illinois is the eighth producing oil State in the Union, over 50 percent of the oil produced in my State comes from the counties which may up my congressional district.

Greater oil production in the United States which cannot be consumed or exported is bringing about the refusal of pipelines in some localities to take the oil produced.

When the pipelines cannot take the crude oil, men are thrown out of work and must go on unemployment compensation, for many weeks. Their earning power is cut off, and with it the taxes the Government would receive if they could remain employed.

It is a great loss to the employers, a heavy loss in taxes to the Government, and it slows down the incentive of oilmen, nationwide, to continue exploration for the wealth and power of oil under the ground. It is dangerous to the economy as well as to the national defense of this country.

Madam Chairman, in White County 50 well locations are ready for drilling, but cannot be drilled, and the hundreds of men employed by the drilling organizations are thrown out of work.

I am bringing this matter to the floor of the House today, because there is only one remedy that can correct this situation in the interest of the economy of our Government, and that is the Congress of the United States.

There is only one reason for the cutback of production of wells all over the United States for the past 2 years, or more, and for the glut of the present domestic oil market. That is and has been the unlimited importation of oil, regardless of the welfare of our domestic oil producers, and regardless of the economic damage it does to our Nation.

Let me be more specific. I introduced a bill to limit petroleum imports, October 1949, when imports of crude and refined products delivered to our ports averaged 784,000 barrels daily. We could not alarm the Congress sufficiently to pass legislation in that session limiting imports, and the flood continued. As it continued, the production of wells in the United States was steadily cut back. This cut back the efforts of oil operators, to locate more domestic fields in our Nation, and reduced our power to defend the Nation in the event of a world conflict, and made us more dependent upon foreign oil, which could be cut off by submarines, placing our Nation in a perilous condition in the event of war.

From 1949 to 1953, the flood of oil, largely from Iran, Arabia, and the Middle East, and Venezuela, continued to come to our shores in such increasing amounts that the daily imports increased from 784,000 barrels in 1949 to 1,050,000 barrels a day in 1953, and it has continued to rise.

The independent oil operators of the Nation who play such a large part in exploring for, and developing new fields became alarmed to the point that they were ready to make a fight to limit foreign imports. At their request, I again introduced the bill to cut back foreign oil imports to 10 percent of our national consumption.

Members of Congress will remember the terrific struggle we had on the floor of the House in the session of Congress last year. We were at the point of passing the legislation when such opposition was brought that we lost the fight on a motion to recommit the bill to the committee.

Madam Chairman, many of us sought to do something about it in this session, but with the roadblocks in sight ahead, and with the important legislation before us on a wide front, it was decided that the efforts of another attempt would be lost.

Madam Chairman, these excess imports, that are doing great damage to the independent oil industry in this country cannot be justified on the theory of trading with foreign nations to furnish them with American dollars.

The countries from which the major part of this foreign oil comes have large treasury balances. May I cite for example: Arabia and Venezuela, whose treasury balances are extremely high.

Madam Chairman, this flood of foreign oil imports is being brought to our shores by several of the big oil industries in this country. A few companies here in the United States are responsible for, and are the beneficiary of these excessive imports. They are responsible for depressing the wide-flung independent oil operators of this Nation, and the Congress should take note of this situation now, and get ready to push a bill through in the next session of Congress to remedy this situation in the interest of the entire economy of our Nation, and in the interest of the future defense of our Nation, if, unfortunately, we are called upon to defend it.

There has been a major shift in the last few years in the world flow of oil with the Middle East supplanting the United States, and Venezuela as the primary source of oil for Europe and other Eastern Hemisphere areas. It has brought a loss of export markets for United States oil, particularly in Europe, and to other parts of the world.

This flood of foreign oil into this country, which has changed our Nation from a net exporter in the prewar years to an increasing net importer; has meant a loss of markets for United States production amounting to more than 1 million barrels daily.

Today, the United States is the only major nation of the free world with sufficient oil within its own border for peace or war. A continuation of this import trend, and progressive restriction of our market outlets will inevitably result in an inadequate United States supply, and production capacity to meet national requirements for peace and for war.

These big importers have talked about reducing their own imports but it has only been talk. They are taking 14 percent of the domestic market today. This injury to our economy and threat to our defense will not be corrected until the Congress does it. It will take legislation to do this job, and I think we should live up to it in the next session of Congress.

Mr. BAILEY. Will the gentleman yield?

Mr. VURSELL. I yield.

Mr. BAILEY. I would like to ask the gentleman from Illinois a question. I would be glad to join with him in making it an offense under this bill to continue this practice.

Mr. VURSELL. I want to thank the gentleman. I am very serious about this. It is about time all Members of the House got ready to do something about it in the next session.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. MEADER. Madam Chairman, I move to strike out the last word.

Madam Chairman, this is an extremely important bill. I do not feel guilty for taking the time of the Committee to call attention to certain language in the bill which disturbs me and ought to be of concern to all Members.

I take this time for the purpose of seeking clarification of this language from the chairman of the subcommittee which handled this legislation for such value as it may have in interpreting this bill if it becomes law.

I draw the attention of the Committee to section 306 of title III, on page 15, lines 5 through 8. This is the same section previously read by the gentleman from New York [Mr. CELLER] and which reads as follows:

> The Attorney General may at any time make, prescribe, amend, and rescind such rules, regulations, and forms as he may deem necessary to carry out the provisions of this act.

I would like to have the attention of the gentleman from Pennsylvania [Mr. GRAHAM], I want to ask him first, Is that provision in existing law regarding alien registration?

Mr. GRAHAM. Yes, it is.

Mr. MEADER. In other words, we are not now adopting a new policy, but that provision giving regulation-making authority to the Attorney General, already exists under the present law?

Mr. GRAHAM. Yes.

Mr. MEADER. Now, since the question has been raised during the debate, would a violation of any regulations made by the Attorney General result in incurring the penalty provided in this act?

Mr. HYDE. Under that title; yes.

Mr. MEADER. In other words, anyone violating a regulation issued by the Attorney General under this authority could be fined $10,000 or imprisoned for 5 years, or both; is that correct?

Mr. GRAHAM. That is correct.

Mr. MEADER. Is there any limitation, or did the committee give any consideration to limiting the regulation-making authority of the Attorney General? Do I understand that his regulations could go so far as to change the terms of the statute?

Mr. GRAHAM. He would have to carry out the provisions of the statute.

Mr. MEADER. He could not in any way change or modify a statute which the Congress has adopted, through his regulatory power?

Mr. GRAHAM. It would be unconstitutional if he did that.

Mr. MEADER. May I ask the gentleman from Pennsylvania if he agrees with me that the purpose of these regulations is to provide for the forms necessary for alien registration, and not to make any substantive regulations, violations of which might lead to this very serious penalty?

Mr. GRAHAM. On page 15, under section 306:

> The Attorney General may at any time make, prescribe, amend, and rescind such rules, regulations, and forms as he may deem necessary to carry out the provisions of this act.

Mr. MEADER. Primarily, that is to give the Attorney General the power to prescribe forms for the registration of aliens.

Mr. GRAHAM. That is correct.

Mr. KEATING. Will the gentleman yield?

Mr. MEADER. I yield.

Mr. KEATING. I think it would remove a misapprehension in the gentleman's mind to point out that if the Attorney General did make any regulation which was not in conformity with the terms of this title III, it would not be enforcible. In other words, that would be a question which a defendant could raise if he were brought up under it. His regulation would have to be in accordance with, and not at variance with, the law itself.

Mr. MEADER. I wish to thank the gentleman from Pennsylvania [Mr. GRAHAM] and the gentleman from New York [Mr. KEATING] for qualifying and restricting somewhat what appeared to me to be a very broad delegation of power to an administrative official.

Mr. GRAHAM. And we thank the gentleman for bringing it to our attention.

Mr. BENNETT of Florida. Madam Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. BENNETT of Florida: Page 10, lines 4 and 5, strike out "in time of war, with intent that the same shall be communicated to the enemy" and insert "with intent or reason to believe that it is to be used in the injury of the United States or to the advantage of a foreign nation."
>
> On page 10, line 9, strike out "war materials" and insert "national-defense materials (as defined in sec. 2151)."
>
> And on page 10, line 15, strike out "the enemy" and insert "any foreign nation."

Mr. BENNETT of Florida. Madam Chairman, the purpose of my amendment is to make all types of espionage capital offenses in peacetime as well as in wartime. My amendment would amend subsection (b) beginning at line 4, page 10, of the bill. As reported by committee, subsection (b) now begins, "Whoever, in time of war." My amendment would change that to read exactly as subsection (a) now begins, so that it would make the acts described in (b) capital offenses in peacetime as well as in war.

On page 3 of the report it is stated:

> It is proposed to make espionage a capital offense, irrespective of when committed, in time of peace or war.

This is not an accurate statement. To make it accurate, my amendment must be adopted. It is true that the committee has made the offenses described in subsection (a) capital in peacetime, but it has not made those described in (b) capital when committed in peacetime.

I may add here at this point that the things which are described in (b) are not lesser things; actually they are greater things and are actually more heinous than the things described in (a). So we have the peculiar situation of having defined separate crimes in the same section and decided that the penalty for the lesser shall be higher than the penalty for the greater.

This is apparent from the beginning of the bill's subsection (b), "Whoever in time of war." My amendment would make the espionage activities described in (b) capital in peacetime as well as in wartime. I have been given no logical explanation as to why the offenses in (a) should be capital in peacetime while those in (b) should not. In fact, the offenses in (b) are more serious, and there is better reason for making them capital in peacetime.

One argument that has been made is that (b) is merely repetitious of (a), and that when the offenses in (b) are committed in peacetime they can be prosecuted under (a). The language of these sections refutes this argument. The offenses in (b) are different from those in (a). For example, it is a crime under (b) to attempt to elicit defense information, while this act is not spelled out in (a).

Moreover, the legislative history of subsection (b) since its first enactment as part of the Espionage Act of 1917 shows that the offenses in (b) are different from those in (a). The Library of Congress tells me that when H. R. 291, the bill which became the Espionage Act, passed the House in 1917, the section corresponding to subsection (b) was not in the bill. However, the sections which were the forerunner of subsection (a) were in the bill. The Senate evidently felt that there were offenses which were not included in (a) and that those offenses should be punished. So they added the forerunner of (b). The House concurred in the amendment. This shows that Congress that year understood the offenses in subsection (b) to be separate and distinct offenses from those in subsection (a).

Under this proposed legislation, as an example, a spy who attempts to elicit information in peacetime would not be guilty of any crime under the laws of the United States. This accidental gap should be closed.

An argument which might be made against my amendment is that the Department of Justice is supposed to be preparing a complete revision of these espionage sections to be presented to Congress next year, and that we should not amend the laws very much at this time. If this argument applies to my amendment, it applies equally to the amendments of the committee. It is my contention that both the committee's amendments and mine are needed now, not next year. It is unwise to postpone needed amendment to this section in the expectation that a better revision will be made next year. We cannot commit the next Congress to action which needs to be taken now. The chances are that we here this afternoon may be considering the last amendments to this section which will be made in many years. We should do the job right now.

Madam Chairman, I urge this amendment to make certain types of espionage capital offenses in peacetime as well as in wartime, and to eliminate the gap between subsections (a) and (b) under which future acts of espionage may escape punishment altogether.

Mr. HYDE. Madam Chairman, I rise in opposition to the amendment offered by the gentleman from Florida [Mr. BENNETT].

Madam Chairman, while I have some sympathy with what the gentleman from Florida is attempting to do, nevertheless his amendment should not be adopted for a number of very good reasons.

In the first place, he is attempting to rewrite substantive law on this subject, which we did not try to do except in respect to the offense being committed. The substantive law involved is under careful study by counsel for the committee and the Department of Justice. We certainly should not try to go into that here on the floor of the House.

Moreover, the language of these two sections has been well defined by the courts and should not be disturbed without very, very careful study because we would not know just exactly what we were doing, particularly if we draft such amendments as these on the floor.

Another point is that the offenses in subsection (b) are different from the offenses in subsection (a), and it might very well be inadvisable to have those offenses applied in time of peace.

Mr. WALTER. Madam Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Pennsylvania.

Mr. WALTER. I want to point out that if this amendment is adopted a person could be punished by death for furnishing information to Canada or to some friendly nation.

Mr. HYDE. That is the point I was about to make. Under the gentleman's amendment if a person attempted to furnish information to an ally during war the person who did so would be subject to the death penalty. Certainly the gentleman did not intend to do that.

Mr. BENNETT of Florida. Madam Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Florida.

Mr. BENNETT of Florida. The error that the gentleman apparently finds in this language of my amendment does not exist. As a matter of fact, every word in the amendment I have suggested is lifted in haec verba, word for word, from subsection (a). There is not a single word left out of the amendment I have offered.

Mr. HYDE. The gentleman left out some very important language in subsection (a). He does not even say where it is going to be used to the advantage of a foreign nation in time of war; he does not say to the injury of the United States.

Mr. BENNETT of Florida. I disagree with the gentleman. He did not listen to the amendment.

Mr. HYDE. I have the gentleman's amendment before me and it does not include those words.

Madam Chairman, in view of the language of the amendment, the fact that it goes into a substantive change, which has not been carefully considered, and in view of the fact that it might possibly do things which this House certainly would not want to do, I earnestly urge that the amendment be defeated.

Mr. BENNETT of Florida. Madam Chairman, I ask unanimous consent to proceed for 2 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BENNETT of Florida. Madam Chairman, I think the Members realize the situation I am in. I introduced legislation similar to this on the first day of my tenure in Congress, in January of 1949, and I am very much interested in such legislation. It is unfair to Members of Congress to give such inadequate and brief consideration to such important legislation.

The gentleman from Maryland who has raised these objections to my amendment should bear in mind that my amendment was taken word for word from section (a). There is not a word in my amendment which is not copied from section (a). You have this rather anomalous situation, this impossible situation, of having lesser crimes as defined in subsection (a) getting a heavier penalty, because, as the gentleman from Pennsylvania said, you can get the death penalty for peacetime acts under section (a); but under section (b), where worse crimes are listed, lesser punishment is given if the acts are committed in peacetime. In fact no penalty at all is given these worse crimes if committed in peacetime.

Mr. McCORMACK. Madam Chairman, will the gentleman yield?

Mr. BENNETT of Florida. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. It seems to me, without passing upon the merits of the gentleman's amendment, that the argument advanced by the gentleman from Maryland is certainly met by the gentleman's amendment because it says "with intent" or "reason to believe." That shows there has to be intent. And it has to be used to the injury of the United States. Certainly, if you gave information to Canada and there was no intent involved, Canada being a friendly nation, or reason to believe it would not be to the injury of the United States, the argument of the gentleman from Maryland would fall to the ground.

Mr. WALTER. Madam Chairman, if the gentleman will yield, it is not only injury to the United States, but to the benefit of another nation. The gentleman has not read the statute.

Mr. McCORMACK. I would not say I have not read the statute and I would not say the gentleman has not read it.

Mr. BENNETT of Florida. If the argument against this amendment is good, then subsection (a) is not any good, for it uses the identical words objected to.

Mr. McCORMACK. Madam Chairman, I move to strike out the last word.

I would like to ask the gentleman from Florida a question.

Section (b) provides "whoever in time of war" and so forth. Now, we will take the Korean conflict. Is that a war? Suppose somebody gave valuable information about the movement of troops. Suppose we get involved in Indochina. Now, they do not call that a war, but nevertheless it seems to me that giving information about the movement of troops under those circumstances should be made a crime where it is to the injury of the United States.

Mr. BENNETT of Florida. I certainly agree with the gentleman.

Mr. McCORMACK. Paragraph (b) certainly covers offenses that are more serious to the United States in some respects than paragraph (a) does.

Mr. BENNETT of Florida. The gentleman is correct.

Mr. McCORMACK. Yet, paragraph (a) applies where there is no war on. It may be an emergency, but it is not a war, and yet paragraph (b) is confined to time of war. Suppose somebody gave information about the movement of troops, a division going across to Korea, leaving San Francisco, during the Korean conflict or now, any movement of troops now, or the movement of naval vessels.

Mr. BENNETT of Florida. Or the construction of atomic submarines.

Mr. McCORMACK. Nothing could be done; no prosecution could be made under paragraph (b).

Mr. BENNETT of Florida. That is correct.

Mr. McCORMACK. Yet it might be just as injurious to our country as if it was made in time of actual war.

Mr. BENNETT of Florida. In fact, it is generally more injurious.

Mr. McCORMACK. Now, we have a gap here. It is all right to talk about peace and war, but there is a twilight zone, and we are in that twilight zone now.

Mr. JUDD. Madam Chairman, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Minnesota.

Mr. JUDD. I do not even like the language in section 204 (a). Under the Mutual Security Act, we are giving blueprints of tanks and planes to our allies, which is to our advantage, and they are foreign nations. This says that whoever with intent and reason to believe that it is to be used to the injury of the United States and to the advantage of a foreign nation, and I think that is all right, but this would make it impossible to carry on our mutual security program, because these things, while they do not injure the United States, they are to the advantage of a foreign nation. I do not see how we can do it under the language here.

Mr. HYDE. And the language has been well defined by the United States Supreme Court so as not to give rise to the danger the gentleman raises.

Mr. McCORMACK. What about the movement of troops during the Korean conflict or the movement of troops now if any were carried out, say, to southeast Asia? Would that come under paragraph (b), where the information would be to the injury of the United States?

Mr. HYDE. It would not have to because he would be prosecuted under paragraph (a), line 1, page 10. If he gave information relating to the national defense, he would be prosecuted under paragraph (a). But paragraph (b) is made to apply only in time of war. I suggest the gentleman look at the language there, where it says, "with intent that the same shall be communicated to the enemy, collects, records, publishes, or communicates, or attempts to elicit any information with respect to the movement, numbers, description, condition, or disposition of any of the armed forces, ships, aircraft, or war materials of the United States," and so forth.

If in peacetime somebody asks a soldier what outfit he is in and where it is or that sort of thing, I am sure the gentleman would not want that person under those circumstances to be subject to prosecution. But if that were done in time of war, that would be a different matter.

Mr. McCORMACK. If the gentleman says that the language on page 10 covers the situation, why does he need paragraph (b)? Paragraph (b) must have a specific purpose. I do not think that "information relating to the national defense" covers the situation provided for in paragraph (b), which refers to specific acts. I do not think you can provide that something is a crime under a general, vague characterization. There is a need for paragraph (a). But it seems to me there is considerable merit to the amendment offered by the gentleman from Florida [Mr. BENNETT] because in the world of today, we may be engaged in a conflict that is not called a war.

Mr. HYDE. The gentleman may be correct. There may be considerable merit in the gentleman's amendment. These two paragraphs, as far as the substantive part of them is concerned, are under serious study now by the Department of Justice and by the counsel for this committee. But we were not ready to go into such serious substantive changes at this time.

Mr. McCORMACK. The gentleman's answer is a very frank one, as he admits that there is a question involved.

Mr. FORRESTER. Madam Chairman, I move to strike out the last word.

I wish particularly to direct the attention of the members of the Committee on the Judiciary to what I am going to say and, of course, at the same time I would ask every Member on the Floor of the House here to listen to the comments I am about to make.

First I want to assure everyone here that I certainly am in favor of punishing people who are guilty of espionage or doing anything that would tend to undermine the security of this country. However, I have noticed with some degree of worry the provisions here relating to conspiracy. Here is the language that is used. I am referring now to page 10, paragraph (c):

> If two or more persons conspire to violate this section, and one or more of such persons do any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be subject to the punishment provided for the offense which is the object of such conspiracy.

If I construe that language correctly, if I understand the English language correctly, I am afraid that that provision is in direct contrast to our laws on conspiracy. What is said here, as I see it, is that if two or more conspire, that then, after they have conspired, if even one of those conspirators commits that act, then all of the persons who joined in the conspiracy in the first instance are guilty.

Mr. GRAHAM. Madam Chairman, will the gentleman yield?

Mr. FORRESTER. I yield.

Mr. GRAHAM. That is the law now. If one man joints in a conspiracy with others and that one man commits an overt act, they are held guilty of the conspiracy. That is the law now.

Mr. FORRESTER. I had understood that probably this was the language that had been used heretofore. But now I am addressing myself to the Members of this body, all of you, and I pose this question: Suppose two other persons and I entered into a conspiracy to violate one of these laws. The other two came to me and said, "FORRESTER, we are abandoning this conspiracy; we are recanting. We are not going any further, and we hope you will not do it." Nevertheless, FORRESTER goes ahead and does that act. Under this law as I read it the three of us are equally guilty. Is that correct?

Mr. WALTER. Madam Chairman, will the gentleman yield?

Mr. FORRESTER. I yield to the gentleman from Pennsylvania.

Mr. WALTER. The gentleman is not correct. Further, the fact that 2 people enter into a conspiracy and 1 decides not to go through with it certainly would not make it necessary to impose any punishment. The conspirators are merely subject to punishment. The gentleman with all of his years of experience as a prosecutor knows how many times he has gone to the court and explained that a criminal has been quite helpful and suggested that perhaps the case ought to be nolle prossed.

Mr. FORRESTER. If that is the angle the gentleman is proceeding on, that is dependent on whether the prosecuting attorney wants to make that statement or not. What I am saying is, Do we want to make it a crime under those circumstances, if he has fully repented and has fully recanted?

Mr. WALTER. The only way you can get at the crime of conspiracy is through this language, which has been law for years. It certainly does not make it necessary that there be any punishment imposed.

Mr. FORRESTER. I take it that I have it cleared up, that is, the question that I asked I think I have had answered. It is that under this law now, in everyone of these laws relating to conspiracy, if a man ever joins in one of these conspiracies, even though he recants, withdraws, and completely repents, and refuses to have anything to do with the act, he is indictable as one of the conspirators.

Mr. EBERHARTER. Madam Chairman, I move to strike out the last word.

Madam Chairman, it is rather late in the day. Of course, everybody on the floor has heard the shouts of "Vote, vote." I take it the shouts of "Vote, vote," are not so much because the Members are desirous of getting home and quitting for the day, although it is 13 minutes after 6; I think it is the general dissatisfaction of the Members here on the floor with the way this legislation has been drawn and with the apparent disagreement between members of the committee who are attempting to defend it. The Members kind of feel they do not have a good cause.

I heard the gentleman from Maryland state that this section and other language is under very extensive consideration and study right now. Of course, gentlemen can get from that, if I heard correctly, that the committee itself is not satisfied as to exactly what the language means.

As I read the language, if the Members will pardon me for making a statement as to that, whenever you use the word "or" certainly you are speaking in the alternative. If you are speaking in the alternative, then take the language on page 9, under section (a).

Mr. WALTER. Madam Chairman, will the gentleman yield?

Mr. EBERHARTER. Just a minute. Let me finish my statement.

Mr. WALTER. The Supreme Court has answered the gentleman's argument.

Mr. EBERHARTER. Madam Chairman, I do not yield to the gentleman.

Madam Chairman, referring to page 9, line 7, if you strike out the words "to be used to the injury of the United States or," then the language would read:

> Whoever, with intent or reason to believe that it is to the advantage of a foreign nation—

Then omitting some of the language—

> to deliver or transmit a model shall be punished by death or by imprisonment for any term of years or for life.

There is no question in my mind, under a strict interpretation of the English language, that according to those words, if a person would transmit to any friendly nation a model—it does not say what kind of a model, maybe it would be a model of a toy or maybe it would be a model of a statuette of some kind, it does not say—therefore, I think it is reasonable to believe this legislation has not had sufficient study and that really we are traveling on rather dangerous ground. Certainly, whenever we come here with a bill containing language which it is admitted by one of the members of the Committee on the Judiciary is indefinite, I think the committee ought to hesitate a long time. We are imposing penalties here which are very severe, and it is very late in the afternoon. I think the wisest action that the leadership could take would be to put this matter over until the committee members themselves can agree on what the language actually means.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. BENNETT].

The question was taken; and on a division (demanded by Mr. BENNETT of Florida), there were—ayes 36, noes 81.

So the amendment was rejected.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Iowa is recognized for 5 minutes.

Mr. GROSS. Madam Chairman, I yield back 3½ minutes of my time.

Madam Chairman, I have obtained this time in order to ask the committee whether under any language in this bill or the amendments pertaining thereto, there is any obligation for carrying out the provisions consistent with the charter of the United Nations. Will someone give me an answer to that—whether you are making this act dependent in anyway upon the charter of the United Nations?

Mr. GRAHAM. My answer to that would be an emphatic no.

Mr. GROSS. I thank the gentleman. You will remember that we had the foreign giveaway bill before us last week and the first 6 or 7 pages carried language stating that the provisions of that act must be consistent with the charter of the United Nations. I compliment this committee for bringing one bill to the House of Representatives dealing with foreigners, and treaties and agreements with foreign governments, that does not have to be carried out in conformance with the charter of the United Nations.

Mr. BROOKS of Louisiana. Madam Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

COMMUNISM

Mr. BROOKS of Louisiana. Madam Chairman, I am supporting H. R. 9580. It is not the ideal bill, in my opinion. It does, however, tighten up some of the loopholes which in the past Communists have used in escaping punishment, and it gives more adequate protection to our Defense Establishment.

In Louisiana I am glad to say that the legislature has recently acted to outlaw communism. I have not had an opportunity of studying this law which passed the legislature in Baton Rouge in the last few days; but I am sure it will constitute a most effective measure in our

fight to stamp out this alien philosophy which for so many years has kept our people agitated and has threatened our free institutions. The important thing is that in Louisiana, the people through its legislature, are thoroughly alert to this serious menace and are acting on their own accord and through State agencies to curb and stamp out communism. I certainly commend the legislature for its action in meeting this problem on a State level and directing State agencies to join the United States in its fight against this ugly doctrine of totalitarianism.

Madam Chairman, of course, our uniform code of justice on which I spent many months of work should likewise be tightened in respect to the punishment for espionage. I have drawn up a bill which I have placed in the hopper of the House of Representatives for this purpose and I trust it will soon be acted upon.

Mr. O'HARA of Illinois. Madam Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Under the rule, the committee rises.

Mr. O'HARA of Illinois. Madam Chairman, in supporting this bill I am guided by the rule that always should prevail among the Members of the Congress of the United States. In time of war, of threatened war or of grave emergency measures regarded as vital to our security by those in closest familiarity with the existing circumstances and charged with responsibility for our protection must be supported.

At the present time we are engaged in a cold war. Sabotage and espionage in the kind of conflict in which we now find ourselves are as much to be met with strong defenses as the hostile maneuvering of enemy forces in a battle area during a hot war.

Moreover we are in the perilous years when new and terrible powers have been placed by the genius of scientific minds in human hands to use for man's advancement or to misuse for his destruction. As yet we have not reached with the other governments of the universe a mutually protective understanding, with valid and binding guaranties. Meanwhile there is forced upon us the exercise of every caution.

PRUDENT TO BE ALERT

It is not only that our plans, our blueprinting, and our secrets must be guarded from spying and unfriendly eyes. It also is prudent to be alert to the possibility of a brutal sabotage, the more horrifying in its possibilities because of the vastness of the opportunities.

Within recent years a bomb planted in a suitcase carried as baggage on a passenger plane caused the loss of the aircraft and many lives. In that instance there was no suggestion of sabotage with political motivation, but that one person seeking the murder of another could with such comparative ease cause the destruction in the air of a large aircraft and the death of many persons is an index to the dangers among which we live in this very perilous period. Not to take every precaution is to be foolhardy.

QUESTIONABLE DETERRENTS

Whether we strengthen our defense against criminal activities by increasing the severity of penalties I discussed at some length in my remarks yesterday on a bill then before us. It has not been the experience of mankind that severity of punishment has served as a deterrent of crime. The mind that has no respect for the laws of an organized society accepts as a greater challenge to daring and defiance the greater degree of retribution to be paid if crime is detected. I think most students of the subject, having reviewed the history of experiences in this and other countries, will agree that making penalties more severe has never operated to diminish the number of crimes.

Nor has capital punishment proved a deterrent of crime. Quite some years ago Clarence Darrow, the great defender, and I teamed up on a series of radio discussions exploring the futility of the death penalty as a deterrent, the possibility of the establishment of innocence after the execution of sentence, too late to rectify a human mistake, and the moral right of man as an integral part of an organized society to do that by the law of God forbidden him as an individual to do.

DIVISION OF OPINION

But these are questions upon which, among reasoning men, there is division of opinion. All are honestly seeking for the answer leading eventually to the prevention of crime. When an atrocious crime has been perpetrated, the immediate popular reaction is a cry for revenge, which may meet with just deserts, in an individual case, but may not serve the real objective of society, the prevention of similar or worse crimes in the future. When a national emergency exists, and immediate perils are being faced, the demand always has been and probably always will be for stern measures.

At the close of the war between North and South, among some in the North, was a demand for the execution of the leaders of the forces of the States of the Confederacy. We are a united country today, the scars of earlier years have been effaced, and the inspiration of great Americans on both sides of that conflict are part of the national heritage. This would not have been the case if in the climate of victory the spirit of revenge had taken over.

Following our war with Mexico we entered into a treaty of peace with the fallen enemy country which merits reading and rereading by the present generation. It charted a path of peace which, during the intervening years, has led the two neighboring Republics to the land of understanding and of friendly cooperation.

Our war with Spain terminated in a treaty of peace by the terms of which our country, forebearing to ask for itself the price of revenge, actually gave the helping hand to the fallen foe, aiding it to regain its feet.

WORLD RESPONSIBILITY

Today we have a world responsibility on a scale forced upon us by destiny. That the spirit of revenge has never motivated our actions, that in victory we never have sought to employ our strength over the vanquished to retaliate for past wrongs upon us, is the measure by which the peoples of the world properly may judge us and appraise the character of our future intentions.

At the moment we are in a cold war. In the Korean phase it was a war of suffering and sacrifice attended with the loss of many American youths far from the shores of our own United States and loved ones at home. The cold war continues in the present phase of evil propaganda seeking to misrepresent and to malign us among other peoples and at home to undermine us by dishonorable practices.

This bill is presented to us as legislation necessary in the existing circumstances. It is intended, as I take it, as a cold-war measure. It cannot be judged by the measure of normal times.

Certainly as applicable to normal times, when again we will be at peace with all the other nations of the world, I would regard as inconsistent with our pledge of friendship to their governments and unfairly reflective upon the loyalty of our own people the provision in this bill making a capital offense of the crime of peacetime sabotage and espionage.

STATUTE OF LIMITATIONS

The effect of this provision is to remove from the running of the statute of limitations all offenses which actually may be those of sabotage or espionage or by purposeful design may be stretched to that appearance. After many years have passed the ability of the accused to establish his innocence is destroyed by the death of witnesses and the disappearance of competent evidence. This is the reason, founded in good judgment, for the statute of limitations.

Madam Chairman, I think I am expressing not only my own thought but that of many other Members, very probably the majority of Members, that the bill for which we are voting today is for the period only of the existing emergency, be it the continuance of the cold war or something worse or something only slightly better, and upon the termination of that emergency the subject should be reexamined when perils are gone and nerves are quiet.

Accordingly the Committee rose; and Mr. HALLECK, having assumed the chair as Speaker pro tempore, Mrs. ST. GEORGE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H. R. 9580), to revise and extend the laws relating to espionage and sabotage, and for other purposes, pursuant to House Resolution 619, she reported the bill back to the House with sundry amendments adopted in Committee of the Whole.

The SPEAKER pro tempore (Mr. HALLECK). Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put the en gross.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. JACKSON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

Mr. WALTER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WALTER. I understand there was an agreement reached with respect to a rollcall vote. I am wondering whether it would be possible to defer the rollcall until tomorrow.

The SPEAKER pro tempore. The Chair knows of no such understanding.

The Clerk will call the roll.

The question was taken; and there were—yeas 324, nays 0, answered "present" 0, not voting 110, as follows:

[Roll No. 100]

YEAS—324

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Ellsworth with Mr. Bonner.
Mr. Short with Mr. Roberts.
Mr. Scott with Mr. Chatham.
Mr. Bonin with Mr. Lucas.
Mr. Kersten of Wisconsin with Mr. Wilson of Texas.
Mr. Hillings with Mr. Willis.
Mr. Hinshaw with Mr. Lanham.
Mr. Taylor with Mr. Perkins.
Mr. McGregor with Mr. Preston.
Mr. Berry with Mrs. Sullivan.
Mr. Harvey with Mr. Bowler.
Mr. Morano with Mrs. Kee.
Mr. Allen of Illinois with Mr. Metcalf.
Mr. Sadlak with Mr. Carnahan.
Mr. Angell with Mr. Fallon.
Mr. Norblad with Mr. Fine.
Mr. Curtis of Nebraska with Mr. Keogh.
Mr. Cotton with Mr. Klein.
Mr. Patterson with Mr. Roosevelt.
Mr. Radwan with Mrs. Kelly of New York.
Mr. Wharton with Mr. Dollinger.
Mr. Shafer with Mr. Regan.
Mr. Busbey with Mr. Sikes.
Mr. Coon with Mr. Lantaff.
Mr. Harrison of Wyoming with Mr. Harrison of Virginia.
Mr. Bow with Mr. Camp.
Mr. James with Mr. Wheeler.
Mr. Knox with Mr. Landrum.
Mr. Bentley with Mr. Moulder.
Mr. Clardy with Mr. Shuford.
Mr. Cretella with Mr. Frazier.
Mr. Mason with Mr. Fisher.
Mr. Hoffman of Michigan with Mr. Thompson of Louisiana.
Mr. Hunter with Mr. Passman.
Mr. Johnson of California with Mr. Long.
Mr. Small with Mr. Heller.
Mr. Wampler with Mr. Buckley.
Mr. Bishop with Mr. Kelley of Pennsylvania.
Mr. O'Hara of Minnesota with Mr. Barden.
Mr. Weichel with Mr. Machrowicz.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROGRAM FOR NEXT WEEK

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ARENDS. Mr. Speaker, I take this time in order to announce the program for next week.

Beginning on Monday, and for the balance of the week, the following bills will be before us for consideration:

H. R. 9144, Federal Reserve Act, loans by Small Business Administration.

S. 1276, to amend the Bankhead-Jones Farm Tenant Act.

S. 2987, to transfer hay and pasture seeds from Commodity Credit Corporation.

Senate Concurrent Resolution 79, to continue Texas City Tin Smelter.

If rules are granted, the following will be considered:

H. R. 8386, conservation of water resources.

We expect various bills from the Committee on the Judiciary dealing with control of Communists.

S. 3539, reenlistment bonuses, from the Committee on Armed Services.

S. 3458, the so-called tanker bill.

H. R. 9689, having to do with Assistant Secretaries of Defense.

H. R. 8356, reinsurance bill from the Committee on Interstate and Foreign Commerce. It is the hope of the leadership that this bill will be reported out on tomorrow.

Conference reports may be brought up at any time and any further program will be announced at a later date.

It is hoped that we can take up on Monday as the No. 1 bill Senate Concurrent Resolution 79, the tin smelter bill, which I mentioned just a moment ago.

COMMITTEE ON INSULAR AFFAIRS

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that the Committee on Insular Affairs may have until midnight Saturday night to file a conference report on Senate bill 3378.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce have until midnight tonight to file a report on H. R. 8356, if reported.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE ON POST OFFICE AND CIVIL SERVICE

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service have until midnight Saturday to file a report on H. R. 9836, if that bill is reported.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE ON BANKING AND CURRENCY

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency have until midnight Saturday night to file a conference report and statement on the bill (H. R. 7839) to aid in the provision and improvement of housing, the elimination and prevention of slums, and the conservation and development of urban communities.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ADJOURNMENT UNTIL MONDAY NEXT

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

CALENDAR WEDNESDAY BUSINESS

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday next be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

SPECIAL ORDER VACATED

Mr. JAVITS asked and was given permission to vacate the special order granted him for today.

OPPOSITION TO THE COMMUNIST CHINESE REGIME'S ADMISSION TO UNITED NATIONS

Mr. JAVITS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JAVITS. Mr. Speaker, our country's unalterable opposition to the admission of the Communist Chinese regime to membership in the United Nations is well nigh universally the conviction of Americans. It would be dangerous for the other free peoples to think otherwise. The Communist Chinese regime is a convicted aggressor in Korea, convicted by the United Nations itself, and continues to this day to proclaim defiance to the U. N. peace efforts there. The Communist Chinese regime is also preventing the free will of the people of Indochina as to the form of their independence and of their future government to be expressed by aiding and abetting Communist aggression and subversion there. In addition, the Communist Chinese regime is guilty of terror and persecution of foreigners, and the holding of prisoners, military and civil, without disclosure, violating the civilized practices between nations. The Communist Chinese regime is also enslaving and terrorizing the Chinese people and not permitting them to exercise the right of self-determination. Our Government must use all its powers as a member of the U. N. and as the acknowledged leader of the free world against the admission of the Communist Chinese regime to the United Nations.

It would be hollow mockery to number the Communist Chinese regime among the other peace-loving states or to assume that the Communist Chinese regime will in good faith accept the obligations contained in the present charter and be able and willing to carry out these obligations as called for by article 4 of chapter 2 of the charter of the United Nations.

I do not believe, however, that the way to keep the Communist Chinese regime out of the United Nations is to threaten to withdraw from U. N. membership or active participation if the Communist Chinese regime be admitted to the U. N. over our objection and possible veto.

This, too, we need neither threaten nor promise relying rather on the moral convictions of the other free peoples who are the overwhelming majority on the Security Council.

The Soviet Union has vetoed the admission of 14 nations to U. N. membership: Austria, Finland, Ireland, Italy, Jordan, Republic of Korea, Nepal, Portugal, Cambodia, Japan, Libya, Vietnam, Laos, and Ceylon.

Five of the Communist satellites have been denied membership for failure to receive the necessary seven votes of the Security Council: Albania, Bulgaria, Hungary, Rumania, and Mongolian Peoples Republic.

The United States has resolutely refused any deals to trade membership of one group for the other as immoral.

I realize that the United Kingdom is rumored now to be favorable to Communist Chinese regime's admission to the U. N. As one devoted to free world cooperation and world leadership of our country I would appeal to the Government and people of Great Britain to respect in this instance the deep convictions of the Government and people of the United States that to admit the Communist Chinese regime to the U. N. would be immoral, gravely dangerous to the U. N.'s objectives, and an invitation to appeasement, and therefore, to world war III. I hope the British Government and people will now join us in keeping the Communist Chinese regime out of the U. N. The reasons against threatening to withdraw from the U. N. are:

First. We would be assuming a defeat in the U. N. we have no right to assume. We would be doubting that the moral convictions of the free world are equivalent to our own.

Second. We would be conceding in advance our willingness to break up the chosen instrument of the free world for world peace, in which the free world has had marked success, and which has in the overwhelming majority of cases, unless inhibited by Soviet vetoes, overwhelmingly repudiated the Communist world and its ideas.

Third. The physical location of the United Nations and the indissoluble legal bonds of membership both of which it is to our great interest to maintain dictate against an advance commitment to withdraw we may later deeply regret. An advance commitment which will have lost its force from having been uttered too soon and used as a threat thereby writing down an action that would be so epochal.

National unity in our opposition to the Communist Chinese regime's admission to the U. N., the national security and the national interest can all best be attained without the added threat of withdrawal from the U. N.

PERSONAL ANNOUNCEMENT

Mr. DORN of New York. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DORN of New York. Mr. Speaker, I was unavoidably absent during the vote today on the vocational rehabilitation bill, H. R. 9640. If I had been present I would have voted "yea." I was actually with the Secretary of the Navy asking him to award the contract for the CVA–62, a new carrier, to the New York Naval Shipyard.

LEAVES OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. WHEELER (at the request of Mr. FORRESTER) for 10 days on account of urgent business.

Mr. ROONEY for Monday, July 12, 1954, on account of official business in Brooklyn, N. Y.

Mr. TRIMBLE for Friday, July 9, and Saturday, July 10, on account of death in family.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 20 minutes on Monday, following the legislative program of the day and special orders heretofore granted.

VETERANS' LEGISLATION

The SPEAKER pro tempore (Mr. HALLECK). Under previous order of the House, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 20 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, at a meeting of the Committee on Veterans' Affairs this morning, I was directed by unanimous consent to bring to your attention this letter written to Hon. LEO E. ALLEN, chairman of the Committee on Rules of the House:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, D. C., July 8, 1954.

Hon. LEO E. ALLEN,
Chairman, Committee on Rules,
House of Representatives,
Washington, D. C.

DEAR MR. CHAIRMAN: In a meeting of the Committee on Veterans' Affairs this morning I was directed by a unanimous vote to bring to your attention again the situation involving the bill H. R. 9020, which seeks to provide, as you know, an increase in the rates of compensation and pension available to veterans and their dependents.

Originally I wrote you on June 2 enclosing a copy of the bill and report and asking for a hearing before the Committee on Rules. Upon learning that this letter had not reached you, I drafted a second letter on June 7, again requesting that we be given an opportunity to appear before your committee in connection with the granting of the rule. To date I have not received any acknowledgment from either of these letters.

The bill, H. R. 9020, represents the careful consideration of the Subcommittee on Compensation and Pensions, headed by the Honorable EDMUND P. RADWAN, and the review of the subcommittee's actions by the full committee. Hearings were held on over 70 bills in this general field prior to the introduction and consideration of H. R. 9020. After careful consideration by the full committee, the measure was reported unanimously on May 28, 1954, and since that time I have been endeavoring with every means at my command to obtain floor consideration of this proposal. The time has now come when action of one sort or another is imperative. We have legislated in this Congress for the benefit of foreign countries and we have been most liberal. Just a few weeks ago we passed a bill authorizing well over $3 billion in this field. We have passed a farm bill—the Social Security Act has been amended with more liberal benefits—the taxpayers have been given needed relief. But in the field of veterans' affairs, one of the most important measures, if not the most important measure in this Congress, is still prevented from being considered by the House.

I am advised that all the members of the Rules Committee save yourself and one other have indicated their willingness to report a rule granting consideration of this bill, and if you will schedule a meeting on H. R. 9020, I am sure that prompt action will result.

It should be pointed out that appropriations for the Veterans' Administration have been decreasing steadily over the last few fiscal years, and that the current appropriation of $3,796,000,000 is the lowest since the fiscal year 1945. The current appropriation is nearly $400 million less than in the 1954 appropriation. The overall first-year cost of H. R. 9020 is set at $231 million and I believe you will agree with, in view of the number of individuals affected, that this is a most reasonable figure.

The author of the bill, the Honorable EDMUND P. RADWAN, has introduced House Resolution 612, calling for the consideration of the bill, H. R. 9020, and this action was taken only when he and other members of the Committee on Veterans' Affairs became discouraged at the progress we were making before your committee. They cannot understand the lack of consideration given this measure.

The veterans of America have fought in numerous wars to see that the United States remained free. We owe much, if not all, of what we now enjoy to those who have participated in these wars. It is certainly a commentary on our times that we should have so much difficulty in obtaining a small increase in the rates of compensation for those who bore the brunt of battle and for their widows and children.

I am therefore appealing to you again that you permit this bill, H. R. 9020, to receive the immediate attention of your committee and that a rule be granted so that the House may have an opportunity at the earliest possible time—and preferably during the week of July 12—to vote on this vital measure. I am sure you will find that there will be few, if any, votes against the proposal.

Mr. SELDEN. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield.

Mr. SELDEN. Mr. Speaker, I commend the chairman of the Committee on Veterans' Affairs for her efforts to have the bill, H. R. 9020, brought before the House for consideration. This measure was reported unanimously by the Committee on Veterans' Affairs of which I am a member. I join with our chairman in urging the Committee on Rules to grant a rule for the consideration of H. R. 9020 without further delay. We all realize that early action on this bill is absolutely necessary if this measure is to be considered by both the House and Senate before adjournment.

Mrs. ROGERS of Massachusetts. The gentleman has been a very fine, cooperative member.

It is interesting, and it is the only committee I have ever known where the membership being divided equally between Republicans and Democrats does not consider matters coming before it in a partisan way; we act as a unit.

Mr. JOHNSON of Wisconsin. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield to the gentleman from Wisconsin, also a very cooperative member.

Mr. JOHNSON of Wisconsin. I wish to be associated with our chairman, the gentlewoman from Massachusetts [Mrs. ROGERS], in an effort to try to have the Rules Committee report and act on H. R. 9020 so that the House and Senate can have an opportunity to act on it before Congress adjourns.

I wish to state further that if the Committee on Rules does not act on it in sufficient time to let it be considered, then it will be the leadership of the House which will be responsible for its failure to pass.

May I also state that the Committee on Veterans' Affairs of which I am a member—by the way, the youngest member, I believe, on the committee—voted unanimously for the passage of this bill something over a month ago.

Mrs. ROGERS of Massachusetts. That is correct; and the two members from Wisconsin and Alabama have attended every session of the committee.

I would like to state again the cooperation the members of the committee have shown in their anxiety to be helpful.

Mr. Speaker, may I remind you that courage, bravery, and likewise suffering, are not confined to the veterans of any one State; the whole country has given and given and given, and suffered and suffered. We have had legislation, for instance, with the peanut people on one side and the candy bar people from my own State of Massachusetts on the other side; there was controversy in oil and other things. But in this there is unity. We owe it to all the people of the country that there be no division on party lines.

I see the gentleman from Alabama [Mr. ELLIOTT] sitting there. He has contributed a great deal during this and other sessions of Congress.

Mr. ROONEY. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I shall be very glad to yield.

Mr. ROONEY. Mr. Speaker, while I am not sure I can agree with the gentlewoman on the peanuts proposition, yet I do want to take this opportunity to congratulate her once again as chairman of the great Committee on Veterans' Affairs for her marvelous work on behalf of the veterans.

Mrs. ROGERS of Massachusetts. It is the members of our committee to whom the veterans are indebted.

Mr. ROONEY. But it is under the inspired leadership of the gentlewoman from Massachusetts that the attention to which he is entitled has been given to the veteran.

Mrs. ROGERS of Massachusetts. The chairman is extremely grateful.

Mr. ELLIOTT. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I shall be very happy to yield to the gentleman.

Mr. ELLIOTT. Having served for 3 years on the Committee on Veterans' Affairs, Mr. Speaker, let me say that I think there is nobody in this entire country who has done more or carried the cause of the veteran closer to his or her heart than has the gentlewoman from Massachusetts [Mrs. ROGERS].

I think her cause is just in this regard and I trust that the Committee on Rules will grant a rule at an early date.

If it does not and I get the opportunity to do so, I am going to sign the first discharge petition I have signed during this session of Congress, a petition which I trust will bring that bill before this House.

Mrs. ROGERS of Massachusetts. I doubt very much that it will be necessary to file a petition, but I feel very sure that the gentleman from New York [Mr. RADWAN], would secure the necessary number of names on his petition. The membership are not fighting for themselves, they are fighting to do some measure of justice and consideration to the veterans. This being so it is hard to understand why there should be this opposition.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. NATCHER and to include extraneous matter.

Mr. FORAND, the remarks he might make today and to include tables and statements.

Mr. ZABLOCKI and include extraneous matter.

Mr. CURTIS of Missouri and to include in the remarks he made today extraneous matter.

Mr. WICKERSHAM and to include extraneous matter.

Mr. REECE of Tennessee.

ENROLLED BILLS SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 6412. An act to preserve the eligibility of certain veterans to dental outpatient care and dental appliances;

H. R. 6893. An act to credit the Shoshone Irrigation District with a share of the net revenues from the Shoshone powerplant, and for other purposes;

H. R. 9008. An act to provide for the deposit of savings of enlisted members of the Army, Navy, Air Force, and Marine Corps, and for other purposes; and

H. R. 9232. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, to extend until June 30, 1955, the period during which disposals of surplus property may be made by negotiation.

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 268. An act for the relief of Harold Trevor Colbourn;

S. 381. An act for the relief of Donald Grant;

S. 455. An act for the relief of Johan Gerhard Faber, Dagmar Anna Faber, Hilke Faber, and Frauke Faber;

S. 490. An act for the relief of Josephine Reigl;

S. 520. An act for the relief of Mr. and Mrs. Ivan S. Aylesworth;

S. 579. An act for the relief of Wong You Henn;

S. 676. An act for the relief of Eftychios Mourginakis;

S. 747. An act for the relief of Jacek Von Henneberg;

S. 1050. An act for the relief of Josephine Maria Riss Fang;

S. 1382. An act for the relief of Elie Joseph Hakim and family;

S. 1508. An act for the relief of Borivoje Vulich;

S. 1517. An act for the relief of Helen Knight Waters and Arnold Elzey Waters, Jr.;

S. 1689. An act for the relief of Mrs. Cacila Gotthardt Gange;

S. 1796. An act to incorporate the Board for Fundamental Education;

S. 1991. An act for the relief of Esperanza Trejo;

S. 1999. An act to provide for the recovery, care, and disposition of the remains of members of the uniformed services and certain other personnel, and for other purposes;

S. 2198. An act for the relief of (Sister) Jane Stanislaus Riederer;

S. 2369. An act for the relief of Karl Ullstein;

S. 2370. An act to authorize the sale of certain vessels to Brazil for use in the coastwise trade of Brazil;

S. 2465. An act for the relief of Lydia Wickenfeld Butz;

S. 2468. An act to authorize the President to appoint to the grade of general in the Army of the United States those officers who, in grade of lieutenant general, during World War II commanded the Army Ground Forces, commanded an Army, commanded Army forces which included a field army and supporting units, or commanded United States forces in China and served as chief of staff to Generalissimo Chiang Kai-shek in the China Theater of Operations, and for other purposes;

S. 2488. An act to provide that each grant of exchange assignment on tribal lands on the Cheyenne River Sioux Reservation and the Standing Rock Sioux Reservation shall have the same force and effect as a trust patent, and for other purposes;

S. 2728. An act to authorize the collection of indebtedness of military and civilian personnel resulting from erroneous payments, and for other purposes;

S. 3196. An act for the relief of Dr. Helen Maria Roberts (Helen Maria Rebalska);

S. 3291. An act authorizing the President to present a gold medal to Irving Berlin;

S. 3336. An act to promote the apportionment of the waters of the Columbia River and tributaries for irrigation and other purposes by including the States of Nevada and Utah among the States authorized to negotiate a compact providing for such apportionment; and

S. J. Res. 165. Joint resolution to provide for construction by the Secretary of the Interior of the Glendo unit, Wyoming, Missouri River Basin project.

BILLS PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and joint resolutions of the House of the following titles:

H. R. 222. An act to suspend for 2 years the duty on crude bauxite and on certain calcined bauxite and to remit the duty on certain bells to be imported for addition to the carillon of The Citadel, Charleston, S. C.;

H. R. 1948. An act for the relief of Mrs. Fung Hwa Liu Lee;

H. R. 2404. An act for the relief of Tibor Horanyi;

H. R. 2406. An act for the relief of Andor Gellert;

H. R. 2427. An act for the relief of Annie Litke;

H. R. 2683. An act to amend section 12 of the Alaska Public Works Act, approved August 24, 1949 (63 Stat. 629);

H. R. 2875. An act for the relief of Dr. James K-Thong Yu;

H. R. 2907. An act for the relief of Elizabeth Just Mayer;

H. R. 3191. An act conferring jurisdiction on the United States District Court for the Northern District of California to hear, determine, and render judgment upon certain claims of the State of California;

H. R. 3903. An act for the relief of Sister Iolanda Sita, Sister Guerrina Brioli, Sister Pasqualina Coppari, Sister Anna Urbinati, Sister Ida Raschi, and Sister Elvira P. Mencarelli;

H. R. 4510. An act for the relief of Mrs. Helen Kon;

H. R. 4747. An act for the relief of Gio Batta Podesta;

H. R. 5265. An act for the relief of Margarete Hohmann Springer;

H. R. 5355. An act for the relief of Eva Gyori;

H. R. 5620. An act to remove clouds on the titles of certain lands in Colorado;

H. R. 5684. An act for the relief of Walter Kuznicki;

H. R. 5820. An act for the relief of Michael K. Kaprielyan;

H. R. 5842. An act for the relief of Viktor R. Kandlin;

H. R. 6412. An act to preserve the eligibility of certain veterans to dental outpatient care and dental appliances;

H. R. 6478. An act for the relief of Nick Joseph Beni, Jr.;

H. R. 6636. An act for the relief of Gregory Harry Bezenar;

H. R. 6893. An act to credit the Shoshone Irrigation District with a share of the net revenues from the Shoshone powerplant, and for other purposes;

H. R. 7146. An act authorizing the Secretary of the Interior to issue a patent in fee to John McMeel No. 1;

H. R. 7371. An act to provide for the disposal of paid postal-savings certificates;

H. R. 7913. An act to convey by quitclaim deed certain land to the State of Texas;

H. R. 8538. An act to provide for the revocation or denial of merchant marine documents to persons involved in certain narcotics violations;

H. R. 9008. An act to provide for the deposit of savings of enlisted members of the Army, Navy, Air Force, and Marine Corps, and for other purposes;

H. R. 9232. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, to extend until June 30, 1955, the period during which disposals of surplus property may be made by negotiation;

H. R. 9340. An act to provide for the conveyance of the federally owned lands which are situated within Camp Blanding Military Reservation, Fla., to the Armory Board, State of Florida, in order to consolidate ownership and perpetuate the availability of Camp Blanding for military training and use;

H. J. Res. 256. Joint resolution to permit articles imported from foreign countries for the purpose of exhibition at the First International Instrument Congress and Exposition, Philadelphia, Pa., to be admitted without payment of tariff, and for other purposes;

H. J. Res. 537. Joint resolution to permit articles imported from foreign countries for the purpose of exhibition at the Washington State Fourth International Trade Fair, Seattle, Wash., to be admitted without payment of tariff, and for other purposes; and

H. J. Res. 545. Joint resolution to permit articles imported from foreign countries for the purpose of exhibition at the International Trade-Sample Fair, Dallas, Tex., to be admitted without payment of tariff, and for other purposes.

ADJOURNMENT

Mr. AREND. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 58 minutes p. m.) the House, pursuant to its previous order, adjourned until Monday, July 12, 1954, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1715. A communication from the President of the United States, transmitting proposed supplemental appropriations for the fiscal year 1955, in the amount of $39,425,000 for the Department of Health, Education, and Welfare (H. Doc. No. 471); to the Committee on Appropriations and ordered to be printed.

1716. A letter from the Administrator, Federal Civil Defense Administration, transmitting relative to an interstate civil defense compact entered into between the States of Idaho and Utah, pursuant to section 201 (g) of the Federal Civil Defense Act of 1950 (Public Law 928, 81st Cong.); to the Committee on Armed Services.

1717. A letter from the Assistant Secretary of the Interior, transmitting one copy each of certain bills passed by the Municipal Council of St. Croix, pursuant to section 16 of the Organic Act of the Virgin Islands of the United States, approved June 22, 1936; to the Committee on Interior and Insular Affairs.

1718. A letter from the Assistant Secretary of the Interior, transmitting a proposed award of a concession contract to Brinwood Ranch-Hotel, Inc., which will, when finally executed by the regional director, region No. 2, National Park Service, on behalf of the Government, authorize the company to operate a lodge and related facilities in Rocky Mountain National Park, Colo., for a period of 5 years from January 1, 1954, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1719. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 4 of the Displaced Persons Act of 1948, as amended; to the Committee on the Judiciary.

1720. A letter from the Acting Comptroller General of the United States, transmitting a report on the audit of Farm Credit Administration, of certain corporations supervised by it, and of the agricultural marketing revolving fund (administered by Farm Credit Administration) for the fiscal year ended June 30, 1953, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), the Accounting and Auditing Act of 1950 (31 U. S. C. 67), the Government Corporation Control Act (31 U. S. C. 841), and the Agricultural Marketing Act (12 U. S. C. 1141i) (H. Doc. No. 472); to the Committee on Government Operations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SHAFER: Committee on Armed Services. S. 3458. An act to authorize the long-term time charter of tankers by the Secretary of the Navy, and for other purposes; with amendment (Rept. No. 2092). Referred to the Committee of the Whole House on the State of the Union and ordered printed with illustrations.

Mr. JOHNSON of California: Committee on Armed Services. H. R. 6223. A bill to amend section 87 of the National Defense Act of June 3, 1916, as amended (32 U. S. C. 47), to relieve the States from pecuniary liability for property lost, damaged, or destroyed through unavoidable causes and to authorize the States to be relieved from accountability in any case except where it shall appear that the loss, damage, or destruction of the property was due to carelessness or negligence or could have been avoided by the exercise of reasonable care; with amendment (Rept. No. 2093). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Armed Services. H. R. 7734. A bill to amend section 47 of the National Defense Act to relieve State-operated educational institutions, under stated conditions, from giving bond for certain property issued by the United States for use by Reserve Officers' Training Corps units maintained at such institutions; with amendment (Rept. No. 2094). Referred to the Committee of the Whole House on the State of the Union.

Mrs. ROGERS of Massachusetts: Committee on Veterans Affairs. H. R. 9482. A bill authorizing the Administrator of Veterans' Affairs to convey certain property to the Armory Board, State of Utah; with amendment (Rept. No. 2095). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOFFMAN of Michigan: Committee on Government Operations. H. R. 179. A bill to amend section 7 of the Administrative Expenses Act of 1946, as amended; with amendment (Rept. No. 2096). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOFFMAN of Michigan: Committee on Government Operations. H. R. 8020. A bill authorizing the transfer of certain property of the United States Government (in Klamath Falls, Oreg.) to the State of Oregon; with amendment (Rept. No. 2097). Referred to the Committee of the Whole House on the State of the Union.

Mr. AREND: Committee on Armed Services. S. 3539. An act to further amend title II of the Career Compensation Act of 1949, as amended, to provide for the computation of reenlistment bonuses for members of the uniformed services; without amendment (Rept. No. 2098). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOPE: Committee on Agriculture. H. R. 9345. A bill granting the consent and approval of Congress to the southeastern interstate forest fire protection compact; without amendment (Rept. No. 2099). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOPE: Committee on Agriculture. S. 2367. An act to amend the act of June 29, 1935 (the Bankhead-Jones Act), as amended, to strengthen the conduct of research of the Department of Agriculture; without amendment (Rept. No. 2100). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOPE: Committee on Agriculture. S. 3487. An act to authorize the Central Bank for Cooperatives and the regional banks for cooperatives to issue consolidated debentures, and for other purposes; with amendment (Rept. No. 2101). Referred to the Committee of the Whole House on the State of the Union.

Mr. BISHOP: Joint Committee on the Disposition of Executive Papers. House Report No. 2102. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. BISHOP: Joint Committee on the Disposition of Executive Papers. House Report No. 2103. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. McCULLOCH: Committee on the Judiciary. H. R. 8658. A bill to amend title 18, United States Code, to provide for the punishment of persons who jump bail; without amendment (Rept. No. 2104). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. GRAHAM: Committee on the Judiciary. S. 95. An act for the relief of Mrs. Donka Kourteva Dikova (Dikoff) and her son Nicola Marin Dikoff; without amendment (Rept. No. 2041). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 98. An act for the relief of (Mrs.) Betty Thornton or Jozsefne Toth; without amendment (Rept. No. 2042). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 102. An act for the relief of Francesco Cracchiolo; without amendment (Rept. No. 2043). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 110. An act for the relief of Christopher F. Jako; without amendment (Rept. No. 2044). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 203. An act for the relief of Yvonne Linnea Colcord; without amendment (Rept. No. 2045). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 222. An act for the relief of Mrs. Dean S. Roberts (nee Braun); without amendment (Rept. No. 2046). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 246. An act for the relief of Gerrit Been; without amendment (Rept. No. 2047). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 267. An act for the relief of Pantelis Morfessis; without amendment (Rept. No. 2048). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 278. An act for the relief of Szyga (Saul) Morgenstern; without amendment (Rept. No. 2049). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 308. An act for the relief of Filolaos Tsolakis and his wife, Vassiliki Tsolakis; without amendment (Rept. No. 2050). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 496. An act for the relief of Dr. Samson Sol Flores and his wife, the former Cecilia T. Tolentino; without amendment (Rept. No. 2051). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 587. An act for the relief of Carlos Fortich, Jr.; without amendment (Rept. No. 2052). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 661. An act for the relief of Nino Sabino Di Michele; without amendment (Rept. No. 2053). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 790. An act for the relief of Irene J. Halkis; without amendment (Rept. No. 2054). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 794. An act for the relief of Paulus Youhanna Benjamen; without amendment (Rept. No. 2055). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 795. An act for the relief of Josef Radziwill; without amendment (Rept. No. 2056). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 830. An act for the relief of Samuel, Agnes, and Sonya Lieberman; without amendment (Rept. No. 2057). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 841. An act for the relief of Dionysio Antypas; without amendment (Rept. No. 2058). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 843. An act for the relief of Rabbi Eugene Feigelstock; without amendment (Rept. No. 2059). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 855. An act for the relief of Kirill Mihailovich Alexeev, Antonina Ivanovna Alexeev, and minor children, Victoria and Vladimir Alexeev; without amendment (Rept. No. 2060). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 891. An act for the relief of Albina Sicas; without amendment (Rept. No. 2061). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 912. An act for the relief of Bruno Ewald Paul and Margit Paul; without amendment (Rept. No. 2062). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 915. An act for the relief of Augusta Bleys (also known as Augustina Bleys); without amendment (Rept. No. 2063). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 917. An act for the relief of Stefan Burda, Anna Burda, and Nikolai Burda; without amendment (Rept. No. 2064). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 937. An act for the relief of Virginia Grande; without amendment (Rept. No. 2065). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 945. An act for the relief of Moshe Gips; without amendment (Rept. No. 2066). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 986. An act for the relief of Mrs. Ishi Washburn; without amendment (Rept. No. 2067). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1129. An act for the relief of Jozo Mandic; without amendment (Rept. No. 2068). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1225. An act for the relief of Brunhilde Walburga Golomb, Ralph Robert Golomb, and Patricia Ann Golomb; with amendment (Rept. No. 2069). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1267. An act for the relief of Irene Kramer and Otto Kramer; without amendment (Rept. No. 2070). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1313. An act for the relief of Olga Balabanov and Nicola Balabanov; without amendment (Rept. No. 2071). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1362. An act for the relief of Rev. Ishai Ben Asher; without amendment (Rept. No. 2072). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1477. An act for the relief of Gerhard Nicklaus; without amendment (Rept. No. 2073). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1490. An act for the relief of David Maisel (David Majzel) and Bertha Maisel (Berta Pieschansky Majzel); without amendment (Rept. No. 2074). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1841. An act for the relief of Carlo (Adiutore) D'Amico; without amendment (Rept. No. 2075). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1850. An act for the relief of Dr. John D. MacLennan; without amendment (Rept. No. 2076). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1860. An act for the relief of Amalia Sandrovic; without amendment (Rept. No. 2077). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1954. An act for the relief of Anthony N. Goraieb; without amendment (Rept. No. 2078). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2009. An act for the relief of Mrs. Edward E. Jex; without amendment (Rept. No. 2079). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2036. An act for the relief of Joseph Robin Groninger; without amendment (Rept. No. 2080). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2065. An act for the relief of Mr. and Mrs. Hendrik Van der Tuin; without amendment (Rept. No. 2081). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2677. An act for the relief of Michio Yamamoto; without amendment (Rept. No. 2082). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2820. An act for the relief of Mrs. Erika Gisela Osteraa; without amendment (Rept. No. 2083). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2960. An act for the relief of Barbara Herta Geschwandtner; without amendment (Rept. No. 2084). Referred to the Committee of the Whole House.

Mr. JONAS of Illinois: Committee on the Judiciary. S. 599. An act for the relief of Cpl. Robert D. McMillan; with amendment (Rept. No. 2085). Referred to the Committee of the Whole House.

Mr. JONAS of Illinois: Committee on the Judiciary. S. 1203. An act for the relief of Lt. Col. Rollins S. Emmerich; with amendment (Rept. No. 2086). Referred to the Committee of the Whole House.

Mr. JONAS of Illinois: Committee on the Judiciary. S. 2070. An act for the relief of the estate of Givens Christian; with amendment (Rept. No. 2087). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 3742. A bill for the relief of Paul Bernstein; without amendment (Rept. No. 2088). Referred to the Committee of the Whole House.

Mr. MILLER of New York: Committee on the Judiciary. H. R. 7508. A bill for the relief of James Dore, Jr.; without amendment (Rept. No. 2089). Referred to the Committee of the Whole House and ordered printed with illustrations.

Mr. JONAS of Illinois: Committee on the Judiciary. H. R. 7636. A bill for the relief of Mrs. Helen Aldridge; with amendment (Rept. No. 2090). Referred to the Committee of the Whole House.

Mr. JONAS of Illinois: Committee on the Judiciary. H. R. 7762. A bill for the relief of M. M. Hess; without amendment (Rept. No. 2091). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BERRY:

H. R. 9832. A bill to provide for the acquisition by the United States of lands required for the reservoir to be created by the construction of the Fort Randall Dam on the Missouri River, and to provide for rehabilitation of the Sioux Indians of the Lower Brule Indian Reservation in South Dakota; to the Committee on Interior and Insular Affairs.

H. R. 9833. A bill to provide for the acquisition by the United States of lands required for the reservoir to be created by the construction of the Fort Randall Dam on the Missouri River, and to provide for rehabilitation of the Sioux Indians of the Crow Creek Reservation in South Dakota; to the Committee on Interior and Insular Affairs.

By Mr. HOFFMAN of Michigan:

H. R. 9834. A bill to provide for taking the Federal Government out of competition with private enterprise; to the Committee on Government Operations.

H. R. 9835. A bill to provide for the termination of Government operations which are in competition with private enterprise; to the Committee on Government Operations.

By Mr. REES of Kansas:

H. R. 9836. A bill to provide a method for the establishment of an equitable classification and pay system for the postal field service, to provide increases in the salaries of personnel in such service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mrs. ROGERS of Massachusetts (by request):

H. R. 9837. A bill to amend title IV of the Veterans' Readjustment Assistance Act; to the Committee on Veterans' Affairs.

By Mr. VELDE:

H. R. 9838. A bill to amend the Subversive Activities Control Act of 1950 to provide for the determination of the identity of certain Communist-infiltrated organizations, and for other purposes; to the Committee on Un-American Activities.

By Mr. WILLIAMS of Mississippi:

H. R. 9839. A bill relating to the exchange of certain properties for purposes of the Vicksburg National Military Park, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. DONOHUE:

H. R. 9840. A bill to provide for programs of public facilities construction which will stimulate employment in areas having a substantial surplus of labor, and for other purposes; to the Committee on Public Works.

By Mr. FRELINGHUYSEN:

H. R. 9841. A bill to provide for emergency Federal financial assistance to the States and Territories in the construction of public elementary and secondary school facilities urgently needed because of overcrowding, and to encourage full and efficient use of State and local resources in meeting school construction needs, and for other purposes; to the Committee on Education and Labor.

By Mr. MILLER of New York:

H. R. 9842. A bill relating to the income-tax treatment of gain realized on an involuntary conversion of property; to the Committee on Ways and Means.

By Mr. BROOKS of Louisiana:

H. R. 9843. A bill to provide that peacetime espionage may be punished by death, and for other purposes; to the Committee on Armed Services.

By Mr. FULTON:

H. J. Res. 559. Joint resolution to authorize the return of former German property, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SHEEHAN:

H. Res. 621. Resolution proposing the withdrawal of diplomatic recognition of the present Government of the Polish Peoples Republic; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUCHINCLOSS:

H. R. 9844. A bill for the relief of Gabriella Sardo; to the Committee on the Judiciary.

By Mr. BARTLETT:

H. R. 9845. A bill to provide preference right to certain land in Alaska to Bert Arthur Paraday of Anchor Point, Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 9846. A bill to provide preference right to certain land in Alaska to Carl E. Robinson of Anchor Point, Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 9847. A bill to provide preference right to certain land in Alaska to Joseph Booth of Anchorage, Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 9848. A bill to provide preference right to certain land in Alaska to Robert Henry Soyk of Kenai, Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. GUBSER:

H. R. 9849. A bill for the relief of the Martin Wunderlich Co.; to the Committee on the Judiciary.

By Mr. HORAN:

H. R. 9850. A bill to authorize the award of a medal to Clyde Pangborn and Hugh Herndon, Jr.; to the Committee on Banking and Currency.

By Mr. HUNTER:

H. R. 9851. A bill for the relief of Mrs. Irene Reyzev; to the Committee on the Judiciary.

By Mr. O'BRIEN of New York:

H. R. 9852. A bill for the relief of Giovanni M. Di Virgilio; to the Committee on the Judiciary.

H. R. 9853. A bill for the relief of Karlis Abele; to the Committee on the Judiciary.

By Mr. SIMPSON of Illinois:

H. R. 9854. A bill for the relief of Vasilios Demetriou Kretsos and his wife, Chryssa Thomaidou Kretsos; to the Committee on the Judiciary.

By Mr. STRINGFELLOW:

H. R. 9855. A bill for the relief of Zelpha H. Sessions; to the Committee on the Judiciary.

By Mr. WALTER:

H. R. 9856. A bill for the relief of John Odabashian, M. D.; to the Committee on the Judiciary.

H. R. 9857. A bill for the relief of Maria Englesis; to the Committee on the Judiciary.

By Mr. WILSON of California:

H. R. 9858. A bill for the relief of Abdul Haleem; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1088. By Mr. CRETELLA: Petition of Mrs. Beth Kooman and others, of New Haven County, Conn., favoring the Bryson bill (H. R. 1227); to the Committee on Interstate and Foreign Commerce.

1089. By Mr. NEAL: Petition of a number of citizens of Huntington, W. Va., and the adjoining areas relative to S. 2515, affecting the American Indians; to the Committee on Interior and Insular Affairs.

1090. By Mr. PHILBIN: Petition of Esther L. Woods and others of the Women's Christian Temperance Union, Leominster, Mass., urging passage of the Bryson bill, H. R. 1227; to the Committee on Interstate and Foreign Commerce.

1091. Also, petition of Winfred E. Baker and others of the Congregational Church of Christ, North Leominster, Mass., urging passage of legislation to prohibit alcoholic beverage advertising over the radio and television and in newspapers and magazines; to the Committee on Interstate and Foreign Commerce.

EXTENSIONS OF REMARKS

The Green River Valley Development Program

EXTENSION OF REMARKS

OF

HON. WILLIAM H. NATCHER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 8, 1954

Mr. NATCHER. Mr. Speaker, today the Owensboro Inquirer, of Owensboro, Ky.; the Owensboro Messenger, of Owensboro, Ky.; the Park City Daily News, of Bowling Green, Ky.; the McLean County News, of Calhoun, Ky.; the Henderson Gleaner and Journal, of Henderson, Ky.; the Sebree Banner, of Sebree, Ky.; the Messenger, of Central City, Ky.; the Greenville Leader, of Greenville, Ky.; the Green River Republican, of Morgantown, Ky.; the Times-Argus, of Central City, Ky.; the Ohio County Messenger, of Beaver Dam, Ky.; the Ohio County News, of Hartford, Ky.; jointly published "the Green River Valley Celebration Special." The editors of the above-enumerated newspapers in an editorial carried in the masthead of this special celebration edition, stated as follows:

In collaboration with the Green River Valley Citizens League, Inc., this special is in gratitude and recognition of action by the national administration and the Congress to initiate the first project (lower Green navigation) of the overall three-pronged Green River Valley development program. More importantly, this special is to accentuate the fact that the Federal Government is now generating and will increasingly generate huge blocks of coal-steam electricity at costs far greater than possible in the Green River Valley—if and when we obtain flood control water storage as provided in other valleys to eliminate costly cooling towers and related facilities. Without this regulated water supply from proposed reservoirs the Green River Valley will not be industrialized and the entire valley will continue as a vast chronic labor surplus area. The benefits of flood control to bottom-land farmers will be tremendous. Essential also is modernized navigation in the upper valley and the minor watershed projects by the Department of Agriculture must be continued and expanded. This issue is factual and the various authors are prepared to support their presentations under oath with ample proof.

The Green River Valley Citizens League, Inc., was organized at Central City, Ky., on September 28, 1951. James R. Hines, of Bowling Green, is the president of this organization; Albert P. Harding, of Central City, is executive vice president and secretary; J. Morton Williams, of Beaver Dam, is the treasurer, and the honorary president is C. A. Reis, of South Carrollton, Ky. The board of directors is composed of James R. Hines, Albert P. Harding, J. Morton Williams, W. C. Sumpter, Fred E. Massey, R. A. Demunbrun, Dr. W. H. Washburn, John Q. Adams, Homer Boyd, I. G. Reynierson, Landon Wills, Chester A. Hope, Edward Delker, James Hayes, W. A. Moore, J. E. Wood, Roy Morton, J. T. Turner, Byron Royster, Harry Wheeldon, and Harry Scott.

Due to the combined efforts of the outstanding newspapers hereinabove listed, and the Green River Valley Citizens League, Inc., development of the Green River Valley in Kentucky has finally started. The citizens of the Green River Valley appreciate the efforts of the Congress of the United States, and I only wish it were possible for me to include all of the articles carried in the Green River Valley Celebration Special praising the Congress of the United States, the Commonwealth of Kentucky, and all of those who have assisted in the development of the Green River Valley.

Mr. Speaker, under leave to extend my remarks in the RECORD, I include herewith an article written by the Honorable James R. Hines, of Bowling Green, Ky., the president of the Green River Valley Citizens League, Inc., which is a part of the Green River Valley Celebration Special, with same entitled "Current Congress Can Spare $800,000 for Valley."

The article is as follows:

CURRENT CONGRESS CAN SPARE $800,000 FOR VALLEY

(By James R. Hines, Bowling Green, Ky., league president)

Is there any good reason why the current session of the Congress should not vote a lump sum of $200,000 for fiscal 1955 starting next July 1 to initiate construction of Rough, Nolin, Green, and Barren Reservoirs as a single project? After showing how Uncle Sam is actually losing money day in and day out by the lack of these projects, Honorary President Reis of the league in another article herein asks similar questions which to me are the most important now that lower navigation modernization is under way.

This takes the writer back to the very embarrassing position in which he was placed in February 1953 when the Louisville district engineer in his report on the overall project stated: "The cost of the improvement (above Green River mile 103) would be in excess of the benefits to be realized." Nothing could be more damaging to the efforts of the Green River Valley Citizens League, Inc., in my hometown of Bowling Green located at the head of navigation on Barren River. This needs early correction and I am sure that with this understanding of my personal position Senator COOPER—with the fine cooperation he has had from Senator CLEMENTS, Congressman GREGORY, and Congressman NATCHER and will continue to have—can without any question obtain the aforesaid $200,000 for the purposes stated before this Congress adjourns.

Even so this further favor to the Green River Valley will not match the so-called Green River 5-year plan adopted by our league officers in November 1953, as follows:

Lower Green River navigation reconstruction	$17,000,000
Rough River Reservoir	7,600,000
Nolin River Reservoir	12,840,000
No. 2 Green River Reservoir	7,175,000
No. 2 Barren River Reservoir	18,460,000
Upper Green River new locks 3 and 4	500,000
U. S. Department of Agriculture subwatershed project	
Total over 5 years, averaging $12½ million yearly	63,575,000

This will provide the Green River Valley a fair share of funds currently spent on inland waterways and compensate for no funds spent in our valley over the last 20 years.

For fiscal year starting July 1, 1954:

Funds to start lower Green River navigation reconstruction.

Funds to start Rough River Reservoir construction.

Funds for planning and designing No. 2 Barren River Reservoir.

Funds to continue USDA North Fork Rough River subwatershed project.

Funds to continue USDA Lincoln-Casey Counties subwatershed project.

In other words we have fallen far short of the $12½ million average this year because $800,000 and $4,800,000 has been appropriated for fiscal 1954 and 1955, respectively, plus the two small amounts for the USDA projects.

Wage Scale Discrimination in the Memphis, Tenn.-Ark., Area

EXTENSION OF REMARKS
OF
HON. B. CARROLL REECE
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Thursday, July 8, 1954

Mr. REECE of Tennessee. Mr. Speaker, a labor situation has developed in the Memphis, Tenn.-Ark., area that should have immediate attention by the appropriate authorities.

This is a cotton area, where large numbers of unskilled laborers are employed. There has been importation of Mexican labor under the Migratory Labor Act, as cotton choppers and pickers, and other types of work in connection with the planting and growing of cotton.

There is also employed a large number of local citizens, most of whom are Negroes.

It is my understanding that the Mexicans are paid on the basis of 50 cents an hour. The local labor, most of whom, as I have said, are Negroes, being paid on the basis of 30 cents an hour.

It is impossible to understand this discrimination.

Of course, I do not feel that 50 cents an hour is too high. I do not think it is, but I think the local laborers should be paid the same scale as the Mexicans and I shall request the Department of Labor to investigate and see that this situation is remedied and that our local labor is treated fairly.

Reciprocal Trade—Oklahoma With Arizona

EXTENSION OF REMARKS
OF
HON. VICTOR WICKERSHAM
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, July 8, 1954

Mr. WICKERSHAM. Mr. Speaker, a week ago I addressed the House of Representatives on the subject of Oklahoma—My Home.

What I had to say then had to do with headlines in the press which blazoned, "Film Musical Oklahoma To Be Made In Arizona." In this talk, I noted the decision of producer Arthur Hornblower to put his company on location in Arizona because, in his own words:

> It (Oklahoma) doesn't look enough like the Oklahoma of 1907 any more. It has too many oil wells, airplanes, and people.

In the opinion of many, my reasoning completely demolished the Hornblower argument.

The Hornblower incident is only one in a series of incidents in which Hollywood has told both the States and the United States "where to head in."

I propose to reverse this process. I propose to give some suggestions to Hollywood from Washington.

Scores of Hollywood stars have portrayed Congressmen, Congresswomen, and Senators. Other scores of Hollywood stars have taken the roles of Presidents. President Andrew Jackson has been a favorite film subject. President Truman was a voice on the screen in Call Me Madame. Actor-producer-director Robert Montgomery gives advice to President Eisenhower.

It is not amiss, therefore, for me to give advice to Mr. Hornblower.

Back in 1899, the great playwright, Augustus Thomas, wrote a stage play. One of the young actors who was a member of the original cast of the Chicago premiere of that play was Mr. Lionel Barrymore who took the part of Lieutenant Young, 11th United States Cavalry.

The name of that play was Arizona.

My advice to producer Hornblower is that he should reissue the play Arizona as a motion picture.

My further advice to Mr. Hornblower is that he should pass up the State of Arizona as a site for filming this production; and that he, instead, choose my State, Oklahoma.

My reasons? Arizona doesn't look enough like the Arizona of 1899. It has too many cities, too much irrigation, and not enough cactus.

Such a step would be true reciprocity. The Oklahoma and Arizona delegations in Congress would be satisfied. Perhaps, it would even meet the approval of the Committee on Intergovernmental Relations.

Mr. Speaker, if Hollywood can whimsically produce Oklahoma in Arizona, I see no possible objection to Hollywood's further exercising its whim by producing Arizona in Oklahoma.

Foreign Service Academy—Part II

EXTENSION OF REMARKS
OF
HON. CLEMENT J. ZABLOCKI
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Thursday, July 8, 1954

Mr. ZABLOCKI. Mr. Speaker, under leave to extend my remarks in the RECORD, granted on June 28, I spoke about the personnel problem in our State Department.

At that time, I pointed out that the interests of our Nation could best be served by the adoption of sweeping changes in the Department. In the first place, steps ought to be taken to provide a reservoir of able, specially trained young men and women who would eventually serve our Government in various positions abroad. Secondly, the personnel structure within the Department of State should be overhauled, so as to do away with the causes of low morale and with poor utilization of human resources.

I had already discussed my proposal for the establishment of a Foreign Service Academy of the United States, contained in my bill, H. R. 1870. This proposal, when adopted by Congress, should provide the State Department and other executive departments and agencies with adequate specialized personnel for oversea work.

Today, in commenting further on the Wriston report for the overhauling of the personnel structure of the State Department, I should like to call to the attention of the membership of this body two editorials from the Milwaukee Journal, both having a bearing on this subject.

The first editorial is entitled "Bad Morale in Courier Service" and it appeared in the Milwaukee Journal of June 28, 1954. It demonstrates why State Department morale is as low as it is. It warrants our earnest consideration, because we cannot expect our Foreign Service to be efficient and effective while we close our eyes to the many causes which undermine its morale.

The editorial follows:

BAD MORALE IN COURIER SERVICE

We had a letter the other day from a friend who is a diplomatic courier in the American Foreign Service. Because of what the State Department's economy drive is doing to him

and to the courier service, he is an unhappy young man.

Diplomatic couriers carry our country's vital documents between 110 United States diplomatic missions around the world. They cover four continents from regional offices at Paris, Cairo, Manila, and Panama. Today they travel almost exclusively by air. The courier travels far, sees strange places and has an occasional adventure. By and large, however, the job is arduous, exacting, occasionally dangerous and often monotonous.

When our friend joined the couriers in 1952 there were 100 men in the service. Schedules generally called for trips of 2 or 3 days, with the rest of the workweek in the regional office. Under such schedules, it was possible to make allowance for bad flying weather and airplane mechanical troubles. The couriers, many of whom are married, were reasonably assured of some time at home.

Since the Eisenhower administration came in, the courier force has been cut from 100 men to 66. On July 1 it will go down to 60. Inasmuch as the same number of missions must still be visited and the same number of miles flown, this means that 60 men must cover the routes and do the work that 100 previously did.

The letter from our courier friend explains what this means:

"I'm abashed for not having written sooner. However, the reduction in force of couriers has weighed heavily on our office. I've had just about time to drop off my laundry and pick up some clean clothes between trips. I've almost forgotten what the apartment looks like. Jane has a few thousand well-chosen and rehearsed words to say about the setup whenever we chance to meet. All we can do is hope that the pressure lets up soon. If not, most of us in this office are going to quit."

Courier morale is low for two other reasons. Most couriers, young men just out of college, joined the service with the expectation that they could, in reasonable time, move up into the regular Foreign Service. They have recently been given to understand that, in view of overall reduction in the foreign staff, there is little chance of such promotion for a long time.

Couriers were also given to understand, when they joined the service, that they would get home leave after 2 years. Last winter they received notice that, for economy reasons, there would be no home leave until after 3 years of service.

All in all, we can't blame our friend for being unhappy. And it is easy to understand why morale in the courier service is bad. Maybe one of the congressional committees concerned with such matters should check into what looks like another example of false economy.

Mr. Speaker, the second editorial, taken from the Milwaukee Journal of June 29, 1954, lists the highlights of the Wriston report, stressing the fact that our Nation badly needs great improvements in the selection, recruitment, and assignment or utilization of the men and women who execute our foreign policy both at home and abroad. It is entitled "More and Better Men Are Needed for Foreign Service," and I commend it highly to my colleagues' attention:

MORE AND BETTER MEN ARE NEEDED FOR FOREIGN SERVICE

The United States badly needs more and better men making its foreign policy at home and representing it in the 68 embassies, 9 legations, and 167 consulates abroad. And it needs to use these men to better advantage than it is using its present diplomats.

This is about what the Wriston committee's recommendations to the State Department about administrative reform add up to.

There is not much new about its recommendations. Similar ones were made after World War II by the late Secretary Stettinius and later by the first Hoover Commission. Little came from them. As one commentator has said of the Stettinius reform: "The principal feature was the transfer of attendants from the corridors to the washrooms."

This time, however, there seems some reason to hope something will happen. Secretary Dulles has approved many of the committee recommendations and ordered them into effect.

Here are highlights of the Wriston committee's administrative reform program:

Personnel in the Foreign Service should be increased from 1,285 to 3,900. This should be done primarily by integrating into the Foreign Service the top personnel of the State Department's civil-service organization in Washington.

The Foreign Service must open its ranks to a large number of people with a high degree of specialization in other than the general practice of diplomacy.

The situation under which the Foreign Service is in effect a condition of exile abroad must be ended. Officers must be brought home for duty regularly to keep their knowledge of American life steadily refreshed.

A modern personnel system must be established under a Deputy Under Secretary of State who will enter the job prepared to stay. A promotion system should be set up.

The Foreign Service Institute should be revitalized to carry out its purpose—to train diplomatic officers as the war colleges train military officers.

Foreign Service recruitment of young men must be stepped up through cooperation with colleges and universities and by accelerating present examination processes and security procedures. For the long range, a nationwide scholarship training program, patterned after the Navy's contract system for its Reserve Officer Training Corps, is urged.

All of these recommendations are worthy. We surmise, however, that it is going to take more than worthiness, and even Secretary Dulles' approval, to bring them to realization. In view of what has happened to equally good recommendations in the past, we think there must be continuing pressure by Mr. Dulles, vigorous administrative action, plus some outside prodding by the Wriston Commission and interested Members of the Congress and the public.

And most important of all, perhaps, there must be improvement of morale inside the Foreign Service and the State Department. The Wriston committee has recognized that this is very low and has suggested how to improve it. Discussion of the morale situation will follow in another editorial.

SENATE

FRIDAY, JULY 9, 1954

(Legislative day of Friday, July 2, 1954)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

O God, who art the foundation of the true and good, the secret and source of all grace and strength: We thank Thee for beauty found in unexpected places, blossoms of joy that grow in dusty ways, flowers of hope that spring in the desert, and for high moments of prayer that reveal to us even fleeting glimpses of the splendors of eternity. By the good will that finds a home in our own hearts, fit us to be among those who in these disruptive days tear down barriers of suspicion and hostility and build bridges of friendliness. May we never forget that righteousness exalts a nation, and that only the pure in heart can see Thee and the Godlike in a world where common bushes burn with the eternal, but where only those who see take off their shoes.

We pray that Thou wilt give persuasive power to all statesmen, writers, and public leaders who hold before the people ideals of truth and beauty. In these perilous days, when pagan blackness battles against the light, may we know in very truth that it is better to light a candle than to curse the darkness. We ask it in the ever-blessed name of that One who is the light of the world. Amen.

THE JOURNAL

On request of Mr. KNOWLAND, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, July 8, 1954, was dispensed with.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States, withdrawing the nomination of Leland H. Goddard to be postmaster at Key West, Fla., was communicated to the Senate by Mr. Hawks, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, announced that the House had passed the bill (S. 3605) to abolish the offices of Assistant Treasurer and Assistant Register of the Treasury and to provide for an Under Secretary for Monetary Affairs and an additional Assistant Secretary in the Treasury Department, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 179. An act to amend section 7 of the Administrative Expenses Act of 1946, as amended;

H. R. 8020. An act authorizing the transfer of certain property of the United States Government (in Klamath Falls, Oreg.) to the State of Oregon;

H. R. 9580. An act to revise and extend the laws relating to espionage and sabotage, and for other purposes; and

H. R. 9709. An act to extend and improve the unemployment compensation program.

COMMITTEE SERVICE

On motion of Mr. KNOWLAND, and by unanimous consent, it was

Ordered, That the Senator from Oregon [Mr. CORDON] be, and he is hereby, appointed

as chairman of the Committee on Interior and Insular Affairs;

That the Senator from Wyoming [Mr. CRIPPA] be, and he is hereby, excused from further service as a member of the Committee on the District of Columbia and is assigned to service on the Committee on Interior and Insular Affairs; and

That the Senator from Nebraska [Mr. REYNOLDS] be, and he is hereby, assigned to service on the Committee on Finance and the Committee on the District of Columbia.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that following a brief executive session and a quorum call there may be the customary morning hour for the transaction of routine business, under the usual 2-minute limitation on speeches.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of executive business, for action on the nominations on the Executive Calendar which appear under the heading "New Reports."

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

The PRESIDENT pro tempore. If there be no reports of committees, the clerk will state the nominations on the Executive Calendar under the heading "New Reports."

FEDERAL COAL MINE SAFETY BOARD OF REVIEW

The Chief Clerk read the nomination of Charles R. Ferguson, of Pennsylvania, to be a member of the Federal Coal Mine Safety Board of Review.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

IN THE ARMY

The Chief Clerk read the nomination of Maj. Gen. Earle Standlee to be a major general in the Medical Corps.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Brig. Gen. Paul Irwin Robinson to be a brigadier general in the Medical Corps.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. KNOWLAND. Mr. President, I ask that the President be immediately notified of the confirmations of today.

The PRESIDENT pro tempore. Without objection, the President will be immediately notified.

NOMINATION OF HERBERT BERNARD LOPER TO BE CHAIRMAN OF THE MILITARY LIAISON COMMITTEE TO THE ATOMIC ENERGY COMMISSION—NOTICE OF HEARING

Mr. HICKENLOOPER. Mr. President, I give notice for the record at this time that on next Monday afternoon at 2 o'clock the Senate members of the Joint Committee on Atomic Energy will meet for an open hearing on the question of the confirmation of the nomination of Herbert Bernard Loper, of Nebraska, to be chairman of the Military Liaison Committee to the Atomic Energy Commission. The room will be announced at a later date.

I further ask unanimous consent that the members on the part of the Senate of the Joint Committee on Atomic Energy be authorized to meet on Monday afternoon.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. KNOWLAND. I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

CALL OF THE ROLL

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Frear	Maybank
Anderson	Fulbright	McCarran
Barrett	George	Millikin
Bennett	Gillette	Monroney
Bowring	Green	Morse
Bricker	Hayden	Mundt
Bridges	Hendrickson	Murray
Burke	Hickenlooper	Neely
Bush	Hill	Pastore
Butler	Humphrey	Payne
Byrd	Ives	Potter
Capehart	Jackson	Reynolds
Carlson	Johnson, Colo.	Robertson
Case	Johnson, Tex.	Russell
Chavez	Johnston, S. C.	Saltonstall
Clements	Kennedy	Schoeppel
Cooper	Kerr	Smathers
Cordon	Kilgore	Smith, Maine
Crippa	Knowland	Smith, N. J.
Daniel	Kuchel	Sparkman
Dirksen	Langer	Stennis
Douglas	Lehman	Symington
Duff	Lennon	Thye
Dworshak	Long	Upton
Ellender	Magnuson	Watkins

Flanders	Martin	Young

Mr. SALTONSTALL. I announce that the Senator from Maryland [Mr. BEALL], the Senator from Indiana [Mr. JENNER], the Senator from Connecticut [Mr. PURTELL], and the senior Senator from Wisconsin [Mr. WILEY] are necessarily absent.

The junior Senator from Wisconsin [Mr. MCCARTHY] is absent on official business.

Mr. CLEMENTS. I announce that the Senator from Mississippi [Mr. EASTLAND], the Senators from Tennessee [Mr. GORE and Mr. KEFAUVER], the Senator from Missouri [Mr. HENNINGS], and the Senator from Arkansas [Mr. MCCLELLAN] are absent on official business.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Annual Pan American Highway Congress at Caracas, Venezuela.

The PRESIDENT pro tempore. A quorum is present.

Routine business is now in order.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

AMENDMENT OF CAREER COMPENSATION ACT RELATING TO CREDIT FOR CERTAIN SERVICE

A letter from the Acting Secretary of the Army, transmitting a draft of proposed legislation to amend the Career Compensation Act of 1949, as amended, to allow credit for certain service for purposes of pay, and for other purposes (with accompanying papers); to the Committee on Armed Services.

PROPOSED AWARD OF CONCESSION CONTRACT, ROCKY MOUNTAIN NATIONAL PARK, COLO.

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed award of a concession contract to operate a lodge and related facilities in Rocky Mountain National Park, Colo. (with accompanying papers); to the Committee on Interior and Insular Affairs.

AUDIT REPORT ON FARM CREDIT AMINISTRATION, ETC.

A letter from the Acting Comptroller General of the United States, transmitting, pursuant to law, an audit report on Farm Credit Administration, certain corporations supervised by Farm Credit Administration, and the Agricultural Marketing Revolving Fund administered by Farm Credit Administration, for the fiscal year ended June 30, 1953 (with an accompanying report); to the Committee on Government Operations.

SESSIONS LAWS OF HAWAII, 1953

A letter from the Secretary of Hawaii, transmitting, pursuant to law, a copy of the Session Laws of Hawaii, 1953, as enacted by the Legislature of the Territory of Hawaii (with an accompanying document); to the Committee on Interior and Insular Affairs.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, and referred as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the Board of Supervisors of Erie County, Buffalo, N. Y., favoring the enactment of legislation to provide adequate funds for the expansion of port facilities for the port of Buffalo, N. Y.; to the Committee on Public Works.

The petition of Terry Mulhall, of Sioux City, Iowa, relating to the withdrawal of the United States from the United Nations if Red China is admitted as a member of the United Nations; to the Committee on Foreign Relations.

By Mr. ELLENDER:

A concurrent resolution of the Legislature of the State of Louisiana; to the Committee on the Judiciary:

"Senate Concurrent Resolution 15

"Whereas at the session of the Legislature of Louisiana held in 1950 House Concurrent Resolution 24 was passed to memorialize and petition the Congress of the United States to call a convention for the purpose of considering an amendment to the Constitution of the United States relative to taxes on incomes, inheritance, and gifts; and

"Whereas eight States which so memorialized the Congress to call the above-mentioned convention to consider an amendment to the Constitution of the United States relative to taxes on incomes, inheritance, and gifts, have since rescinded their action; and

"Whereas it is desirable that the Legislature of the State of Louisiana give serious reconsideration to its action evidenced by

House Concurrent Resolution 24 of 1950, in the light of present local, national, and international conditions: Therefore be it

"Resolved by the Senate of the State of Louisiana (the House of Representatives concurring), That the action of the presiding officers in signing House Concurrent Resolution 24 of 1950, is hereby rescinded; and be it further

"Resolved, That a duly attested copy of this resolution be immediately transmitted to the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, and to each Member of the United States Congress from this State.

"All rules of the senate and of the house in conflict herewith are hereby suspended for the limited purposes set forth in this resolution.

"C. E. BARHAM,
"Lieutenant Governor and President of the Senate.

"C. C. AYCOCK,
"Speaker of the House of Representatives."

A concurrent resolution of the Legislature of the State of Louisiana; to the Committee on Finance:

"Senate Concurrent Resolution 19

"Whereas the security of the United States in these troubled times rests as fully upon our economic strength as upon our strength of arms; and

"Whereas the economy of the State of Louisiana is basically agricultural and the sugar industry is one of the most important industries in the State; and

"Whereas the Federal Government has set a quota on the amount of sugar that may be produced in the State of Louisiana which has resulted in a loss of revenues for the sugar producers of the State; and

"Whereas sugar has not been given the price raises similar to those afforded to other agricultural commodities; and

"Whereas the continued subnormal price of sugar will seriously impair the welfare of the industry; and

"Whereas a raise in the price of sugar will grant the relief which the industry needs, and will make possible a corresponding raise in the wages of employees in the industry: Therefore be it

"Resolved by the Senate of the State of Louisiana (the House of Representatives concurring), That the Secretary of Agriculture of the United States and the Congress of the United States are hereby memorialized and requested to take such action as is necessary to raise the price of sugar; be it further

"Resolved, That the Senators and Representatives from the State of Louisiana now serving in the Congress of the United States are hereby respectfully requested to exert every effort and utilize all facilities at their command to further said action; be it further

"Resolved, That copies of this resolution shall forthwith be transmitted to the Secretary of Agriculture of the United States, to the presiding officer of each House of the Congress, and to each Senator and Representative from Louisiana.

"C. E. BARHAM,
"Lieutenant Governor and President of the Senate.

"C. C. AYCOCK,
"Speaker of the House of Representatives."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CORDON, from the Committee on Interior and Insular Affairs:

S. 3134. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Talent division of the Rogue River Basin reclamation project, Oregon; with amendments (Rept. No. 1760).

By Mr. MALONE, from the Committee on Interior and Insular Affairs:

S. Res. 271. Resolution providing for an investigation of critical raw materials by the Committee on Interior and Insular Affairs; without amendment.

By Mr. DANIEL, from the Committee on Interior and Insular Affairs:

S. 3699. A bill granting the consent of Congress to a compact entered into by the States of Louisiana and Texas and relating to the waters of the Sabine River; without amendment (Rept. No. 1783).

By Mr. BUSH, from the Committee on Public Works:

H. R. 7815. A bill to provide for the construction, operation, and maintenance of the Cougar Dam and Reservoir on the South Fork McKenzie River, Oreg., with participation for power by the city of Eugene, Oreg.; without amendment (Rept. No. 1761).

By Mr. CASE, from the Committee on the District of Columbia, without amendment:

H. R. 7132. A bill to exempt from taxation certain property of the Veterans of Foreign Wars of the United States in the District of Columbia (Rept. No. 1766).

By Mr. BEALL, from the Committee on the District of Columbia, without amendment:

S. 3506. A bill to repeal the act approved September 25, 1914, and to amend the act approved June 12, 1934, both relating to alley dwellings in the District of Columbia (Rept. No. 1762).

By Mr. BEALL, from the Committee on the District of Columbia, with amendments:

S. 1585. A bill to amend the District of Columbia Traffic Act, 1925, as amended (Rept. No. 1763);

S. 2655. A bill to amend the District of Columbia Teachers' Salary Act of 1947, as amended (Rept. No. 1764); and

S. 3482. A bill to amend the District of Columbia Unemployment Compensation Act, and for other purposes (Rept. No. 1765).

By Mr. PAYNE, from the Committee on the District of Columbia, without amendment:

H. R. 8692. A bill to permit the payment of certain trust accounts to the beneficiary on the death of the trustee by savings and loan, and similar associations in the District of Columbia (Rept. No. 1767);

H. R. 8973. A bill to amend paragraph 31 of section 7 of the act entitled "An act making appropriations to provide for the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," approved July 1, 1902, as amended (Rept. No. 1768); and

H. R. 8974. A bill to permit investment of funds of insurance companies organized within the District of Columbia in obligations of the International Bank for Reconstruction and Development (Rept. No. 1769).

By Mr. PAYNE, from the Committee on the District of Columbia, with amendments:

S. 880. A bill to amend the license law of the District of Columbia (Rept. No. 1770).

By Mr. CRIPPA, from the Committee on the District of Columbia, without amendment:

S. 2686. A bill to amend the act entitled "An act to control the possession, sale, transfer, and use of pistols and other dangerous weapons in the District of Columbia, to provide penalties, to prescribe rules of evidence, and for other purposes," approved July 8, 1932 (Rept. No. 1772);

S. 2687. A bill to authorize the Commissioners of the District of Columbia to designate employees of the District to protect life and property in and on the buildings and grounds of any institution located upon property outside of the District of Columbia acquired by the United States for District sanitoriums, hospitals, training schools, and other institutions (Rept. No. 1773);

S. 3329. A bill to amend the District of Columbia Police and Firemen's Salary Act of 1953 to correct certain inequities (Rept. No. 1774); and

S. 3655. A bill to provide that the Metropolitan Police force shall keep arrest books which are open to public inspection (Rept. No. 1775).

By Mr. CRIPPA, from the Committee on the District of Columbia, with amendments:

S. 3683. A bill to amend the District of Columbia Credit Unions Act (Rept. No. 1776); and

H. R. 6080. A bill to authorize the appropriation of funds for the construction of certain highway-railroad grade separations in the District of Columbia, and for other purposes (Rept. No. 1777).

By Mr. NEELY, from the Committee on the District of Columbia, without amendment:

S. 3558. A bill to amend the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes," approved March 1, 1907 (Rept. No. 1778).

By Mr. NEELY, from the Committee on the District of Columbia, with an amendment:

H. R. 9077. A bill to amend section 405 of the District of Columbia Law Enforcement Act of 1953, to make available to the judges of such District the psychiatric and psychological services provided for in such section (Rept. No. 1779).

By Mr. NEELY, from the Committee on the District of Columbia, with amendments:

S. 1611. A bill to regulate the election of delegates representing the District of Columbia to national political conventions, and for other purposes (Rept. No. 1780);

S. 3518. A bill to amend the laws relating to fees charged for services rendered by the Office of the Recorder of Deeds for the District of Columbia and the laws relating to appointment of personnel in such office, and for other purposes (Rept. No. 1781); and

H. R. 7128. A bill to amend the act entitled "An act to provide an immediate revision and equalization of real-estate values in the District of Columbia; also to provide an assessment of real estate in said District in the year 1896 and every third year thereafter, and for other purposes," approved August 14, 1894, as amended (Rept. No. 1782).

PUBLIC SCHOOL CONSTRUCTION ACT OF 1954—REPORT OF A COMMITTEE (REPT. NO. 1771)

Mr. COOPER. Mr. President, the Committee on Public Labor and Public Welfare has ordered to be reported the bill (S. 2601) to provide for Federal financial assistance to the States and Territories in the construction of public elementary and secondary school facilities, with amendments. From that committee I now report the bill.

The written report on the bill is not yet ready and it will be some days before it can be put into final form. I feel that that fact should not delay making the text of the bill, in its amended form, available to the Congress and the public at large.

I ask unanimous consent that the names of the following Senators be carried as cosponsors on the next print of the bill: Mr. COOPER, Mr. SMITH of New Jersey, Mr. UPTON, Mrs. BOWRING, Mr. MURRAY, Mr. HILL, Mr. NEELY, Mr. CLEMENTS, Mr. DOUGLAS, Mr. KENNEDY, and Mr. MCCLELLAN.

The PRESIDENT pro tempore. The bill will be placed on the calendar, and.

without objection, the additional names of cosponsors will be added on the next print of the bill.

REPORTS ON DISPOSITION OF EXECUTIVE PAPERS

Mr. CARLSON, from the Joint Select Committee on the Disposition of Executive Papers, to which were referred for examination and recommendation five lists of records heretofore transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted reports thereon pursuant to law.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DIRKSEN:

S. 3721. A bill to amend the Internal Revenue Code to provide that the tax on television tubes shall not apply where such tubes are sold for use in the manufacture or production of nontaxable component parts of television sets or for export; to the Committee on Finance.

By Mr. BUTLER:

S. 3722. A bill to provide for a program of merchant-ship construction in American shipyards; to the Committee on Interstate and Foreign Commerce.

By Mr. SALTONSTALL (by request):

S. 3723. A bill for the relief of Mrs. Chii Sugiura, Motoko Sugiura, Atsushi Sugiura, and Kumi Sugiura; to the Committee on the Judiciary.

By Mr. CASE:

S. 3724. A bill for the relief of Mary J. Reitz; to the Committee on Finance.

By Mr. AIKEN:

S. 3725. A bill for the relief of Capt. Cassius H. Styles; to the Committee on the Judiciary.

By Mr. SALTONSTALL (for himself, Mr. KENNEDY, Mrs. SMITH of Maine, Mr. PAYNE, Mr. FLANDERS, Mr. AIKEN, Mr. BRIDGES, Mr. UPTON, Mr. PURTELL, Mr. BUSH, Mr. PASTORE, and Mr. GREEN):

S. 3726. A bill granting the consent of Congress to certain New England States to enter into a compact relating to higher education in the New England States and establishing the New England Board of Higher Education; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. SALTONSTALL when he introduced the above bill, which appear under a separate heading.)

By Mr. SALTONSTALL (for himself and Mr. KENNEDY):

S. 3727. A bill to amend paragraph 717 of title I of the Tariff Act of 1930, with respect to duties applicable in the case of fish sticks; to the Committee on Finance.

By Mr. BURKE:

S. 3728. A bill for the relief of Mrs. Gertrud Eckerl Strickland; to the Committee on the Judiciary.

By Mr. IVES:

S. J. Res. 173. Joint resolution to authorize the President to proclaim the week of November 28, 1954, through December 4, 1954, as National Salvation Army Week; to the Committee on the Judiciary.

(See the remarks of Mr. IVES when he introduced the above joint resolution, which appear under a separate heading.)

NEW ENGLAND BOARD OF HIGHER EDUCATION

Mr. SALTONSTALL. Mr. President, on behalf of myself, the senior Senator from New Hampshire [Mr. BRIDGES], the senior Senator from Rhode Island [Mr. GREEN], the senior Senator from Vermont [Mr. AIKEN], the junior Senator from Vermont [Mr. FLANDERS], the senior Senator from Maine [Mrs. SMITH], the junior Senator from Rhode Island [Mr. PASTORE], the senior Senator from Connecticut [Mr. BUSH], the junior Senator from Maine [Mr. PAYNE], the junior Senator from Connecticut [Mr. PURTELL], the junior Senator from New Hampshire [Mr. UPTON], and my colleague, the junior Senator from Massachusetts [Mr. KENNEDY], all Senators from the New England States, I introduce for appropriate reference a bill to give the consent of Congress for any of the New England States to enter into a compact establishing a New England Board of Higher Education. The object of the compact is to produce more doctors, dentists, veterinarians, public health officers, and technical and scientific specialists in other fields through the cooperative efforts of all the States.

By the enactment of this bill, at no expense to the Federal Government, an increase in the number of students from the compacting States can be arranged with existing institutions. This concrete action will strengthen these institutions while at the same time alleviating to some extent the existing need for their professionally trained graduates. Each of the compacting States plans to contribute toward the education of students from its State in the leading centers of one of the other States. In this way, duplication and overlapping can be avoided, and economies can be achieved. The result, I hope, will be to offset the constantly widening gap between the tuition costs and the actual cost to the institutions to provide the necessary training.

Massachusetts participation has already been authorized by the State legislature and signed by Gov. Christian A. Herter. The compact has also received enthusiastic support among leaders in all sections of New England.

I wholeheartedly endorse this cooperative effort amongst our New England States to use to the fullest and expand our exceptionally fine centers of learning. It is a particular pleasure to join with the other New England Senators acting together to further enrich the professional community with graduates from our schools.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3726) granting the consent of Congress to certain New England States to enter into a compact relating to higher education in the New England States and establishing the New England Board of Higher Education, introduced by Mr. SALTONSTALL (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

NATIONAL SALVATION ARMY WEEK

Mr. IVES. Mr. President, I introduce for appropriate reference a joint resolution to authorize the President of the United States to proclaim the week of November 28, 1954, through December 4, 1954, as National Salvation Army Week.

The Salvation Army will celebrate its 75th anniversary year of service in the United States this fall. In October of 1879, Lt. Eliza Shirley came to the United States and her efforts resulted in the landing of the first official delegation of Salvation Army officers at Battery Park in New York City on March 12, 1880. A commemorative plaque marks the spot where these officers knelt in prayer at Battery Park. Their prayers were fully answered and today the Salvation Army has grown into a huge operation composed of 3,996 officers who administer 6,400 centers of charitable and religious work. These dedicated officers are advised and assisted by thousands of prominent citizens of all races and creeds, who have formally associated themselves in the close relationship of lay leadership.

The work of the Salvation Army, under the charter issued by the State of New York in 1899, is well known to all of us. Therefore, it is only fitting that the week of November 28, 1954, through December 4, 1954, be proclaimed as National Salvation Army Week.

I ask unanimous consent that the joint resolution be printed in the body of the RECORD at this point in my remarks.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, will be printed in the RECORD.

The joint resolution (S. J. Res. 173) to authorize the President to proclaim the week of November 28, 1954, through December 4, 1954, as National Salvation Army Week, introduced by Mr. IVES, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Whereas in October of 1879 a lone woman Salvation Army officer, Lt. Eliza Shirley, encouraged the formation of an official party, comprising seven women officers and Commissioner George Scott Railton, to extend the work of the Salvation Army in the United States; and

Whereas today the Salvation Army has grown into a huge organization with its 3,996 officers administering 6,400 centers of charitable and religious work assisted by 34,687 prominent citizens of all races and creeds who have formally associated themselves in the close relationship of lay leadership; and

Whereas the Salvation Army, acting under a charter issued by the State of New York in 1899, is an organization designed to operate as a religious and charitable organization with the following purposes: The spiritual, moral, and physical reformation of all who need it; the reclamation of the vicious, criminal, dissolute, and degraded; visitation among the poor and lonely and sick; the preaching of the Gospel and dissemination of Christian truth by means of open-air and indoor meetings: Therefore be it

Resolved, etc., That the President of the United States is requested and authorized to officially proclaim the week beginning November 28, 1954, through December 4, 1954, as National Salvation Army Week.

ADDITIONAL FUNDS FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. BRICKER submitted the following resolution (S. Res. 276), which was referred to the Committee on Interstate and Foreign Commerce:

Resolved, That the Committee on Interstate and Foreign Commerce is authorized to expend from the contingent fund of the Senate, during the Eighty-third Congress, for the purposes specified in section 134 (a) of the Legislative Reorganization Act of 1946, $10,000 in addition to the amount authorized in such section.

EXTENSION OF COVERAGE UNDER OLD-AGE AND SURVIVORS INSURANCE PROGRAM—AMENDMENTS

Mr. KERR submitted amendments intended to be proposed by him to the bill (H. R. 9366) to amend the Social Security Act and the Internal Revenue Code so as to extend coverage under the old-age and survivors insurance program, increase the benefits payable thereunder, preserve the insurance rights of disabled individuals, and increase the amount of earnings permitted without loss of benefits, and for other purposes, which were referred to the Committee on Finance, and ordered to be printed.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated:

H. R. 179. An act to amend section 7 of the Administrative Expenses Act of 1946, as amended; and

H. R. 8020. An act authorizing the transfer of certain property of the United States Government (in Klamath Falls, Oreg.) to the State of Oregon; to the Committee on Government Operations.

H. R. 9580. An act to revise and extend the laws relating to espionage and sabotage, and for other purposes; to the Committee on the Judiciary.

H. R. 9709. An act to extend and improve the unemployment compensation program; to the Committee on Finance.

A QUESTION OF LOYALTY

Mr. McCARRAN. Mr. President, there has come to my desk a column written by Father James Gillis, entitled "A Question of Loyalty." This short essay is so calmly reasoned, that it cannot fail to appeal to the intellect of whoever may read it. I ask unanimous consent that the text of this column may be printed in the RECORD at this point as a part of my remarks.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

A QUESTION OF LOYALTY

(By James Gillis)

Out of the welter of debatable questions brought to the fore by the McCARTHY-Army imbroglio, I select one for consideration. It is a matter of concern to the conscience of any individual in the armed forces, or in a governmental department which demands an oath of loyalty of its employees.

Let us suppose that one such employee learns of certain goings on that may work to the detriment of the Nation. He communicates the knowledge to his immediate superior. Time passes and there is no evidence that the superior has transmitted the information to the higher ups. The wrong doing and the danger continue.

In the governmental employee's oath there is a clause which forbids the transmission of "classified" information to any "unauthorized" person.

But our man is convinced that if he continues to abide by the letter of the oath of silence, he may contribute to national disaster.

He feels in conscience bound to reveal what he knows to someone who is in a position to do something effective.

WHERE THE OFFENSE?

As it happens, a Senatorial committee is in process of investigating precisely the kind of abuse of which the governmental employee is aware.

So the employee decides to tell what he knows not to his wife, his neighbors, his companions, not to the newspapers, not to some loose-lipped news commentator and gossip purveyor but to the chairman of the senatorial committee investigating—now let us make it specific—Communist infiltration into Government.

That being the kind of danger the employee has in mind, he conveys what he knows to the Senator who is himself bound by oath not to use to the detriment of the Nation any knowledge that he may acquire.

Now tell me—I speak to professional moralists and to well educated citizens—wherein has the governmental employee offended? Unless I have misunderstood all that was taught me years ago concerning moral obligations, the employee has done exactly what he was bound in conscience to do.

He should be rewarded, not punished, promoted, not discharged. For there is a law above all rules, regulations, prohibitions, oaths of secrecy. The ancient Romans knew it. They had a motto, "Salus populi suprema lex"—"The welfare of the people is the highest law."

SHOULD BE REWARDED

Also, in our ethical system conscience is, in the last analysis, the ultimate norm of action. It must be an "informed" conscience, a careful, cautious, and, so to speak, conscientious conscience.

Acting on such a conscience, a man not only may but must disregard all other laws. Yet I have seen nowhere—even in Catholic publications—so much as a surmise that the "young Army officer" who passed on information to the McCarthy committee could possibly have been acting in accordance with that fundamental moral principle. I, for one, give him credit.

It is reported that the Army is hunting him out and that they have threatened to expel him if they find him. The Army accepted a known traitor, a Communist, gave him a commission, promoted him, and when it appeared that the lawfully appointed investigators were closing in on him the Army hurriedly gave him an honorable discharge. Yet the same Army threatens dishonorable discharge to an officer who did, or may have done, his patriotic duty. Treason is rewarded; devotion to duty and to conscience penalized.

In one of John Galsworthy's best plays, Loyalties, there is a thrilling exposition of what happens when one loyalty conflicts with another. Among the guests at a house party in the home of Charles and Lady Winsor, there are Dancy, a retired army captain; General Canynge; and a wealthy and aristocratic Jew called De Levis. Dancy, having lost heavily at the races and at the gambling table, robs De Levis of a thousand pounds. De Levis knows who has stolen his money. So does General Canynge. The general, anxious for the honor of the army, persuades De Levis not to prosecute.

HIGH LOYALTY

Three weeks later, De Levis, applying for membership in the Jocky Club, is blackballed. The captain had called him a d—— Jew, and De Levis had called Dancy a thief. Thereupon come the conflict of loyalties. The captain's lawyer drops the case because of loyalty to his profession. The general remains silent because of loyalty to the army. Winsor declines to speak because of loyalty to his concept of a host. The captain's wife is loyal to her husband. De Levis is loyal to his racial pride. "My race was civilized when you were all savages." he says. One and all, they are loyal to this and to that, but no one is loyal to truth and justice.

I read that play in 1922. It came back to me after all these years because of the coverup tactics of the Army. Loyalty to the Army is good, so is loyalty to the administration, but there is a higher loyalty to which no one seems to pay attention.

The coverup has been at this writing effective. We don't know even yet the name of officers at Fort Monmouth or in the Pentagon who promoted the Communist and gave him an honorable discharge. We don't know what was in the document conveyed by the Army officer to the chairman of the committee.

Loyalty to conscience, to the people, and to the Nation is smothered under a pile of lesser loyalties. Suprema lex salus populi; the supreme law, the welfare of the people, is forgotten.

PROPOSED SEVERANCE OF DIPLOMATIC RELATIONS WITH SOVIET RUSSIA

Mr. McCARRAN. Mr. President, since the introduction of Senate Resolution 247, to provide for the severance of diplomatic relations with Soviet Russia, I have received a great deal of mail touching on this subject. Most of this mail has favored the proposal.

I do not want to burden the Senate with even a sampling of this correspondence; but I do want to call to attention one letter which, on its face, gives such obvious evidence of sincerity that I truly believe every Senator will find it interesting.

I ask unanimous consent that the text of this letter, which came to me from Mr. Otto J. Ellik, of Brooklyn, N. Y., may be printed in the RECORD at this point as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BROOKLYN, N. Y., *June 30, 1954.*

Senator McCARRAN,
United States Senate,
Washington, D. C.

MY DEAR SENATOR: Allow me to congratulate you in your gallant fight with communism.

A couple of days ago I saw a short notice in papers about your demand to sever diplomatic relations with Soviet Russia. I came to this country as a war refugee 7 years ago. Although now a full-fledged citizen, I am not too well informed about political matters in this country. Anyway, I recall that a year or more ago I read about a plan in which you also advocated to terminate all ties with communistic countries.

I am not a politician. In old country I was a science teacher. However, I believe I understand communism. I have lived 2 years behind the Iron Curtain where I learned all basic principles of communism. On my own skin, of course, I had the luck to escape. However what I have seen and

know makes it impossible for me to enjoy life in comfort.

Mankind is deadly sick. All our ordinary problems—progress, culture, raising of children, etc.—are only of second importance. If we don't get well all will be over in a few years. Our Western World, our dearest values—God, truth, spiritual, cultural—will be dead and gone.

It is appalling how little people outside the Iron Curtain understand communism. It is appalling to see how right now those who are voted into power are leading the free world into destruction.

The overwhelming majority of American people are anti-Communist. The same is true about their representatives in Government. However, because of ignorance and complacency, every political grouping, every newspaper, almost every person has a different idea about methods how to fight communism. Such confusion makes any concerted and effective action impossible.

The grossest samples of our ignorance are the unnormal relations with communistic countries. There seems to be no difference at all as compared with our friendly countries. We trade with Communists, we invite them to international organizations, to cultural meetings, etc. Needless to say that such an attitude bereaves us from all moral factors in fight with communism.

I cannot understand how your approach, dear Senator, which is the only right one, has won so little ground. I don't wonder very much about politicians. They are often blinded by diplomats, who, as we know, are the greatest malefactors of human race. I wonder about religious and cultural organizations who should evaluate things from the standpoint of morals. Why they have not joined for a united action against our immoral ties with communistic countries is more than I can comprehend.

Once a paper published a picture how an American diplomat cordially shook hands with Andrei Vishinsky. I showed the picture to a woman refugee. "How would you like to shake hands with Vishinski?" She took a look at the picture and retorted angrily: "I would rather chop off my hand than to touch that bloody swine." And she furiously spat at the photo.

A mixed up, halfwit holdup murderer is a despicable monster, not worthy of human mercy. Could you shake hands with him? Probably not, neither could I. Vishinsky, a big wheel in history's greatest mass murder spree, is responsible for at least 10,000 murders. Yet we call him a foreign diplomat, we confer politely with him and treat him in any way as if he were an honest man.

How is such dualism possible? Because people don't understand communism. The angry refugee woman, a plain farmer's wife, understood it. To her communism did not mean those lengthy, well-worded definitions boys learn at Harvard. To her communism meant things she had seen with her own eyes: Crime, murder, violence, injustice, immorality.

Our main trouble, ignorance, seems to have historical background. What is communism? Most of answers would be: A political ideology, a political party, a certain form of government, etc. There are communistic states. The term "state" is in human mind automatically connected to term "law," of long, long experience. Since there are communistic states they have to be something lawful, etc.

Such conclusions are fallacious and obsolete. Present-day communism is nothing political. It is a crime. Communism is an international crime organization who under pretext of politics is fighting to enslave the world.

If I were a historian I would start a research as to where and when another state was so utterly lawless and criminal as today's Russia. It's hard to believe there ever was. Even in the old slave states at least national customs provided some security and justice.

Real progress in a man's life began when he first organized a state and made laws. There cannot be any real peace and cooperation in the world until we put up international laws and abide them. (Basic human rights, guaranties for peaceful cooperation, etc.) It's time we start to distinguish between lawful and unlawful states. The latter category is criminal and has to be treated as such.

A diplomat would say: "All this is hysterical, impractical, not up-to-date and realistic politics." Well, practical and realistic diplomats have run the world for the last 50 years. They have run it straight into hell. Only an idiot pays attention to what a diplomat says.

Please forgive my long letter. I am afraid I let me carry away. Please excuse also my deficient language.

I take the liberty to ask you for a favor. Please could you inform me are there any nonpartisan clubs or organizations who advance your ideas about the relations with communistic states. I would like to join one in hope to do my wee bit in a gigantic battle.

It's grand to know that in all darkness and evil there are such sturdy fighters for human cause as you are, dear Senator.

With best regards,

OTTO J. ELLIK.

ANTI-COMMUNIST LEGISLATION

Mr. McCARRAN. Mr. President, the Attorney General has been making a great deal of noise about the desirability of enacting some anti-Communist legislation.

In this connection, I invite the attention of Senators, and particularly the attention of the able majority leader, to the bill S. 23, Calendar No. 1540. This bill has been on the Senate calendar since June 7, when it was reported favorably from the Committee on the Judiciary.

In the hope that I may be able to induce the able majority leader to schedule this bill for debate in the Senate, I wish to point out some facts about the bill.

This bill would accomplish two things which have been recommended by the present administration, through its Attorney General. For one thing, it would prohibit members of Communist organizations from holding office or employment with labor unions. For another thing, it would let an employer fire a subversive employee without being held guilty of an unfair labor practice.

In this latter connection, the bill provides that no statute of the United States shall preclude an employer from discharging without liability an employee who voluntarily continues as a member of a subversive organization, designated as such by the Attorney General, or who has actively concealed his membership in such an organization, or who has refused to state to a duly constituted congressional legislative committee whether or not he is or has knowingly or willingly been a member of such an organization.

In the case of the ban against Communist officers or employees of labor unions, the bill would apply only to members of organizations found by a final order of the subversive activities control board to be Communist organizations; and the penalty would be applied to the Communist who continued in employment or in an office in a labor union. There is no penalty to be imposed upon the union itself.

I indicated, Mr. President, that this bill covered two recommendations made by the Attorney General. I do not mean to say that the bill is in response to those recommendations. As a matter of fact, the bill was introduced at the very beginning of this Congress, and long before those recommendations were made by the Attorney General. Furthermore, this bill is identical with another bill, S. 2548, of the 82d Congress, of which I also had the honor to be the sponsor.

What is involved here is very simple. By approving this bill, we shall be taking a long step in the direction of eliminating the power and influence and domination of the Communist Party in the field of labor and in labor organizations in this country.

I point out that enforcement of the proposed prohibition against the holding of office or employment with a labor organization by a member of a Communist organization, would be in the hands of the regular Federal law-enforcement officials; that is, in the first instance, the offices of United States attorneys throughout the Nation. Enforcement of the provision with respect to the right of an employer to discharge a subversive would come about in this way: Whenever a discharged employee went to the Labor Relations Board with a complaint that his discharge constituted an unfair labor practice, the employer would be able to defend by showing that the employee in question had voluntarily continued as a member of an organization designated on the Attorney General's subversive list, or had actively concealed his membership in such an organization, or had refused before a congressional committee to state whether or not he is or has knowingly or willingly been a member of such an organization.

I note the calendar print of the bill bears the imprint 83d Congress, 2d session. Actually it was introduced during the 1st session of this Congress, as the number clearly indicates, the actual date of introduction being January 7, 1953.

I hope that what I have said about this bill may help to induce my friend, the able majority leader, to tell us that he will schedule the bill for Senate action. I do believe that if the Senate is permitted to vote on this measure, it will be approved.

PROPOSED REORGANIZATION OF THE OFFICE OF THE PRESIDENT

Mr. McCARRAN. Mr. President, my reading of the Journal of the American Bar Association, and other professional journals, has been somewhat slowed up by the press of Senate business; and it was only this week that I came across a very important article which appears in the April 1954 issue of the ABA Journal. This article was written by Mr. C. Dickerman Williams, former General Counsel of the Department of Commerce. Its title is: "The Office of the President: A Reorganization Is Needed."

In this article, Mr. Williams is responsible for one of the outstanding understatements of the year when, in speaking of the personnel of the office of the President, he says:

The extent to which this large and key body of personnel operates without Senate or other congressional control is not generally appreciated.

In his article, Mr. Williams makes several excellent points. His No. 1 point is:

The personnel of the office of the President should be subjected to control by law with respect to their appointment, compensation, and duties.

In the course of his article, Mr. Williams analyzes the Harry Dexter White case, which he calls "a horrible example of how the present looseness of organization" in the White House staff may work in practice.

As Mr. Williams says in his article:

It may be argued that it makes little difference whether a task is performed or advice given by the officer nominally responsible or by someone else. The answer is that orderly government must be carried on according to law; the alternative is arbitrary executive power. A department head is subject to confirmation by the Senate; his rights and duties are prescribed by statute; he is provided by Congress with the staff and equipment necessary for the discharge of those duties. These safeguards do not apply to a presidential aide. His instructions may be most informal; they are issued at the pleasure of the President and may be inspired by the aide himself for the purpose of his own aggrandizement. The struggle for British liberty was largely to require the monarch to rely on advice from his lawful ministers, and to act through them.

I will not take the time of the Senate, Mr. President, to read further from this very fine article, but I intend to ask that the full text of the article may be printed in the RECORD.

I want to make two suggestions with respect to this subject matter. First, I wish to commend to the Committee on Government Operations a thorough study of this matter, with a view to formulating and reporting legislation to provide the desirable extent of control by law over the personnel of the office of the President. Second, I respectfully recommend and urge that the Hoover Commission consider the creation of a task force to go into this matter most thoroughly and make recommendations to the Congress.

I now ask unanimous consent that the text of the article by C. Dickerman Williams, to which I have referred, may be printed in the RECORD at this point as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE OFFICE OF THE PRESIDENT: A REORGANIZATION IS NEEDED

(By C. Dickerman Williams, of the New York Bar, New York City)

(The Office of the President, the President's personal assistants, has existed as a legal entity only since 1939, when President Roosevelt created it by Executive order. It is extraordinary because it has no statutory definition although its members, because of their access to the ear of the Chief Executive, exercise tremendous power. Mr. Williams points out the dangers inherent in such an organization, citing cases where Presidential aides have overruled even Cabinet officers. The recent controversy over Harry Dexter White may indicate the dangers inherent in the present system. Mr. Williams, who was General Counsel of the Department of Commerce under Secretary Sawyer, urges a general reorganization of the White House.)

A disquieting trend in public affairs has been the increasing concentration of authority in the hands of the President and his immediate entourage. Leading to this result have been several subsidiary trends: to government as compared with private enterprise, to the National Government as compared with the State governments, to the executive branch of the National Government as compared with the legislative and judicial branches, and, within the executive branch, to the personal establishment of the President as compared with the departments and agencies whose powers and duties are defined by law.

This paper is concerned solely with the development last mentioned. Serving as General Counsel of the Department of Commerce under former Secretary Charles Sawyer, the writer was impressed with the size, power, and unregulated character of the White House, as the Executive Office of the President is usually called. This organization was created as a legal entity by President Roosevelt on September 8, 1939, by Executive Order 8248.[1] It has become what the "court" or "palace" was in the monarchies of the past—that is to say, a large group of people surrounding the person of the chief of state, people who for the most part do not have, or are not limited to, duties clearly defined by law, but because of their ready access to the holder of enormous power, have great influence on events. History demonstrates that such influence is almost always exercised badly, that courtiers obstruct the work of responsible ministers and legislative and popular leaders and often urge upon the ruler extreme policies that have harmful and sometimes disastrous consequences.

Undoubtedly, if unfortunately, the importance and complexity of modern government require that the President have a fairly large personal organization. The evils of the existing arrangement can, however, be greatly reduced. That is to say, the Office can be subjected to legal control and much of its work transferred to the regular executive departments.

The purpose of this paper is to demonstrate and illustrate the existing evils and to propose needed reforms. As Congress last July created a Commission on Organization of the Executive Branch,[2] the way to reorganization is open.

One constant objective runs through these proposals; curtailment of the tendency of the President to develop a personal staff of advisers and examiners, men not subject to Senate confirmation and relatively unknown to the general public, who review and audit the work of the departments, and who, in some instances, through constant and ready access to the President, overrule or even supersede department heads, and who at other times accomplish little or nothing, serving only to confuse by needless activity.

A conception of the extent of this development may be gained by comparing the number of personnel in the Office of the President at the end of the Coolidge[3] and Truman administrations. In February 1929 there were 42; in November 1952 the corresponding figure was 1,181, an increase of 25 times. As there were only 597 at the time of the death of President Roosevelt, the absolute increase in the last few years has been very great. According to units within the Office at the end of various administrations, the figures are:

	White House staff proper	Bureau of the Budget	Coordinating agencies
Coolidge	42	(1)	
Roosevelt	67	390	140
Truman	245	495	441

[1] Then in Treasury.

The presentation of the writer's proposals can best be accomplished by stating each and then discussing the reasons for it.

1. The personnel of the Office of the President should be subjected to control by law with respect to their appointment, compensation, and duties.

The extent to which this large and key body of personnel operates without Senate or other congressional control is not generally appreciated.

ACCESS TO PRESIDENT GIVES POWER

The Constitution requires the advice and consent of the Senate to the appointment of all officers of the United States, except that Congress may in its discretion dispense with this requirement in the case of inferior officers.[4] The influence that flows from access to the President of the United States makes the members of the White House staff anything but inferior officers. It is indeed anomalous that Senate confirmation is not required for such a powerful officer as Director of the Budget, who reviews the proposals of members of the Cabinet, but is necessary for the appointment of a second lieutenant in the Regular Army, the postmaster of a village or a sanitary engineer in the health service. It is similarly anomalous that Senate confirmation should be required for the Assistant Secretaries of the various departments and not for the assistants to the President. How are the latter inferior to the assistants to members of the Cabinet? Congress should require Senate confirmation of all the principal employees of the Office of the President and limit their terms of office, albeit with eligibility for reappointment.

Again, Congress has strictly specified the compensation, or the standards of compensation, of all Government officers and employees from the highest to the lowest—all, that is, with one exception: the employees of the White House. For them Congress customarily appropriates large sums to be paid "at such per diem rates for individuals as the President may specify, and [for] other personal services without regard to the provisions of law regulating the employment and compensation of persons in the Government service * * * [the funds used] to be accounted for solely on [the President's] certificate."[5]

Although it cannot be said that any President has abused this power, the provision seems unconstitutional in that it effects a delegation of the legislative power of appropriation without limiting standards (*Panama Refining Company* v. *Ryan* (293 U. S. 388)). Certainly it is an abdication of the "power of the purse," long considered the

[1] Fed. Reg. 3864. Resolution 2, 78th Cong., adopted June 7, 1939, approved Reorganization Plan No. 1 of 1939 (title 5, U. S. Code, sec. 133t) which referred to the "Executive Office of the President" but did not define it. The President's "Office" was then what it always had been, rooms where the President worked with clerks and secretaries. Executive Order 8248 made it a legal entity in September of that year.

[2] 4 Public Law 108—83d Cong.

[3] As already noted, the Office did not become a legal entity until Executive Order 8248 of September 8, 1939.

[4] Art. 2, sec. 2.

[5] E. g., title I, Public Law 422, 82d Cong.

most vital safeguard against arbitrary government.

The third and perhaps most important respect in which the Office of the President requires regulation is the specification of duties. The jurisdiction, duties, and powers of the departments, bureaus, and other agencies have in general been carefully set forth by acts of Congress. But the Office of the President has never been so defined, although some of its units have been, such as the Bureau of the Budget. Indeed, strictly speaking, the Office has never been created as a permanent organization like other Government agencies. The Office has no organic act. It exists only by virtue of annual appropriations and President Roosevelt's fiat.

Moreover, there is no public document specifying in any detail the duties of the various members of the White House staff. Anyone who has business to do with, say, the Under Secretary of Commerce for Transportation can go to the Federal Register and read a formal departmental order defining that officer's responsibilities at length.[6] President Roosevelt's decree merely provides that the staff shall "assist" him and maintain liaison with Government agencies, press, and public.

HARRY DEXTER WHITE CASE IS HORRIBLE EXAMPLE

A horrible example of how the present looseness of organization may work in practice is provided by the Harry Dexter White case.

According to former President Truman, the commission to White was issued in order to safeguard the investigation of the Silvermaster spy ring. But who told Mr. Truman that such a course of action was necessary or desirable? It is hardly conceivable that he reached such a conclusion unless so advised by one or more of his associates. Yet the evidence so far available does not identify any adviser who took this view. Mr. Hoover, who was in charge of the investigation, has expressly denied giving such advice. Secretary Byrnes says that after his interview with the President he was left with the impression that the President would forestall the appointment. Attorney General Clark, we learn from both Messrs. Hoover and Caudle, wanted to prevent White's assumption of office. Secretary Vinson, too, Mr. Hoover says, was against the appointment, although he feared that after the Senate's confirmation White had a legal right to the commission—a very different consideration from the possibility of danger to the success of an investigation. (Secretary Vinson's fear was obviously an initial reaction which only a little research would dispel. There is a formal and most persuasive opinion by Attorney General Stanbery (12 Op. Atty-Gen. 304) that the President may reconsider an appointment after Senate confirmation. *Marbury* v. *Madison* (1 Cranch 50), sometimes mentioned as holding the contrary, may be distinguished on two grounds; first, the commission had been signed and the petitioner was merely trying to get it; second, the office involved was judicial, that is, beyond the removal power of the President. There is a dictum in *Marbury* v. *Madison* that the President may withhold even a signed commission from one appointed to the executive branch as an incident of the power of removal.)

Now it also is clear that Mr. Truman lacks a keen recollection of the incident. His first comment was that he had never read an FBI report on White; his second, that White had been dismissed as soon as it became known that he was disloyal. His telecast explanation was obviously a reconstruction made after a study of the records. With the best will in the world, it is extremely difficult to be accurate under such circumstances. The difficulty would be acute for anyone who at the time had been living the crowded life of the President of the United States and would be doubly so if the reconstruction were attempted under the pressure that existed in this case.

The theory that President Truman would willfully disregard such a report is also untenable. Whatever Mr. Truman's faults, the Communist infiltration of the Government took place under the Roosevelt administration, not the Truman administration. Undoubtedly during the Truman administration some agencies were not sufficiently prompt and vigorous in removing them, but others were vigilant. So far as this writer is aware, all Government employees who had been identified as spies were dismissed sooner or later, and before the end of the administration. Attorney General Brownell has obtained no espionage indictments against Government employees and apparently does not regard himself as able to do so under existing legislation.

In short, the departments with responsibility, all headed by well-known public figures, were unanimously in favor of one course of action, and yet a different course of action, extraordinary and contrary to usual policy, was adopted.

Another explanation, therefore, seems possible—that some employee of the Office of the President, secretly a Communist or Communist sympathizer and not yet identified, may have been the source of unscrupulous advice to sign the commission, or may have secured the President's signature without realization by Mr. Truman of the nature of the document he was signing, or, indeed, may have forged the signature.

Communist penetration of the Office of the President during the Roosevelt administration, not rooted out by 1946, is a possibility that cannot be lightly dismissed. The Communists sought to penetrate every organization of importance. Would they have ignored the Office of the President? The name of Lauchlin Currie, administrative assistant to the President from 1939 until he was dismissed on June 30, 1945, has appeared repeatedly in testimony concerning the Silvermaster espionage ring. White testified that Currie was his good friend. They both had taken graduate economics at Harvard at the same time; both entered the Treasury as economists in the year 1934 and had had brilliant careers in government thereafter. May not Currie, during his 6 years at the White House, have sponsored the employment there of Communists or fellow travelers in positions that would have been minor apart from their close association with matters of transcendent importance? Also, Mrs. Roosevelt and Harry Hopkins were at times friendly with Communists. May not the same question apply to them? And if Communists got in, when were they put out? For if they were still there, they may have had an opportunity to effectuate the White appointment.

Like all busy men, President Truman relied extensively on his staff. If one of them advised him on the White affair, he would hardly be able to remember it. He did not at first even recollect his meeting with Secretary Byrnes.

Further, it has been reported that the President must sign 600 documents a day. He can hardly read each one carefully. Conceivably some employee, without the President's knowledge, may have designedly or carelessly put the White Commission into the pile of documents for his signature.

It was rumored in Washington during the Truman administration that, because the President's fingers were so cramped by the signing of documents to which the law required his signature, he had authorized a clerk to sign his name to relatively unimportant personal correspondence in a script resembling the President's own. The possibilities of abuse of this practice, if it existed, are obvious.

In an interview broadcast by radio on the evening of November 29, 1953, former Ambassador Harriman expressed doubt that President Truman had consciously signed the effusive letter to Mr. White that went out over his signature on the occasion of Mr. White's resignation from the International Monetary Fund. No one had a better opportunity than Ambassador Harriman to observe White House procedures. And if the President did not consciously sign that letter of appreciation, is it not also possible that he did not consciously sign the commission?

Although the White case may provide a sensational example of the evil of the present situation, perhaps even more dangerous to constitutional government is the tendency of the personnel of the office of the President to usurp or interfere with the work of the executive departments.

ORDERLY GOVERNMENT MUST CARRY ON ACCORDING TO LAW

It may be argued that it makes little difference whether a task is performed or advice given by the officer nominally responsible or by someone else. The answer is that orderly government must be carried on according to law; the alternative is arbitrary executive power. A department head is subject to confirmation by the Senate; his rights and duties are prescribed by statute; he is provided by Congress with the staff and equipment necessary for the discharge of those duties. These safeguards do not apply to a Presidential aide. His instructions may be most informal; they are issued at the pleasure of the President and may be inspired by the aide himself for the purpose of his own aggrandizement. The struggle for British liberty was largely to require the monarch to rely on advice from his lawful ministers, and to act through them.

In recent years, Dr. John R. Steelman was a conspicuous example of the Presidential assistant who supersedes a Department head. Secretary of Labor Tobin was head of an executive department whose statutory purpose is "to foster, promote, and develop the welfare of the wage earners of the United States, to improve their working conditions, and to advance their opportunities for profitable employment."[7] Secretary Tobin had been appointed by the President, sat in his Cabinet, and held office at his pleasure. Yet Dr. Steelman handled major labor matters on behalf of the President. So far as could be observed, from the press, from gossip in Government circles, and by the writer personally, the President relied on Dr. Steelman's advice when questions arose in that field.[8] What is criticized is the system, not the individuals. The President had no intention of undermining the Constitution; he simply found that he worked more readily with Dr. Steelman than with Secretary Tobin. But the result was the disregard of procedures contemplated by law and, consequently, irresponsible government.

Another illustration is the less publicized intervention of Admiral Dennison, the President's naval aide, in the controversy over the

[6] 18 Federal Register, p. 1216.

[7] Title 5, U. S. Code, sec. 611.

[8] Perhaps the outstanding labor problem of the Truman administration was the dispute in the steel industry leading to the seizure of the mills on the evening of April 8, 1952. The writer was present at a conference held on the steel situation that afternoon. Dr. Steelman presided. The Secretary of Defense, the Secretary of Commerce, the Acting Attorney General, the Under Secretary of the Treasury, the Economic Stabilization Administrator, the Director of Price Stabilization, the Defense Production Administrator, and various assistants were all there, but no representative of the Department of Labor.

steamship *United States* and in other maritime matters. By the Merchant Marine Act of 1936, as amended by Reorganization Plan No. 21 of 1950, Government responsibility for the administration of merchant-marine subsidy contracts is confided to the Secretary of Commerce. Nevertheless Admiral Dennison saw fit to interest himself in the contract for the steamship *United States*. He held meetings on the subject to which the Department of Commerce was not invited. Letters appeared over the signature of the President of which the Department had no advance notice. It should be emphasized that in this instance, unlike the labor illustration, the Secretary of Commerce was actively handling the matter, and doing so with the knowledge and consent of the President. Admiral Dennison also concerned himself with maritime-tax policy, a subject long under consideration by the Departments of Commerce and Treasury. In the latter part of 1952, the President suddenly asked for elaborate reports of their positions, presumably at the instigation of Admiral Dennison. At that time the views of the incumbent Secretaries had become supremely unimportant, and it was hard to believe that the President was then taking personal interest in the problem. There was no statutory basis for Admiral Dennison's activity, but the magic words "White House" commanded attention. No particular harm resulted from Admiral Dennison's officiousness except that the time of high officers of the Government was unnecessarily occupied.

It may be thought that these forebodings are a result of experience in the so-called messy Truman administration, that in future administrations the caliber of personnel will be so high that such evils will be avoided. Perhaps. It is not only in the Truman administration, however, but universally that men are prone to self-confidence, to think that they can handle problems better than those who have the responsibility for them, to enjoy getting in on the act, and to make use of a ready hearing by the boss. Nor are these failings, if they are to be called that, confined to incompetents. Admiral Dennison was a man of ability; the President's military aide enjoyed a higher reputation as an amusing companion than as a serious student of military affairs. Yet there were times when the problems of the merchant marine would have been far simpler if the naval aide had also been an officer of that type.

A remedy already proposed is regulations specifying the duties of the President's assistants in some detail. Insofar as such duties relate to matters within the jurisdiction of an executive department, the regulations should be worked out with the collaboration of the department head. Also, the regulations should be published in the Federal Register.

Underlying all remedies must be the attitude of the President. He must be conscious of the difficulties of overlapping jurisdictions, of the vast power which he grants merely by intimate association, of the extraordinary need for self-restraint. When the President concludes that a department head is not equal to the responsibilities of his office, as apparently happened in the case of Secretary Tobin, the President should dismiss him, painful as the episode may be to all concerned. If the fault of the department head is in no way a lack of earnestness or loyalty, the President can and undoubtedly would make the departure a graceful one. And the President should avoid the appointment of assistants who might be, or appear to be, or might try to become, rivals of department heads.

2. The Bureau of the Budget should be transferred to the Treasury Department or to Congress, or partly to each.

The Bureau is the largest unit of the Office of the President, and, with the exception of the Division of Legislative Reference,[9] the one that least deserves to be there.

That the recommendation in respect of this Bureau may be understood, it is necessary to review briefly both past and present practice in the handling of appropriations and also the factors of expense for which appropriations are made.

It is not disputed that only Congress may make appropriations. The Constitution expressly so provides.[10] The problem relates rather to the proceedings leading up to their enactment. As has long been recognized, Congress requires proposals known as estimates, from the executive branch. Prior to the Budget and Accounting Act, 1921,[11] department heads sent their estimates to Congress through the Secretary of the Treasury who did not attempt to revise them. The act of 1921 directed the President to submit to Congress at the beginning of each regular session a budget setting forth, among other things, "Estimates of the expenditures and appropriations necessary in his judgment for the support of the Government for the ensuing fiscal year." To enable the President to comply with this direction, the act created the Bureau of the Budget as a unit of the Treasury Department and required each "department and establishment" to submit its estimates to the Bureau not later than September 15 in each year.

By Reorganization Plan No. 1 of 1939,[12] President Roosevelt transferred the Bureau to his own office. He said in his explanatory message to Congress that he was thereby "keeping the tools of American democracy up to date."[13] Unfortunately President Roosevelt had a tendency to confuse democracy with his own personal power.

Now there are two basic factors represented in every estimate: (1) projects and functions, and (2) administrative cost. The cost of projects and functions may be reduced by modification or elimination; the administrative cost may be reduced by greater efficiency. Insofar as the total budget is concerned, the number and importance of the projects and functions is all-important; the efficiency with which they are administered makes relatively little difference.[14] Undoubtedly efficient administration can save large sums expressed in absolute terms, but substantial saving to the taxpayer must be in respect of projects and functions.[15] That is to say, what causes high taxes are armament, foreign aid, pensions to veterans, agricultural and other subsidies, dams, and the like, as distinguished from inefficiency in the administration of such programs—not that every effort should not be made to secure the greatest efficiency.

Now there is every reason for the President to review the projects proposed by his department heads. Generally such projects can be readily understood. If the President thinks his department head has proposed too many or too elaborate projects, by all means let the President trim them. Clearly, too, the President needs a subordinate to assist him in this task, someone who can familiarize himself with the various projects and advise the President.

On the other hand, it is as a practical matter impossible for the President, or any outsider, to form an intelligent opinion as to the number of personnel needed to administer a given project or function. Only the chief administrators can do so, and, as everyone ever connected with a large organization knows from experience, the best they can do in advance—that is, by way of estimate—is to make a good guess.

When the departmental estimates go to the Bureau a group of examiners attempts to appraise them as to both substance and administrative efficiency. The latter subject comes down in effect to the question of the number and rank of the personnel to be engaged in administration. If the Bureau reduces the estimates to more than a nominal extent the departments are resentful. They think that they best know their own business. The departments particularly dislike reductions by such lowly figures in the Government hierarchy as Bureau examiners. The reaction of the departments to the work of the Bureau is well illustrated by several passages in The Forrestal Diaries.

At page 237, Secretary Forrestal, writing of a Cabinet meeting, says that the Secretary of the Interior made "a protest against the methods by which the people down the line in the budget not much above the status of clerks make allocations within departments between various bureaus and offices of that Department." Secretary Forrestal continues: "With reference to the people in the budget, in my talk with the President yesterday I said that we had been quite uneasy under Harold Smith's administration of the Bureau, about the fact that a young man recently a seaman second class in the Navy, who had been a student of administration at the University of Colorado, * * * had been making up our figures" (i. e., the budget figures of the Department of the Navy). At page 429 et seq. is depicted a controversy between Mr. Forrestal, who had meanwhile become Secretary of Defense, and the Bureau of the Budget, over the 1948–49 budget. The editor of the Diaries, Mr. Walter Millis, comments on a reduction proposed by the Bureau as follows, at page 430: "Suddenly it appeared that it was Mr. Webb (then the Director of the Bureau), who was in control of American military policy rather than the Secretary of Defense."

DIRECTOR IS NOT IN GOOD POSITION TO OVERRULE DEPARTMENT HEAD

The picture of a seaman second class, who takes a college course in administration and is assigned the duty of revising the appropriation proposals made by the highest officers of the Navy, will strike a familiar note with anyone who has participated in the budget-making process as at present conducted.[16] But even the director himself is not in a good position to overrule a department head; the director is of lower rank and without responsibility for the subject.

In consequence, the net result of the bureau activity is "sound and fury, signifying nothing." Whenever a substantial cut is made, it is the President himself who makes it. Obviously the President can act only with respect to good round numbers—he cannot spend time deciding how many grade 12 scientists there should be in the Bureau of Standards. And there should be better ways both of getting these major questions to the President for decision and of reviewing

---

[9] The criticisms of this paper do not apply to the Bureau of the Budget's Division of Legislative Reference, which supervises the expression of departmental comment on pending legislation. This Division has been well-run and should remain at the White House.

[13] Title 5, U. S. C., sec. 133t supp.

[14] A number of high officials of the Eisenhower administration have learned this fact—and other things—the hard way.

[15] The worst feature of excessive personnel in program administration is the increased pressure thereby created to keep the program in effect after it has outlived its usefulness.

[16] This is an extreme example. The point is that the budget examiners have neither the rank nor the experience of the department officials who prepare the estimates.

the department estimates from the standpoint of efficiency.

In the writer's opinion, the Bureau of the Budget should be transferred back to the Department of the Treasury and confined to review of major projects and functions. If the Secretary of the Treasury tells a department head that the Government cannot afford a given proposal, that advice would probably be effective; it certainly would be taken with better grace and more seriousness than a ruling of the Bureau of the Budget. But if the department head was insistent, the President could decide between him and the Secretary of the Treasury. As is evident from the Forrestal diaries, a department head would be far more willing to be overruled in favor of the Secretary of the Treasury than in favor of the Bureau of the Budget.

An argument not without force could be made for transferring the Bureau to Congress or the General Accounting Office. Congress is the appropriating authority. The department heads are the President's appointees in their respective areas of responsibility; they are his men, and not the representatives of a foreign power or even of another branch of the Federal Government. One would think that they could carry out his financial policies without the necessity of a special screening officer, and that the screening should be done by the appropriation authority. A precedent is the transfer of the audit of expenditures from the Department of the Treasury to the General Accounting Office effected by the Budget and Accounting Act, 1921. The General Accounting Office functions as an arm of Congress. Limitations of space forbid discussion of possible objections to this proposal.

As for the detailed examination of such features of departmental estimates as relate to efficiency of administration, number of personnel and the like, this question can probably best be dealt with by strengthening the authority of the departmental budget officers—in other words, by more organizational emphasis on economy within the departments. The departmental budget officer should have more power to cut down administrative costs and should be less concerned with shepherding the department estimate through the Bureau of the Budget and Congress with the least possible damage. The conscientious departmental budget officer, such as the one at the Department of Commerce when the writer served there, could be more effective without the present reviewing process than he is with it.

3. When a project or problem cuts across departmental lines the President should establish an interdepartmental coordinating committee, and not a parallel organization within his own office.

It frequently happens that a given problem may come within the jurisdiction of two or more departments. Unfortunately the solution frequently adopted has been to create a large organization, or series of organizations, within the Office of the President—organizations sometimes called coordinating agencies which in fact parallel, duplicate, or supersede the departments supposedly coordinated. An example of this evil was the Office of Defense Mobilization, a unit of the Office of the President, and subordinate agencies as they existed in 1950–53. Another organizational monstrosity, run from the White House, although only in small part in the Office of the President, was the Economic Cooperation Administration, later known as the Mutual Security Administration, through which the United States had a double set of embassies throughout a large part of the world, and foreign aid was divorced from the negotiation of American objectives. In Paris there were four ambassadors. Because of the harmonious personal relations between Messrs. Acheson and Harriman, the results were not so bad as might have been expected.

An example of a parallel organization in the Office of the President is the Council of Economic Advisers. Probably the Department of Commerce is best qualified to advise the President on economic trends. The Office of Business Economics of that Department has long made economic studies with such success that it enjoys a high reputation. The same Department's Bureau of the Census has been engaged in statistical work since the creation of the Federal Government and is also highly regarded. On the other hand, the agricultural interests and the labor unions would, not without reason, resent having a department primarily concerned with the welfare of the business community as sole economic adviser to the President. Also the Bureau of Agricultural Economics of the Department of Agriculture and the Bureau of Labor Statistics of the Department of Labor are expert in their respective fields. Yet under the Truman administration none of these departments was represented in the formulation of economic advice to the President except insofar as the Council used their statistical studies.

The problem of economic advice to the President would more properly be handled by an interdepartmental committee of these departments and also the Department of the Treasury.[17] In order to avoid an appearance of preferring any department or, what is perhaps more important, the economic interest represented by any department, there might be a single economic adviser from the Office of the President to act as Chairman. Such organization would reduce the personnel of the Office of the President, assure recognition of the departments with special responsibilities in the field of economics, and tend to prevent the proposal to the President of extreme advice or fanciful schemes, carrying with them possibilities of the most dangerous consequences.

An existing organization which should be a model for the handling of this type of problem is the air coordinating committee. This committee includes representatives of the departments having responsibilities in the field of aviation. The chairman is a departmental officer appointed by the President; the staff consists largely of employees of the interested agencies; these employees concern themselves with the work of the committee only when necessary. The small full-time staff is appointed by the entire committee, carried on the rolls of the Department of Commerce, but paid with money contributed by all departments represented on the committee. In this way there is no duplication of personnel; all agencies have a hearing; the President has available to him a single officer who is familiar with the combined thought of those in Government responsible for the subject.

THE SUBJECT DESERVES MORE ATTENTION

The preceding discussion is, of course, not a complete catalog of the difficulties and dangers of the present organization nor of the possible solutions of the problem. The subject is complex and deserves more attention than could be given here.

Possible objections to the point of view which has been expressed are these: The President has responsibility for the executive branch; should he not be allowed to run it to suit himself? What reason is there to think that the department heads whom a President appoints will be better men than those whom he has in his immediate office?

The answers to these questions are several. The President must rule according to law; the alternative is dictatorship. The matter is one of checks and balances. The Senate has consistently shown itself willing to confirm in the absence of clear, affirmative disqualification.[18] It is true that the President is held responsible for administration, but he must play the game according to the rules.

Why Presidents and rulers generally do better to rely upon the advice of heads of departments and ministries than upon that of personal staffs is a fascinating speculation. Generally speaking the former are men who have already achieved distinction and perspective; they are not so dependent upon the chief of state for the advancement of careers. They have more dealings with the public and legislative bodies, and therefore better understand public and legislative opinion. The personal aide, subconsciously perhaps, sees his own fortunes tied up with the aggrandizement of the chief of state and tends to develop a fanatical ambition for him. These generalizations do not always apply. In the Roosevelt administration two department heads, Messrs. Morgenthau and Hopkins, functioned like personal aides. Both had no stature apart from the favor of the President and no capacity to deal with the problems of their respective departments, Treasury and Commerce.[19] Both continually invaded other areas of responsibility. The famous Morgenthau plan, for instance, whatever its merits, was a typical palace maneuver. That is, its proponent made use of his ready access to the chief of state to urge a radical policy concerning a subject for which he had no responsibility. Appointments like those of Morgenthau and Hopkins to head departments are, however, unusual; such men are more frequently appointed to the personal staff. On the other hand, able and conscientious public servants are constantly appointed to the personal staff; unfortunately the palace atmosphere subjects them to unwholesome pressures.

In Great Britain, it was determined at a cost of two revolutions that the chief of state must accept the advice of the legislature. Recognizing the difference between a hereditary monarch and an elective President, the framers of the Constitution adopted a far less stringent control over the appointments of our chief of state, requiring merely the consent of the Senate. Any suggestion that the Constitution under the inferior officers provision contemplated exemption from this requirement for the immediate staff of the President cannot be entertained for a moment. The framers were entirely familiar with the evils of palace government, much more so than the educated men of the present day. They were well aware that those who had easy access to the chief of state were not inferior to village postmasters and sanitary engineers.

Needed reforms should not be explored in any spirit of hostility to the President. Both Messrs. Eisenhower and Truman inherited this apparatus; they did not create it, and probably none of the considerations advanced in this paper has even occurred to them. It should be frankly recognized that the enormous accretions of power to the President which have taken place in the last few years have created new problems which deserve careful study if constitutional government is to be preserved.

[17] Since this paper was originally written, a step has been taken in the suggested direction by the creation of an advisory board, including representatives of the departments.

[18] Insofar as service in Washington is concerned. The Senate has been jealous of appointments to service in particular States.

[19] Which is the reason why Mr. Morgenthau was such an easy mark for Soviet Agent Harry Dexter White.

THE FARM ISSUE

Mr. BUTLER. Mr. President, what has been referred to as the "farm issue"

is of vast importance to our national economy. This very issue has been debated throughout this session of Congress and we must soon make our decision. I have previously indicated, by means of my weekly newsletter to my constituents in Maryland, that I wholeheartedly support the President and Secretary Benson on their farm program. For this reason, and because I am firmly convinced that the interest of our farm citizens will be best served by that program, I was gratified to receive a letter from the president of the Maryland Farm Bureau which supports my conclusion. Mr. President, I recommend this letter to my colleagues and ask unanimous consent that it be printed in the body of the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MARYLAND FARM BUREAU, INC.,
Baltimore, Md., June 25, 1954.

Hon. JOHN MARSHALL BUTLER,
Senate Office Building,
Washington, D. C.

DEAR SENATOR BUTLER: I am glad for the privilege—as suggested in your letter of June 22, to comment further regarding my observation of the reaction of Maryland farmers whenever they are actually brought face to face with control programs on their farming operations.

Probably nowhere else do farmers practice greater diversification on their crop program than in our small State of Maryland. As one with 35 years' experience, I am reminded as I look back through the past years that my present crop schedule is entirely different than during that earlier period. Freedom to choose and decide what seemed best to undertake for the year ahead without any regard whatsoever for the operation of the years past provided the greatest incentive for progress during my experience. Whatever success I have achieved in farming derives from that basic principle.

Control programs must necessarily curtail that privilege. History of past years' production becomes the limitations beyond which farmers cannot go, even though factors in their particular situation would normally assure the plan to be according to good business management. Our farmers have never been forced to deal with situations in the past comparable to those we face at the present time. Unforeseen circumstances came along at the opportune time to permit the waiving of some of the regulatory features of our previous programs and I feel that this is giving some farmers of our present day the false hope that the control features of a high rigid program can somehow be avoided again.

Even today with the limited regulations in our corn program we are hearing numerous expressions of dissatisfaction—such as evidenced by Mr. Ingwalson's letter which I enclosed in my letter of recent date.

We must bear in mind, however, that a very large majority of our farmers express their disapproval of a high rigid support program at every opportunity. They foresee the handicaps involved in the controls necessary to meet present-day situations. They also very well understand that as attractive as prices may be, it represents only one factor in the determination of net income.

The necessary limitations on the right to produce will bring about a greater loss in net income in most instances than would result in a lesser price as possible under the flexible program.

Without question the flexible support program as recommended by the administration will best serve the long time interests of farmers and consumers alike.

This, of course, is only one part of a sound farm program, which must also include the supervision of diverted acres, along with a sound plan for conserving and building our land and water resources. We believe this is well provided for in the soil fertility bank plan. There are many other important aspects of this problem which space does not permit covering.

The most thoughtful farmers whom I know are fully convinced that every means should be used to encourage farmers to exercise self-discipline in meeting this problem rather than to continue to perpetuate evils we have created under the program of the past few years.

Sincerely,

WILSON A. HEAPS,
President, Maryland Farm Bureau, Inc.

DROUGHT CONDITIONS IN TEXAS

Mr. JOHNSON of Texas. Mr. President, it is probable that the recent dramatic story of the disastrous floods along the Rio Grande has diverted attention from the fact that some areas of Texas are more seriously affected by drought conditions now than at any time in the past several years. That appraisal is the statement of the Governor of Texas in a telegram sent to me yesterday.

Texas Agriculture Commissioner John C. White is in Washington this week to confer with Department of Agriculture officials about the possibility of aid for farmers and cattlemen in these drought-stricken areas. Commissioner White has reported to me that conditions are very serious in a number of central Texas counties.

Range conditions are the worst in the history of the cattle industry in this area.

There is practically no grass left. Cattlemen already have had to begin supplemental feeding of livestock.

The harvest of oats and other small grain was very scant. In most cases, the grain harvested was not enough to pay the expenses of making the crop.

The corn crop is virtually a total loss.

Water supplies are dangerously low at several points in these central Texas counties.

The cattlemen in these counties urgently need protein supplements and roughage or hay to sustain their breeding herds. If these cattle breeders are forced to sell their foundation stock, it will represent economic waste of the most flagrant kind.

The present cutoff date for the national drought relief protein feed program is July 15—Thursday of next week. That date can be extended by administrative decision.

It either should be extended, or a separate program should be set up for the assistance of these counties, which after 4 years of drought conditions are in a critical and even desperate situation.

Such action is vitally necessary.

I have received telegrams from officials in several of these counties, setting forth the conditions that exist. I ask unanimous consent that the text of these telegrams be appended to my remarks in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

AUSTIN, TEX., *July 7, 1954.*

Hon. LYNDON B. JOHNSON,
United States Senator:

I have just wired the Secretary of Agriculture as follows:

"A number of counties in central Texas are more seriously affected just now by drought than at any other time in the past several years. In my judgment, it is vital and urgent that some steps be taken to provide relief either by the extension of the emergency feed program or by the inauguration now of new program that would give the assistance so desperately needed. I respectfully urge and recommend that steps be taken by the United States Department of Agriculture to give assistance to this emergency. High regards."

I know you will be glad to take appropriate steps to encourage action by the United States Department of Agriculture which will provide relief in this emergency situation. Kind regards.

ALLAN SHIVERS,
Governor of Texas.

AUSTIN, TEX., *July 8, 1954.*

Hon. LYNDON B. JOHNSON,
United States Senator,
Washington, D. C.:

Appreciate so much your message regarding drought conditions and your efforts in bringing matter to attention of USDA officials. The affected counties now advise me that their most serious need is for protein feed and they earnestly hope that program can be continued or reopened after July 15. Kind regards.

ALLAN SHIVERS,
Governor of Texas.

GOLDTHWAITE, TEX., *July 7, 1954.*

Hon. LYNDON JOHNSON,
United States Senate,
Washington, D. C.:

Drought conditions extremely serious; crops ruined; ranges dry. Help needed to restore county to emergency drought relief.

COMMISSIONERS COURT OF MILLS COUNTY,
JOHN L. PATTERSON, *County Judge.*

GATESVILLE, TEX., *July 7, 1954.*

Hon. LYNDON JOHNSON,
Senator, United States Senate,
Washington, D. C.:

We urge your support in extending the national drought emergency program and request that Coryell County be included on the active list for Federal aid for drought relief. Letter will follow.

E. PRICE BAUMAN,
President, Gatesville Chamber of Commerce.

GATESVILLE, TEX., *July 7, 1954.*

Hon. LYNDON JOHNSON,
Washington, D. C.:

Please extend drought emergency feed program and include Coryell County, Tex. Foundation herds are having to be sold. Breeding herds lost. Pastures are 15 percent of normal condition. Heavy grasshopper damage. Grain crop way below normal.

CORYELL COUNTY FARM BUREAU,
R. A. HEMPEL, *President.*

SAN SABA, TEX., *July 7, 1954.*

Hon. LYNDON JOHNSON:

As 1 of the 9 livestock and farming counties in compact area in central Texas completely missed by recent and earlier rains where pastures were burned to crisp and feed crops completely destroyed, we urge you use every reasonable means to prevent national drought relief protein feed program being closed July 15 or have separate program

set up for these counties after 4 years drought condition now more desperate and critical in these 9 counties than at any time. Stock feeding resumed this week.

M. W. TRUSSELL,
San Saba County Judge.
A. B. FORD,
County Agricultural Agent.
J. E. MCCOURY,
Chairman, San Saba County Drought Committee.
L. P. COBERN,
Secretary, County Chamber of Commerce.

GEORGETOWN, TEX., *July 7, 1954.*

Senator LYNDON B. JOHNSON:

The executive committee of the Williamson County Livestock Association has met and discussed the drought situation here in this county. It is the opinion of this group that the county is in need of drought relief and if any counties are designated, Williamson County should be included. The livestock operator is especially up against it. Any number are feeding, others are just selling their livestock. The rainfall for this year will average about 5 inches which is about one-third of normal, and fell in such small amounts each time that very little benefit was derived from what did fall. We would appreciate anything that can be done in designating this county for drought relief and especially in the way of feed for livestock.

WILLIAMSON COUNTY LIVESTOCK ASSOCIATION,
ANDREW P. PRUDE, *President.*

CONSTRUCTION AT MILITARY AND NAVAL INSTALLATIONS

The PRESIDING OFFICER (Mr. UPTON in the chair). Is there any further morning business? If not, the Chair lays before the Senate the unfinished business, which the Secretary will state.

The LEGISLATIVE CLERK. A bill (H. R. 9242) to authorize certain construction at military and naval installations and for the Alaska communications system, and for other purposes.

Mr. FLANDERS obtained the floor.

Mr. FERGUSON. Mr. President, I ask unanimous consent that the Senator from Vermont may yield to me for 10 minutes without his losing the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from Michigan may proceed.

AMERICAN FOREIGN POLICY

Mr. FERGUSON. Mr. President, very seldom do I find it necessary to take issue with a colleague on the floor of the United States Senate. Unfortunately, I would be remiss in my duties as a member of the Senate and a member of our Foreign Relations Committee if I did not make reply to the foreign policy views recently expressed by the junior Senator from Montana. To me there is great importance in differences of views regarding our foreign affairs deliberately debated, with decisions arrived at after full and fair debate and then supported with the greatest possible degree of bipartisanship. Little is accomplished in behalf of the American people if we establish as a rule of operations self-imposed and unnecessary limitations on what can and what cannot be said in our dealings with other nations.

When the junior Senator from Montana claims we have too many voices saying things about foreign relations, perhaps he is confused, but I have the utmost confidence that the American people are not confused. I have more confidence in them and their ability to judge situations, no matter how complicated, than apparently he has.

I have read the Mansfield speech. It seems to me a pretty fuzzy expression. Just what he wanted to accomplish is not so clear—unless it is only to criticize.

The Senator complains because various Senators have spoken about foreign policy which he says is confusing to the people. He says:

> Presumably the President has a Secretary of State to assist him in matters of foreign policy. If that is the case, then the only official voices we should hear in these matters ought to be the voice of the President and the voice of the Secretary of State.

I cannot follow him on this. I recognize and respect his right to speak on the foreign policy of the United States. The only explanation for his speaking would be that Republican Senators are "officials" and Democrats are not "officials." This seems rather thin since the Senate is a coordinate branch of Government in relation to many aspects of foreign policy and all of its members are "officials."

Senator MANSFIELD suggests that the collapse of the French position in Indochina is because the United States went along with the French demand that it should have a peace conference at Geneva. It is absurd to attribute French weakness, its loss of the will to fight, the loss of Dien Bien Phu, and so forth, to the Geneva Conference. The French were determined to talk of peace and would have done so whether or not we consented.

American diplomacy is, of course, a potent force. But it is not sufficiently potent to overcome the consequences of growing French weakness and the fact that as a result of two world wars France has been weakened to a point where its overall commitments in the world are beyond its capability. The United States could, of course, push in to fill the vacuum created by the decline of French power. This would, however, have involved us, in the case of Indochina, in fighting the French for the privilege of getting in to fight the Viet Minh. I do not understand that the Senator from Montana advocates this course. This administration was alert to try to fill the vacuum to the maximum possible extent. We agreed in substance to pay the entire cost of the war. We agreed to supply the French and the Vietnam forces with military equipment, and we agreed that we would share in an "internationalizing" of the war if the French were willing to put it on an international basis with the backing of the United Nations and with conditions for the independence of the associated states which would make it sure that it was not a colonial power. In these respects we went to the limit. If this was not enough, and it was not enough, the reason was not that the United States could properly have done more but that the French weakness was too great to be bolstered even by the maximum potential of American diplomacy.

The fundamental blunder with respect to Indochina was made after 1945, when the French, as the colonial power in Indochina, had been ousted by the Japanese. The question then was whether or not the United States as a victor over Japan would use its power to put the French back into Indochina. Originally, President Roosevelt was against this on the ground that France did not have a good record as a colonial power and its return would not be accepted by the people. Nevertheless, our Government allowed itself to be persuaded in this matter by the French and the British and we acted to restore France's colonial position in Indochina. The French position was maintained only in the face of bloody massacres by those who opposed the French which started the colonial war, of which the Communists subsequently took control, and the result has been a bleeding of France and the giving to the Communists of a popular issue against which the French were unable to prevail.

It was in 1945 that our Government cooperated in the reestablishment of French colonialism in Indochina. It was not until July 3, 1953, that the French gave assurance of independence to the associated states. This pronouncement came as a result of strong representations by Secretary Dulles. He prevailed upon the French to make such assurances within 6 months after this administration took office. Remember that the civil war had then been in progress for about 6 years.

The Senator from Montana says, "Geneva was a mistake; and the result was a failure of American policy. It is a profoundly humiliating result." Geneva may have been a mistake, but, if so, it was not a United States mistake. The United States has not the power, and, if it had, it could not wisely exercise the power to force France to go on fighting after its will and power to fight had gone. We might ourselves have stepped in and taken over the fighting but that apparently is not what the Senator from Montana wanted us to do. Certainly it is not what the American people wanted us to do. There is not the slightest reason why the United States should feel humiliated as a result of what is happening at Geneva. It has taken throughout a clear, strong and honorable position. If our position, for understandable reasons, is not shared by others, that may be a reflection upon them, but surely it is not a reflection upon the United States.

The Secretary of State, speaking at Seattle on June 10, 1954, pointed out that while the United States does have a large measure of responsibility in the world "that is far short of saying that the United States has responsibility for all that takes place throughout the world. We do not accept the view that whenever there is trouble anywhere it is the fault of the United States and we must quickly fix it. The United States does not believe that it can alone solve problems everywhere. The possibilities

of solution lie primarily with the peoples directly concerned."

It is a grave disservice to the United States to assume the contrary view and that it is a failure of the United States if anywhere in the world others fail. Uncle Sam is not a worldwide "Mr. Fixit."

Mr. MANSFIELD. Mr. President, will the Senator from Vermont yield, to permit me to reply to the Senator from Michigan?

Mr. FLANDERS. I yield for that purpose.

Mr. MANSFIELD. I have listened with interest to the remarks made by the distinguished senior Senator from Michigan. In my opinion, the American people are just as confused as ever on the basis of the explanation made by administration spokesmen.

There is much in what the Senator has said with which I could agree. As a matter of fact, I believe I recognized some of the phrases I used in my speech yesterday, or at least they were paraphrases. I think the Senator from Michigan should be reminded that President Roosevelt recognized that an explosive situation would occur in Indochina if the French returned, and that he should be commended for his efforts to bring about an end of colonialism in that area.

After the war was concluded, the British occupied the southeast part of Indochina, and the Chinese Nationalists, under Chiang Kai-shek, occupied the northern part. The British left very shortly, and turned the southern area over to the French. But a great deal in the way of negotiations was required before the French and the Nationalist Government of China, under Chiang Kai-shek, could get together on terms upon which the Chinese Nationalists would evacuate.

Finally, an arrangement was made by means of which the Chinese Nationalists were given railroad and seaport rights in Vietnam, and the French took over.

So far as I have been able to study the Berlin Conference, it was, in my opinion, a 100-percent failure, because the Russians won everything they wanted at that Conference. What they wanted comprised two objectives. One was to achieve some degree of recognition of Communist China; the other was to bring about a breakup of the European Defense Community.

So far as the recognition of Communist China is concerned—and much has been heard about that in this country during the past week—in my opinion, the mere fact that the United States agreed with France, Great Britain, and other nations, to attend the general conference at Geneva, Switzerland, to which Communist China was invited as an interested state, indicates that a degree of recognition was achieved.

What has happened to China through the person of Chou En-lai since the Geneva Conference got under way? He has been wined and dined while visiting the heads of state in Burma, India, and elsewhere. China now is really a far greater power than she was before the Geneva Conference. This is due, in some small part, at least, to the fact that the United States was a party to the particular agreement to hold a conference after the Berlin Conference.

So far as the second objective of the Communists is concerned, namely, the breakup of EDC, it appears to me that that objective is well on the way to achievement. As I stated yesterday, I feel so forlorn about the possibilities of EDC that I think the United States should look for an alternative; and that alternative should be to bring about the inclusion of both West Germany and Spain in the North Atlantic Treaty Alliance.

The Senator from Michigan says that the administration went the limit. Well, it tried to go the limit, because Admiral Radford discussed with responsible congressional leaders—and perhaps the Senator from Michigan was among them—the idea of using American naval and air support at the time of the battle of Dien Bien Phu.

Furthermore, as the Senator from Michigan must know, the administration asked a group of responsible congressional leaders what they thought of the idea of having a resolution passed, which would give to the President of the United States the discretion to use authority as he saw fit in the southeast Asia area. Those proposals are a matter of record.

Mr. FERGUSON. Mr. President, will the Senator from Vermont yield?

Mr. FLANDERS. I yield to the Senator from Michigan.

Mr. FERGUSON. Will the Senator from Montana state who was asked for a resolution to authorize the sending of troops into Indochina?

Mr. MANSFIELD. I was going to raise a technical point about the question asked, because I said that American naval and air support had been proposed.

Mr. FERGUSON. No; that was not my question.

Mr. MANSFIELD. Yes; that is what the Senator asked about. It is the same thing, because if one goes into Indochina on an airplane he is just as much a trooper as if he is on the ground.

Mr. FERGUSON. But will the Senator state who was asked for a resolution?

Mr. MANSFIELD. Responsible congressional leaders. I was not present, because I am not one of the responsible leaders.

Mr. FERGUSON. I think I have attended all the meetings, and I have never heard of any such request.

Mr. MANSFIELD. If the Senator from Michigan will bear with me, and if the Senator from Vermont will be kind enough to yield further——

Mr. FLANDERS. I yield further.

Mr. MANSFIELD. I shall be glad to look up the item for the Senator.

I have before me an article entitled "United States Twice Proposed Indochina Air Strike," written by Chalmers M. Roberts, and published in the Washington Post and Times Herald of June 7, 1954. I understand that Mr. Roberts is a quite reliable writer, and I believe the Senator from Michigan must have seen the article. Let me read the leading paragraph:

The United States twice during April proposed using American Navy carrier planes and Air Force planes based in the Philippines to intervene in the Indochina war provided Congress and our allies agreed. But the British would not agree and the plans fell through.

The Eisenhower administration set a tentative date for an air strike to aid the then besieged fortress of Dien Bien Phu. The date was April 28, 2 days after the opening of the Geneva Conference.

President Eisenhower was prepared to go to Congress Monday, April 26, to ask for passage of a joint resolution to permit American intervention.

Secretary of State John Foster Dulles and Adm. Arthur W. Radford, Chairman of the Joint Chiefs of Staff, first broached the idea at a secret meeting April 3 of the bipartisan leaders of Congress.

In neither instance was the use of American ground troops contemplated.

Now, if I may turn to April 3——

Mr. FERGUSON. Just a moment.

Mr. MANSFIELD. I am attempting to answer the Senator's question.

Mr. FERGUSON. I do not know where the statement came from about which Mr. Roberts has written.

Mr. MANSFIELD. I now have the information, if I may give it. I must say that I get my information only from the newspapers, because I do not have access to the confidential information of the Department.

Mr. FERGUSON. But is not the Senator a member of the Committee on Foreign Relations?

Mr. MANSFIELD. Oh, yes.

Mr. FERGUSON. Did not the Senator attend the conferences of the Committee on Foreign Relations on the very issue of Indochina, about which he is now speaking?

Mr. MANSFIELD. I may say to the Senator from Michigan that I get more information from the press than I get from my attendance at the executive sessions of the Committee on Foreign Relations. I read further from the article by Mr. Roberts:

Saturday, April 3: Dulles and Radford met in secret session at the State Department with eight congressional leaders representing both parties and with the then Under Secretary of Defense Roger Kyes and the then Navy Secretary Robert B. Anderson. Congressional leaders present were Senators KNOWLAND, MILLIKIN, LYNDON JOHNSON, RUSSELL, and CLEMENTS, and Representatives MARTIN, MCCORMACK, and PRIEST.

Dulles said the President had asked him to call the meeting. He said he felt that it was indispensable at this juncture that the leaders of Congress feel as the administration did on the Indochina crisis.

Radford said the administration was concerned with the rapidly deteriorating situation.

Dulles said that the President wanted him to take up with the congressional leaders action by Congress, but action short of a declaration of war or the use of ground troops. Dulles said that if Congress would permit the President to use air and naval power, then a way could be found to prevent broadening of the conflict.

I repeat the last sentence:

Dulles said that if Congress would permit the President to use air and naval power, then a way could be found to prevent broadening of the conflict. He said it was felt that the necessary air and naval power was already in the area and that Congress should shoulder its responsibility in the crisis.

Radford suggested that if Congress passed a joint resolution giving the President general power to act, it would be possible to

make a single air strike to relieve the embattled fortress of Dien Bien Phu, then under siege for 3 weeks. Radford explained the urgency by saying that he was not even certain, because of the 13-hour time difference between Washington and Indochina, whether the fortress was still holding out at that very moment.

There is more to the article, but I shall place the entire article in the RECORD later.

Mr. FERGUSON. I knew that the idea was being batted around last spring, but I had never heard of this, and it had never been called to my attention. I have conferred with the second ranking member of the Committee on Foreign Relations, and he informs me that he had never heard of it.

The Senator from Montana, instead of accepting what is supposed to be a direct quotation in a newspaper article, must have had an opportunity, on many occasions, to ascertain the facts when he was present with Secretary of State Dulles or Admiral Radford at various meetings before the Committee on Foreign Relations.

Mr. MANSFIELD. That is correct.

Mr. FERGUSON. The Senator could have found out whether or not the quotations were true or untrue and whether they could be relied upon.

Mr. MANSFIELD. But the Senator did not know about that until after it happened. I want the Senator to know that I have a great deal of confidence in Mr. Chalmers M. Roberts, who is usually pretty sure of his facts.

I also wish to make the observation that it will be noted on the list of those who were present that, outside of the Senator from California [Mr. KNOWLAND], who was there in his capacity as majority leader, I am sure there was no one present from the Foreign Relations Committee. That was one of the points I made yesterday, that the ranking minority member of the committee, the Senator from Georgia [Mr. GEORGE], and the chairman of the Foreign Relations Committee, have on occasions been ignored. When the Foreign Relations Committee is ignored, and there is concentration on the Armed Services Committee, the Department of Defense, and the leadership, then we are getting pretty close to something that looks like intervention.

Mr. FERGUSON. My reason for doubting the accuracy of Mr. Roberts in this respect is that I have never heard where he got his information. Someone could have told him what he wrote. However, I know that the senior Senator from Georgia, the senior Senator from Wisconsin, and the Senator from Michigan, the present speaker, have been present on occasions when the subject referred to in the article was discussed. It seems strange that the reporter should quote the information about a meeting where those Senators were not present. The Senator from Montana had the opportunity, on a number of occasions, in executive sessions of the Foreign Relations Committee to bring out what the facts actually were. I do not know of any occasion when I have attended such a meeting at which the Senator from Montana was present and brought up the point. If he has any record of it, I wish he would state that he asked the Secretary of State, Admiral Radford, or anyone else in the Foreign Relations Committee about the truth of the Roberts statement that Congress was asked to make a declaration of war in advance.

Mr. MANSFIELD. If the Senator from Vermont will again indulge me, in reply to the Senator from Michigan I should like to say that I did raise those two particular points in a Senate speech, and no Senator on the floor—and there were present at that time Members who were supposed to have been at the meeting—raised his voice.

With regard to the question of the senior Senator from Georgia and the chairman of the committee being at the meetings, I know some meetings were held at which they were not in attendance. I think when a question of foreign policy is being considered those two Senators ought to be in the meetings, certainly ahead of members of the Committee on Armed Services.

Mr. FERGUSON. I share that viewpoint.

Mr. MANSFIELD. I know the Senator from Michigan does.

Mr. FERGUSON. I share the view that the senior Senator from Georgia should be at the meetings. So far as I am personally aware, he has been at the meetings. Does the Senator now claim that France asked America to intervene in the war? Does the Senator contend that that is true?

Mr. MANSFIELD. I cannot answer that question categorically, because I do not know; but I have heard and read reports to the effect that the French were begging us for air assistance at the time the battle of Dien Bien Phu.

Mr. President, if I may, I should like to ask unanimous consent to have printed in the RECORD at this point in my remarks a newspaper article which appeared in the Washington Post of June 7, 1954, entitled "United States Twice Proposed Indochina Air Strike," and an article appearing in the New York Times of May 4, 1954, entitled "A Chronology of the Administration's Policy on Indochina."

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post of June 7, 1954]

UNITED STATES TWICE PROPOSED INDOCHINA AIR STRIKE

(By Chalmers M. Roberts)

The United States twice during April proposed using American Navy carrier planes and Air Force planes based in the Philippines to intervene in the Indochina war provided Congress and our allies agreed. But the British would not agree, and the plans fell through.

The Eisenhower administration even set a tentative date for an air strike to aid the then besieged fortress of Dien Bien Phu. The date was April 28, 2 days after the opening of the Geneva Conference.

President Eisenhower was prepared to go to Congress Monday, April 26, to ask for passage of a joint resolution to permit American intervention.

Secretary of State John Foster Dulles and Adm. Arthur W. Radford, Chairman of the Joint Chiefs of Staff, first broached the idea at a secret meeting April 3 of the bipartisan leaders of Congress.

In neither instance was the use of American ground troops contemplated.

The President himself did not discuss the proposed intervention with either the bipartisan congressional leaders or the ambassadors of allied nations, leaving that to Dulles and Radford.

NOT BACKED BY JOINT CHIEFS

Radford told the congressional leaders on April 3 that the proposal did not have the backing of the other members of the Joint Chiefs.

It was these intervention proposals which divided the Anglo-American alliance, a division which continues to this day on what to do about the Indochina crisis.

With a major Communist assault by Viet Minh forces expected shortly on French Union forces in the Red River Delta of Indochina and with peace negotiations making little progress at Geneva, the Allies soon may once more be faced with the problem of whether to act militarily to hold back Communist aggression. This is the reason that the following chronology is of more than mere historical interest.

The chronology is based both on the scanty public record and on private information gathered by this reporter in London, Paris, at the Geneva Conference, and in Washington from American and allied officials.

This is the sequence of events thus far:

Saturday, March 20: Gen. Paul Ely, French Chief of Staff who last week was made commander in Indochina, arrived in Washington with reports on the Indochina war which gravely alarmed American officials. He conferred during several days with President Eisenhower, Dulles, Radford, and other officials. The sum of his message was that French Union forces could not win in Indochina without American military intervention. The American response indicated a willingness to act.

Monday, March 29: Dulles, in his Overseas Writers speech in New York, called for united action though it might involve serious risks. He said that Communist China was backing aggression in Indochina with the goal of controlling all of southeast Asia and that the United States felt that, "that possibility should not be passively accepted but should be met by united action."

MEETING WITH HILL LEADERS

Saturday, April 3: Dulles and Radford met in secret session at the State Department with eight congressional leaders representing both parties and with the then Under Secretary of Defense, Roger Kyes, and the then Navy Secretary, Robert B. Anderson. Congressional leaders present were Senators KNOWLAND, MILLIKIN, LYNDON JOHNSON, RUSSELL, and CLEMENTS, and Representatives MARTIN, MCCORMACK, and PRIEST.

Dulles said the President had asked him to call the meeting. He said he felt that it was indispensable at this juncture that the leaders of Congress feel as the administration did on the Indochina crisis.

Radford said the administration was concerned with the rapidly deteriorating situation.

Dulles said that the President wanted him to take up with the congressional leaders action by Congress, but action short of a declaration of war or the use of ground troops. Dulles said that if Congress would permit the President to use air and naval power, then a way could be found to prevent broadening of the conflict. He said it was felt that the necessary air and naval power was already in the area and that Congress should shoulder its responsibility in the crisis.

Radford suggested that if Congress passed a joint resolution giving the President general power to act, it would be possible to make a single air strike to relieve the embattled fortress of Dien Bien Phu, then under siege for 3 weeks. Radford explained

the urgency by saying that he was not even certain, because of the 13-hour time difference between Washington and Indochina, whether the fortress was still holding out at that very moment.

FOLLOWUP CONTEMPLATED

Radford spoke of using the approximately 200 planes on two 27,000-ton United States Navy carriers, the *Essex* and the *Boxer*, then in the South China Sea. Radford said that land-based United States Air Force planes in the Philippines would join in such a strike.

Radford was asked whether such action would be war. He replied that we would be in the war. He was asked whether, if the strike did not succeed in relieving the fortress, we would follow up. He replied "Yes." He was asked whether land forces would then also have to be used. He did not give a definite answer.

Radford was asked whether he was speaking for the Joint Chiefs of Staff. He said "No." He was asked what was the division in the Joint Chiefs. He replied that the other members did not agree with him on the idea of the air strike.

Dulles was asked why he did not go to the United Nations. He replied that it would take too long, that this was an immediate problem. Dulles was asked whether he had lined up the British or any other allies for a joint venture under the "united action" doctrine. He said he had not. The congressional leaders suggested that he should line up the allies before Congress take any action. The meeting broke up on this note.

Sunday, April 4, through Friday, April 9: Dulles consulted with diplomatic representatives in Washington of Britain, France, Australia, New Zealand, the Philippines, Thailand, and the three Associated States of Indochina, Vietnam, Laos, and Cambodia.

During these talks there evolved on Dulles' part a proposal for positive military action along the lines discussed the previous Saturday with the congressional leaders and including planes from aircraft carriers to be supplied by Britain, France, and Australia. There also was discussed a statement or declaration of intent designed to explain to the world what action was being taken and why, and warning the Chinese Communists not to intervene.

The British reaction was negative. The other nations indicated they would go along with the plan provided everyone, especially the United Kingdom, joined in.

Dulles offered to go to London, if necessary, to make clear the urgency of the situation and the need for action. British Prime Minister Winston Churchill asked that Dulles fly over and a London-Paris trip was then arranged.

Saturday, April 10: Dulles left by air for London and Paris on what he called a mission of peace through strength and to pool allied strength "to create the conditions needed to assure that that conference [the coming Geneva Conference] will not lead to a loss of freedom to southeast Asia but will preserve that freedom in peace and justice."

Monday and Tuesday, April 12 and 13: Dulles conferred with Churchill and Foreign Secretary Anthony Eden in London. The British urged caution and flatly opposed any military action at this time, saying that the monsoons soon would bring the fighting to a halt, perhaps in 2 weeks. Dulles dropped the idea of immediate military intervention and took up the idea of creating a southeast Asia defense alliance somewhat similar to the North Atlantic Treaty Organization in Europe.

Dulles felt he had won agreement to begin at once creating this united front in southeast Asia with the idea that this would lead to united action if necessary to save Indochina though not specifically to save Dien Bien Phu. Dulles agreed to soften the wording of the proposed communique at Churchill's insistence.

Tuesday, April 13: An Anglo-American communique said that the two nations were ready to take part in examining the possibilities of a southeast Asia defense pact. Eden, in announcing the communique in the House of Commons, said that the two nations "must await the reaction of the other interested countries before determining what steps we take next." He insisted that he had committed Britain to no specific action but only to examine the possibility of such action.

Dulles understood that a working group would be set up in Washington in a few days to begin drafting the pact. Dulles had argued that the Geneva Conference would be more apt to succeed if there were some strong alternative to a failure to get what the West wanted by negotiation. No ultimatum to Red China was intended, however, Dulles felt that the critical situation in Indochina in fact activated the pact.

Wednesday, April 14: Dulles flew from London to Paris where he discussed the proposed pact with French Premier Joseph Laniel and Foreign Minister Georges Bidault. A Franco-American communique closely followed the language of the London communique. The French understood that work on drafting the pact would begin at once.

Friday, April 16: Vice President NIXON told newspaper editors in Washington (his identity became known the next day) that the effect of the loss of Dien Bien Phu would be almost catastrophic. He said if the French withdrew, Indochina would be Communist-dominated within a month and that the United States, as a leader in the free world, could not afford further retreat in Asia. NIXON said that it was hoped that the United States would not have to send troops to Indochina but if the United States could not avoid it the administration must face up to the situation and dispatch forces.

Sunday, April 18: British Ambassador Sir Roger Makins told Dulles that he could not attend a meeting called by the United States for the following day to begin work on the southeast Asia pact. Sir Roger had been told by the State Department late the previous week about the meeting. At the time he had not received a report on the Dulles visit to London and hence he asked London for instructions. London referred him to the report of the Dulles-Churchill-Eden conference, by then received at the British Embassy here. Sir Roger thereupon told Dulles that his government was not prepared to take part in such discussions because of the possible repercussions on south Asian opinion of an announcement that such discussions were being held. Sir Roger said that he could only discuss the other topic scheduled for the Geneva Conference, that is Korea. The Monday meeting was thereupon turned into a discussion of Korea.

Dulles felt that the British had switched their position on going ahead with the southeast Asia pact. There is some question whether Sir Roger specifically told Dulles that Eden had forgotten about the coming Colombo Conference, due to open the following week, at Colombo, Ceylon. Dulles, at any rate, felt that the British switch was due to objections from Indian Prime Minister Jawaharlal Nehru, who was to meet at Colombo with the Prime Ministers of Pakistan, Ceylon, Burma, and Indonesia.

Monday, April 19: Dulles, after seeing the President at Augusta, Ga., told reporters it was unlikely that American troops would be sent to Indochina.

Tuesday, April 20: Dulles briefed bipartisan congressional leaders on his London-Paris trip and on his plans for Geneva, saying that American intervention in Indochina was not imminent or under active consideration at present. At the meeting were Senators KNOWLAND, MILLIKIN, FERGUSON, SALTONSTALL, WILEY, BRIDGES, HICKENLOOPER, LYNDON JOHNSON, CLEMENTS, RUSSELL, GREEN, and FULBRIGHT, and Representatives CHIPERFIELD, ARENDS, FULTON, and BROOKS HAYS.

Later that day, Dulles left by air for Paris and Geneva. The Paris stop was to attend a NATO meeting and to consult with Eden and Bidault on Geneva.

Friday, April 23: Bidault told Dulles that Gen. Henri Navarre, then French commander in Indochina, had just cabled that he would not be responsible for the fate of French Union forces in Indochina if Dien Bien Phu fell. Bidault, therefore, asked whether the United States were prepared to take military action to prevent fall of the fortress.

Saturday, April 24: Radford arrived in Paris. Dulles and Radford told Eden that the French were asking for military help. An allied air strike at the Vietminh positions surrounding the fort was discussed.

The discussion involved use of the same two United States Navy carriers and Philippine-based Air Force planes that had been considered on April 3. The carriers had been in the South China Sea since nearly March, the Navy said, for training. The nearest point from the Gulf of Tonkin to Dien Bien Phu was about 240 miles distant.

Bidault said that General Navarre had agreed that a strike by about 500 American planes would be sufficient to save the fort.

Dulles said that if the Allies agreed the President would go to Congress on Monday, April 26, and ask for a joint resolution authorizing such action and that this would permit a strike on Wednesday, April 28, assuming that Congress had acted in time.

The State Department had prepared a declaration on intentions—an outgrowth of the early April meetings in Washington—to be signed on Monday or Tuesday by ambassadors of the nations allied with the United States—Britain, France, Australia, New Zealand, the Philippines, Thailand, Vietnam, Laos, and Cambodia. The declaration spoke in general terms of the danger of Communist aggression and the allied recognition of the necessity of repulsing that agression by military means.

However, there were no British or Australian aircraft carriers close enough or available to join in the strike on the proposed day and the only French carrier was already fully occupied.

Eden told Dulles and Radford that this was a most serious proposal, amounting to war, and that he wanted to hear it from the French themselves. Eden and Dulles then conferred with Bidault, who confirmed the plea for aid.

Eden said he personally opposed such a move and that he felt that ground troops would be called for within 48 hours after an air strike as had been the case at the beginning of the Korean war.

Eden added, however, he would not want to give a final British judgment and that he, therefore, would go to London at once and confer with the British Cabinet.

At the end of the day, Eden flew to London. Dulles then told Bidault that (1) the proposed strike was beyond the President's constitutional powers without action by Congress, and (2) that no action could be taken except under the united action previously discussed but delayed by British unwillingness to act at once. Dulles also said that there was doubt in the minds of American military leaders thaat a single strike would, at this late date, save Dien Bien Phu. Dulles then flew off to Geneva.

Sunday, April 25: The British Cabinet met in extraordinary Sunday session and decided against participating in the united action air strike. The British Chiefs of Staff unanimously agreed thaat it would not be sufficient to save Dien Bien Phu.

Eden stopped in Paris Sunday evening en route to Geneva and told Bidault at Orly Airfield of the negative cabinet decision. Dulles was told by Eden late that night in Geneva. At this time Eden told Dulles that Britain had decided to wait and see what sort of

settlement the French could get from the Communists at the Geneva Conference before taking any action.

Monday, April 26: Radford arrived in London from Paris to talk with Churchill and the British Chiefs of Staff.

On the same day, the Geneva Conference opened.

Also on Monday, Under Secretary of State Walter Bedell Smith in Washington discussed Indochina in a conference with Senators H. ALEXANDER SMITH, HICKENLOOPER, LANGER, FULBRIGHT, GILLETTE, and MANSFIELD and Representatives CHIPERFIELD, ARENDS, FULTON, and BROOKS HAYS. Under Secretary Smith raised the question of unilateral American military action in Indochina but the Members of Congress strongly opposed such a course.

Tuesday, April 27: Churchill announced to a cheering House of Commons that the British Government was "not prepared to give any undertaking about United Kingdom military action in Indochina in advance of the results of Geneva."

Churchill went on to say that "we have not entered into any new political or military commitments" but he did not explain the background of his statements.

Thursday, April 29: President Eisenhower told his press conference that the United States was trying to steer a course between the unattainable and the unacceptable in the Indochina crisis. He repeated a statement of some time earlier that the United States would not get into a war except through constitutional processes which involved the declaration of war by Congress.

Wednesday, May 5: Dulles returned to Washington from Geneva and reported on the conference to Senators KNOWLAND, FERGUSON, MILLIKIN, SALTONSTALL, WILEY, H. ALEXANDER SMITH, BRIDGES, LYNDON JOHNSON, CLEMENTS, GEORGE, RUSSELL, and GREEN and Representatives MARTIN, HALLECK, CHIPERFIELD, VORYS, JUDD, SHORT, ARENDS, RAYBURN, MCCORMACK, GORDON, LANHAM, and VINSON. Dulles indicated that the United States had virtually abandoned all hope of effective united action in Vietnam and that he was now seeking a collective security system designed to seal off and protect Laos and Cambodia, the other Indochinese states.

Friday, May 7: Dien Bien Phu fell to the Communists.

Wednesday, May 19—President Eisenhower told his press conference that it might be possible to create a collective security system in southeast Asia without the British and that the United States might possibly work out something with Australia, New Zealand, and some Asian nations.

Thursday, May 20: New Zealand External Affairs Minister T. Clifton Webb, asked by reporters about the possibilities of a pact without Britain, said that "I can't conceive of a satisfactory alliance being made that would not include Britain" and that he felt "that any form of security pact for southeast Asia that it may be necessary to form will, in fact, include Britain."

Thursday, May 27: Adm. Richard B. Carney, Chief of Naval Operations, and a member of the Joint Chiefs of Staff, said in a New York speech that the United States is "approaching the fork in the road"; that the "choice could be a fateful one"; and that however grave are "today's alternatives," their "gravity may well be dwarfed by those which will confront us in a few years if our country fails to choose properly now." He said the question was, "Do we want to turn into the smooth dead-end or take the rougher road that offers us a good destination if we have got the guts and strength to manage it?"

Wednesday, June 2: President Eisenhower told his press conference that he had not, by any manner of means, reached any decision to ask Congress for authority to act in southeast Asia.

Thursday, June 3: Five-power military talks between high-ranking officers of the United States, Britain, France, Australia, and New Zealand opened in Washington. Admiral Carney was the United States representative. The talks, due to last a week, were military and not political in nature and were designed to explore military problems which might arise from a southeast Asia defense pact, among others.

Thursday, June 3: Gen. James A. Van Fleet, who had been sent to the Far East in May as a special envoy by President Eisenhower, gave what one Senator termed "a very alarming" report to the combined Senate Foreign Relations and Armed Services Committees.

Friday, June 4: Dulles told the Senate Foreign Relations Committee that the situation in Indochina is grave but by no means hopeless and that it is "fraught with danger not only to the immediate area but to the security of the United States and its allies in the Pacific area." When Senator FULBRIGHT observed that recent witnesses before the committee had urged a go-it-alone policy Dulles replied that he would not want to make an answer which conceded that Britain had a veto on what we might want to do and that a situation might arise when the United States would have to act without the British.

Saturday, June 5: Senate Majority Leader KNOWLAND in an interview said that the free world has reached the jumping-off place, and if it does not force some kind of showdown with the Communists in Indochina within the next 30 days, all Asia may fall to the Communists. He added that the United States ought to face up to the fact that it may have to fight in Indochina.

Monday, June 7: Admiral Radford and General Van Fleet have an appointment with President Eisenhower at 10:30 this morning.

[From the New York Times of May 4, 1954]

A CHRONOLOGY OF THE ADMINISTRATION'S POLICY ON INDOCHINA

WASHINGTON, May 3.—Following is a catalog of the Eisenhower administration's main statements of policy on Indochina:

April 16, 1953, President Eisenhower to the American Society of Newspaper Editors in Washington:

"The free world * * * knows that aggressions in Korea and southeast Asia are threats to the whole free community to be met only through united action. * * *

"With all who will work in good faith toward such a peace we are ready—with renewed resolve—to strive to redeem the near-lost hopes of our day. The first great step along this way must be the conclusion of an honorable armistice in Korea.

"This means the immediate cessation of hostilities and the prompt initiation of political discussions leading to the holding of free elections in a united Korea.

"It should mean no less importantly an end to the direct and indirect attacks upon the security of Indochina and Malaya, for any armistice in Korea that merely released aggressive armies to attack elsewhere would be a fraud. We seek throughout, as throughout the world, a peace that is true and total."

August 4, 1953, President Eisenhower at the Governors' Conference:

"Now let us assume that we lost Indochina. If Indochina goes, several things happen right away. The peninsula, the last little bit of land hanging on down there, would be scarcely defensible. The tin and tungsten that we so greatly value from that area would cease coming, but all India would be outflanked.

"Burma would be in no position for defense. * * *

"So when the United States votes $400 million to help that war, we are not voting a giveaway program. We are voting for the cheapest way that we can prevent the occurrence of something that would be of a most terrible significance to the United States of America—our security, our power and ability to get certain things we need from the riches of the Indonesian territory and from southeast Asia."

August 7, 1953, report of the Korean unified command to the United Nations:

"We, the United Nations members whose military forces are participating in the Korean action, support the decision of the commander in chief of the United Nations command to conclude an armistice agreement. * * *

"We affirm, in the interest of world peace, that if there is a renewal of the armed attack, challenging again the principles of the United Nations, we should again be united and prompt to resist. The consequences of such a breach of the armistice would be so grave that, in all probability, it would not be possible to confine hostilities within the frontiers of Korea.

"Finally, we are of the opinion that the armistice must not result in jeopardizing the restoration or the safeguarding of peace in any other part of Asia."

September 2, 1953, Secretary Dulles to the American Legion convention:

"Communist China has been and now is training, equipping, and supplying the Communist forces in Indochina. There is the risk that, as in Korea, Red China might send its own army into Indochina. The Chinese regime should realize that such a second aggression could not occur without grave consequences which might not be confined to Indochina. I say this soberly in the interest of peace and in the hope of preventing another aggression miscalculation."

February 9, 1954, Secretary of Defense Wilson to a news conference:

Question. "Do you think a military victory can be won in Indochina or that peace will have to be negotiated there?"

Answer. "I would think that a military victory would be perhaps both possible and probable."

February 10, 1954, President Eisenhower before his news conference:

Question. "Mr. President * * * there seems to be some uneasiness in Congress that sending these technicians to Indochina will lead eventually to our involvement in a hot war there. Would you comment on that?"

Answer (permitting direct quotation). "Well, I would just say this: No one could be more bitterly opposed to ever getting the United States involved in a hot war in that region than I am. Consequently, that every move that I authorize is calculated, so far as humans can do it, to make certain that that does not happen."

Question. "Mr. President, should your remarks on Indochina be construed as meaning that you are determined not to become involved or, perhaps, more deeply involved in the war in Indochina, regardless of how that war may go?"

Answer. Mr. Eisenhower replied that he was not going to try to predict the drift of world events now or the course of world events over the next months.

He would say that he could not conceive of a greater tragedy for America than to get heavily involved now in an all-out war in any of those regions, particularly with large units.

February 17, 1954, President Eisenhower at his news conference:

Question. "Is there any way to distinguish between aid to the anti-Communist forces in Indochina and support of colonialism?"

Answer. The President replied that the questioner had asked the very question that was the crux of this whole thing. There was no colonialism in this battle at all.

France, he added, had announced several times, and most emphatically last July, that she was fighting to give the three Associated States their freedom, their liberty. He believed it had been agreed they would live inside the French Union, but as free and independent states.

March 10, 1954, President Eisenhower at his press and radio conference:

Question. "Mr. President, Senator STENNIS said yesterday that we were in danger of becoming involved in World War III in Indochina because of the Air Force technicians there. What will we do if one of those men is captured or killed?"

Answer. "I will say this: There is going to be no involvement of America in war unless it is a result of the constitutional process that is placed upon Congress to declare it. Now, let us have that clear. And that is the answer."

March 24, 1954, President Eisenhower at his news conference:

Question. "Mr. President, would you care to say anything, sir, about the conference at Geneva with reference to Indochina and Communist China?"

Answer. The President replied that he would say only a very few things: One, he didn't believe that it was necessary to argue the importance of all this great southeast Asian area, and the Southwest Pacific—its importance to the United States and to the free world. All that region was of the most transcendent importance.

Now, this fighting going on in Indochina, no matter how it started, had very manifestly become again one of the battlegrounds of the people that want to live their own lives against this encroachment of Communist aggression.

March 29, 1954, Secretary Dulles to the Overseas Press Club of America in New York:

"Under the conditions of today, the imposition on southeast Asia of the political system of Communist Russia and its Chinese Communist ally, by whatever means, would be a grave threat to the whole free community. The United States feels that that possibility should not be passively accepted, but should be met by united action. This might have serious risks, but these risks are far less than would face us a few years from now if we dare not be resolute today."

April 15, 1954, Adm. W. Radford, Chairman of the Joint Chiefs of Staff, to the American Society of Newspaper Editors:

"The free nations cannot afford to permit a further extension of the power of militant communism in Asia. In the interests of preventing aggression, full advantage should be taken of the fact that non-Communist Asia has a considerable potential for development of defensive military forces * * * it's (Indochina's) loss would be the prelude to the loss of all Southeast Asia and a threat to a far wider area."

April 16, 1954, Vice President NIXON in a background talk to the American Society of Newspaper Editors (this was not attributed to him at first but later published):

Question. "If the French pulled out of Indochina, what should the United States do?"

Answer. The Vice President replied that there was no reason why the French could not stay on and win, but on the assumption that they did withdraw—an assumption he did not accept—Indochina would become Communist in a month.

He added the United States, as a leader of the free world, could not afford further retreat in Asia. It was hoped that the United States would not have to send troops there, but if this Government could not avoid it, the administration must face up to the situation and dispatch forces.

Therefore, the United States must go to Geneva and take a positive stand for united action by the free world. Otherwise, it would have to take on the problem alone and try to sell it to the others.

This country was the only nation politically strong enough at home to take a position that would save Asia. Negotiations with the Communists to divide the territory in any form would result in Communist domination of a vital new area.

April 20, 1954, Vice President NIXON, in Cincinnati, at the 20th annual University of Cincinnati Day dinner:

"The aim of the United States is to hold Indochina without war involving the United States, if we can. We have learned that if you are weak and indecisive, you invite war. You don't keep Communists out of an area by telling them you won't do anything to save it."

April 21, 1954, Vice President NIXON in Des Moines, Iowa:

"The purpose of our policy is to avoid sending our boys to Indochina or anywhere else to fight. We believe a strong policy has the best chance to accomplish that purpose."

April 26, 1954, President Eisenhower to the United States Chamber of Commerce:

"I think each of us senses that when we meet, as you are meeting today, we are doing so in a time of great decisions. I think it is no longer necessary to enter into a long argument or exposition to show the importance to the United States of Indochina and of the struggle going on there.

"No matter how the struggle may have started, it has long since become one of the testing places between a free form of government and dictatorship. Its outcome is going to have the greatest significance for us, and possibly for a long time into the future. * * *

"And then we turn our eyes to Geneva and we see representatives of great—and some antagonistic—powers meeting there, trying to arrive at some situation that at least we could call a 'modus vivendi.' We do not hope, I think, very soon to have the type of understanding that we believe we can ultimately develop among ourselves as to great issues. But we would hope that the logic of today's situation would appeal to all peoples, so that they would see the futility of depending upon war, or the threat of war as a means of settling international difficulty."

April 29, 1954, President Eisenhower to his news conference:

Question. "Mr. President, in a recent speech you referred to the desirability of a modus vivendi in Indochina. Could you give us anything further on your thoughts, what is in your mind, by a modus vivendi?"

Answer. The President replied that we were steering a course between two extremes, one of which, he would say, would be unattainable, and the other would be unacceptable. It wouldn't be acceptable, he thought, to see the whole anticommunistic defense of that area crumble and disappear.

On the other hand, we certainly could not hope at the present state of our relations in the world for a completely satisfactory answer with the Communists. The most you can work out is a practical way of getting along.

Question. "Mr. President, I would like to go back, sir, to what you said about modus vivendi. It is a question of interpretation. I may not have caught all you said, but I caught this much: That you want to get along on a practical basis, as we are not getting along in Europe."

The President replied that he didn't mean to endorse, even by indirection, any specific means of getting along. He pointed out that a completely trustworthy peace, one in which we could have confidence as between ourselves and the Communist world today, seems to be something over the horizon. We work toward it; we have not achieved it, and we would be foolish to think we could do this quickly.

On the other hand, he added, we also understand what the loss of this region would mean to us. There is fighting going on, and, of course, everybody would like to see fighting stopped, but he was merely talking about some solution that could be, that would be acceptable to us, and would stop the bloodletting.

Mr. FERGUSON. Does the Senator from Montana say to the Senate of the United States that he believes America should have gone into the Indochina war?

Mr. MANSFIELD. Oh, the Senator knows my attitude on that question. I have been one who has been consistent in saying there should not have been intervention, because, in my opinion, it would have been suicidal. It would have brought about a resumption of the war in Korea, resulting in the launching of war against the Chinese mainland, and it would have turned this country into a dictatorship and a garrison state.

Mr. FERGUSON. I share the views of the Senator from Montana, but not for the same reasons.

Mr. MANSFIELD. What are my reasons?

Mr. FERGUSON. We were not asked for aid by the Associated States. As has been stated previously, if people do not want freedom, if they do not want to fight for freedom for themselves, if they do not ask for the cooperation of those who believe as they do in freedom, America cannot be "Mr. Fixit" all over the world and force itself into every dispute wherever it may be, whether the people affected want America to intervene or not.

Mr. MANSFIELD. That is exactly what I said yesterday. We could never get a request from the three Associated States, because they were not independent states.

Mr. FERGUSON. They had not received independence from France.

Mr. MANSFIELD. I wish to say on behalf of Mr. Dulles and the Department of State that they did their best to try to hurry up independence for the three Associated States, because that really was the ultimate and final answer.

Mr. SMITH of New Jersey. Mr. President, will the Senator yield?

Mr. FLANDERS. Mr. President, I should like to remind the Senator from New Jersey that I have the floor, but I yield.

Mr. SMITH of New Jersey. I am amazed at the statement made by the Senator from Montana that there was apparently a secret meeting.

Mr. MANSFIELD. It was mentioned in the press.

Mr. SMITH of New Jersey. I am a member of the Foreign Relations Committee and chairman of the Subcommittee on Far Eastern Affairs.

Mr. MANSFIELD. The Senator from New Jersey was not present.

Mr. SMITH of New Jersey. I never heard of any such meeting.

Mr. MANSFIELD. But the meeting was held, I inform the Senator from New Jersey, although he was not there.

Mr. SMITH of New Jersey. The Senator from New Jersey was not invited to be there. I think if the meeting concerned such an important problem, I probably would have been invited to it, because I am chairman of the Subcommittee on Far Eastern Affairs of the Committee on Foreign Relations. I had discussed this matter with the Department. I never understood an attempt was made to pass such a resolution as has been mentioned.

Mr. MANSFIELD. The proposal was made and turned down, thank heaven, by the leadership.

Mr. SMITH of New Jersey. I know nothing about it. I can confirm what the Senator from Michigan said, that we were not at the meeting.

Mr. MANSFIELD. That is correct.

Mr. SMITH of New Jersey. I do not know the point the Senator is trying to emphasize.

Mr. MANSFIELD. That was one of the difficulties I had. Since some of us protested, thanks to the majority leader, there has been better liaison between the State Department, the Defense Department, and the committees.

In response to a question asked by the Senator from Michigan, let me read from the Washington Post of June 7, 1954:

Friday, April 23: Bidault told Dulles that Gen. Henri Navarre, then French commander in Indochina, had just cabled that he would not be responsible for the fate of French Union forces in Indochina if Dien Bien Phu fell. Bidault, therefore, asked whether the United States were prepared to take military action to prevent fall of the fortress.

Mr. FERGUSON. What is the Senator from Montana contending?

Mr. MANSFIELD. I am answering a question asked by the Senator from Michigan.

Mr. FERGUSON. Is he contending that we should have gone into Indochina?

Mr. MANSFIELD. How many times do I have to say "No"? So far as I am concerned, I am opposed to that, for the reasons I have outlined.

Mr. FERGUSON. What is the point the Senator from Montana is making?

Mr. MANSFIELD. I am answering a question the Senator from Michigan raised.

Mr. FERGUSON. I merely say I agree with the Senator from New Jersey. I never knew of the meeting. I never had heard from any official source, and from no other source than this article, that there was any such meeting. I come back to the proposition that, instead of the Senator from Montana relying upon a newspaper article, he should have asked the Secretary of State, during the meetings the Senator has attended, what the facts were.

Mr. MANSFIELD. When the time came to ask the questions, the Secretary was in Geneva or Berlin.

THE CHINESE PROBLEM

Mr. FLANDERS. Mr. President, I find the colloquy extremely interesting, but we seem to have arrived again at the point where we came in.

The PRESIDING OFFICER. The Senator from Vermont has the floor.

Mr. FLANDERS. I am not disposed to support the circumlocutionary discussion, which can be continued in the time of the Senators who have been speaking.

Mr. President, in theory and in practice a nation should be solidly behind its official foreign policy and the foreign policy should be one which all reasonable citizens can support. I am not sure that this is the case at the present time or that it has been for some years past. I am making this brief talk as a free lance. I am not on the Foreign Relations Committee, so have had no briefings in executive session. I have access to no secrets.

Let me first make it clear that I am opposed to the admission of Red China to the United Nations. I am also in support of declarations from the House and Senate on this matter at this time. The administration should be, and I believe is, appreciative of such support.

I have contributed toward the Committee for One Million, which is an organization opposed to the admission of Communist China. I may say I have noted in the newspapers of this morning and yesterday afternoon that the Committee has attained its membership of one million, so that it has reached its objective in that respect. Its honorary chairmen are former Ambassador to the United Nations, Warren R. Austin, who preceded me in the Senate; and the Honorable Joseph C. Grew, former Ambassador to Japan. In correspondence with these men, I suggested that it might be well for the Committee to make some such statement as the one that was made by the Republican floor leader, and was seconded by the Democratic floor leader, expressing legislative opposition to admission of Red China to the United Nations. If this were to be tied in with a statement that it would be difficult to get appropriations from the Congress for the United Nations if Red China were to be admitted, these esteemed elder statesmen felt that that would be in the nature of a threat, and would be an unwise thing to do. It has seemed to me, however, that there must be some way of informing our associates in the United Nations of the facts of life, and this question of continuing appropriations is one which does raise a question as to the facts of life which in some way should be made plain. I am, therefore, glad of the statements which have been made.

Let me call attention, however, to the fact that an expression of our determination in this matter is a purely negative thing. We shall not by this means be making any contribution to a positive solution of the problems which we face in Asia and on the other continents of the globe, where Soviet power is gaining position month by month and year by year. It is to make suggestions as to positive policy that I am now taking the floor.

The first point to be made is that every decision has to be made in the light of the future, rather than as meeting by temporary means a temporary situation. To emphasize this point, let me refer to the original endeavor to support Chiang Kai-shek and the Nationalist armies against the increasing strength of the Reds during and succeeding the last years of World War II.

It is unwise for those of us who sought to support the Nationalist cause to forget that Chiang Kai-shek's organization was riddled with graft, that the Soong family was generally reported to have enriched itself at the expense of our assistance, and that the Generalissimo himself gradually lost the support of Nationalist groups who had once given him enthusiastic support. These things have to be taken into account.

It was with these conditions in mind that on June 12, 1947, I wrote to General Marshall a letter, which I shall now read:

As a graduate member of the Business Advisory Council, I was privileged to attend the dinner last evening and listen to your satisfying frank discussion of the Chinese situation. Of course, the satisfying thing about it was your frankness. The situation itself is incredibly difficult.

I have the temerity, nevertheless, to pass on to you some vague thoughts which have been going through my mind.

Would it be possible to clear a restricted area of China of Communist military strength and mark off that area for assistance and reconstruction? It might be from the Yangtze River south or perhaps an area of 50 to 100 miles north of the Yangtze might be included. If transportation, supporting coal mines, and cotton textiles, for instance, could be reconstituted in that area, it would form a basis for reviving normal living for many millions of harassed people.

The difficulties are obvious. It would require close supervision on our part to make sure the assistance is not poured down the military rathole. It would be difficult to get such supervision to be politically acceptable to the Chinese Government and it would be difficult to recruit and organize the necessary supervision. Recognizing these difficulties and others which your experience would suggest, it might still be considered as one of the faint hopes in the Chinese situation.

To this letter the general replied, under date of June 24, 1947, as follows:

Thank you for your kind letter of June 12, 1947, in regard to the problem of assistance to China.

The suggestions you make in regard to the demarcation of certain areas in China where we could concentrate American assistance for purposes of reconstruction are very pertinent ones. The Department has had under consideration a program such as that outlined in your letter, but has found itself confronted with some very obvious difficulties, including those mentioned in your letter, which would be involved in carrying out a program of assistance of this kind.

Regardless of such difficulties, some of which are common to any program for assistance to China, your ideas on this subject merit the continuing attention and consideration of the Department. You may be assured that in our attempt to find some means of assisting China, they will not be overlooked.

In retrospect, this suggestion still seems to me the only one which could have been followed with any hope of success in arresting the Red conquest of China. Without doubt, it died for two reasons: First, the administration then in power was still obsessed with the notion that Mao Tse-tung was primarily an agrarian reformer, rather than a Communist; and, second, the scandalous graft in the Nationalist forces gave the administration a reasonable excuse for not pursuing the matter further. Presumably the same considerations led to the sabotaging of the congressional endeavor to support the Nationalist side, although there was no excuse for using the indirect means which were employed, instead of coming out honestly with the real reasons.

This is a part of the background of the present situation which we must keep in mind if we are to act wisely. Another part of the background is to be

found in the tragic consequences of our policies in the Korean war.

The tragic decision came at the time when General Van Fleet's armed forces, on his own testimony, had the Communists fleeing north, disorganized and in confusion, with their ammunition spent. The decision that he should not be permitted to pursue a vanquished enemy at least to the narrow neck of Korea was a decision which we took under strong pressure from our allies and in consequence of the blind stubbornness of our own statesmen. Korea, our country, and the world have suffered ever since from that tragic error.

The results have been that the Chinese Communists are clear in their own minds that no military threat of ours will be carried through to a conclusion. Once we have folded up with victory in our hands, they are sure we will always fold up.

The next point is that we have probably lost the respect of Asia as a whole. We have no ambitions to be a great power in the old sense, but we have given the Asians no substitute term by which to define our moral and material influence.

These losses have been compounded by recent unfortunate statements that we have not been able to back up by deeds. The promise, for example, that we would pick out the battleground with the forces of communism and engage in the contest when and where we pleased has not been borne out by the facts of current history. And again the threat of massive retaliation proves to be meaningless in the jungle fighting actions in which the Communist armies by preference engage. It retains a meaning only as massive retaliation for an atomic attack.

We threw away a military victory in favor of a military stalemate which cost us many more thousands of lives and many more billions of expense than we would have suffered had we chosen to win. But there was still a chance that a moral victory might have been achieved. This possibility I mentioned more than once on the Senate floor, but I refer particularly to my remarks of March 6, 1953, in the CONGRESSIONAL RECORD, volume 99, part 2, page 1675, and May 20, 1953, part 4, page 5187. An endeavor to sell the idea of a moral victory was made throughout the previous administration from top to bottom of the policymaking officials involved. It appeared to be acceptable in the lower ranges of policymakers, but met with refusal at the top, where the statement was made over and over again that the Soviet Government and its allies respect only military force; and this statement was made in spite of the fact that military force was not allowed to have its proper effect. A moral victory was something unappreciated and unconsidered.

There had been great hope that the present administration might see this thing in a clearer light. And much more progress was made than with the previous administration. Setting as our goal a diplomatic settlement of the Korean matter which was right for the people concerned—the people of North Korea, the people of South Korea, the people of Red China—would have an effective appeal. A suggested neutral zone along the Yalu River whose neutrality was to be administered by an all-Asian commission also had the appeal of establishing a policy of Asia for the Asians, in which the Asiatic nations would have had to take on the responsibilities of such a policy as well as enjoy the advantages.

In the complicated machinery of determining national policy in this administration, this proposal disappeared. We are now in the position of not actively supporting a policy of Asia for the Asians. Lacking this support in Asiatic public opinion, we have been maneuvered by French shortsightedness into a position where, on the face of it, we are the supporters of the few remaining rags and tatters of Western colonialism in the Eastern World. All of this follows from the earlier mistakes. Are we to make more of them?

So far this talk has been principally one of complaint as to the present and a mourning over what might have been in the past. What we do have to face, however, is the question of what we shall do now.

So far, at least, as our relations with the Soviet Government are concerned, it is clear to me as to what we should do now. We should go on the offensive to win the hearts and minds of the Russian people on the question of disarmament. I am not going to go over this matter again, because I have already adequately expressed myself in a speech on the Senate floor on July 8, 1953, CONGRESSIONAL RECORD, volume 99, part 7, page 8199. Here is an opportunity to enter the conflict on our own initiative, at times and places of our own choosing. Until now we have failed to carry out our announced intention. Let us not fail at this point.

There is one very important thing that we can do with regard to diminishing the increasing influence of Communist Chinese among the millions of Chinese scattered through southern Asia and the islands of the Pacific. They are now sending their children by the tens of thousands to Red China to be educated. There is no greater menace to the future of Asia than this. These children have no other place to go, except at vast expense and through the difficulties of passport and visa troubles.

In past generations they would have had other places to go. American friendship for the people of China led to the establishment of many institutions, both of middle and higher learning, supported by funds from Europe and America. The need was great then. It is far greater now. Private philanthropy must reenter this field. Here is a field in which people can help people. Institutions of higher learning for Chinese might well be set up in Japan, for example, in Singapore and in Djakarta, so that with a minimum of personal expenditure these bright young people could be trained to serve the interests of the many, instead of serving as tools for totalitarian tyranny.

Finally, let me make a suggestion which perhaps may not appeal at first thought to many of my fellow Senators who believe, as I do, that Red China must not be admitted to the United Nations. As was said at the beginning, this is a purely negative policy. Let us put something positive into it.

Let us not use weasel words such as "she must not be admitted at the present time" or "until she has shown a willingness to abide by decisions of the United Nations." Let us make it specific and positive. Let us say that when Communist China tears away its curtain and resumes intercourse with the Western World, as freely as the nations of the Western World now allow their people to intervisit, intertrade, and intercommunicate, then we should be willing to reconsider our objections. Such a China will not be the Communist China of today.

There should, indeed, be two great principles which our Nation must uphold in the Assembly and in the Security Council of the United Nations. One of them is guaranteed universal disarmament, which must become a hard-fought crusade instead of being referred to stagnant committees. The second is that curtains—iron, bamboo, and others—must be vigorously attacked and their destruction made a primary objective based on our experience with nations which hide behind them.

Let us be positive instead of negative.

Military action has proved its necessity defensively, to gain time. It has solved no problems. The solution lies in moral action, in the appeal to the hearts of men.

Destroying curtains, establishing free education and disarmament are moral purposes and can bring to their support the spiritual forces of the universe.

Let us ally ourselves with these forces. Let us not allow the sword of the spirit to rust in its scabbard. Let us sharpen it and wield it with faith and with might.

PROPOSED ATOMIC ENERGY COMMISSION POWER CONTRACT

Mr. FULBRIGHT obtained the floor.

Mr. SMATHERS. Mr. President, will the Senator from Arkansas yield so that I may suggest the absence of a quorum, with the understanding that he will not lose the floor?

Mr. FULBRIGHT. I yield for that purpose.

Mr. SMATHERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. SMATHERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FULBRIGHT. Mr. President, during recent weeks there has been much sound and fury with respect to a proposed contract to be entered into by the Atomic Energy Commission for 600,000 kilowatts of electric power. Many statements being made are not based on fact, and it is time for the other side of this issue to be presented in an objective manner to the Senate. The proposed

contract would, of course, result in an expenditure of substantial sums of money in my State—a most welcome development—but actually the proposal recommended by the President of the United States is justified in the national interest.

Mr. President, if I may digress for a moment, on the front page of this morning's Washington Post there appears an article entitled "Democrats Planning TVA Battle." The article, written by Sam Zagoria, begins with this paragraph:

> Senate Democrats yesterday laid out legislative strategy to be used next week in an attempt to scuttle an Eisenhower administration plan to bring private power into the Tennessee Valley Authority area.

Mr. President, I should like to suggest that the sentence should refer to "some" Senate Democrats, because by no means are all Democrats planning any such a strategy or supporting any such movement. While I do not speak for the Democratic Party, I am quite sure that whoever gave that interview, if it was an interview, or whoever gave that information to the reporter, was not speaking for anywhere near all the Democratic Members of the Senate.

I see no reason why this should be made a party matter. I think it will not be made a party matter. I hope it will not be considered a party matter by the Democratic Members of the Senate. I think it is a matter involving high policy in both the economic and fiscal areas of government.

As Senators from the Tennessee Valley know, I am not motivated by any desire to destroy the TVA either piecemeal or by one fell swoop. I have supported TVA in the past and I have supported the SPA in my own area.

That is the Southwestern Power Administration, which operates in my State and in the Southwestern area.

I have tried to approach these question from a realistic viewpoint, and have done what I could to promote both public and private power development in this great area. I am quite willing for this proposal to be judged on that same basis. In fact, my concept of the TVA is very similar to that expressed by the junior Senator from Mississippi [Mr. STENNIS] when he said:

> TVA is a national yardstick for electric power rates and as such has served a great purpose to the Nation as a whole, and to the private power companies. It has helped put electricity within the reach of the masses of the people and at the same time has created mass customers for the private power companies and the appliance manufacturers.

This statement of the Senator from Mississippi is a proper description of the role performed by TVA. Let us, therefore, proceed to analyze this proposed contract in the light of the TVA yardstick.

The issue at hand has been greatly distorted and exaggerated by TVA advocates who are needlessly concerned, I believe, over the future of the Authority. TVA is not a weak reed to be broken by a waft of power blowing across the Mississippi River toward Memphis. The fact is that TVA has been buying power from across the Mississippi for several years—450 million kilowatt-hours in 1953. Practically all of this power was delivered to the Memphis area from the same sources who are sponsoring the proposed contract with the Government.

As to the background of this proposal, the Atomic Energy Commission had contracted for nearly 2 million kilowatts of electric power in the Paducah, Ky., area. It has insisted that all of its power contracts provide a means of cancellation in the event power requirements should decrease or be eliminated. AEC has been conscious of the advantages of having diverse power sources. To me that makes commonsense. The proposed power contract provides a means for permitting the Government to rid itself of a substantial liability for excess power in the Paducah area if at any time it becomes desirable to cancel a portion or all of the AEC power contract. In addition, a remedy was found for TVA's widely publicized crying need for more electric power for the city of Memphis. Furthermore, having this plant in Arkansas is an asset to national defense. I am told by competent engineers that having the additional heavy transmission lines crossing the Mississippi River results in more tying together of the great power resources of TVA and those of the private power companies operating in the Southwest.

We have heard much criticism about having the Atomic Energy Commission enter into a contract for power generated at Memphis, Tenn., because it was some distance removed from Paducah. Such criticism is without foundation. The delivery of power by replacement is neither a new nor novel idea. It is the practice employed by TVA since it began adding capacity to its system to serve AEC beginning in 1949.

TVA has continuously coupled its demands for new steam electric stations with the plea that such additional power was needed by the Atomic Energy Commission for national defense. Did TVA consistently locate its plants immediately adjacent to the required AEC loads? The answer is definitely "No." The lines did not go directly into the Atomic Energy Commission plant at all.

The first major expansion of AEC facilities was authorized in 1949. To supply power to these new facilities, TVA sought and received authority to build the Widows Creek generating plant and unit 4 of the Johnsonville steam plant. AEC needed the additional power at Oak Ridge. Johnsonville is 200 miles away from Oak Ridge, Widows Creek 100 miles. The Johnsonville plant is farther away from Paducah than is the proposed plant.

When TVA was requested late in 1952 to supply additional power requirements at Oak Ridge and Paducah and when TVA received appropriations to build steam stations to supply these requirements, 2 units were requested for Kingston, 2 units for John Sevier, and 2 for Gallatin. The Kingston plant is located near Oak Ridge, but the John Sevier plant is 70 miles away and Gallatin 150 miles away.

The Shawnee plant authorized to supply power at Paducah initially was to be a 4-unit plant, then 2 more units were added—not for AEC but for normal load growth—and then 4 additional units were requested on the basis of AEC's last request for power. However, in justifying additional capacity for the Paducah requirement, TVA requested funds for the last 4 units at Shawnee and also part of 2 units at Gallatin. Gallatin is 130 miles from Paducah.

It is apparent that TVA has long applied the theory of serving power loads by displacement—the same theory that their stanch advocates now denounce because it does not serve the purpose of adding further to the TVA empire. Electric power, like water, flows over the path of least resistance. A large power pool is somewhat like a large lake—one may put water, or power, in at one point and take a like amount out at another point. That is exactly what is happening here. The only difference between the proposed replacement of 600,000 kilowatts for the Paducah load and previous increases to the TVA system to supply AEC requirements is this: In the past, TVA made the decisions as to where it would locate its plants. In this case it has been decided, with competent technical advice, that additional power could advantageously be obtained through a contract between the AEC and private utilities from a new plant to be located in the Memphis area, the same area previously selected for such purpose by TVA itself.

Many confusing and misleading statements have been made indicating substantial additional costs under the proposed contract. Figures prepared by the Bureau of the Budget with the assistance of the Federal Power Commission give quite a different answer. These are the facts.

The Atomic Energy Commission has contracted with TVA for electric power. The contract is a document which lends itself to ready analysis—there can be no dispute on what the cost of power to the AEC will be, save for the effect of escalation provided for in the contract. The TVA does not charge its sister agency, the Atomic Energy Commission, the actual costs of producing that power. It charges a contract rate which will increase as national indexes of costs increase.

A proper appraisal of the proposed contract is simply a comparison of the cost of 600,000 kilowatts to be purchased from the private power companies versus the contract price in the existing TVA-AEC arrangement. I am sure that it will surprise many people to learn that the difference in cost is almost negligible. Based on fuel priced at 19 cents per million British thermal units, it is only $282,000 a year, exclusive of Federal income taxes which, obviously, should be ignored in this comparison. This very nominal difference in the bill of the power companies is even more impressive when it is considered that they must pay some $1,499,000 in State and local taxes.

Much has been made of the fact that the AEC is to pay, through this proposed contract, the Federal income taxes arising from the sale of power.

TVA, by law, is not required to pay any taxes on sales of power to AEC. However, if they should be required to do so, the following excerpt from article 5 of the AEC-TVA Paducah contract would govern:

> In the event that Authority is required by any law enacted after January 1, 1953, to pay any amounts for or in lieu of taxes which it would not have been required to pay except for the supply of power hereunder, including without limitation any payments resulting from Authority's ownership or operation of steam electric generating and other facilities required for such supply of power, Commission will reimburse Authority for such payments. Authority will confer with Commission before making any payment for which it would be entitled to such reimbursement in whole or in part.

That is in the existing contract.

Mr. HILL. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. HILL. The Senator from Arkansas realizes, of course, that today the Atomic Energy Commission does not pay the TVA anything for taxes, does he not?

Mr. FULBRIGHT. I have just made it clear that that provision is in the contract; and if the TVA is required to pay taxes, then the AEC will have to pay.

Mr. HILL. Of course, that is only a precautionary clause. The TVA has been supplying the AEC with power for some 14 or 15 years, and the AEC has never paid the TVA $1 for any taxes whatsoever. Other purchasers of power would have to pay taxes equivalent to what the TVA pays, but not the Federal Government. Whether it be the Atomic Energy Commission or the Air Force, for its Air Force base—all Government agencies are exempt from paying any taxes whatsoever.

I do not see how Arkansas really would get much benefit from this plant, even if it be admitted that the contract is a good one, except the payment of $1,500,000 each year for taxes, because not one kilowatt of the power is supposed to go into Arkansas. The Senator knows that a steam plant uses very little manpower; and so far as the machinery and equipment of the plant are concerned, they would not be manufactured in Arkansas; they would be built outside the State.

Mr. FULBRIGHT. I realize that the amounts which would accrue to Arkansas, contrasted with the enormous amounts which have been put into the TVA, look very small; but, as a matter of fact, there will be about $7 million a year, for 3 years, spent in construction. It is estimated also that there will be a payroll of $1 million a year, and that $1,500,000 will be paid in taxes.

To my State, that is a very substantial amount, although I am not basing my argument solely upon the benefits to Arkansas. I think the contract is a good one in itself, for the reasons which I hope the Senator will listen to, and will consider seriously.

Mr. HILL. I may say to my distinguished friend from Arkansas that the $1,500,000 which the contract would require the Atomic Energy Commission to pay to Arkansas does not seem like a small amount to me. I think it is one of the most outrageous things about the contract. The Atomic Energy Commission is the most delicate and vital agency connected with the defense of our country; yet it is directed to enter into a contract under which it will have to pay taxes, for which there is no precedent, so far as I know.

Mr. FULBRIGHT. Private suppliers to the Government pay taxes.

Mr. HILL. Oh, but the Senator knows that the Government of the United States, and particularly in its defense installations, does not pay taxes. Why should it pay taxes? The atomic facilities are constructed for the defense of the people of Arkansas as well as for the defense of all the other people of the United States. Shall we now establish a precedent whereby a Government agency, the Atomic Energy Commission, will have to——

Mr. FULBRIGHT. Just a moment; I have the floor. I wish to respond to the Senator.

I said that those who supply materials of all kinds to the Government pay taxes. It so happens that the school system of my State is dependent upon taxes, and that other facilities of the State need taxes with which to operate.

It also will be quite apparent as I develop the subject, I hope to the satisfaction of the Senator from Alabama, that what has been happening has been that the TVA has been siphoning out of AEC quite substantial sums of money, in many cases at a higher rate than is taken out of local citizens, enabling the TVA thereby to subsidize local citizens in a very satisfactory manner.

I should like to have the comments of the Senator from Alabama on some of the facts and comparative figures I shall use in a moment. The matter of taxation is not quite so simple as the Senator from Alabama would have us believe. There are more ways of getting money than by taxation, and of spreading it in the places where it is most appreciated, I may say. So I hope the Senator from Alabama will bear with me while I state some figures. If they are wrong, I should like to have the error pointed out.

Much confusion has been brought into the picture by various statements that the added cost to the Government would be from $3,500,000 to $5,500,000 annually. Those figures have been bandied about by speakers in both Houses of Congress and have also appeared in the press.

The figures represent an estimate—purely an estimate—of the difference between what TVA claims to be their net barebone expense of operating a powerplant versus a guaranteed cost backed up by the credit of the private power companies. If there is any substance in these larger figures, it must be that the TVA is charging its sister agency, the Atomic Energy Commission, a substantial profit on the power it now sells at Paducah.

To me, this is one of the key questions. The comparisons I am making, and to which I have referred, are between the existing contracts. There is no funny business about it. It is the price provided by existing contracts between the AEC and the TVA. It is a comparison of that rate and those conditions with the proposal of the private companies, not a comparison between an estimate taken out of thin air by the TVA and compared with the proposal by the private companies. That is a difference which has never been pointed out in the press. The legitimate proper comparison is with the existing contracts—the price the AEC now pays for the same kind of kilowatts. There is no difference in the kilowatts; they do the same thing in the same way in the steam plants. The proper legitimate comparison is between the price which is now being paid, based on 600,000 kilowatts, and the price contained in the proposal. That is the legitimate way for private persons to try to compete with or to do business with the Government. It is not some cooked-up proposal, which may or may not materialize; it is not a barebone proposal, as I have previously suggested.

I do not know—no one knows—how an activity so large as the TVA keeps its books. We do not know how much they allocate for depreciation or to the payments in lieu of taxes. They have a tremendous discretion as to how they shall keep their books. I do not mean to imply that there is anything wrong or anything dishonest, but all of us know that in any company there is great discretion as to how depreciation is taken, whether it be fast or slow. It is a quite legitimate bookkeeping procedure. But that question is eliminated when existing rates are considered. That is what I want to emphasize. I am comparing existing rates—rates which the AEC is now paying to the TVA—with the proposal made by private companies.

I say that if there is anything at all to the estimate made by the TVA, then TVA is certainly overcharging AEC. It is overcharging, in an unconscionable way, and in a way which no friendly agency should ever overcharge another friendly agency. It appears to me that if one accepts the proposal, or anywhere near the proposal, made by the TVA estimate, one must conclude that what the TVA has been doing is billing the AEC high charges and giving the benefit of the profits therefrom to the city of Memphis and other purchasers in the local area. I see no other explanation for it, and I call attention to the facts. The figures are not mine.

Mr. SPARKMAN. Madam President, will the Senator yield?

The PRESIDING OFFICER (Mrs. BOWRING in the chair). Does the Senator from Arkansas yield to the Senator from Alabama?

Mr. FULBRIGHT. I yield.

Mr. SPARKMAN. The Senator has just stated that apparently the TVA was overcharging the Atomic Energy Commission and passing the benefits on to municipalities which had contracted with the TVA for power. As a matter of fact, I am sure that when the TVA makes a contract with a municipality, it makes it for a long period of years. For example, the contract with Memphis was made nearly 20 years ago. The contract will expire in another year or so. So far as I understand, there has been no modification of the contract with Memphis or with any other municipality since it was originally made, so I do not see how it is possible for TVA to pass on the benefits accruing as a result of undue profits

which it has been making from contracts with the Atomic Energy Commission. If the Senator from Arkansas intends that the charge which he has made shall stand, I certainly hope he will give us the facts on which he has based his statement.

Mr. FULBRIGHT. I was on the verge of giving the facts. I was leading up to that. I made my statement not as a charge. I said that if the statement which has been made by the Senator from Alabama that the private power contract would cost the Government $5½ million more a year than the TVA estimate is accurate, that is, if TVA can undersell the private power companies by $5½ million, then certainly the TVA is overcharging under the existing contract.

I make that statement to point up the significance of the figures I am about to put into the RECORD.

Mr. SPARKMAN. Will the Senator yield for another question?

Mr. FULBRIGHT. I yield.

Mr. SPARKMAN. The able Senator has just used the figure $5½ million. I believe that is the estimate which the TVA made as to what the loss would be.

Mr. FULBRIGHT. Yes.

Mr. SPARKMAN. Is it not true that the representatives of the Atomic Energy Commission said that the loss would be $3,600,000 a year, or a figure similar to that?

Mr. FULBRIGHT. I am coming to the figures. I question the last statement made by the Senator from Alabama. I do not think the Atomic Energy Commission would put it in quite the terms stated by the Senator from Alabama. That amount has been used by the press, but I shall presently deal with those figures.

I point out again that the extravagant claims are based on the TVA estimate. The true comparison, I repeat, rests in the difference between the cost to the AEC for 600,000 kilowatts under their existing contract with TVA versus a proposal of the private power companies for an equivalent amount of power delivered where most needed; and that difference is $282,000 a year, which is more than offset by payment of State and local taxes of $1,499,000. I wish to emphasize that the $282,000 difference is after paying the full taxes in the State of Arkansas.

There are other advantages in the proposed contract. The private power companies are taking a substantial risk, for the Government can serve notice of cancellation at any time, to be effective 3 years thereafter. In other words, if the AEC finds that it does not need power in these amounts, or if a more economical source of power becomes available, it can cancel its contract on favorable terms, and the private power companies will have the burden of taking over the expense of paying for and operating this large plant. They are the ones that must find a market for the power. On the other hand, if this plant continues to be useful in the AEC's program, it can use it for the entire 25 years of the contract, and have an absolute call on the facilities for 2 additional 5-year periods.

The Atomic Energy Commission has, I believe, driven a sound bargain in its negotiations with these companies because, in addition to the privilege of cancellation, it has also protected itself in the event actual construction costs should exceed estimates. The contract for power is keyed to construction costs of $107,250,000, an amount found by the Federal Power Commission representative to be in line with existing costs. If construction costs should soar, the maximum exposure of the Government is limited to $285,000 per annum. On the other hand, if construction costs should be less than the estimate, the Government will share 50–50 in all such savings without limit. Thus, the sponsors have a real risk under the proposal offered, and a compelling reason to keep capital costs below the estimated cost of $107,250,000. The Government, on the other hand, stands almost no risk, and has a very real prospect of participating in savings.

Madam President, I ask unanimous consent to have printed in the RECORD at this point in my remarks a table which I have prepared, so that the figures may be contained in the RECORD, and I merely wish to discuss the figures for a moment with the Senator from Alabama.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Comparison of annual cost of power supply from Dixon-Yates proposal versus cost to AEC of power from TVA at Paducah, using 600,000 kilowatts capacity, 5.2 billion kilowatt-hours per year or 98-percent load factor, and 19 cents per million B. t. u. fuel cost

	TVA, present Paducah contract	Dixon-Yates, revised proposal Apr. 10, 1954
1. Power bill before taxes:		
Capacity	$8,208,000	$8,775,000
Energy	11,648,000	9,688,000
Total	19,856,000	18,463,000
2. Add for TVA transmission to point of delivery		177,000
3. Add State and local taxes		1,499,000
4. Total before Federal income taxes	19,856,000	[1] 20,139,000
5. Amount Dixon-Yates proposal including State and local taxes exceeds TVA rate		282,000

[1] Amounts to be paid by AEC to Dixon-Yates for Federal income taxes are not included as the same amounts would be paid to the Government for Federal income taxes.

Mr. FULBRIGHT. Madam President, under the present Paducah contract, which is the existing contract with the TVA, using 600,000 kilowatts capacity and 5.2 billion kilowatt-hours a year, or a 98-percent load factor, at 19 cents a million B. t. u. fuel cost, I will state the way the figures work out. I may say that the figures were prepared by the Bureau of the Budget.

The capacity charge of the TVA under the present contract is $8,208,000, and the energy charge is $11,648,000, making a total of $19,856,000. That is what the TVA now charges.

I shall now state the proposal by the private companies, the Dixon-Yates proposal, for a similar amount of power, under similar conditions, with a similar place for power. I shall not read the subtotals, unless the Senator from Alabama desires to have me do so, but the total of the energy, plus the standby charge, is $18,463,000. That is a substantially lesser charge when compared to the charge of $19,856,000.

Then the charge of $177,000 for the TVA transmission to point of delivery should be added. Then State and local taxes should be added, amounting to $1,499,000. Those all bring the total to $20,139,000.

That represents a difference of $282,000. The private companies' figures are that much higher.

The comparison made is with the existing rates in effect. The figures the Senator was referring to were based on a rate estimated by TVA.

The point I make, and I do not see how the Senator from Alabama can get away from it, is that the TVA is making an estimate of a much lower rate than it is presently charging the AEC. How does the Senator justify that?

It seems to me that the only legitimate comparison is with the rate being presently charged under an existing contract. When the TVA comes forward at this late date and says, "Oh, we can do it $3,500,000 or $5,500,000 cheaper," it seems to me there is something questionable about such a procedure.

When the private company is asked by the Atomic Energy Commission to make a proposal, and when it makes a proposal in trying to approach the existing rate, it seems to me that is the proper way to proceed.

So I say that these circumstances lead me to believe that the Atomic Energy Commission is presently being overcharged. I believe there are several reasons why the Atomic Energy Commission should cast about for a new source of electric power, and it seems to me that possibly, and probably, one of the reasons is a feeling that it was being overcharged.

Now let me refer to the figures regarding Memphis, that I mentioned a moment ago. These figures are for the sale of power to Memphis, Tenn., by the Tennessee Valley Authority, for the fiscal year 1953. The TVA sells power to Memphis at an average monthly demand rate of 249,054 kilowatts. The annual sale of power amounted to 1,459,861,220 kilowatt-hours.

Madam President, I ask unanimous consent to have printed at this point in the RECORD the table to which I now refer. These figures are very complex, and I wish to have them available for study by other Senators who are interested in this subject.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Sale of power to Memphis, Tenn., by TVA, fiscal year 1953

1. TVA sales to Memphis:	
Average monthly demand (kilowatts)	249,054
Kilowatt-hours sold [1]	1,459,861,220
Revenue [1]	$5,663,005
Average per kilowatt-hour [1] (mills)	3.88

[1] Distributors of TVA Power 1954 Annual Report.

Sale of power to Memphis, Tenn., by TVA, fiscal year 1953—Continued

2. TVA contract rate to AEC (contract dated Mar. 26, 1953):	
Capacity charge: per kilowatt-month ($13.20 per kilowatt-year)	$1.10
Energy charge[2] (mills per kilowatt-hour)	2
3. What Memphis would have paid TVA under TVA-AEC contract rate:	
249,054 kilowatts at $13.20	$3,287,513
1,459,861,220 kilowatt-hours at 2 mills	$2,919,722
Total	$6,207,235
Average per kilowatt-hour (mills)	4.25
4. TVA-AEC contract rate over TVA Memphis charge:	
Amount	$544,230
Percent	9.6

[2] Based on fuel at 17.5 cents per million B. t. u.

Mr. FULBRIGHT. Madam President, the sale price was $5,663,005. It works out at an average kilowatt hourly rate of 3.88 mills. These figures are taken from Distributors of TVA Power 1953 Annual Report.

Under the contract with the Atomic Energy Commission, under date of March 26, 1953, the capacity charge has been $1.10 per kilowatt-month, or $13.20 per kilowatt-year. The energy charge was 2 mills per kilowatt-hour. The following is what Memphis would have paid the TVA under the TVA Atomic Energy Commission contract rate—in other words, when applying to the electricity that Memphis actually used, the rate the TVA is charging the Atomic Energy Commission: a total charge of $6,207,235, as compared with last year's figure of $5,663,005, or an overcharge of $544,230. The percentage overcharge is 9.6. The average charge per kilowatt-hour would have been 4.25 mills, as compared to a charge of 3.88 mills for the 1953 TVA sales to Memphis. The difference between these figures is hard for me to explain.

Mr. SPARKMAN. Madam President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. I yield.

Mr. SPARKMAN. Certainly the Senator from Arkansas must understand that an accurate comparison cannot be made between the power supplied to the Atomic Energy Commission, which in large part is for industrial purposes, and perhaps is supplied on a 24-hour basis, and the power which is sold to a city, a great part of which is used for the ordinary lighting of homes and for various commercial uses, and so forth. In other words, for city use, certainly different types of power are mixed together, whereas the chances are that most of the power supplied to the Atomic Energy Commission is supplied on an industrial basis, and I assume it must be firm power, perhap on a basis of 24 hours a day.

So I think the Senator from Arkansas would have to go much further than he has gone in order to show an accurate comparison. In fact, I doubt that a true comparison could be shown, as between two different types of power served.

Mr. FULBRIGHT. Of course I would not undertake, even if I could—and I cannot—to go into the technicalities the Senator from Alabama has raised. But there are certain facts we do know about the relationship. For example, we know that the AEC obtains funds from Congress very easily. In fact, Congress rushes virtually to cover the AEC with money, because we are so afraid of Russia, and we have become so hysterial about the possibility of being wiped out; and because of a lack of other policy, we build atomic bombs. At any rate, for various reasons we have almost overwhelmed the Atomic Energy Commission with money.

Thus, in the face of that situation, there is a great temptation to the TVA, which has had great difficulty in obtaining funds. I remind the Senator from Alabama that I have always supported the TVA; yet our efforts to obtain funds for it have invariably involved considerable struggle and controversy. So I think the TVA would be under some temptation to let the Atomic Energy Commission pay a little higher rate, for, after all, the AEC has a great deal of money.

When the TVA is charging the AEC the rate I have just stated, and when a counterproposal is submitted by a private company, and then when the TVA suddenly finds it can undercut that proposal probably by $5,500,000, I must say it is a circumstance that I find hard to explain; and I do not think the Senator from Alabama has yet explained it to my satisfaction.

Mr. SPARKMAN. I am not certain that the sequence of events as related by the Senator from Arkansas is correct—in other words, that the TVA rushed in and tried to meet a bid which had been made to the Atomic Energy Commission.

Mr. FULBRIGHT. In what way was I in error?

Mr. SPARKMAN. I said I was not certain that the Senator from Arkansas had the proper sequence—in other words, that the TVA rushed in, after the other proposal had been made, and tried to compete with it.

But a few minutes ago the Senator from Arkansas said the Atomic Energy Commission was trying to find other sources of power, and he thought perhaps one reason was the high charge being made to it. As a matter of fact, is it not true that the representatives of the Atomic Energy Commission have testified before the committees of Congress that they did not deem the proposed contract to be in the national interest?

Mr. FULBRIGHT. All I can say, Madam President, is that the Chairman of the Atomic Energy Commission personally told me that they were casting about, in the latter part of last year, for other sources of supply of electric energy. That is not hearsay on my part.

Mr. SPARKMAN. Of course, so long as Congress refused to appropriate money to allow the TVA to expand its generating capacity, it had to be looking for other sources of power. But despite all that, is it not true that a majority of the members of the Atomic Energy Commission, according to their testimony before congressional committees, were opposed to the contract, and stated that they did not deem that it was in the public interest?

Mr. FULBRIGHT. No; I do not understand their testimony to be subject to that interpretation. The furthest I would go would be to say that I think 2 or 3 of the members felt perhaps they were getting beyond their proper jurisdiction, let us say. There is no question that they have the legal authority. I think perhaps they felt they should not concern themselves with making electric-power contracts.

Mr. SPARKMAN. For power not for their own use.

Mr. FULBRIGHT. However, I do not think what they said can properly be interpreted as a statement that it was not in the public interest. I do not think they said that at all.

Mr. HICKENLOOPER. Madam President, will the Senator from Arkansas yield for a question?

Mr. FULBRIGHT. Madam President, I shall be glad to yield in a moment.

First, in regard to the inference left by the Senator from Alabama—namely, that perhaps Congress has been niggardly with the TVA—I shall ask unanimous consent to have printed in the RECORD some figures which have been calculated to show how ungenerous we have been with the TVA. As a matter of fact, it is very clear that we have been extremely generous with the TVA, and I am glad it has profited as a result. The total appropriations by Congress for the TVA amount to $1,596,734,581. So I would say Congress has not been too mean to the TVA.

I ask unanimous consent that the table to which I have referred be printed in the RECORD at this point as a part of my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Tennessee Valley Authority, fiscal year 1953

1. Fixed assets, June 30, 1954:	
(a) Total (less reserves for depreciation)	$1,359,618,270
(b) Portion applicable to power:	
Completed powerplant (less reserves for depreciation)	803,481,086
Construction and investigations in progress	205,684,170
Total	1,009,165,256
2. Appropriations by the Congress, June 30, 1954	1,596,734,581
3. Estimates of cost to complete major dam and power projects under construction or authorized: Estimate from TVA 1953 annual report	694,000,000

Mr. FULBRIGHT. On July 7 Representative PHILLIPS made this statement on the floor of the House of Representatives:

We appropriated $377,438,000 to the TVA for next year, and we will get back $50 mil-

lion. We appropriated $214,526,000 for the year just ended, and we got back $20 million. We appropriated $209,046,402 for 1953 and we got back $15 million.

I think there has been fairly generous treatment of TVA. We have not been niggardly with it. I am not advocating that we cut it off, either. It is a question of proper balance.

I now yield to the Senator from Iowa.

Mr. HICKENLOOPER. I thank the Senator from Arkansas. I have been very much interested in the figures which the Senator has developed as to the cost per kilowatt-hour for electricity furnished in the Memphis area by the TVA, which I have noted as 3.88 mills.

Mr. FULBRIGHT. That is what the TVA actually gets now.

Mr. HICKENLOOPER. As compared with a charge of 4.25 mills to the Atomic Energy Commission, based upon the figures which the Senator has placed in the RECORD.

Mr. FULBRIGHT. That is correct.

Mr. HICKENLOOPER. I should like to ask the Senator a question. I think there is another factor which enters into the cost differential, which does not appear from the bare figures which are used for the calculation.

As the Senator pointed out a moment ago, the Memphis area is a residential area. There are many thousands of residences, thousands of meters, and thousands of miles of electric line which must be maintained, as I understand, by the electric company. There are hundreds of small factories individually served, whereas in the Paducah area, for the AEC use, the general rule is that the power is pushed in through a tremendous pipe. It then becomes the property of the AEC, and the AEC handles it from that point on.

In other words, it is dumped, as compared with being filtered into the Memphis area. Normally the cost of dumped electricity should be far less than the cost of electricity in an area where there are thousands of installations which must be maintained the cost of which must be included in calculating the cost per kilowatt-hour.

So I do not believe the figures which the Senator has given show the full amount of the overcharge which the Atomic Energy Commission is now paying to TVA, in comparison with what TVA is charging in an area of diversified industry, and in residential areas, which it must serve with countless employees and installations. I wonder if the Senator has taken into account the fact that it is far more costly to put electricity into a diversified community than it is to deliver such electricity in great quantities to a vast industrial plant, and allow the plant itself to take over the responsibility of distribution within the plant.

Mr. FULBRIGHT. Of course, what the Senator has said would confirm my argument. However, I believe the municipality accepts the power at the gateway to the city, and distributes it. I do not believe the TVA distributes it. Therefore, the actual delivery would be practically identical in both cases.

Mr. HICKENLOOPER. I asked the Senator that question because I did not know. If the TVA services the community——

Mr. FULBRIGHT. The power is turned over to the community's own distributing system, and the community or municipality handles it from that point on. However, there is something to the Senator's argument. The city is selling power to private consumers. It is uniformly true, I think, over the country that power delivered in small amounts is sold at a higher price than power delivered to a large user. The Senator is quite correct, I think, in that under normal circumstances, if the Atomic Energy Commission were not a Government installation, but a private installation, the rate would probably be cheaper than the rate charged the city, which, of course, is just the reverse of the fact.

Mr. HICKENLOOPER. Under the circumstances which the Senator has explained, my additional comparison of the ramified distribution system in a city would not necessarily be applicable.

Mr. FULBRIGHT. The cost would, of course, be absorbed by the city's own company. I do not know, but my guess is that the city probably makes some profit. The amount of profit is determined by the TVA. My guess is that the TVA is probably very generous to the local distributing system, because, after all, there is a reciprocal relationship. If one were to read the newspapers in Memphis these days and see all the letters indicating strong support for TVA, he would conclude that the people of Memphis deserve good rates. They deserve to be treated well. They have been treated very well by TVA for many years. I do not complain about that. I am only trying to examine into the factors involved, and see whether or not the proposed contract is against the public interest. I do not believe it is.

Mr. HILL. Madam President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. HILL. The Senator has stated the proposition correctly. TVA is not what we might call a retail distributor.

Mr. FULBRIGHT. That is correct.

Mr. HILL. TVA generates and transmits power to some 150 municipalities and REA cooperatives. Those municipalities and REA cooperatives do the distributing, as was described by the Senator from Iowa. The TVA does not do the distributing.

Mr. FULBRIGHT. That is correct.

Mr. HILL. Earlier the Senator spoke about the appropriations for TVA. I am sure he knows that about half the TVA power today goes to the Atomic Energy Commission. I emphasize this, because of the amount of appropriations which went into investments for the power. A large amount of additional power goes to great national defense installations, such as the great Tullahoma Air Base installation, great ordnance installations, chemical plants, and other installations which are direct national defense installations. So, of course, a large part of those appropriations can be charged directly to providing power for the national defense. As I stated earlier, all such power is provided to the Government by TVA without 1 penny of cost for taxes.

Mr. FULBRIGHT. The Senator is quite correct. This is what might be called the reverse of what we sometimes call a vicious circle. This is an extremely happy circle. The TVA area has the TVA. Since it has the TVA, it attracts many additional plants. Two years ago I did everything in my power, as did many others in the State of Arkansas to get one little atomic plant in Arkansas. We had everything else except the TVA. However, that atomic energy plant went to the TVA area. In that area there are not only public installations, but private installations. It is true that the public installations pay no taxes, but is it not a happy circumstance that the TVA is able to sell power to the citizens of Memphis and to the 150 installations to which reference has been made, at a rate much lower than others pay? The most significant and amazing thing to me, after I went into the contract, was to learn that power sold in the Memphis area was sold at rates lower than the Federal Government was being charged. That is a circumstance which the Senator from Alabama has not yet explained to my satisfaction. I am waiting for the explanation.

Mr. HILL. When there has been opportunity to examine the Senator's figures there will be good reason to show that the TVA has not in any way charged the Atomic Energy Commission a higher rate. On the contrary, the very statement which the Senator from Arkansas has just made, to the effect that the atomic-energy plant went to the TVA area, when he tried so hard, powerful as he is, to get that plant for Arkansas, demonstrates the incorrectness of the Senator's premise with respect to the TVA in some way charging the Atomic Energy Commission too much. If there had been any such thing as that, with all the power and pull of the Senator from Arkansas, we know that the atomic-energy plant would have gone to Arkansas, instead of to the TVA area. So I believe the Senator, by his own illustration, has largely destroyed his own case.

Mr. FULBRIGHT. I will say to the Senator that in Arkansas we cannot even approach this overcharge which the TVA puts on the AEC, for various other reasons. However, we are making progress. I may say that if the plant comes to Arkansas, we will get a diffusion of this great largess which has been concentrated in such a restricted area in the Tennessee Valley. Since the Senator mentioned that over a billion and a half dollars have been poured in, I do not believe he should resent some small crumbs falling off the table and being available across the Mississippi River. I do not know why he should be so upset. It will not hurt TVA. As a result of it, not one man will lose his job in TVA. This is not a proposal to cut down the power. It is to provide an additional source of power in that whole area. I do not believe the Senator should take it so hard. I cannot understand why the TVA advocates are so distressed about this plant being located across the river. It amazes me that the Senator should be so disturbed about it.

Mr. HILL. Madam President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. HILL. I may say to my distinguished friend—and he knows the high esteem and appreciation in which I hold him—that I would be delighted to see Arkansas have anything. I would be delighted to see any good come to Arkansas. However, so far as the contract is concerned, there are many things that make it an outrageous contract. By forcing the Atomic Energy Commission to be a broker for private power, it opens up a precedent of taxing the Federal Government, through a defense activity, to provide a windfall for the State of my friend from Arkansas and a good chance for a private-utility monopoly to drive into the TVA area in an effort to destroy the TVA yardstick.

Mr. FULBRIGHT. I should like to inquire whether the Senator from Alabama is opposed to a windfall on principle or only because it is going to the other fellow?

Mr. HILL. I am opposed as a matter of principle, particularly.

Mr. FULBRIGHT. On that point, the Senator's opposition as a matter of principle——

Mr. HILL. Particularly where the Federal Government is concerned and where the defense of the United States is concerned, it is outrageous to tax the defense of the United States to provide a windfall for Arkansas or any other State.

Mr. FULBRIGHT. I will ask the Senator, if this is a windfall, what does he consider the rate to the citizens of Memphis to be? That rate, from the same TVA, is substantially below the rate that is paid by the Federal Government. Is that not a windfall to the consumers of Memphis?

Mr. HILL. No, because I am confident——

Mr. FULBRIGHT. Is that just manna from heaven?

Mr. HILL. No. I say when the figures are properly analyzed it will be found that the Atomic Energy Commission has received a very fair and reasonable rate in terms of the other TVA rates, and that is the reason why the Atomic Energy plant was not located in Arkansas, but in the TVA area.

Mr. SPARKMAN. Madam President, will the Senator yield?

Mr. FULBRIGHT. I believe I asked permission before to have these figures go into the RECORD. I shall be very interested to hear what the Senator has to say about them, after he has had an opportunity to study them. I realize it is very difficult for him to challenge the figures, because I know they are accurate figures.

Mr. SPARKMAN. Madam President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. SPARKMAN. On that same point, I doubt seriously that the figures which the Senator from Arkansas will put in the RECORD will tell the story. They will not tell the story unless they are broken down as to quantities and types of power, because a city, with its diversity of use, can utilize a great deal of secondary or dump power, instead of requiring all of it to be firm power.

Mr. FULBRIGHT. I said all that in the beginning of my remarks. If the Senator would like to look at these pages I shall be glad to show them to him.

Mr. SPARKMAN. I doubt seriously that the figures themselves will be sufficient until the different types of power and the quantities of power are shown. When they are shown, I am just as confident as I can be that the Senator from Arkansas will find that there is no overcharge to the Atomic Energy Commission.

By the way, it should be remembered that TVA never asked for the privilege of serving the Atomic Energy Commission. Congress gave it that job, and TVA has been complying with the obligation Congress imposed upon it.

Mr. FULBRIGHT. Well, what of that? That is all right.

Mr. SPARKMAN. The Senator seems to have the impression that TVA went forth begging for the privilege of serving the Atomic Energy Commission.

Mr. FULBRIGHT. The TVA is certainly objecting to anyone else trying to do it.

Mr. SPARKMAN. The Senator from Arkansas has based most of his argument on TVA. I wish to emphasize what my colleague, the senior Senator from Alabama, said a few minutes ago. I hope the Senator from Arkansas appreciates this statement. As a matter of fact, the worst thing about this contract is that it is an order from the President of the United States to an independent agency of the Government to do something that Congress never intended it should be charged with doing when it created the agency. Not only is it an independent agency, but it is the most sensitive independent agency in the whole Government.

The Atomic Energy Commission is ordered to be a power broker for the purpose of buying power, not for the use of the Atomic Energy Commission, but for sale to the people of Memphis, with the extra charge passed on to TVA, and with the extra money, whatever it may be, paid by TVA.

Mr. FULBRIGHT. With all due deference, I must say there is nothing to that argument at all. I treated that point in my remarks before the Senator came into the Chamber. I referred to the 600,000 kilowatts being used in the Paducah area. In the Southwestern Power Administration we get it in reverse. The Southwestern Power Administration, which is a small Administration, but similar to TVA, has power to sell in Texas. It has a customer far off, where it has no lines. It sells power to that customer, and it feeds the amount contracted for into a private company's line in Texas. A similar amount is taken out at the other end by the customer, an REA cooperative. We call it wheeling, or displacement. There is nothing peculiar about it. I do not understand why the Senator should make so much of it. There was a good reason for not providing another 600,000 kilowatts there. Suppose it was necessary to cancel it. Suppose unforeseen circumstances made it unnecessary to provide this additional power to the AEC and it became necessary to cancel the contract. It would have created an intolerable situation in the Paducah area if that power-generating capacity were put up there. I covered all those points in my earlier remarks. There is nothing to that argument.

The simple problem is whether or not, from the point of view of the Government, it is a wise contract. In other words, does it give a source of supply, and is it within reason so far as its cost is concerned?

I will grant that if the figures which were used by some Senators from the TVA area, which indicated that there was an overcharge of $5½ million, that would be a very substantial amount, and would be improvident. However, if it is only $282,000, as I believe it is, on any fair comparison, then it is a justified contract, and the other advantages which are involved further justify it.

Mr. BUSH. Madam President, will the Senator yield?

Mr. FULBRIGHT. I yield to the Senator from Connecticut.

Mr. BUSH. The $282,000, as I believe the Senator has pointed out, relates to a cost of something like $22 million. Therefore it is in the vicinity of 1 percent.

Mr. FULBRIGHT. That is correct. It is a very small percentage.

Mr. BUSH. That is the justification for the Senator's statement that the difference in the matter of cost is negligible. Is that correct?

Mr. FULBRIGHT. That is correct.

Mr. BUSH. I may have to leave before the Senator finishes his able address. Therefore I wish to commend the Senator for his defense of the decision of the President and for his very clear analysis of the situation. It has been said by those who oppose the President's view in this matter that this is an attempt to scuttle the TVA. I should like to ask the Senator directly whether it is his feeling that that is the case?

Mr. FULBRIGHT. I say certainly it is not. I do not believe it will injure TVA. On the contrary, I think, we should have more balance in my section of the country and throughout the South. I would not vote to abolish TVA or to injure it. If we could get a better balance, I think the attempt on the part of some persons to injure TVA would be quieted. The amount involved has been very substantial. I think it is time that development should take place in other parts of the area, across the river. I cannot understand why the advocates of TVA take it so seriously. I do not believe it will hurt the TVA.

Mr. BUSH. I am glad to hear the Senator say that, and I certainly concur heartily in his statement.

Does the Senator believe the President's decision in this matter is directly in line with his general policy, that it is not the appropriate thing for the Federal Government to handle these business operations when local and private agencies are able and willing to do it? Is not that in line with the general philosophy?

Mr. FULBRIGHT. I do not believe I am competent to pass at this time upon the validity of the general principles of the President. That is a little too broad.

But in this specific instance I believe the bringing in of this additional source of power is justified on many grounds.

Mr. BUSH. The point I wish to make is that it seems to me it is directly in line with the policy of which I strongly approve. I think it is very much in line with some of the other things which are coming before us for a vote, and with some which have been before us recently. When the Coosa River project was before us the Senators from Alabama were loud in their praise of the bill which was to repeal an enactment of the Congress in order to get into operation a private development on the Coosa River. I helped them to get the bill through, and was very glad to do so. It is surprising to me to see that when we have before us a privately operated station on the other fringe of the TVA area, our friends are violently in opposition to it. I do not think their position is entirely consistent with the premises at all.

Madam President, I wish to say to the Senator from Arkansas that I am delighted to hear his address on this subject. I think it is proper and fitting that some Senator should rise and defend the President's policy in this connection, and I congratulate the Senator very much on his remarks.

Mr. FULBRIGHT. I thank the Senator from Connecticut very much for his contribution.

Mr. STENNIS. Madam President, will the Senator from Arkansas yield?

Mr. FULBRIGHT. I yield. I am sorry the Senator from Mississippi was not here earlier. I quoted with approval from the Senator's speech.

Mr. STENNIS. I appreciate the Senator's compliment. It is a compliment to have my speech quoted with approval by the Senator. I do not think the Senator has ever been a member of the Atomic Energy Committee, but I think he would make a fine member of it.

Mr. FULBRIGHT. I should be glad to be a member of it.

Mr. STENNIS. In any event, does not the Senator know that there was not a single member of the Atomic Energy Commission who really wanted to become involved in the matter of negotiating a contract for power? Although it has never been denied that they said they would go along with the wish of the President. Does the Senator accept that as a fact?

Mr. FULBRIGHT. I should like to deny it right now. I personally talked with two members and discussed this matter with them. I do not agree with the Senator. I am not a member of the Atomic Energy Committee nor obviously of the Commission, and I am not as well acquainted with all the members of the Atomic Energy Commission as I might be, but two members of the Commission including the Chairman, I do know, and I have discussed it with them. They are in favor of the contract. In fact, they participated, I think, in originating the entire idea, on the ground of the need of additional sources of power and on the ground of not concentrating all of it in the area of Paducah.

Mr. STENNIS. I am not attempting to speak for the members of the Commission. I have not talked with them at all.

Mr. FULBRIGHT. I have talked with two of them.

Mr. STENNIS. There was a press report stating that 2 members opposed it and that 2 said they would go along with the President's wishes, and, since that time, they have said they were for the contract. I am using that as a preliminary remark to this question: Does the Senator think it is a sound policy of government for the Atomic Energy Commission, which is charged with great responsibility, on the very highest plane, with reference to the national security, in the very highest realm of national security, on an absolute nonpartisan, nonpolitical, and nonsectional basis, with the whole world looking to it for a decision, and having to consider cases such as the Oppenheimer case, for illustration, to be also dabbling in this highly controversial domestic question of public power and private power? Does not the Senator think the Commission should be kept entirely out of domestic controversy and squabbles of that kind?

Mr. FULBRIGHT. That is a long question. In the first place, I do not know how we can keep anything of such importance as atomic energy out of domestic controversy, any more than we can keep the Senate out of domestic controversy. Controversy is the very essence of any democratic system. The purchase of power is most important to the AEC. The purchase of uranium is likewise important and may involve greater expenditures. I cannot, however, imagine that the Commission would not be extremely interested in its power rates. The Commission should have more than one source of power, if that is possible. As I pointed out before the Senator entered the Chamber, there is evidence to indicate that they are being charged more than other people are being charged by the TVA within that area, for instance, in the city of Memphis.

I think it is good business to have more than one source of supply. I know that persons who manufacture do not like to be dependent upon a single source of supply. If the price is not out of line, I think there are many good reasons why they can bring into this picture a private source.

There is one other item which I suppose would not appeal to the Senator from Mississippi; it is an item of $100 million which would have to be appropriated for the TVA if it built the plant. If the proposed contract is approved, then a private company will do its own financing largely through loans from insurance companies and banks. The private source would pay more interest by approximately 1 percent. The Government can obtain money for 2½ percent.

We are going to be asked in a few days, probably, to raise the public-debt limit. I was against it last year, and I may be against it this year. I certainly cannot be against it if we continue increasing appropriations.

This is a long-term contract. No one knows but that within 10 years we may use atomic power itself to generate electricity, and such a contract will not be necessary. There are provisions in the contract for cancellation, which do not occur, I may say, in the other alternative which has been said to have been offered, nor would it be possible to cancel it if the Government itself built the plant. The Government would be stuck with it. That is an important economic business consideration. I cannot imagine, important a part of the whole operation as electricity is, that the Atomic Energy Commission could ignore it or not be concerned about it, as the Senator from Mississippi has suggested.

Mr. STENNIS. I did not suggest that the AEC should not be concerned about rates at a time when it should be concerned. My point is that the movement in this direction precipitates the AEC unnecessarily into the middle of a highly controversial matter which has been raging throughout the country for many years, and will continue to rage for many more years. If that is to be the case, the TVA should have been directed either to generate the power or to negotiate for the purchase of it. Although I have not looked into the question, I doubt that there is authority in the law for the TVA to enter into the contract. The General Accounting Office raised the point. It said it was doubtful whether the Atomic Energy Commission had such authority.

Mr. FULBRIGHT. I do not think there is the slightest doubt about it. There is specific authority in the Atomic Energy Commission legislation to enable the Commission to make contracts up to 25 years for the purchase of electricity or anything else.

Mr. STENNIS. I appreciate the Senator's yielding to me.

Mr. FULBRIGHT. The Senator from Mississippi says that this should not be a controversial subject. I do not think it should be controversial either. That is why I have been surprised at all the controversy which has arisen on the floor. This is the first speech which has been made on the floor in defense of the contract. I did not start the controversy. The contract has been so viciously attacked, and I think so unfairly and erroneously attacked, and figures have been so freely used without justification, that someone simply had to say something about actual facts of the contract.

Mr. STENNIS. The Senator from Arkansas certainly is within his rights. No attempt has been made to limit him.

Mr. FULBRIGHT. I think everyone should quiet down and let the contract proceed as it should.

Mr. STENNIS. My point is that there is already a public power controversy, and this puts the Atomic Energy Commission right in the middle of it. The Commission will have a hard time regaining the high place in the Halls of Congress which it has always had, at least since I have been a Member of Congress, and I think since the Atomic Energy Commission was created.

The Senator from Arkansas made a point about the amount of money which will be saved. I certainly am not opposing private enterprises having legitimate investments. That is all right. If private enterprise can make money, well

and good. But as one who has served on the committee which has been considering this year the bills to construct post offices and other public buildings under a new plan, and to build ships under a new plan, and although I supported the bills in their final form, I am firmly convinced that there will not be any money saved.

So the Senator from Arkansas will be disillusioned. When he ascertains the real facts, he will understand that there will not be any savings in dollars and cents to the National Treasury on this proposal.

I thank the Senator for yielding. I do not unnecessarily wish to take up his time.

Mr. HILL. Madam President, will the Senator yield?

Mr. FULBRIGHT. I yield to the senior Senator from Alabama.

Mr. HILL. The Senator from Arkansas has referred at quite some length, and with considerable emphasis, to certain rates which the AEC paid to the TVA for power. Can the Senator advise us whether or not the power for which those rates were paid was power generated by the TVA in a TVA plant?

Mr. FULBRIGHT. Those are figures to which I am about to come. The figures I was citing are the rates which are provided in the contract as compared with the Memphis rates. It does not matter where they came from. Those are the rates which are provided in the contract.

Mr. HILL. Madam President, will the Senator further yield?

Mr. FULBRIGHT. In a moment. That is the rate under the existing contract. I think that what the Senator from Alabama is coming to—and I have the figures in my hand—are the so-called interim rates being charged in the process of the building of the new power installations. I shall read the figures now.

Mr. HILL. That is what I want. Some of those rates are rates paid to private power companies.

Mr. FULBRIGHT. I understand.

Mr. HILL. It is for power which the TVA bought from private power companies for the Atomic Energy Commission.

Mr. FULBRIGHT. In the initial stages of construction. The figures which I quoted with respect to the proposed rate are not that case. They are the firm, permanent rates under the existing contract between the TVA and the AEC at the Paducah plant.

Mr. HILL. Is the Senator now getting ready to address himself to the rates being paid by the TVA to private power companies for the AEC plant?

Mr. FULBRIGHT. For the period from January 1, 1951, to December 31, 1953, the AEC bought for use at its Paducah plant 2,987,403,660 kilowatt-hours from TVA, for which they paid $20,277,585.78, or an average cost of 6.7897 mills per kilowatt-hour. During the same period, the AEC bought from Electric Energy, Inc., almost the same number of kilowatt hours—2,802,626,121—for $16,001,700.64, or 5.7095 mills per kilowatt-hour.

Therefore, private power was more than a mill cheaper per kilowatt hour.

Mr. HILL. Madam President, will the Senator yield?

Mr. FULBRIGHT. In a moment.

I am not suggesting that this is representative of what the costs will be when both the private plant and the TVA plant near Paducah are completed. I think it indicates, though, that the private power companies, during the period of the construction of their facilities near Paducah, have done a workmanlike job in getting kilowatt-hours to the AEC at fair prices, at lower prices than the TVA prices, for whatever reasons.

That is interesting. I looked at the actual figures, and I asked for an explanation of them. I was told, as the Senator has indicated, that the TVA had to buy from private sources some of the power which they supply. But I may say that the figures which I used a moment ago, to compare with Memphis, are not interim power rates; they are the rates which will be charged under the existing contract.

I should very much like to have the Senator from Alabama ascertain what is wrong about the figures I have placed in the RECORD. I do not think anything is wrong with them. This is a comparison between Memphis and the AEC. The figures which I think the Senator had in mind are the interim rates, during the period of construction.

It seems to me that the TVA is not making a very strenuous effort to give the AEC a break during this period, when it is charging the AEC almost 1 mill more—6.7 mills against 5.7 mills. That appears to be too big a difference to be justified on any ground.

Mr. HILL. Madam President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. HILL. Of course, the Senator realizes, does he not, that the TVA had to buy the power on an interim basis, and had to pay pretty much whatever the private power companies charged? Those rates were not fixed by the TVA, but were fixed by the private power companies.

Mr. FULBRIGHT. The TVA has been buying enormous amounts of power from private companies throughout the years. I gave the figures a moment ago. They are such large figures that I cannot remember them. It was something like 4 billion kilowatt-hours that was purchased from private sources. The TVA is now buying power from private sources; it is buying it from the southwest grid, through an interchange agreement. This is not something which occurred to the TVA overnight. It is possible, too, that the TVA billed the AEC for some of the more expensive power it obtained from private sources during this period.

If there were only one instance in which the TVA had charged the AEC more than had been charged other power consumers, I should think that perhaps that was not very significant. But the figures relating to the Memphis sales seemed very significant to me. I think I understand the reason for it.

If I were trying to maintain my position and to be popular with my constituents, I would give them a break, too. I would try to give them a break, because that is a part of the game in which we are engaged, in trying to keep the peace among a great many people in the 48 States. This is one of the ways in which to do it.

I am not blaming anyone; I am trying to explain the circumstances which I think gave the Atomic Energy Commission the justification for entering into negotiations for this contract.

Mr. SPARKMAN. Madam President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. SPARKMAN. The able Senator from Mississippi [Mr. STENNIS] a few minutes ago referred to the stand taken by at least three members of the Atomic Energy Commission. I should like to quote from the testimony of one of the witnesses before the joint committee. I refer to the testimony of Commissioner Thomas E. Murray, who testified as follows:

> Since our program is not advanced by these negotiations and the subsequent administration of this 25-year contract, I do not believe that it is desirable for the Atomic Energy Commission to perform a function that another agency of the Government could perhaps more logically perform.

He was certainly testifying directly in opposition to the statement made on the floor of the Senate. It is my understanding that at least two of the other Commissioners testified in a similar vein.

Mr. FULBRIGHT. As I said to the Senator, there is a difference of opinion. We often run into differences of opinion, even on the floor of the Senate. I am sure Commissioners are not immune from differences of opinion.

Mr. SPARKMAN. In this case it happened that a majority of the Commission was in opposition to the order sent by the President to an independent agency, telling it to do something which did not fall within the category of its obligations at all.

Mr. FULBRIGHT. Of course, there are many differences. As I understand, a majority of the Commission was opposed to going forward with the H-bomb, but the President overrode it and went ahead. There often occur differences of opinion. I personally happen to know that two of the members of the Commission are not opposed to what is proposed. I have not spoken to the other Commissioners. I have spoken to two of them, including the Chairman. I do not want to leave the impression that they endorse such a contract. They say conditions are such as to justify negotiating for a contract. If the contract works out as they think it will, it is their position that it should be entered into. They have not said such a contract should be signed. They have merely stated that they should enter into negotiations. If the private group can do what it has indicated it can, then the contract should be entered into. That is their position.

What is the function of the President in our system of government? It is properly a function of the President

to resolve differences within his official family, in this case between the TVA and the AEC. There is nothing wrong with his stepping in and saying, "This should be done." I do not say I always accept his judgment, but there is certainly nothing immoral or illegal about his action, nor is it beyond his jurisdiction.

Mr. SPARKMAN. I believe the Acting Comptroller General questioned the legality of it. That is the way I interpret the letter he wrote. He did indicate that perhaps under the Second War Powers Act the President might invoke his powers.

Mr. FULBRIGHT. This is the second or third time that point has been raised. I wish to read a paragraph from a memorandum prepared by the General Counsel, William Mitchell, of the Atomic Energy Commission:

Section 12 (d) of the Atomic Energy Act reads as follows:

"12 (d). The Atomic Energy Commission is authorized in connection with the construction or operation of the Oak Ridge, Paducah, and Portsmouth installations of the Commission, without regard to section 3679 of the Revised Statutes, as amended, to enter into new contracts or modify or confirm existing contracts to provide for electric-utility services for periods not exceeding 25 years"—

And so on. It is as clear as a bell to me what that means. I shall be glad to read the entire paragraph, if the Senator from Alabama is interested.

Mr. SPARKMAN. I suggest that the Senator have it printed in the RECORD.

Mr. FULBRIGHT. I am willing to read it all, but I ask unanimous consent that the paragraph be printed in the RECORD at this point.

There being no objection, the paragraph was ordered to be printed in the RECORD, as follows:

12 (d). The Atomic Energy Commission is authorized in connection with the construction or operation of the Oak Ridge, Paducah, and Portsmouth installations of the Commission, without regard to section 3679 of the Revised Statutes, as amended, to enter into new contracts or modify or confirm existing contracts to provide for electric-utility services for periods not exceeding 25 years, and such contracts shall be subject to termination by the Commission upon payment of cancellation costs as provided in such contracts, and any appropriation presently or hereafter made available to the Commission shall be available for the payment of such cancellation costs. Any such cancellation payments shall be taken into consideration in determination of the rate to be charged in the event the Commission or any other agency of the Federal Government shall purchase electric-utility services from the contractor subsequent to the cancellation and during the life of the original contract.

Mr. SPARKMAN. If the Senator from Arkansas has the letter which came from the General Accounting Office, I suggest that he also place it in the RECORD.

Mr. FULBRIGHT. What I have read is contained in a memorandum from the General Counsel.

Mr. SPARKMAN. That is a memorandum from Counsel for the Atomic Energy Commission. I am talking about a letter from the General Accounting Office. Contracts involving the Government have to clear that Office. If the Senator has that letter, I suggest he put it in the RECORD, in order that those who read the RECORD may learn that the General Accounting Office raised a question as to the legality of such a contract.

Mr. FULBRIGHT. Did the General Accounting Office raise the question, or pass on the question and say that such a contract would be illegal? Of course, the Office has to raise the question. Did it state that such a contract would be illegal?

Mr. SPARKMAN. I am sorry I do not have the letter before me, but, as I recall, the Acting Comptroller General stated that the President might have power under certain war powers, probably the Second War Powers Act, provided he invoked such powers. If I interpret the action of the President correctly, he had not invoked those particular powers.

Furthermore, I may say that the General Accounting Office likewise suggested that if a contract was to be made, it ought to be made in competitive bidding.

I should like to ask the able Senator from Arkansas, who has always been an advocate of legislation against monopolistic practices, is it not rather unusual that the President of the United States should direct the Atomic Energy Commission, an independent agency charged with a high responsibility, as pointed out by the Senator from Mississippi, to enter into a contract for which specifications had never been drawn, to make that contract with a corporation which had never been organized, and is not yet in existence, and to buy that power from a plant which has not yet been built?

Mr. FULBRIGHT. I should like the Senator to yield for a moment, because, very clearly, the Senator is misstating the facts. In the first place, the President did not order any such thing. The proposal really came through the Bureau of the Budget. There were inquiries made and discussions had with the electric-power industry regarding the possibilities of such a contract. However, the Senator from Alabama is creating a false impression. Actually, we all know that the electric-power industry is what we call a natural monopoly. To my knowledge, there will not be found, within the same city, two electric-power companies competing any more, because it is not economically feasible.

What are the facts in the area under discussion? The Senator from Mississippi knows very well which companies constitute the electric power industry in that area: The Mississippi Power & Light Co., the Arkansas Power & Light Co., the Louisiana Power & Light Co., and New Orleans Public Service Co. constitute the operating companies in Middle South Utilities, Inc. The other is the Southern Co.

To give an example of why a company from New York State or one from the Northwest would not come into that area to compete, I suggest that we consider an item which is extremely important in a contract, that of cancellation. What would happen if the Atomic Energy Commission should wish to cancel a contract? What would happen is that the companies would have to absorb and dispose of the power. If a company were brought into the area which had no other connection in the whole area, which had nothing but the plant, and it was faced with a cancellation, what would happen? It would be a total loss. Under the contract being discussed, since it would be with existing companies having other connections, the loss would be minimized in the event of a cancellation. The provision in the proposed contract relating to cancellation would be that there would be an absorption of the power into the systems of the States of Mississippi, Arkansas, and Louisiana. The additional capacity that had been provided would simply be absorbed by the existing systems.

The ability to do that is extremely important. The idea that there could be competition in the sense that a company could enter the area and compete with a system which is already there simply is not correct.

I do not know whether the other proposal submitted to the AEC was a bona fide arrangement or not, but in that case a company with no existing capacity or distribution system simply said, "We will build it cost-plus, if you will give us $4 million as a fee." That is as simple as it was. There could not possibly be any provision which would result in distributing the excess power in case of cancellation. Of course, there is no competition in the purchase of electric power. It is a matter of negotiation.

If in this case the respective parties do not and cannot arrive at figures approximating what has been suggested here on the floor in my figures, I would say the negotiations would be off. The proposed contract and the rates under it must be satisfactory to the Commission, as compared with the TVA rates. That is why I was making the comparison. The TVA was set up as a yardstick. We are simply accepting it at its word. The private companies are trying to meet that yardstick, and they have come very close to meeting it. That seems to me a perfectly legitimate way to proceed.

Mr. HICKENLOOPER. Mr. President, will the Senator from Arkansas yield at this time?

The PRESIDING OFFICER (Mr. CRIPPA in the chair). Does the Senator from Arkansas yield to the Senator from Iowa?

Mr. FULBRIGHT. I yield.

Mr. HICKENLOOPER. In recent days, much has been made in claiming that no specifications were developed by the AEC and furnished in connection with this matter. I wish to ask the Senator from Arkansas whether the specification in which the AEC was interested was the question of who would furnish 650,000 kilowatt-hours of electricity and how it would be furnished?

The AEC was not telling anyone how to design or build the plant. It was not telling anyone how many bricks to place in the foundation or what motors or generators to use. The AEC said, in effect, "The specifications are 600,000 kilowatt-hours of electricity. Who will propose to supply it? We will examine the proposals, to see which one is the best; and if it is in the public interest,

we will be prepared to negotiate the matter. But the specification is 600,000 kilowatt-hours of electricity."

Mr. FULBRIGHT. Yes. One reason is that each watt of electricity that travels over the wires is identical, no matter how it is made. So it is not proper to compare one unit of electricity with another unit of electricity, and try to show a difference, in the way that a difference can be shown between a Jeep and a Cadillac. After all, each unit of electricity is the same as every other unit of electricity. The only difference is in the cycles, I suppose. So of course the AEC is interested in the price, as well as such other things as cancellation privileges. I think the Senator from Iowa is quite correct.

The whole reference to specifications in this instance is purely a smokescreen. After all, the procedure of constructing an electric generating plant is fairly well standardized. The fuel used may differ. On the other hand, in this instance the plant will be built very close to the place where the TVA has planned to build a plant, and thus the fuel used will be the same.

Mr. SPARKMAN. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. I yield.

Mr. SPARKMAN. However, is it not true that the cost to the Government would not be fixed, but would depend upon the cost of building the plant and getting it ready to supply the power? So are not the specifications and the type of plant and the manner in which it will be built, matters of importance?

Mr. FULBRIGHT. But I would say there is great standardization in the construction of such plants.

However, I think the best way to proceed is the way they did, namely, to consider what the AEC is now paying the TVA, and compare it with whatever proposal is made. If the proposal compares favorably with what the AEC is now paying the TVA, if it comes reasonably close to it, then they will be on sound ground. Of course there are other conditions, including such factors as the cancellation provision and the necessity of raising $100 million of public funds by appropriation, and so forth. Those are important considerations which would be balanced against the additional cost—in this instance, $282,000.

If the construction costs, under the proposal, are less, the cost to the Government will be less; and the Government will thus get the benefit of the lower construction costs.

Mr. SPARKMAN. And of course the converse will be true, namely, that if the construction cost is greater, the cost to the Government will be greater.

Mr. FULBRIGHT. But if it were to go above $117 million, the private firm would have to assume all of the added carrying cost. I did not go into every little detail of the matter, although that information is available, if the Senator from Alabama is interested in it.

Mr. SPARKMAN. Of course that is true. For instance, we have not discussed, either, the 9 percent margin, as well as other details.

Mr. FULBRIGHT. Yes. Of course, the 9 percent figure which you mention applies only to the equity capital put up by the sponsoring companies. This amount is $5,500,000 and not $107 million. Interest on the borrowed money is calculated at 3½ percent.

Mr. SPARKMAN. Of course, there is no question that if the TVA were to expand its facilities, Congress would have to appropriate $100 million. But a very significant thing the Senator from Arkansas has not mentioned is the fact that at the end of 25 years, the Government—under the TVA plant proposal—would own the plant the TVA had built for $100 million, whereas at the end of 25 years the private concerns will own the plant that the Government has paid for over that period of time.

Mr. FULBRIGHT. The Government will not have paid for all of the plant. As I have said, under the proposed contract—it has not yet finally been negotiated—25 percent of the plant will not have been amortized. At the end of the 25 years the private company will still hold 25 percent of the investment; it will own that much of it. By that time, of course, the plant will be 25 years old; in short, it will then be a rather obsolete plant. So I think it is rather an advantage to the Government not to have to pay the 100 percent which the Government would have to pay if it made the proposed payment to the TVA. Thus, I believe it would be an advantage to the Government not to own 100 percent of the plant. In other words, that 25 percent was not included in the rate structure; the Government will not pay for the total amount. I think the Senator from Alabama will find that is a provision of the proposed contract.

Mr. President, there are 1 or 2 other points I should like to make.

Much has been made of the delay in the construction of the EEI plant at Joppa. The catchy phrase "Ebasco fiasco" has been coined. I now ask unanimous consent to have printed in the RECORD photostatic copies of two newspaper accounts and an excerpt from testimony before the Joint Committee on Atomic Energy. These would seem to explain in large measure the difficulties experienced by Ebasco in the erection of the plant at Joppa, Ill. The two newspaper accounts indicate what the reason was. In fact, indictments have been returned in connection with labor racketeering that allegedly occurred in connection with construction of the plant, and I think these accounts throw a somewhat different light on that matter.

There being no objection, the articles and excerpt were ordered to be printed in the RECORD, as follows:

[From the St. Louis Post-Dispatch of April 29, 1954]

TWO ILLINOIS AFL LEADERS HELD ON $1,030,000 EXTORTION COUNT—EVAN R. DALE AND JAMES BATEMAN INDICTED IN PLOT AGAINST CONTRACTOR AT JOPPA ATOMIC PROJECT

Evan R. Dale and James Bateman, southern Illinois AFL leaders, were taken in custody today on an indictment charging them with an attempt to extort $1,030,000 from a general contractor who worked on construction of the strike-plagued $160,000,000 atomic-energy facility at Joppa, Ill.

Dale, president of the Southern Illinois District Council of the AFL Hod Carriers and Building Laborers' Union and Republican political figure, surrendered at East St. Louis and was released on $30,000 bond.

Bateman, business agent of a Murphysboro, Ill., local of the AFL Plumbers and Pipefitters' Union, was taken into custody by a deputy marshal at Murphysboro. He was taken to Benton, Ill., for arraignment before a United States commissioner.

FIRST COUNT IN INDICTMENT

The first count of the indictment charged that the labor bosses conspired to obstruct and delay interstate commerce in a period beginning April 29, 1951, by demanding payment of the $1,030,000 in exchange for industrial peace on the important defense power plant.

A series of work stoppages on the Joppa project began the same month the first alleged shakedown was attempted and continued for the following 18 months, the indictment alleged. Finally, after work had been halted 43 times, mostly by jurisdictional strife among unions, the contract was taken away from the general contractor, Ebasco Services, Inc., of New York.

Those approached for payoff, the indictment charged, were Clinton J. Sammond and Arthur J. Mohan, industrial labor relation consultants for Ebasco Services, and Edward M. Marselli, general plant superintendent for Electric Energy, Inc., operator of the facility.

DALE IN CHARGE OF LABORERS

Dale was in charge of a large pool of laborers employed at the project and Bateman, in November 1951, was named chairman of a committee to rule on jurisdictional disputes. Many work stoppages occurred after this, however.

The second count of the indictment charged Dale and Bateman with attempting to extort $1,030,000 from Ebasco. A third count charged Dale only with extorting $7,500 from John E. Burke, vice president of th Maxon Construction Co., Dayton, Ohio, a subcontractor at Joppa, in June 1951.

Dale also was charged in two other indictments with extorting $10,500 from two firms engaged in construction of highways for the State of Illinois.

Another indictment naming two AFL leaders remained suppressed. The four indictments were the first returned by the East St. Louis jury following an extensive investigation of reports of labor racketeering in southern Illinois.

Dale was charged in the first count of one indictment with obtaining $2,500 from John F. Parker, an agent of J. C. O'Connor & Sons, Inc., of Fort Wayne, Ind., by wrongful use of actual and threatened force, violence and fear.

The company, which was paving a section of United States Route 40 north and east of Vandalia, Ill., was threatened with delays, financial loss, injury to officers, damage to property, and labor disputes, the indictment stated. The offense occurred in May 1951.

THREATS CHARGED

The indictment charged Dale made the threats for the purpose of instilling fear in the minds of company officers and causing them to pay off. The Federal law was violated, it charged, because vehicles in interstate commerce use the highways.

The second count of this indictment charged Dale with obtaining $6,000 from the same company in October 1952, while the firm was reconstructing a section of United States Route 460 between Mount Vernon and Carmi, Ill. Use of the same threats was charged.

The second indictment charged a $2,000 shakedown of Allen J. McKay, individually and as vice president of S. J. Groves & Sons Co., of Minneapolis, Minn. At the time the firm was reconstructing a 4.25-mile section of Illinois Route 3 north of Cache, Ill.

Dale also is under bond in St. Louis on a labor racketeering indictment returned by

the grand jury here last summer. The East St. Louis grand jury on March 10 indicted him for evading payment of $4,489 in income taxes in 1947 and the Internal Revenue Service has demanded payment of $209,121 in unpaid Federal income taxes and penalties for the years 1947–52.

Dale, who served as national consultant of the labor division of the Republican National Committee in 1952, lives at Carbondale, Ill., and has an office at Cairo.

[From the St. Louis Globe-Democrat of April 30, 1954]

TWO UNION LEADERS INDICTED—$1,030,000 LABOR RACKET CHARGED—SHAKEDOWN ATTEMPT AT JOPPA ALLEGED

The attempted extortion of $1,030,000 from 2 companies in connection with construction of the Electric Energy, Inc., powerplant at Joppa, Ill., was charged against 2 Illinois AFL union leaders in an East St. Louis Federal grand jury indictment made public yesterday.

Named as defendants in the labor racketeering indictment were:

Evan R. Dale, president of the southern Illinois district council of the International Hod Carriers, Building, and Common Laborers Union.

James Bateman of Murphysboro, Ill., representative of Local 160 of the Pipefitters Union.

The indictment charges in 2 counts that Dale and Bateman conspired and attempted to extort $1,030,000 from Ebasco Services, Inc., a New York building firm, and Electric Energy. Ebasco was the general contractor on the project until last summer. Ebasco was forced to give up the job because of delays and mounting costs, in which numerous labor disputes were a factor, and the project was assigned to another contractor.

DEMANDS REJECTED

Dale and Bateman, it was charged, promised there would be "pleasant" labor relations and work would proceed efficiently if the $1,030,000 was paid.

Demands for the shakedown, the indictment said, were made upon Clinton J. Sammond, industrial relations consultant for Ebasco; Arthur J. Mohan, resident labor consultant at Joppa for Ebasco and Edward M. Marselli, assistant general plant superintendent for Electric Energy. The demands were rejected.

It is charged that beginning about April 29, 1951, Evans and Bateman delayed, obstructed, and interfered with interstate commerce in carrying out the extortion attempt.

The two men, it was charged, threatened to exercise force and power in their capacities as union officers to cause work stoppages and other labor trouble if the extortion demand was not met.

It also was charged that officers of the two corporations were caused to fear personal and property damage if the demanded shakedown was not paid.

Dale, 37, who lives at Carbondale, surrendered yesterday to the United States marshal at East St. Louis. He was released on $10,000 bond. The indictment was returned Wednesday but was suppressed until the defendants were taken into custody.

COSTING $159 MILLION

Dale is a Republican figure in southern Illinois. In the 1952 fall election campaign he was a labor consultant to the Republican National Committee. In 1948 he was elected vice president of the Republican League, which includes all of Illinois except Cook County.

Bateman was arrested yesterday at Murphysboro and his bond was set at $25,000.

The powerplant at Joppa is being constructed to furnish electricity to an atomic-energy plant at Paducah, Ky. Costs of constructing the plant, which has been beset by repeated work stoppages, have skyrocketed since work began in 1951.

It is now estimated the plant will cost in excess of $159 million, with 6 generating units. The original estimated cost, with 4 generating units, was $88 million.

Electric Energy is a corporation formed by five private utility companies, at the request of the Atomic Energy Commission, to build the powerplant at Joppa. Union Electric Co. of Missouri, is the biggest stockholder in Electric Energy.

After the Ebasco contract was terminated last summer, following prolonged labor trouble, the general contract was transferred to Bechtel Corp., San Francisco.

A third count in the indictment charges that Dale on June 7, 1951, extorted $7,000 from a subcontractor on the Joppa project, the Maxon Construction Co. of Dayton, Ohio. It was charged the money was extorted from John E. Burke, vice president and treasurer of the firm.

This subcontractor had a contract to construct a water intake from the Ohio River and a barge unloading dock.

OTHER INDICTMENTS

Two other indictments returned Wednesday but suppressed until yesterday charged Dale with extorting a total of $10,500 from two contractors on Illinois highway projects.

One indictment charged Dale with extorting $2,000 from Allen J. McKay as vice president of the S. J. Groves & Sons Co., Minneapolis, which was paving a stretch of Illinois Highway No. 3 north from Cache, Ill.

The indictment charged that, starting about May 15, 1951, and continuing to the time of the indictment, Dale used threats of force and violence to extort the money, and threatened labor trouble.

The other indictment, in two counts, charges Dale with extorting $8,500 from J. C. O'Connor & Sons, Inc., Fort Wayne, Ind. The sum of $2,500, it was charged, was extorted from John F. Parker, general superintendent for the firm, on a United States Highway 40 project northeast of Vandalia, Ill., with the extortion efforts beginning about May 7, 1951.

The amount of $6,000 was extorted from Parker and R. B. Dexheimer, job superintendent for the same firm, on a paving job on United States Highway 460 from Mount Vernon to Carmi, Ill., it was charged. The indictment alleged this offense began about October 1, 1952.

Dale was released on $10,000 bond on each of the indictments.

TWO OTHERS NAMED

One additional indictment which was returned by the East St. Louis grand jury, which is making a broad inquiry into labor racketeering, remained suppressed yesterday. It names two labor union officers who still had not been arrested late yesterday.

Clifford M. Raemer, United States attorney for the eastern district of Illinois, and his assistant, Edward G. Maag, are directing the inquiry, which began February 1.

TESTIMONY OF MR. R. W. COOK, DIRECTOR OF PRODUCTION FOR THE ATOMIC ENERGY COMMISSION, BEFORE THE JOINT COMMITTEE ON ATOMIC ENERGY ON JUNE 18, 1954, WITH RESPECT TO CONSTRUCTION WORK STOPPAGES AT THE JOPPA, ILL., POWERPLANT OF ELECTRIC ENERGY INC.

Mr. COOK. There were a total of 51 partial strikes. There were a total of 20 partial stoppages, totaling 51 days, I mean. There were a total of 24 complete work stoppages, totaling 115 days. I think it is well recognized that a partial stoppage is almost as destructive to efficient work as a complete work stoppage.

In addition, the work productivity prior to a strike and after a strike is not very good. So those two total up 166 days.

If you assume, and I think it is a valid assumption, that you lose about twice the actual days of the strike, you have lost 332 days or approximately a year.

Mr. FULBRIGHT. Mr. President, testimony presented by representatives of the Atomic Energy Commission in some recent congressional proceedings indicates that in their opinion at least a year of construction time was lost through strikes and work stoppages. When the job at Joppa is completed, a review of all the facts may or may not indicate that the private power companies and their contractors performed rather well there under the most trying circumstances. I, for one, am willing to await the final results, before passing judgment.

I wish to state just one or two other things before I close. A calm review of the facts in this case indicates to me that the AEC is about to enter into a sound contract which has made it possible to relieve the Federal budget of more than $100 million at a time when we are pressing against the statutory debt limit.

The AEC is diversifying its power sources, minimizing the effect of possible cancellation or decrease of power needs, strengthening the national defense by virtue of additional strong ties between major power systems, and clearly is acting within its legal rights. Delivery of power by displacement or replacement is neither new nor novel.

Another thing—advocates of the TVA have indicated that this plant is to be built on an area subject to floods. The statement was made that former President Herbert Hoover once sailed over this site in a steamboat. The facts are that our Army engineers have long since built protective levees and revetments there. This site has been productively farmed for more than 30 years. The private power companies before selecting the site conferred with the Army engineers in charge of river facilities in this area. The additional levees that will be built around the plant will, in fact, add further protection to this whole area. Can anyone seriously suggest that private industry or the banks and insurance companies from which they borrow would risk a $100 million investment by placing it in an area which is likely to be flooded?

Charges have been made that specifications for the proposal submitted by the Dixon-Yates group were "rigged" so that they alone could qualify. Even a casual examination of the facts would have disclosed this to be an ugly rumor without foundation. The Atomic Energy Commission initially presented its problem verbally to representatives of the power industry. In response there was submitted a most detailed proposal which, to quote the Atomic Energy Commission, it found to "constitute a satisfactory basis for negotiation of a definitive contract." The much publicized set of specifications later came into being when a second group sought an audience with the Atomic Energy Commission preparatory to submitting a proposal. I am informed that, as a means of making a fair comparison of the two proposals, the AEC suggested to the second group—who,

incidentally, made their proposal most belatedly—that their material be submitted in conformity with the specification sheet. Admittedly this was prepared to parallel the so-called Dixon-Yates proposal as a means of full and fair comparison. The specification sheet had no other use or implication. The proposal of the second group was considered and found wanting.

An attempt has been made locally to discredit the coal-burning plant at West Memphis on the ground that it would bring death and destruction, to say nothing of depositing tons of fly ash daily on the Memphis streets. Apparently this concern was not shared by those who built the beautiful United Nations Building in New York just 2 or 3 blocks from a similar coal-burning powerplant. I am told that there are many acceptable methods of dealing with smoke and fumes from modern coal-burning plants. I cannot for the life of me remember reading or hearing of a single complaint lodged against TVA, which burns many millions of tons of coal annually in the conduct of its public-utility business.

I think our Memphis friends will become much more conscious of the ringing of cash registers than they will of smoke and fumes. Surely they cannot fail to be aware of the benefits flowing from new jobs for 2,500 construction workers and $7 million of pay they will collect annually during the 3-year construction period. Perhaps a few zealots are opposed to coal barges on the Mississippi River, but thinking people know that handling 2 million tons of coal annually makes jobs, and jobs make business hum.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks a telegram which I have received from the Jaycees of West Memphis.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WEST MEMPHIS, ARK., *July 8, 1954.*

Hon. J. W. FULBRIGHT,
Senate Office Building,
Washington, D. C.:

Following is resolution adopted by West Memphis Jaycees. Request reading into CONGRESSIONAL RECORD:

"Whereas there exists in this Nation an undesirable trend toward the centralization of power in our National Government to the hurt, destruction, and detriment of State and local government; and

"Whereas the creed of the United States Junior Chamber of Commerce states that we believe that economic justice can best be won by freemen through free enterprise; and

"Whereas there exists today in the Congress of the United States a controversy between free enterprise represented by congressional leaders and the executive branch of our Government, and those advocating the expansion of Federal control through Federal ownership of power facilities to the detriment of the vast majority of the people of the United States of America; and

"Whereas the West Memphis Junior Chamber of Commerce, an organization of young men typical of the young men who signed the Declaration of Independence which created this magnificent country of ours, after due consideration of the facts involved in this controversy, do hereby deplore the usurpation of power by the Federal Government, which is inimical to the best interest of our people and of good government, Federal, State, and local, and will tend to ultimately place in jeopardy our American way of life: Now, therefore, be it

"*Resolved by the West Memphis Junior Chamber of Commerce in open meeting assembled on this 7th day of July 1954,* That this organization hereby strongly recommends to the Congress of the United States that this debate be resolved quickly and resolutely in favor of the proponents of private power as represented by the Dixon-Yates group who have presented a proposition, approved by the President of the United States, which is to the best interest of all the people of the United States of America: And be it further

"*Resolved,* That copies of this resolution be given the widest distribution possible."

Respectfully yours,

WEST MEMPHIS JAYCEES.

Mr. FULBRIGHT. I also ask unanimous consent to have printed in the RECORD for the information of the Senate at this point a calculation with respect to the cost to the Government in case of cancellation of the contract by the Atomic Energy Commission.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Figures on cancellation (3-year notice required)

Government takes:	*Kilowatts*
1st year	600,000
2d year	600,000
3d year	600,000
4th year	500,000
5th year	400,000
6th year	300,000
7th year	200,000
8th year	100,000
9th year	None.

The maximum cost to Government if no power is used during the entire 8-year period is approximately $40 million. If during the fourth to eighth years, inclusive, the power can be absorbed by the generating company at a rate more rapidly than 100,000 kilowatts per year, this figure will be reduced.

The private company could lose as much as $18 million for the period during which it is absorbing 100,000 kilowatts progressively. When the Government's obligation to purchase ends completely, the maximum exposure of the company is at a rate of about $7 million annually.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. ANDERSON. I missed a part of the Senator's remarks. Did the Senator at any time indicate that he thinks there is legal justification for this contract, and give his reason for such an opinion?

Mr. FULBRIGHT. I gave to the Official Reporter an excerpt from the law which was supplied to me by the General Counsel for the Atomic Energy Commission. It seems to me very clearly to authorize the execution of the contract.

If the Senator is making the point that the replacement of power does not conform to the law, I said a good deal upon that subject. I think that point has been greatly exaggerated. Replacement of power is a procedure which is used very widely by the SPA and its private power connections or relations in the Southwest. We call such arrangements wheeling contracts. They are very common.

I used the illustration of putting water in at one edge of a lake and taking it out on the other side. It is the same kind of water. In this case it is the same kind of electricity. The replacement provision seems to me to be not novel at all. Certainly it is in conformity with the authority of the Atomic Energy Commission to execute a contract for its use.

Mr. ANDERSON. I do not wish to enter into a discussion of this subject with the Senator today. I merely wished to be sure, if he had something on the point, that he would place it in the RECORD.

There was an opinion in the Atomic Energy Commission that there was no authority for this contract. Had there not been an edict to go through with it, there might never have been permission to go through with it, so far as the Commissioners were concerned. I think that is why a majority of the Commission felt that they should not go ahead with the contract. This contract did not involve a question of judgment, as did the atomic bomb. It involved a question of legal authority to do something which had been suggested. I was hopeful that the Senator would place in the RECORD whatever justification he felt he had on that score.

Mr. FULBRIGHT. The General Counsel of the Atomic Energy Commission certainly thinks the contract is within their legal authority.

Mr. ANDERSON. He thinks so currently, but I understand he has not always felt that way.

Mr. FULBRIGHT. To me, as a lay member of the Senate, the language seems quite clear. It seems to me quite clear that the Atomic Energy Commission is given specific authority to procure power for the Paducah installation, among others.

Mr. ANDERSON. This power will not be for Paducah. It will not be for Portsmouth.

Mr. FULBRIGHT. The Senator is quibbling over a procedure.

Mr. ANDERSON. No; I am not quibbling.

Mr. FULBRIGHT. I think the Senator is entirely mistaken. We discussed with the Senator from Alabama the question of the replacement of power in a power grid. I think the Senator is trying to establish a technical difference where there is none. We do not follow the precise kilowatt as it goes through the wires. I think the analogy of water is a good one. The water, or the individual kilowatt, loses its identity. There is no valid reason why this contract could not be considered a wheeling contract, if you like. What the TVA is doing is wheeling power for the Atomic Energy Commission from West Memphis to Paducah.

I used as an analogy the procedure in Texas. The SPA has what is called a wheeling contract with the Texas Power & Light Co. A contract is made with an REA cooperative, which is not on the SPA line. A certain amount of power is put into the system at one place, and taken out at another. It is fiction to say that the same power is withdrawn. Everyone knows that it is not the same power at all. There is no reason why the replacement principle should not be

a legitimate principle to be applied in this case.

Mr. ANDERSON. Does not the Senator agree that not one kilowatt of power generated at that plant will be used by any atomic energy plant?

Mr. FULBRIGHT. No, I cannot agree. I do not know where the individual kilowatt is going. Neither does the Senator from New Mexico. They are all put into the TVA system. Electricity travels at the speed of 180,000 miles a second. The Senator does not know where those kilowatts go, or where they originated. They all come out of a great pool.

Mr. ANDERSON. I realize that.

Mr. FULBRIGHT. I would not say that they do not. How can the Senator say that they do not?

Mr. ANDERSON. We all recognize that what has happened is that the faith and credit of the United States has been pledged in order to make a private contract profitable. There is no other purpose in the pledging.

Mr. FULBRIGHT. I cannot accept that as a proper characterization.

Mr. ANDERSON. There is no other purpose in the pledging. A life-insurance company is willing to lend money on the plant provided the faith and credit of the United States is pledged behind the 3½-percent loan. When the New York Life Insurance Co. lends it money, assuming that the contract is executed, it will be only because the credit of the United States has been pledged, and not because private people, exercising private initiative, will have negotiated a good deal.

Mr. FULBRIGHT. The Senator has a right to differ with regard to motives and purposes. I have assumed that the motives and purposes in the creation of the contract were legitimate. If the Senator wishes to differ, that is his privilege. There are quite legitimate reasons for the Atomic Energy Commission to seek and obtain alternative supplies of power, and I think there are quite legitimate reasons why private industry should take advantage of the opportunity to match this great yardstick which we have spent $1½ billion to create. I am for it. I assume responsibility for having voted for appropriations for the TVA. Now a private power company comes along and says, "We can match it." I see nothing immoral, illegal, or wrong about it in any way.

Mr. SPARKMAN. Mr. President, will the Senator yield for one more question?

Mr. FULBRIGHT. I yield.

Mr. SPARKMAN. I hope the Senator from New Mexico will stay in the Chamber long enough for me to ask this question. The able Senator from New Mexico, who is a member of the Joint Committee on Atomic Energy, and who, I know, has given a great deal of study and thought to the subject, asked a question bearing on the legality of this contract. A little earlier, in an exchange between the able Senator from Arkansas and myself, I stated that, as I recalled, there was an opinion, or, at least, a letter, from the General Accounting Office which certainly raised a question as to the validity of this contract. The Senator from Arkansas did not have a copy of it. I suggested that it be placed in the RECORD. I do not have it. I thought perhaps the Senator from New Mexico might have a copy of it, and that it would be available to him to place it in the RECORD for all people to read.

Mr. REYNOLDS. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. REYNOLDS. The junior Senator from Nebraska has been an intensely interested listener to the debate between the learned Senators, armed as they are with facts and figures which are not available to him. I wonder whether the Senators would be interested in the impression they have made upon the newest Member of the Senate.

Mr. FULBRIGHT. I should be very much interested indeed.

Mr. REYNOLDS. It has been said that no nation which ever took one step down the road to socialism ever turned back, and history bears out that statement. America has been first in a great many enterprises, and it might well be the first one to change that statement.

The debate today, as it boils down to its essence and fundamentals, as it appears to this newcomer, seems to be a suggestion on the part of the Senator from Arkansas that we take one step away from the road to socialism and back toward the ancient American system of private enterprise, and his opponents apparently are opposed to taking such a step.

I should be only too happy to follow the leadership of the Senator from Arkansas, if not in turning back, at least in going no further down that road which has wrecked so many nations.

Mr. FULBRIGHT. I appreciate the Senator's comment. I may say that I had not quite approached the subject on the doctrinaire basis. I am not at all sure that the Senator from Nebraska may not have oversimplified the question. It is a very complex subject. I believe both sides have legitimate interests which should be considered very carefully. However, I am very much interested in the Senator's comment.

LEGISLATIVE PROGRAM

Mr. KNOWLAND. Mr. President, I should like to make an announcement for the information of the Senate. The pending bill is Calendar No. 1719, H. R. 9242, the military construction bill.

That bill will be followed by Calendar No. 1668, H. R. 7664, to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

That bill will be followed by Calendar No. 1634, H. R. 5173, to provide that the excess of collections from the Federal unemployment tax over unemployment compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States to provide that the remainder of such excess shall be returned to the States, and for other purposes.

That bill will be followed by Calendar No. 1615, H. R. 2763, to amend the Tariff Act of 1930 so as to modify the duty on the importation of wood dowels, and for other purposes.

Then Calendar No. 1626, S. 3268, to repeal the provisions of section 16 of the Federal Reserve Act which prohibit a Federal Reserve bank from paying out notes of another Federal Reserve bank.

Tomorrow, Saturday, we shall have a session of the Senate, starting at 11 o'clock in the morning. At that time we will have the call of the calendar of bills to which there is no objection, starting at the point where the last call of the calendar was concluded, plus any of the bills I have mentioned which we do not dispose of today.

On Monday, July 12, we shall take up Calendar No. 1710, S. 3690, to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

I call to the attention of the Members of the Senate that I have in my hand both volumes of the printed hearings on the atomic energy bill, and all Senators who are interested in the subject may wish to take the hearings home over the weekend, or at least over Sunday, and read them. I hope that by Monday we will be ready to consider that proposed legislation.

I do not believe we will stay in session later than 6 o'clock tomorrow evening. I hope we will not have to say in session later than 7 o'clock this evening.

I make this announcement so that Senators may be generally advised of the legislative program.

Mr. STENNIS. Mr. President, will the Senator yield at that point?

Mr. KNOWLAND. I yield.

Mr. STENNIS. The Senator referred to the atomic energy bill. Is the report available?

Mr. KNOWLAND. I am informed that the bill as reported has been available for the last week. The hearings are now available. I understand that the report will be available either tomorrow or on Monday morning.

PROPOSED ATOMIC ENERGY COMMISSION POWER CONTRACT

Mr. LEHMAN. I wonder whether the Senator from California would yield so that I may ask a question of the Senator from Arkansas [Mr. FULBRIGHT].

Mr. KNOWLAND. I should be happy to yield for that purpose, if it would not involve a prolonged colloquy. Both the Senator from Arkansas and I are due now at a meeting of the Committee on Foreign Relations, where a quorum is required in order that the committee may report the foreign aid bill.

Mr. LEHMAN. I shall be very brief. I was interested in the question which was raised by the junior Senator from Nebraska [Mr. REYNOLDS]. I should like to ask the Senator from Arkansas a question. It is my understanding that he has for many years strongly favored the operations of the TVA, and that he has voted wholeheartedly for appropriations for the TVA.

Mr. FULBRIGHT. That is correct.

Mr. LEHMAN. Therefore, it would be very interesting to have him tell me whether he thinks or has had any

thought that the TVA was a step toward socialism.

Mr. FULBRIGHT. In my answer to the junior Senator from Nebraska I said that I had not approached TVA as a doctrinaire matter. I do not think it is necessarily so, or should be made so. I think it is a fine development, just as SPA in my section of the country is a fine development. They are very similar in operation. I have supported both of them. I may say, in addition that I believe that private power has a place too, and I am not in favor of the abolition of private power either in the southwestern area or in any other area. I believe there is a place for both of them, and that they should be able to work together in harmony for the welfare of the country as a whole. I should not like to see either run the other out of business completely, as I believe they both can cooperate effectively, as they are, in my opinion, in my State and throughout the Southwest.

Mr. LEHMAN. That is undoubtedly the case with many of the activities that are conducted in that manner. However, since the Senator has voted for appropriations for the TVA and has supported the TVA wholeheartedly, I am very glad to have his statement in connection with what the distinguished junior Senator from Nebraska has said.

Certainly there is nothing to indicate that the TVA has been a step toward socialism or is socialism now. It has been of tremendous help, in my opinion, to the entire area it is serving, and it has not blocked the private development of power.

Mr. FULBRIGHT. If I may say so, where the Senator is wrong is in assuming that this proposed contract would, if entered into, do great injury to TVA. I am unable to follow that reasoning. I do not believe it would seriously or in any way injure TVA.

Mr. KNOWLAND. Mr. President, I yielded for a question, and I should like to suggest to the distinguished Senator that if he wants to debate the issue, there will be ample time when the bill is before the Senate.

Mr. LEHMAN. I was directing my remarks not to the issue debated by the distinguished Senator from Arkansas, but merely to the issue raised by the Senator from Nebraska when he referred to the TVA as a socialistic move and expressed his satisfaction that now we were taking the means of blocking what he dubbed socialism. I wish to make it very clear that, in my opinion, there has never been any question of socialism involved. It has nothing whatsoever to do with the present issue of whether the Atomic Energy Commission should be permitted to act as is now proposed. I am trying to establish the fact that the TVA—and I have no doubt the Senator from Arkansas will agree with me—has never been a socialistic move and there is no reason to suppose that it will ever be a step toward socialism.

Mr. FULBRIGHT. I take it that the Senator from Nebraska has been oversold by some of the campaign slogans.

Mr. LEHMAN. I think that is true.

THE CASE OF NIKOLAI KHOKHLOV

Mr. KNOWLAND. Mr. President, there should be friendship between the people of Russia and the people of the United States. It has been demonstrated on several occasions. The fact of the matter is that the Russian people were the first victims of Communist aggression. It is not the destiny of the people of Russia permanently to be enslaved by the godless, ruthless men in the Kremlin. The Russian people have a love of family and a deep religious belief that not even a Communist totalitarian dictatorship has been able to stamp out.

The free world admires courage. Despite their Communist masters, the people behind the Iron Curtain also admire courage.

Such courage was shown by a woman in Moscow who was willing to endanger her safety and perhaps her life to bring her husband to see the light of leaving the service of the Kremlin dictatorship.

Recently there appeared in the American press a news item from Bonn, Germany, reading as follows:

MRS. NIKOLAI KHOKHLOV VANISHES IN MOSCOW

BONN, GERMANY, June 2.—The wife left behind by Soviet Intelligence Capt. Nikolai Khokhlov when he defected to the West last February is reported to have disappeared in Moscow. This report, received from the Soviet capital, said Mrs. Yanina Khokhlov vanished without trace from her three-room apartment several weeks ago and apparently is in secret police custody.

Khokhlov, who backed down on a Red assignment to kill a Russian resistance leader in Frankfort, had appealed to the free world to help save his family from what he said were certain Soviet reprisals, possibly death. His wife, the 31-year-old Russian said, had persuaded him not to go through with the plot to do away with George S. Okolovich, anti-Communist leader, with the special weapons—including a cyanide poison pistol shaped like a cigarette case—with which he had been equipped.

The reports did not make clear what has happened to the Khokhlov's 18-month-old son and the 14-year-old sister of Mrs. Khokhlov, who lived with them.

Today I had a visit in my office by Captain Khohklov, who handed me this letter, which I now read:

To Senator KNOWLAND.

I am Nikolai Khokhlov, a former Soviet intelligence officer. In 1953 I received an assignment to organize the assassination of a Russian anti-Communist leader residing in Western Germany. All possible attempts to withdraw from carrying out this assignment without endangering my life and those of my family were tried and failed. These and resulting circumstances obliged me to address myself to the free world for help. The deep religious roots and moral convictions of my wife were the deciding factor in my action to save this man from Soviet assassination. In all this she committed no violation of any written or moral laws, but followed the dictates of her conscience to prevent a murder. Until recently she was in Moscow with our 2-year-old son. But on June 2, the International News Service reported that she and our child had disappeared from our apartment in Moscow. Now I fear for her life because the revenge for my actions may be carried out against her. It is my conviction from personal observation that the force of public opinion can save her. I know that the Soviet Union is very conscious of the weight of public opinion in the free world. For this reason I addressed myself to Western authorities, including President Eisenhower, with the request that they express their understanding and sympathy for her stand and her great sacrifices and their indignation at the fate that may be hers in the Soviet Union.

It is my conviction that millions of Russian people are aware of my wife and what she has done. The reaction of the free world in the case of this woman will give them concrete proof of the attitude toward the Russian people whose suffering she symbolizes.

I can no longer hope for my wife's deliverance through normal diplomatic procedures. I can only hope that public opinion of the Western World can be mobilized in her behalf and brought to bear on the Soviet Government.

It is my belief that you, more than almost anyone, will understand the significance of the simple but profound story within the struggle of enslaved peoples against tyranny and immorality.

The letter is signed: "N. Khokhlov, Washington, July 9, 1954."

Mr. President, this woman showed all the courage of the early Christian martyrs. The bloody-handed men in the Kremlin may soon take her life, or they may have already taken her life.

Mrs. Yanina Khokhlov may become a symbol of courage which will some day bring the Communist tyranny crashing down. I hope that a day of prayer may be set aside for the ultimate freedom of the people of Russia. Silently behind the Iron Curtain a hundred million Russians could be asked by the Voice of America to join in such prayers. How will Malenkov or Molotov ever know whether their bodyguards or their chauffeurs are also praying for the downfall of the bloody Red regime?

This Godless machine, murderer of millions of men, women, and children, cannot survive its crimes for too many years more.

Already cracks are appearing to shake the permanence of the Kremlin's rulers. Let us not lose faith that right, justice, and freedom will prevail against the Communist tyranny. Only then will there be peace with honor, and the people of Russia will take their rightful place as respected equals among the civilized and decent nations of the world.

Mr. BUTLER. Mr. President, on June 19, 1954, I addressed the annual convention of the Maryland and District of Columbia Radio and Television Broadcasters' Association, at Ocean City, Md., on the subject inter alia to which the distinguished majority leader has just addressed himself. I ask unanimous consent that the address may be printed in the body of the RECORD immediately following his remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR BUTLER

Developments of the past several months would seem to signal greater activity in all parts of the world by the partisans of atheistic communism. Undoubtedly Communist infiltration of Central and South America, the impasse at Geneva, in conjunction with continued and devious subversion in our country and other areas, are but part of a planned program for the complete subjugation of the United States and of all freedom-loving people everywhere. There is much expert testimony to substantiate this point.

Thus the repugnant pattern of world domination, conceived by Marx and Lenin and implemented by the Bolshevik terrorists immediately following World War I and since, moves closer to ultimate attainment. It envelops all it touches, and the free world, indolent, apathetic, and partially blind to the true nature and goal of the Red menace, seems unable to summon the strength, the courage, the leadership, or even the interest on which the very survival of the free world depends.

Let it not be forgotten that international communism has but one objection—world domination and total subservience to its philosophy and its ends—the accomplishment of which has followed a definite plan composed of several phases:

First, the overthrow of the Czarist regime in Russia after World War I for the purpose of obtaining a national base for international operations. Second, in the years prior to World War II, the consolidation of Russia under Communist control. Third, a program of expansion to assure support from surrounding satellite nations. Fourth, the mastery of Asia by either direct or indirect means—the latter having proved most effective. Fifth, the mastery of Africa with its vast storehouse of natural resources. Sixth, the control of Latin America as a prelude to the economic strangulation of the United States. None of these requires direct military intervention by Russia; on the contrary, results are obtained through the typical Kremlin-inspired tactics of subversion, subtle infiltration, and vicious propaganda. Only recently the scope of these tactics has been broadened to include a campaign of negotiated economic ties with the Communist orbit.

The significance of the tremendous build-up in their merchant marine to carry this campaign into effect can scarcely be overemphasized, especially in view of the rapid deterioration of our own merchant fleet.

The present world tension might well be viewed in the light of results thus far achieved through this phased plan of conspiracy since World War II: Establishment of Red China, occupation of Tibet by "a people's army of liberation," invasion and division of Korea, support of Communist leaders in Indochina, attempts to aid the insurrectionists in the Philippines, support of independence for Indonesia, infiltration of Burma, a program to communize Thailand and Malaya, creation of an Iron Curtain defense, disruption of most Middle East governments, except for Greece and Turkey.

With the knowledge of such a global conspiracy, and the inroads which have already been made in the community of free nations, the widespread reaction of indifference to situations such as now exist in Guatemala, Indochina, and Geneva is indeed unbelievable.

It would appear that there is a tendency to minimize the Red menace and its spreading control in all corners of the globe. The rights of the individual and the cherished heritage of human liberty are here at stake, and the continuing and ever-growing threat to our way of life cannot be casually discounted.

You, as representatives of the broadcasting and telecasting profession of Maryland and the District of Columbia, have a great public trust in this matter, and I commend you and your colleagues for the forthright manner in which you have accepted this essential responsibility of presenting to the American people the true meaning of this menace. Thomas Jefferson once said: "I know no safe depository of the ultimate power of society but the people themselves; and if we think them not enlightened enough to exercise their control with a wholesome discretion, the remedy is not to take it from them but to inform their discretion by education." Yours is the challenge of education and enlightenment, and I feel that you share my optimism with regard to the future.

The ominous nature of the world Communist conspiracy can be dramatically characterized by a review of two seemingly unrelated incidents of recent happening. I say "seemingly unrelated" but, as mentioned earlier, I am convinced that these conform to the plan and pattern of eventual world domination and subservience by the Communists.

Any goal of world conquest must of necessity include the use of all possible military, political, and economic weapons. Among others, I would certainly include psychological warfare, espionage, subversion, sabotage, propaganda, and the promotion of internal strife—all of which have already been practiced with alarming success by the Communists. But the minions of the Kremlin have now introduced another thoroughly inhuman device—that of moral ruin. To carry out such an objective the Communists have established a far-reaching system for the distribution of narcotics.

Official emphasis as to the seriousness, both present and potential, of the new threat can be found in the remarks of the Honorable Harry J. Anslinger, United States representative at the 1954 session of the United Nations Commission of Narcotics. Several of his observations, which I am taking the liberty of quoting, are indeed alarming and awesome:

"Last year I told this Commission that the United States is a target of Communist China to be supplied with a flood of foreign-exchange earning, health- and morale-devastating heroin. For several years I have presented documented facts which established that narcotic trafficking from the Chinese mainland is an insidious, calculated scheme of the Chinese Communist regime to obtain operating funds and at the same time spread the debauchery of narcotic addiction among the free nations."

It offers additional dramatic proof that we are not dealing with a petty adversary but rather with a formidable and far-reaching plot to gain foreign exchange and at the same time to demoralize the people of the free world.

"Spreading narcotic addiction and obtaining funds for political purposes through the sale of heroin and opium is not just the policy of one man in the Communist regime. It is the policy of the entire Communist regime in mainland China."

Mr. Anslinger continued, "The threefold increase in some areas in the land devoted to the cultivation of the opium poppy in Communist China, the establishment of new heroin factories in Communist China, the continuation and expansion of a 20-year plan to finance political activities and spread addiction among free peoples through the sale of heroin and opium by the Communist regime in China, and the extension of the same pattern of narcotic activity to areas coming under the jurisdiction of Communist China has mushroomed the narcotic menace from Communist China into a multiheaded dragon threatening to mutilate and destroy whole segments of populations from whom the danger of addiction through ready availability of drugs had been removed during the past 40 years by the uncompromising work of the narcotic enforcement authorities in the free countries of the world.

"Until this Communist traffic in narcotics is dried up, the agents of this menace wherever found must be apprehended and dealt with surely and severely as a means of bringing under control this unbridled monster."

Warfare, in the minds of the vast majority of our population, is pictured solely in terms of direct combat, and the horrible recollections of two world wars and the Korean crisis, with their vast mortality and destruction, are indelible memories. But, the all-pervading concept of indirect, yet constant warfare, as a doctrine of the Communist movement, is something new to most of us. The danger of this concept cannot, and must not, be taken lightly.

Communist tactics are aimed at the destruction of society and the will to resist. They are based on the principle that a country can be destroyed as surely and as easily from within as from without. The evil traffic in narcotics and drugs, with its demoralizing results, in combination with the other more familiar weapons of subversion and infiltration, is in accord with these objectives, and brings into clear perspective the monstrous wrong which the philosophy of communism permits and promotes in its followers.

The division between the communistic forces and those of the free world is further stressed by the recent publication of the photographs of the cigarette-case gun which silently injects cyanide into its victims, and which is apparently part of the equipment of Russian murder experts sent abroad by their masters to hunt down those whom the MVD wishes to destroy.

This is the story of a former captain of the MVD, a 31-year-old officer of the terror and diversion section of the Russian secret police. This captain, the most recently revealed Communist convert to the West, reported to West German authorities all the cynical details of a global Soviet network dedicated to sabotage, assassination, kidnaping, and other violent and clandestine activities. The Russians called this story a horror tale without basis in fact.

It was a horror tale indeed and American intelligence agents say it was a true one as well. They report that he gave himself up in February, along with two East German accomplices who were assigned to assassinate, with the above-mentioned "toy" guns, one of the key Russian members of an anti-Soviet organization which reaches even behind the wall of the Iron Curtain. Only a plea by his wife dissuaded him from carrying out the killing. That wife remains in Moscow, together with their young son and daughter, at the complete mercy of those who don't even know the meaning of the word.

This Russian captain said that his Kremlin boss in the MVD told him that the job of killing the Russian resistance leader in West Germany would be a simple one and in many ways quite attractive. The murder was planned with painstaking care, four fat volumes of information were compiled on the intended victim, so that no slip-up could occur. But, thank God, one did occur—the dormant conscience of this young Russian officer finally shook off the moral paralysis which communism injects in the veins of its victims, and he refused to murder a good man in cold blood.

On Soviet principles this assignment was logical, legitimate, and in the ordinary course of business, so to speak. On those principles the life of an individual human being has no values in itself; only the self-interest of the Soviet is to be considered.

For the advancement of the dictatorship of the proletariat, many millions of human beings have been killed or enslaved in the last 30 years. So there was really nothing odd about the MVD's chief executioner telling the captain that murder was a simple enough job and in many ways an attractive one, and that it might even involve the thrill of "using a new model fountain pen with electric firing apparatus" so innocent looking, but yet so very, very deadly. The debasement of the human soul, which the above statement illustrates, is the greatest sin that communism could commit against mankind. After having undergone a lifetime of systematic smothering the flame of conscience, it is reassuring that a man, so mutilated, could still strike out against that tyranny. Not with the weapon of force which the Communists use, but with the

weapon of moral repudiation, he dealt communism a blow of such shattering impact that it was heard around the world.

"By their fruits shall you know them." So does the Bible warn against those who make prideful hypocritical speeches of their high intentions but whose actions are the opposite of their words. This Biblical quotation states a principle so fundamental and obvious that it is difficult to realize how our sometimes wavering and confused allies have missed its application to Soviet Russia.

The German murder plot gives a true picture of the rottenness of communism that the world has ever seen. But the world paid more attention, I fear, to the spectacular cloak-and-dagger side of the story than to its moral implications. This is the element that we must seize upon as our weapon in the continuing struggle against the false pose of respectability and regard for mankind which the Communists put on to deceive and entrap the unwary.

It is unfortunate that so many of our own people do not realize to this day the extent of Communist infiltration of free institutions; that they do not recognize the footprint of the Kremlin in our Government, our labor unions, and even our schools. "What can 25,000 card-carrying Communists do?" they scoff.

Ask the people of Estonia, Latvia, Rumania, Hungary, Yugoslavia, and Czechoslovakia. Ask them how a handful of people in the right places were able to open the gates of their country and place the lackeys of Red Russia in the very seat of their governments? Ask the people of Germany what six men and a painter by the name of Adolf Hitler were able to do to their homeland? Ask the people of the Soviet what Lenin and a few faithful followers were able to do to the Russian bear and her untold millions of martyred people? Ask the Christian world what 12 simple men, filled with dedication and purpose, were able to do in transforming the spiritual face of the earth?

Dedication and purpose, those are the keys that give a single man the power and strength of an army. That is a point the scoffers might well heed. And all the rest of us have to do to betray America is precisely nothing. Be neutral and indifferent. Continue in our complacency long enough, and all of our troubles will be over. Neither a dead man nor slave worries about maintaining the strength and integrity of free institutions. And if the Communists succeed in what they most certainly plan and are trying to do, you will be one of these—a cringing slave or an honorable dead man.

Some of our own good neighbors may be an unwitting accomplice of those who exploit the decency and the traditional tolerance of our country. Not, I say, because they do not love America, but because they do not know the evil that would enslave them. If they could clearly see the beastliness of communism and the falsity of its pretended concern for peace and human welfare they would surely be able to summon the moral courage and the necessary action to oppose this diabolical philosophy in all its many faces.

You will notice that in speaking of the dangers that beset the free world, I have made an effort to avoid any political partisanship, because the issues here involved should be beyond partisan feeling. The problem of protecting and enriching the fundamental principles upon which the American faith is based may cause some difference of opinion. But the question of what those principles are, their value to the continuation of our way of life, and our firm determination to preserve them are elements on which the American people must remain united. On this common ground we can meet any challenge, and with God's help, I know we will.

Thank you very much.

ACCESSIBILITY AND AVAILABILITY OF SUPPLIES OF CRITICAL RAW MATERIALS—REPORT OF A COMMITTEE (S. REPT. NO. 1627)

Mr. MALONE. Mr. President, I ask unanimous consent to submit a report pursuant to Senate Resolution 143, to investigate the accessibility and availability of supplies of critical raw materials to the United States.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada? The Chair hears none, and the Senator may proceed.

Mr. MALONE. Mr. President, from the Committee on Interior and Insular Affairs, I submit, pursuant to Senate Resolution 143, a report of the Minerals, Materials, and Fuels Economic Subcommittee.

This report is entitled "Accessibility of Strategic and Critical Materials to the United States in Time of War and for Our Expanding Economy."

The Committee on Interior and Insular Affairs today directed the chairman of the subcommittee to submit the report to the Senate in accordance with Senate Resolution 143.

Mr. President, I ask unanious consent that the report be printed, with illustrations.

The PRESIDING OFFICER. Without objection, the report will be received and printed, as requested by the Senator from Nevada.

Mr. MALONE. Mr. President, I ask unanimous consent that the introduction, recommendations, findings, and list of the critical materials be printed at this point in the RECORD as a part of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTRODUCTION

AVAILABILITY OF CRITICAL MATERIALS IN TIME OF WAR

For the first time in the history of the United States Senate, a Senate subcommittee was directed to conduct an overall investigation of the accessibility of critical materials to the United States in time of war, particularly as to its effect on the security of the Nation.

The testimony before the committee is alarming: To a very dangerous extent, the vital security of this Nation is in serious jeopardy. We are dependent for many of our essential raw materials on sources in far-off lands, many under the control of possible fickle allies or timid neutrals, some veritably under the guns of our potential enemies.

And what is perhaps a more devastating conclusion of this committee is that none of this vulnerability need exist. Long overdue corrective measures should be undertaken at once.

The Minerals, Materials, and Fuels Economic Subcommittee of the Interior and Insular Affairs Committee derived its authorization by Senate Resolution 143 of July 28, 1953. It was directed to:

1. Determine the accessibility of the critical raw materials to the United States during a time of war.

2. Recommend methods of encouraging the production of the critical war materials adequate for the expanding economy and the security of the United States.

In pursuance of these directions, the subcommittee conducted hearings over the past 10 months from coast to coast and examined more than 360 witnesses. The most distinguished engineers, military authorities, scientists, and experts familiar with the problems of securing essential raw materials during wartime contributed their counsel and advice to the committee.

The subcommittee concentrated its examination on a total of 77 raw materials which the Secretary of Defense declares are indispensable and essential in conducting modern warfare and which we have acquired by imports from abroad.

The committee adopted at the outset three general areas of investigation vital to our national defense and to the maintenance of our national economy:

1. A study of the area from which critical materials will be available to the United States in time of war.

2. The degree of self-sufficiency that can be established within that area.

3. The congressional policy under which maximum economic self-sufficiency can be established in this Nation.

The investigation and report come at a very critical and uncertain period in the affairs of this Nation—when new and improved methods of offense and defense must be weighed and considered. Laboratory developments and discoveries, including substitutes and replacements for critical materials—all affect the long-range welfare of our people and our relations with the people of the Western Hemisphere and with the world.

The availability of critical materials essential to the defense of our country and which are vital to our civilian economy have strongly influenced our foreign policy. The known availability of the necessary critical materials in the Western Hemisphere, in an area that we can defend, should have a real impact on future foreign policy and defense decisions.

The Western Hemisphere can become completely self-sufficient in the production of the necessary critical materials in time of war. This Nation can materially increase its own economic production of strategic and critical materials by strengthening its laws regulating foreign trade. Congress cannot shirk its duties in this area.

The printed hearings, covered in this report, are divided into 10 parts as follows:

Part 1. Bureau of Mines.
Part 2. Stockpile.
Part 3. Titanium.
Part 4. International Materials Conference.
Part 5. Commodity trade agreements.
Part 6. Fuels.
Part 7. Tariffs and taxes.
Part 8. Paley Commission, staff study.
Part 9. Uranium, columbium, cobalt, rutile, and strategic agricultural products.
Part 10. Industry.

COMMITTEE RECOMMENDATIONS

The availability of critical and strategic materials are vital to military security and to an expanding domestic economy. National survival in time of war depends on ample and uninterrupted supplies of the 77 such materials included in the report. To assure that imperative needs of the United States be met:

1. We recommend the closest cooperation among the nations of the Western Hemisphere, which is the only dependable source of the necessary critical materials in time of war. This area can be defended and can be made self-sufficient in the production of such materials. We recommend that the spirit of the 130-year-old Monroe Doctrine prevail in our relations with the nations of the Western Hemisphere.

2. We recommend that Congress insure that the regulation of foreign trade conforms to the principles thus laid down in article I, section 8, of the Constitution thus assuring the American workers and investors access to American markets.

3. We recommend eliminating our Nation's present dependency upon remote and possibly unfriendly or neutral areas of the world for the critical materials, without which we cannot conduct a war.

The only tin smelter in the Western Hemisphere is in Texas City, Tex. The continued operation and maintenance of this smelter is essential to our security. The capacity meets our wartime needs.

4. We recommend increased depletion allowances to producers of critical minerals and materials as a further incentive to production.[1]

Further studies should be made of the Canadian method of delayed taxation in connection with such critical mineral and material development.

5. We recommend acceleration of the Federal program of stockpiling critical and strategic minerals and materials to assure ready supplies in the event of war and coordination of this program with "going concern" production industries in the Western Hemisphere to assure continuation of necessary supplies under stress of war.

6. We recommend studies with a view to improve petroleum, gas, and coal resources and develop them to assure maximum availability of domestic fuels for both the peacetime economy and national security. Such studies should determine whether present regulations are unduly restrictive of our own resource expansion and reserves, and if so, regulations should be adjusted to maintain our self-sufficiency in these vital fuels.

7. We recommend increasing the production goal for titanium to 150,000 tons annual minimum without delay. Titanium is a new wonder metal. This is a military must. Contracts should be awarded without delay by the Government to qualified concerns prepared to contribute toward this goal. Civilian demands are tremendous for this heat-resistant, high-strength-weight-ratio, noncorrosive, nonmagnetic metal.

This metal can become the basis for a $5 billion to $10 billion new civilian industry. Production of the long-range supersonic speed bombers and the necessary fighter planes will make obsolete any nation's air equipment built without it.

8. We recommend that goals for production of uranium for fuel be made adequate to meet both military and civilian requirements. Hemisphere self-sufficiency in uranium for fuels can be attained. A liberal long-range market price must be maintained as long as Government control is necessary for security. A tremendous civilian potential use of uranium is assured based on nuclear power for industry.

9. We recommend a review of the work of the Securities and Exchange Commission by the appropriate committees of Congress to clarify its duties and responsibilities. The sale of securities affects the strategic materials program. It is recognized that the Commission should assure full and complete information to potential purchasers of securities, and that its responsibility does not include determination of feasibility. Such congressional committee review should consider the advisability of a requirement that a thorough and confidential inquiry should precede any public announcement of an investigation of offered securities.

10. We recommend determination by the Congress, through appropriate committees, of the precise duties and relationships between the multiple (approximately 38) agencies and branches of our Government responsible for stockpiling operations of critical materials.

The determination of these duties should precede the appropriation of funds for these agencies with the aim of facilitating their work and of fixing responsibility for the proper coordinated objectives.

11. We recommend appropriations of $50 million annually to establish and operate a comprehensive 5-year program of laboratory, pilot plant, and exploratory research into improved methods of beneficiation of critical materials and the study of substitutes, including synthetics and replacements.

We approve the research and studies conducted by the Bureau of Mines on the low-temperature carbonization of coal and we recommend that adequate funds be appropriated to conduct extensive studies and investigations of ways and means to revive the coal industry. These funds should be made available to be used independently or in conjunction with responsible privately operated companies and organizations.

It is recommended that research and pilot-plant work be continued; that the erection of a large-scale oil-shale plant be considered by industry in cooperation with the Government. Such plant would endeavor to advance the production of petroleum fuel on a commercial basis, and it would be available in a war emergency.

12. We recommend rejection of international controls of production, prices, and supplies of critical and strategic materials unless by legislative action by the Congress of the United States.

FINDINGS

The findings include conclusions developed from the 10 parts of published testimony and are the foundation for the 14 recommendations for the United States Senate. This is in conformance with Senate Resolution 143 directing the committee to determine the accessibility of the critical materials to this Nation in wartime, and for our expanding economy and security.

1. The Western Hemisphere can be defended and will be the only dependable source to the United States of critical raw materials in the event of an all-out war.

The delivery of any such critical materials to the Nation across a major ocean during such a conflict will be highly problematical.

The evidence indicates that it now is possible for the enemy to destroy the production of critical materials at their source and, in any case, sea lanes will be even more difficult and costly to depend upon than was the case during prior wars.

The Western Hemisphere can be made self-sufficient in the production of critical materials which are essential in war.

Since the testimony of competent witnesses indicates that the Western Hemisphere will be the only dependable source of critical raw materials in the event of an all-out world war, it is imperative to the security of this Nation and to the nations of the Western Hemisphere that we and they foster the greatest measure of self-sufficiency in the production of such materials and continually study all possible devices that will encourage the expansion of hemispheric production in this vital field.

It is vital to our domestic welfare, economy, and security that maximum economic production be maintained, first, within our own borders and, second, in the Western Hemisphere.

2. During the last more than a quarter of a century established procurement practices have dangerously increased our dependence for the critical materials upon nations across major oceans without which this Nation cannot survive.

We must avoid dependence upon overseas suppliers to the extent that these suppliers could suddenly render us impotent by withdrawing supplies of critical materials during a world conflict, or could use such dependence as a political or economic bargaining lever.

Testimony is abundant that our domestic and foreign policies have been based on the false assumption that the United States is a have-not nation insofar as the supply of critical raw materials necessary to this Nation in wartime is concerned.

This testimony also shows that in many instances the United States has expended enormous sums of money to underwrite foreign fiscal systems and world policies of nations whose friendship is deemed of great importance because of their control and possession of raw materials.

This misconception that we are a have-not nation has found wide acceptance by the public through confusion between the statistical and engineering terms, "proved commercial reserves" and "potential and latent resources," which include developed ore, probable ore, possible or inferred ore to designate supplies of ore in various states of development.

This confusion has led to predictions over the past two decades that we would soon exhaust our supplies of petroleum, iron ore, copper, lead, zinc, tungsten, mercury, and other critical materials. Expert testimony before this subcommittee made it crystal clear that there were more known commercial reserves of critical materials in the United States than ever before in the history of this Nation.

In the meantime we have consumed more than the total quantity of proven commercial reserves of two decades ago.

The potential latent resources or reserves are more than ever susceptible to discovery today by modern techniques and exploration methods, requiring only a financial incentive to be found.

Evidence was presented which showed that this country was led into the mistaken conclusion that, according to the known reserves of critical materials, including petroleum, tungsten, manganese, zinc, lead, and other minerals, "we would exhaust our supplies and they would be virtually depleted" within 2 to 12 years.

Documents were introduced into evidence which stated that in 1944 the Government was advised to conserve its minerals and that it should purchase some critical materials from foreign countries, including Russia. It was testified that this advice played a part in the subsequent increase in United States dependence on foreign nations for critical materials which are available in this Nation and in the other areas of the Western Hemisphere.

3. Less than 1 percent of the areas of this Nation has been included in geological investigations; only 12.7 percent has been geologically mapped, and 31.1 percent topographically mapped by the United States Geological Survey; and that the Survey started its mapping work in 1880.

4. The evidence indicates that Federal tax laws definitely retard the production of critical materials in this Nation.

The principle of depletion allowance has materially increased the known reserves of petroleum and natural gas and if extended to other critical materials would increase the incentive to discover and develop additional supplies.

5. The United States cannot possibly exhaust its present and potential fuels supply including petroleum and coal in the foreseeable future. The absolute necessity for going-concern industries cannot be overemphasized. This is particularly essential where materials cannot be stockpiled, as coal and petroleum. Testimony is conclusive that the petroleum industry is a thriving going-concern business growing through the

[1] Present percentage of depletion allowance:

Mineral:	*Percentage of gross income*
Oil and gas properties	27½
Sulfur	23
Metal mines—practically all types	15
Uranium	15
Coal	10
Sand, gravel, slate	5

effect of a continually increased market and the tax policies including depletion allowances, but emergency dependence must be on the going-concern industry.

Enormous oil reserves are found in the shales and/or coal of Colorado, Wyoming, Utah, Kentucky, Indiana, and Ohio, as well as in Canada. It has been estimated these shales contain over 200 billion barrels of oil.

Experimental work by the Union Oil Co. and Bureau of Mines in pilot plant operation shows that petroleum production from this source is entirely practicable and that vast amounts of oil may be produced in the foreseeable future. The Green River formation in Colorado alone has been described as an area of 1,000 square miles with an underlay of oil shale 500 feet thick averaging a recovery of 15 gallons of oil per ton.

Coal reserves are unlimited for energy demands as well as for petroleum production. The coal industry is in a state of decline and steps should be taken and studies should be made with a view to expanding the uses of coal.

An International Materials Conference was established in December 1950 by the State Department without the express consent of Congress. It was testified before the subcommittee that the IMC was set up in lieu of the International Trade Organization which Congress had refused to ratify at an earlier date.

There is evidence before the subcommittee that the operations of the IMC and international control of production and consumption allocations may have depleted and retarded fulfillment of stockpile objectives.

The IMC has now been discontinued. A new effort to establish a similar international organization is currently in progress in the United Nations Economic and Social Council, based on a resolution passed by that body on April 30, 1954.

An international organization, setting up controls over the distribution of the production and consumption of the world's goods could inhibit our own going-concern industries.

7. Ore is a mineral aggregate that can be extracted at a profit. Through properly regulated foreign trade the incentive for risk capital necessary to develop additional reserves and establish a going-concern critical-material industry will be available.

8. Mines once closed down require years of time and tremendous investments to reopen. With experienced workers and technical staffs widely scattered, machinery liquidated, mines flooded and caved, much of our once available reserves are destroyed, and prospecting for new reserves is discouraged. Failure to realize the situation could mean tragedy to our economy and our material security.

9. Numerous administrative agencies and departments of the Government are involved in the stockpile program, or in efforts to increase the production of critical materials. They act independently of each other and none are charged with the complete operation. Many are not cognizant of the end objectives of the program. Their activities are marked by confusion and delay, frequently defeating the intent of Congress.

10. The Securities and Exchange Commission's "purpose is to provide full and fair disclosure of the character of securities sold" and "to prevent fraud." Complaints were made that the discovery and development of new minerals was retarded by actions of the Securities and Exchange Commission in that it improperly attempted to determine the feasibility of an enterprise and in that public announcements of investigations of securities sales were made prior to confidential inquiries justifying such announcements.

The Chairman of the Securities and Exchange Commission assured the committee that "the Commission does not pass upon the merits of any security or feasibility of an enterprise offering securities for public sale." The Commissioner also stated that there would be no publicity given to any administrative investigations before the Commission authorized a public hearing or announces a public investigation.

11. Titanium production is a must. It is a wonder metal without which this Nation cannot produce the most effective bomber plane flying at supersonic speeds with a range of five to seven thousand miles. Titanium will increase both the range and speed of these planes.

(a) This Nation needs a minimum production of 150,000 tons of titanium annually. The manufacture of the proper type of military planes without this wonder metal is impossible. We are producing approximately 2,000 tons annually.

(b) Three agencies share the responsibility for the production of this indispensable lighter, heat-resistant metal, which is far stronger than aluminum, and less than half the weight of steel. The Secretary of Defense, the Office of Defense Mobilization (ODM), and the General Services Administration (GSA) work on the program. The ODM represents the consolidation of about 15 such agencies.

(c) In 1953 the Secretary of Defense recommended the production of 35,000 tons of titanium annually by 1956. The ODM reduced the figure to 25,000 tons and up to September 21 of that year the GSA had let contracts for 13,200 tons and the actual annual production was little over 2,000 annual tons.

As of May 15, 1954, the Secretary of National Defense still recommends the production of only 35,000 tons, the ODM will permit contracts up to 37,500 tons. The GSA is now in process of negotiating additional contracts for an additional 16,500 tons per annum.

There is no provision for checking the contractees and for facilitating the work. Australia now furnishes the rutile for the Henderson, Nev., plant where two-thirds of the production is located—and India furnishes most of the ilmenite for the New Jersey plant, which is the source of the remaining one-third. Neither source would be available in time of war. There is more ilmenite in the United States and southern Canada than we can use in a century.

The industrial use of titanium, in addition to the military needs, could amount to from $5 to $10 billion annually in the near future—it is the strongest light metal known and in addition is noncorrosive, even in sea water. Many industries, including the chemical field, have announced that they can use the metal as fast as they can be assured a continuous supply.

12. The commercial use of nuclear power could be the greatest potential source of improvement, starting in the desert and mountainous areas where other fuels and hydroelectric potentials are high cost or nonexistent.

13. A stockpile of each critical material must be maintained which, coupled with going-concern production within the Western Hemisphere, will be ample to meet the military and civilian needs. Such a stockpile can be decreased as the going-concern production is increased.

The best wartime insurance of the adequacy of our supplies of critical and strategic materials is a healthy, expanding mining industry combined with well balanced, ample stockpiles.

The availability of tin is a matter of deep concern to this Nation. The far eastern resources may well prove unavailable to the United States in any future war.

The Western Hemisphere resources contained in Bolivia are more than adequate to meet the United States requirements. At present the United States Government is operating the only tin smelter in the Western Hemisphere. Recently efforts have been made to dismantle this smelter. Testimony received by the committee proves that this would be foolhardy and shortsighted. It is essential that we have a going-concern tin smelter in the United States capable of supplying the United States in the future and to supplement our stockpile requirements.

14. Laboratory research, pilot plant experimentation and exploration is important in the interest of national defense and must be implemented—for new and improved methods of beneficiating critical materials and for new uses, substitutes and replacements—and to facilitate the discovery of new reserves.

The difference in country rock and reserve ores often lies in an improved beneficiation process.

Numerous new uses for metals and materials have continually been developed over the years through laboratory work and pilot plants, among them titanium, zirconium, columbium, thorium, and uranium and new materials such as synthetic mica.

Many of these can be utilized as substitutes and replacements for scarce materials. They have opened up entirely new and unexplored fields of increased speed and power. There is every reason to conclude that if properly encouraged, much greater and broader progress in these fields lies immediately ahead.

LIST OF STRATEGIC AND CRITICAL MATERIALS

Group I

Abrasive crude aluminum oxide; aluminum; antimony; asbestos, amosite; asbestos, chrysotile; asbestos, crocidolite; bauxite, metal grade; bauxite, refactory grade; beryl; bismuth; cadmium; celestite; chromite, chemical grade; chromite, metallurgical grade; chromite, refractory grade; cobalt; columbite; copper; corundum; diamonds, industrial; fluorspar, acid grade; fluorspar, metallurgical grade; graphite, amorphorus lump; graphite, crucible grade; graphite, lubricant and packing grade; kyanite; lead; magnesium; manganese ore, battery grade; manganese ore, chemical grade; manganese ore, metallurgical grade; mercury; mica, muscovite block, good stained and better; mica, muscovite block, stained (radio tube quality); mica, muscovite film; mica, muscovite splittings; mica, phlogopite splittings; molybdenum; nickel; petroleum; platinum group metals, iridium; platinum group metals, platinum; quartz crystals; rare earths; selenium; tin; titanium; tungsten; vanadium; zinc; uranium; thorium.

Nonminerals: bristles, hog; castor oil; coconut oil; cordage fibers, abaca; cordage fibers, sisal; cotton, extra long staple; feathers and down, waterfowl; hyoscine; iodine; jewel bearings, instrument jewel except vee jewels; jewel bearings, sapphire and ruby vee jewels; jewel bearings, watch and timing-device jewels; opium; palm oil; pyrethrum; quinidine; quinine; rubber, crude natural; sapphire and ruby; shellac; silk; talc, steatite, block; sperm oil; vegetable tannin extract, chestnut; vegetable tannin extract, quebracho; vegetable tannin extract, wattle.

Group II

Minerals: bauxite, abrasive; cryolite, natural; graphite, crystalline fines; ilmenite; mica, muscovite block, stained and lower; mica, phlogopite block; platinum group metals, osmium; platinum group metals, palladium; platinum group metals, rhodium; platinum group metals, ruthenium; rutile; zirconium ore, baddeleyite; zirconium ore, zircon.

Nonminerals: agar; cotton; diamond dies; emetine; optical glass; talc, steatite, ground; wool.

Mr. MALONE. Mr. President, the recommendations and the findings are supported by 10 published volumes of

testimony, a summary of which is included as a part of the report.

The summary appears in the report under 14 sections, and represents a digest of the 10 months of hearings.

Mr. President, the United States is a part of the Western Hemisphere. Our ultimate security will be threatened if any European or Asiatic nation moves into this area to gain military, political, or economic control.

Therefore, closer cooperation among the nations of the Western Hemisphere is immediate and compelling.

The spirit of the 130-year-old Monroe Doctrine is the settled principle upon which that cooperation must be based. The principle should apply equally to the British, the Dutch, the French, the Union of Soviet Socialist Republics, and to all other European and Asiatic nations.

WE SHOULD DECLARE OUR INTENTION NOW WITH RESPECT TO RED CHINA

Mr. JOHNSTON of South Carolina. Mr. President, to me it is a remarkable demonstration of our independence of thought and expression—and I trust, action—at this season of the year, when we have just concluded the celebration of our national Independence Day, that we find the distinguished majority leader and the distinguished leader of my party in the Senate joining in quite similar expressions in regard to the course of action our Government should follow in the present world situation in view of recent trends. On Thursday and Friday of last week these leaders of major political thought in this country made extraordinary and significant statements in their brief remarks appearing in the RECORD. To them I offer my humble praise and approbation. I welcome them to a field of thinking to which I long ago subscribed.

My position in this respect requires no extended explanation on my part. We cannot always be consistent just for consistency's sake. Unforeseen events and conditions over which we are unable to exercise control, either individually or as a nation, may ultimately compel many of us to take stands and positions contrary to those which we may have assumed heretofore.

It is fallacious and unwise to suggest even for an instant that because one has taken a position on any public or private question he must in all events and at the risk of great hazards maintain that position. Changing conditions develop new problems which require different solutions and often dictate a reversal of one's former attitude. That the leaders of the two dominant parties of this country are able to see that changing world conditions require a new look at world problems, and recognize the need for a new examination of our foreign affairs, is a heartening development for our national good. As for myself, their statements have dispelled a feeling of loneliness which I have experienced throughout the several years of my membership in this body.

On this occasion, so closely associated with our July 4 celebrations, these personal declarations of independence by the distinguished Senators from California and Texas, whose leadership we in this body are pleased to acknowledge, are deserving of our acclamation.

I trust I may be pardoned for making a personal reference. I brought with me into membership in the Senate a few practical convictions and observations which have application in everyday affairs between man and man, and which I believe are equally applicable to nations. A businessman does not extend credit to one he does not trust or to one unworthy of credit. He does not engage in daily transactions with one he fears. I learned a long time ago that, if one extends credit or puts faith in a pseudo-friend, and later asks that the credit or loan be restored or repaid, when the faith and loyalty of the so-called friend are put to the acid test and found wanting, such an individual does not merit credit and confidence.

Why nations should be otherwise dealt with has been an unanswered question in my mind for many years. Before I had the honor of a seat in the Senate, I questioned the wholesale extension of aid, supplies, money, and credit to many so-called friendly nations. I never cared too much for the lend-lease program. Its name and purported aims never beguiled me.

Mr. President, I have looked with great disfavor upon heaping and almost forcing our substance upon many nations of the world. I am now thinking particularly of Russia and her satellites during the last war. I looked with great disfavor upon Russia's failure to cooperate with us during the very time—in war—when her national existence, like our own, was imperiled. Were our officers and civilian technicians permitted to go behind their battle lines to learn the problems the war was creating in Russia, how our generous help and assistance were being employed there, and how we might best prepare for the problems of peace? The iron curtain Russia maintained was just as impenetrable then as it is now. Russia erected then, and maintained then, as now, a barrier to wholehearted cooperation with the free world. We hesitated then to express our fears for the future even though many of us doubted the wisdom of our seemingly boundless generosity. The time has now come, and better for us now, before it is too late, that we must give full, frank, and public expression to our feelings of honest doubt. This is not isolation. This is not undue nationalism. This is no show of political immaturity.

This is a political necessity. It is evidence of the fact we intend to guard our own interests and view the future candidly. What is best for America, is my theme. What is best for freedom, liberty, and the pursuit of individual happiness, for ourselves and our posterity, and for freemen everywhere, is the question I must resolve in my own conscience, in the light of my own personal experience and such knowledge as I possess of the history of mankind and nations.

It is argued here and there that war is the only alternative to our failure to remain as a member in the United Nations. That is not so. That is not necessarily so. Such a result is not the only alternative. Such statements are not believed, in my opinion, by many who assert them. They know, or ought to know, that the history of mankind disputes them. The first 1,945 years of existence under Christendom were not all devoted to the affliction of war. There have been more years of peace since the dawn of civilization than there have been of war. That is a historical fact.

There probably will be some who will say that my observations smack of warmongering. I want only to be realistic about the grave problems we as a nation are facing. I hate war. I deplore the death caused by war and the misery and suffering which follow in its wake. The maimed, halt, blind, and persons otherwise afflicted who fill our veterans' hospitals bear convincing evidence that war solves few problems, if any, but we do know the scourge of war creates many more problems than it ever solves. If a personal reference may be pardoned, I myself have heard shells explode in midair and close at hand on the battlefield. I have been in the thick of machinegun fire, smelled the poisonous gases, and seen brave men fall on the battlefields of France during World War I. I have seen war at first hand, and its ghastly and beastly worst. War is abhorrent, and I want no more of it. Yet, if we are to exist and not fall victim to the stealthy, surreptitious, and insidious infiltration and transformation of our representative Republic, we must appraise and reappraise, often, however agonizing.

Can there not be associations and alliances among nations of good will and peaceful purposes, instead of the horrifying alternative of war which some predict would occur if there should be a change in our policy? I shall never take the threat of such an alternative as a justification for a further dissipation of our strength as a nation or as an excuse for our continued humiliation in the family of nations. In the United Nations, one setback after another fosters still others. Now is the time to stop, look, consider, and make whatever changes are necessary. The sooner our country realizes these things and sets its foot upon a firm foundation in the preservation of our rights, the greater the hope for the salvation of mankind everywhere.

Certainly I do agree with the pronouncements of our party leaders, the leaders of our two major parties, that we as a nation are at the crossroads of our national life so far as our foreign policy is concerned.

Consistency has been denominated a jewel. Jewel though it be, I want none of it at the expense of the very lifeblood of our Nation. I may say, however, that the position now asserted by our leaders is the one I have consistently taken. I refer to my negative votes in connection with all these foreign-aid programs which have plagued us for so many years. The recent pronouncements of our leaders in this body encourage me in the hope that I have been right on this subject.

You cannot buy a man's favor or friendship. His own self-interest will generally determine his course of action.

So it is with nations. The pathetic resolve, so clear to me, of the free nations now willing to sell their national existence as free peoples in exchange for a pitiable mess of trade pottage should be revolting to their heritage. What has become of the courage and determination of the man who gave mankind, after the battle at Dunkerque, the thrilling admonition in the immortal words, "All I can promise you is blood, sweat, and tears"? That was his answer to the threatening and menacing hordes of invaders, and the battle was ultimately won. Where is the tenacity, the inherited devotion to free institutions, and what becomes of individual liberty, if we are to continue to follow the course of trading with the enemies? Everything we cherish as Americans and as descendants of the barons who wrenched Magna Carta from King John at Runnymede may be lost. Are we breaking from our former allies if we adopt a different foreign policy and remain true to our national ideals? Are they not, rather, breaking from us and pursuing a course of present advantage, with no thought of their moral obligation toward insuring the future rights of freedom-loving people everywhere?

Long ago, I made my own appraisal of the world situation in the light of my own experiences and my understanding of history and its teachings. While the administration's spokesmen have recently been at variance—some urging we cannot afford to lose all of southeast Asia, and others contending we can only resist further aggression when and if the Asian peoples themselves join us with their assistance and cooperation—there does seem now at last to be more or less agreement in the pronouncements of the President, the Secretary of State, and more lately, here in the Senate, that, to use the phrase coined for the particular situation, there must be "an agonizing reappraisal" of our foreign policy. That reappraisal may shape up in the form and design of my own original appraisal. I do not favor, Mr. President, and never have favored, wasting our national substance, scattering and sprinkling our resources here and there, a little here and a little there, at all times weakening ourselves gradually, taxing ourselves with unbearable burdens, in the futile hope that many in the nations never accustomed to our way of life would wish to assume it and be the promoters and defenders of it in the world at large.

I believe in a strong America. I believe in alliances with free governments which have the courage, determination, and fortitude to stand up to the enemies of freedom, come what may. I want to follow the statesmanship of men who appreciate the heritage and understand the lessons of the past; men who have the wisdom to know we cannot do business with the tyrannical rulers of the Soviet Union.

Who is so naive as to think Russia is restrained by any regard or respect for the United Nations? The Soviet Union is ruled by despots whose ingrained purpose and ambition are to enslave all mankind, as a mass, to do their diabolical bidding. What desperation has seized the leaders in England, France, Italy, or any other nation, that they are unwilling to look just a little into the future and become aware of the fate that surely awaits them if they succumb to the temptation of profits of a wicked trade? Have these countries no leaders of the courage and conviction of Syngman Rhee, the undaunted leader of a suffering yet courageous Korean nation? Cannot the Western European countries realize that a succession of temporary advantages granted by the Soviets only mean that total domination and enslavement by the Communists will be their ultimate portion?

Mr. President, I do not share the apprehension of some of my friends on this side of the aisle or of others in this body who say we should not now declare our intentions in the event Red China should be admitted to the United Nations over our objections. It is not, as has been suggested here, that we seek to dominate the United Nations or that we do not wish to continue to play the game according to the rules, or that in a moment of adversity we should gather our marbles and go home. We were instrumental in forming the United Nations. We have been its principal supporter. We have given it a home and haven here. We have abided by its objectives and purposes. Has Russia done as much? Who is there to assert that of Russia? Whenever our former allies follow the spirit of the rules of the United Nations, in support of our efforts to enforce those rules, will they have done more than they should, or as much? Should not their deeds conform to their words? With just a few exceptions, we were given only token military support in the Korean war—and it was a war; let there be no mistake about it. That action cost us billions of dollars and upwards of 140,000 American casualties. Did we follow the rules there, and did we play the game fairly and squarely? Measure our contribution against that of England, please.

It requires nothing more than common justice and reasoning for me to take the position that our country should withdraw from the United Nations in the event Red China is permitted to walk over the dead bodies of thousands of American soldiers and the millions of freedom-loving Koreans, to gain a seat in the United Nations. My position requires no hedging, and permits of none. It requires no wait and see on that score. It is not daunted by the threat of war as an alternative. The situation cannot even be debated, so far as I am concerned. My answer is a natural one: "No; a thousand times No." When the bloody Communist Chinese put their feet under the tables in the councils of the free nations and assume the privilege of voting in the United Nations, it is time for the United States to leave those councils forthwith.

Should Communist China retire from Korea and make amends for the wrongs inflicted upon that devastated land; when Red China renounces her evil intentions of infiltrating the helpless nations of southern Asia, and quits her cat-and-mouse affair with the docile millions in India, so unwisely dominated by Nehru—who, if he knows anything, knows better than to trust Red Russia or Red China; and when Red Communist China shall renounce war as an instrument of national policy, and shall renounce infiltration as being inimical to peaceful relations between nations; and when by other acts and deeds she demonstrates that confidence may be placed in the good faith of her intentions, then is the time for us to consider a change of attitude and intentions. Until that time shall arrive, I plead for the free nations to remain adamant.

I should like to point out that we have lost no faith and confidence among men of worthwhile nations because of our recognition of the rights of the German people or those of the good people of Japan. Only yesterday, under brutal and misguided leaders, they were our mortal enemies. Today, we and they are friends. I hope their friendship for us and ours for them will be steadfast and enduring. To such as they and to the great people of Turkey, whose leadership today is at its greatest, and to Greece and the other free nations who value human rights and personal liberty over the paltry profits of temporary trade and commerce with the enemy, I say let us continue our alliances of friendship, our mutually helpful and fair trade relations and practices, and such loans and grants as may assist them in being and remaining strong. To the free nations of this hemisphere, let us continue our union of Pan-American states and our benevolent cooperation and alliances. Let us also not forget the people of the Philippines, who look to us for assistance and guidance, and to whom we are historically bound.

Likewise, we would include our friends in New Zealand, Canada, and Australia. Let us give, within reason and propriety, such assistance, guidance, and cooperation to other free nations in the danger zones of the world.

When we shall have done these things for those who value individual liberty and human dignity above temporary and passing material gain, we shall have helped ourselves and others in the hard struggle to maintain free governments and free institutions, and thus, in the long run, we shall have rendered the most substantial service to mankind. To do otherwise, to cringe from the hazard of free expression of our intentions for the future, is unbecoming of us as individuals and as a nation. The time has come for us to be forthright, frank, and courageous. It is no time to shrink, cringe, and shudder. To defer is merely to postpone the day of reckoning. To delay permits the strong to further impose upon the weak. Let us strengthen the weak by stating candidly to the world what our own future action will be.

I shall vote to reduce, cut off, and abandon entirely our policy of handouts to foreign governments at the great expense and detriment to our people here at home. When I reflect now upon the billions we have wasted in the forlorn effort of trying to save England—and now to save her from herself and her false theory of the beneficence of Fabian socialism—the billions we have scattered

hither and yon in a fruitless effort to preserve a semblance of free government for those who now appear unwilling to receive it, and who do not appreciate our aid, I reproach myself for not having been more vocal in my unalterable opposition to these handouts. On previous occasions the situation seemed rather hopeless when I was almost alone in casting my vote in opposition.

We could spend to good advantage here at home the billions authorized in the present foreign-relief bill, which has passed the House of Representatives. Years ago we could have reduced our national debt if we had applied to it the billions we have wasted abroad. We could call home the hordes of Americans employed in our various foreign-aid programs and schemes. I feared long ago that they were harming our relations because of their reckless actions and licentious mode of living. In many instances they have not been our true representatives. We shall save millions when they are released from the public payrolls. By this large saving we can reduce our own tax burdens and return to our historic policy of friendliness toward all nations whose national ambitions, aspirations, and actions deserve our friendship.

Thus we will preserve our role among the free nations of the earth as the champion of the dignity of the individual man. Thus we will help to preserve for ourselves, for our posterity, and for free men everywhere the great principles of individual liberty so beautifully taught us in the Christian religion. Thus only can we render our greatest service, the greatest within our power, in the preservation of human liberty throughout the world.

Mr. McCARRAN. Mr. President, I take this opportunity to congratulate the Senator from South Carolina for a fine presentation of views which I share.

CALL OF THE ROLL

Mr. BUTLER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DOUGLAS. Mr. President, reserving the right to object, the Senator from Louisiana [Mr. LONG] is planning to deliver a major address on the military construction bill.

The PRESIDING OFFICER. The question is not debatable.

Mr. DOUGLAS. I said "Reserving the right to object."

Mr. LONG. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard. The clerk will complete the call.

The Chief Clerk resumed and concluded the call of the roll, and the following Senators answered to their names:

Aiken	Bridges	Carlson
Anderson	Burke	Case
Barrett	Bush	Chavez
Bennett	Butler	Clements
Bowring	Byrd	Cooper
Bricker	Capehart	Cordon
Crippa	Johnson, Colo.	Murray
Daniel	Johnson, Tex.	Neely
Dirksen	Johnston, S. C.	Pastore
Douglas	Kennedy	Payne
Duff	Kerr	Potter
Dworshak	Kilgore	Reynolds
Ellender	Knowland	Robertson
Ervin	Kuchel	Russell
Ferguson	Langer	Saltonstall
Flanders	Lehman	Schoeppel
Frear	Lennon	Smathers
Fulbright	Long	Smith, Maine
George	Magnuson	Smith, N. J.
Gillette	Malone	Sparkman
Green	Mansfield	Stennis
Hayden	Martin	Symington
Hendrickson	Maybank	Thye
Hickenlooper	McCarran	Upton
Hill	Millikin	Watkins
Humphrey	Monroney	Welker
Ives	Morse	Williams
Jackson	Mundt	Young

The PRESIDING OFFICER (Mr. CRIPPA in the chair). A quorum is present.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

Mr. WATKINS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the amendments of the House to Senate Concurrent Resolution 75, which records congressional approval for suspension of deportation of certain cases which were referred by the Attorney General.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the concurrent resolution (S. Con. Res. 75) favoring the suspension of deportation of certain aliens, which were, on page 16, strike out lines 18 and 19 inclusive; on page 35, strike out line 22; on page 41, line 11, strike out "Tin-Yang" and insert "Ting-Yang", and on page 41, after line 12, insert:

A-9948032, Palombella, Onofrio.
V-28612, Vergos, Diamatis or Diamond.

Mr. WATKINS. Last week I called to the attention of the Senate the action of the House of Representatives with respect to this concurrent resolution. At that time there was objection to taking it up. I have contacted the ranking minority member of the committee, and there is now no objection to going ahead with the matter.

Mr. MAYBANK. Mr. President, will the Senator from Utah yield?

Mr. WATKINS. I yield.

Mr. MAYBANK. Did the Senator from Utah ask unanimous consent to take it up?

Mr. WATKINS. I did, and at this time I renew the request.

The PRESIDING OFFICER. It is a privileged matter and can be taken up on motion.

Mr. MAYBANK. Mr. President, reserving the right to object—and I do not intend to object—I may say to the Senator from Utah that I wish to ask unanimous consent that the yeas and nays be ordered on the Long amendment.

The PRESIDING OFFICER. There is no Long amendment pending at the present time.

Mr. MAYBANK. Mr. President, I ask unanimous consent that when the amendment of the Senator from Louisiana [Mr. LONG] is before the Senate, the yeas and nays be ordered.

Mr. DOUGLAS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOUGLAS. What is the business before the Senate?

The PRESIDING OFFICER. The amendments of the House to Senate Concurrent Resolution 75, which records congressional approval for suspension of deportation of certain cases which were referred by the Attorney General.

Mr. WATKINS. Mr. President, under date of April 19, the Senate adopted Senate Concurrent Resolution 75. Thereafter, on June 15, the House of Representatives amended Senate Concurrent Resolution 75 by adding 2 names, deleting the names of 2 aliens, and by changing the spelling of a certain alien's name. These cases have been examined and have been found to comply with all our standards, and, accordingly, I move that the Senate concur in the House amendments to Senate Concurrent Resolution 75.

Mr. MAYBANK. Mr. President, will the Senator from Utah yield?

Mr. WATKINS. I yield.

Mr. MAYBANK. I should like to ask the Senator if he consulted the minority leader.

Mr. WATKINS. I consulted the minority leader, and I contacted the Senator from Nevada [Mr. MCCARRAN], and he has no objection.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah.

The motion was agreed to.

Mr. FREAR subsequently said: Mr. President, I should like to have the attention of the senior Senator from Utah. I move to reconsider the vote by which the motion of the Senator from Utah was just agreed to. The reason for asking a reconsideration is that I understood the Senator—perhaps I was not quite clear on it—had received clearance from the ranking minority member of the Judiciary Committee, from whom I just received a telephone call asking for reconsideration on behalf of the Senator from Nevada [Mr. MCCARRAN].

Mr. WATKINS. A member of my staff contacted the Senator, and he had no objection whatever.

Mr. FREAR. I hope the Senator will understand my reason for asking a reconsideration.

Mr. WATKINS. I shall not oppose reconsideration, but it seems to me that a great deal is being made of a very little.

Mr. FREAR. Mr. President, I enter a motion that the Senate reconsider the vote by which the motion of the Senator from Utah was agreed to.

The PRESIDING OFFICER. The motion will be entered.

Mr. FREAR subsequently said: Mr. President, I ask unanimous consent that I may be privileged to withdraw the motion to reconsider the vote by which the motion made by the Senator from Utah was agreed to.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

CONSTRUCTION AT MILITARY AND NAVAL INSTALLATIONS

The Senate resumed the consideration of the bill (H. R. 9242) to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes.

Mr. LONG. Mr. President, I ask unanimous consent that I be permitted to offer my amendments en bloc, notwithstanding the fact that they would change one figure already agreed to by the Senate.

Mr. CASE. Mr. President, reserving the right to object, may I ask the distinguished Senator from Louisiana if the amendment to which he refers is an amendment which would change the figures in several places in the bill relating to enlisted men's barracks, and so forth?

Mr. LONG. Yes.

Mr. CASE. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I now call up my amendments which are at the desk.

The PRESIDING OFFICER. The Clerk will state the amendments offered by the Senator from Louisiana.

Mr. LONG. Mr. President, I ask unanimous consent that the reading of the amendments may be dispensed with, as they are somewhat lengthy, and that they may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments offered by the Senator from Louisiana [Mr. LONG] are as follows:

On page 2, line 6, to strike out "troop housing."

On page 2, line 8, to strike out "$1,579,000" and insert "$1,087,000."

On page 3, to strike out lines 3 and 4.

On page 3, to strike out lines 5 and 6.

On page 3, to strike out lines 16 and 17.

On page 3, to strike out line 18.

On page 3, to strike out lines 19 and 20.

On page 3, line 24, to strike out "$2,290,000" and insert "$800,000."

On page 4, line 6, to strike out "$2,739,000" and insert "$1,320,000."

On page 4, to strike out lines 7 and 8.

On page 4, to strike out lines 13 and 14.

On page 4, to strike out lines 19 and 20.

On page 4, to strike out line 21.

On page 5, to strike out lines 1, 2, and 3.

On page 5, to strike out lines 5 and 6.

On page 5, line 7, to strike out "troop housing."

On page 5, line 9, to strike out "$3,470,000" and insert "$681,000."

On page 5, line 10, to strike out "troop housing and."

On page 5, line 11, to strike out "$3,623,000" and insert "$181,000."

On page 5, lines 13 and 14, to strike out "$7,875,000" and insert "$2,297,000."

On page 5, line 17, to strike out "$7,063,000" and insert "$3,944,000."

On page 5, line 18, to strike out "troop housing, and."

On page 5, line 19, to strike out "$2,216,000" and insert "$902,000."

On page 5, line 22, to strike out "$3,582,000" and insert "$164,000."

On page 5, to strike out lines 23 and 24.

On page 6, line 2, to strike out "troop housing and."

On page 6, line 3, to strike out "$6,268,000" and insert "$793,000."

On page 6, to strike out lines 4 and 5.

On page 6, line 6, to strike out "troop housing and."

On page 6, line 7, to strike out "$774,000" and insert "$444,000."

On page 2, line 24, to strike out "troop housing and."

On page 2, line 25, to strike out "$580,000" and insert "$88,000."

Mr. CASE. Mr. President, I think the Members of the Senate would like to have an explanation of the amendments. The amendments were prepared in consultation with the clerk of the committee, and include merely the changing of items at several points in the bill to eliminate the enlisted men's barracks. Is that correct?

Mr. LONG. That is correct, and to eliminate the so-called replacement program. I have no objection to having the amendments read, but while there are several Senators on the floor I should like to ask that the yeas and nays be ordered at this time.

The PRESIDING OFFICER. There is a sufficient second. The yeas and nays are ordered.

Mr. LONG. Mr. President, the amendments I am offering seek to strike out the so-called replacement program. They do not seek to strike out all the barrack buildings in the bill. They do not touch the so-called hard-core program, which is a program to construct barracks where they are needed for additional housing on bases. The figures I am seeking to strike relate to barracks which I believe to be unnecessary, because they are merely replacing existing barracks.

When the Army was 20 percent larger than it is today this program was considered by the Senate Committee on Armed Services. At that time the committee made a study of the subject. We examined into it carefully. We obtained the best advice we could get from competent civilian engineers, all of whom had been loaned to the committee by the Army itself, from the Corps of Engineers. After a thorough study had been made of the entire program, the committee rejected the program, and eliminated the project, which at that time involved $100 million. This is the language in the committee report at the time:

ARMY BARRACKS

The committee heard testimony from the Army in some detail with respect to the rather large number of barrack spaces which it requested. At many installations substantial numbers of barrack spaces were requested, although existing facilities were more than enough to house the present strength and any foreseeable increase. As a general rule the barracks facilities available are of a permanent or semipermanent type.

The justification of the Army for this request is that it has calculated its construction capabilities in the event of full scale mobilization and finds that the demands upon its capabilities in the early stages of such mobilization will be in excess of its capabilities. It, therefore, proposes to take up this slack at the present time by the construction of barracks of a permanent type. Had the Army suggested that the slack be taken up in the heavy construction fields, such as ordnance production and other industrial facilities, it would have appeared more logical to the committee. The fact is that temporary housing represents the most simple type of construction and could be constructed promptly when required.

In the opinion of the committee, living quarters for our military men can be provided very quickly when the need arises and should not be constructed perhaps years in advance of their requirement. At bases where there is not sufficient troop housing space sufficient barracks have been allowed to make up the deficiency.

I say again today that the Armed Services should be provided with all the barracks which they need for their requirements, but we should not undertake a program costing $100 million for the first year, which is being asked for at this time. I am glad to note that the committee has wisely seen fit to reduce the amount by 50 percent, but it would have been much wiser to have reduced it by 100 percent. My proposal is that Congress make a further economy and save an additional $45 million.

There is less need for this project today, with the Army being 20 percent smaller, than there was 2 years ago, when the Army was 20 percent larger. Anyone can figure that out. As a matter of fact, the amount of barracks which the Army believes it could build with the money would not be sufficient to house more than 41,000 men. Yet the Army has closed bases throughout the United States large enough to handle that number of men. The Army has closed one large barracks in Louisiana. I am certain they have closed others throughout the Nation adequate to house the number of men for whom the Army proposes to build barracks at a cost of $100 million.

The committee included this amount in one item, but it is still being proposed to take men out of permanent or semipermanent type barracks, built at the time when materials were immediately available, built when the unit costs were higher, to provide facilities which are better than the present specifications. The Defense Department proposes to take troops out of those barracks and to put them into newly constructed barracks, to cost $45 million.

Mr. President, soldiers will not be better because they are housed in new barracks buildings.

This is $45 million of unnecessary spending. The item has been rejected twice previously by the Committee on Armed Services. On a previous occasion, just after the outbreak of the Korean war, a bill was introduced providing for the same item. The committee turned it down.

Subsequently a bill came before the Congress providing for $3 billion, and again it was turned down. Now the Department of Defense comes before the Congress again, when the Army is 20 percent smaller, and when bases are being closed throughout the entire United States, and again proposes this barracks-building program. It does not make sense. Sometimes we make ourselves appear to be foolish, when we spend money in this fashion.

Let me illustrate what the Government has been doing. This is an article in the Washington Post and Times Herald, which is absolutely amazing to me. It is dated Monday, June 21, 1954. The

headline is: "Army Gets $2 Billion Extra To Allay Fears."

I read from the article, as follows:

Defense Department official has told Senators that $2 billion in "fat" was left in the Army budget to allay public fears that America's ground forces were being cut too hard.

Lyle S. Garlock, of the Defense Comptroller's Office, made the statement to members of the Senate Appropriations Committee recently in secret hearings on the administration's $29 billion defense budget. The bill was approved by the Senate Thursday.

Garlock said $2 billion was appropriated in past years for Army procurement and production. It will not be used by the Army in fiscal 1955, but was left in the budget for public "psychology," he said.

Senators have passed a bill in which there was $2 billion of waste. What did the Army say? They asked for $2 billion more than they had any need for at all.

The same Department of the Army has come before Congress again with the same type of bill as has been rejected time and again, containing the same item. It should never be granted. It seems to me that this is a type of waste and extravagance which should be stopped. Ways should be found to make certain that the armed services do not ask for these enormous, unnecessary appropriations.

I realize that a great burden is placed upon Senators because usually contracts for such construction bring commerce, prosperity, and payrolls to the towns which will benefit by the unnecessary construction of military bases. I realize what the pressures are.

I know that some time ago a contractor from Louisiana, together with a number of members of his local chamber of commerce, came in his private airplane to Washington and gave a dinner for the Louisiana delegation. He urged that all measures should be taken to insure that a certain base in his State should never be closed. On that occasion the problems were discussed, and it was suggested that the officials connected with the base thought it would be well to have more expensive barracks and barracks facilities built in that area. Then it would be made more certain and more likely that the base would not be closed, in the event that the particular service concerned was required to take a cut in its budget.

Mr. President, I know what the pressures are on Senators in connection with these matters. I am frank to say that the bill has great appeal from a political point of view, because it provides for $1,100,000,000 in expenditures. There is something for almost everyone in the bill. In order to be fair, I wish to advise Senators that the following States would receive the benefit of some of the unnecessary expense on barracks, if the bill is passed without amendment:

Maryland, Alabama, Virginia, Pennsylvania, Kentucky, New Jersey, California, Texas, Massachusetts, Georgia, Oklahoma, Colorado, Kansas, and Washington.

It may be that Senators wish to have the bases improved, want more construction, would like to have more new barracks to replace the older barracks, which are in all respects completely adequate for the Army's needs.

Recently, when Camp Polk was closed in Louisiana, and the troops were shifted to other bases throughout the Nation, we were assured that there was plenty of barrack space at the other bases, and that there would be no need to build new barracks when the troops were shifted to other areas.

I have previously worked on items of this kind. At one time I had the honor of serving on the Committee on Armed Services. When I learned that this bill was to be introduecd, I recognized the same old, time-honored, wasteful item. I went to the distinguished chairman of the subcommittee and explained the situation to him. I advised him where the item was in the bill, and suggested that it might be well to look into it.

I am very much pleased and appreciative that the chairman of the subcommittee recommended to the subcommittee that half of the item be eliminated. But I believe, Mr. President, that it would be a mistake to allow the Department of Defense to begin this program at all. This is just a beginning. It is the plan of the armed services to come back year after year with a replacement program of this kind.

This is something which can be postponed. This expenditure of $45 million does not need to be made this year. It could be postponed for 10 years, without any harm to the armed services. This item is being sought at a time when the Congress is being asked to raise the national-debt limit by another $15 billion, to take the public further into debt.

It comes at a time when Congress said that it cannot afford to grant a tax reduction to the little man. We have said that the average man cannot even have a $20 reduction in his tax bill. Yet we have before us a bill for $1,100,000,000, which again includes an item for $45 million to construct barracks which are not needed.

Mr. President, I ask unanimous consent that the article in the Washington Post and Times Herald of June 21, 1954, to which I have previously referred, be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARMY GETS $2 BILLION EXTRA TO ALLAY FEARS

(By John W. Finney)

A Defense Department official has told Senators that $2 billion in "fat" was left in the Army budget to allay public fears that America's ground forces were being cut too hard.

Lyle S. Garlock, of the Defense Comptroller's Office, made the statement to members of the Senate Appropriations Committee recently in secret hearings on the administration's $29 billion defense budget. The bill was approved by the Senate Thursday.

Garlock said the $2 billion was appropriated in past years for Army procurement and production. It will not be used by the Army in fiscal 1955, but was left in the budget for public "phychology," he said.

The administration's defense budget for the 12 months beginning July 1 is about $5.5 billion below the funds provided by Congress for the current fiscal year. The Army would absorb about $5.3 billion of the cut.

THE ARMY TO BE CUT

The administration's "new look" military strategy calls for more reliance on air and new weapons retaliatory power and less on ground forces. Defense officials plan to cut Army strength from 20 to 17 divisions between now and June 30, 1955.

Testimony released by the Appropriations Committee shows that Senator LEVERETT SALTONSTALL, Republican, of Massachusetts, chairman of the Armed Services Committee, first hit on the Army surplus as an easy target for a quick savings.

SALTONSTALL noted that the Army presently has about $5 billion in past appropriations for procurement and production, and that by June 1955 some $2 billion of this still will remain unobligated or unused.

He asked why it would not be a good idea to transfer this to some other fund, such as maintenance and operation and thus save it in new appropriations for the Army in the coming fiscal year.

IDEA HELD FEASIBLE

Garlock admitted that SALTONSTALL's idea technically was feasible since the Army has no plans to spend or obligate this $2 billion in fiscal 1955.

But Garlock said strictly a policy decision had been made in the executive branch that it would be advisable to leave the money in the Army's pockets.

Garlock agreed with SALTONSTALL that the policy decision was based on psychology.

"In view of the present conditions in Indochina and all over the world," SALTONSTALL observed, "it might be better to leave it there with the idea you are not cutting the Army's expenditures down to too low a limit."

Garlock said that if the surplus were cut everyone in this room and everyone in the Congress would thoroughly translate it, but when it traveled over the news wires, they would see $2 billion reduction in the Army.

Senator RICHARD B. RUSSELL, Democrat, of Georgia, objected that we are basing everything on psychology now, Supreme Court decisions and everything else.

RUSSELL suggested the $2 billion was a kind of nest egg for procurement in event of an emergency. Garlock said that was correct and said the Army did not plan to use the money unless some unusual emergency arises.

Mr. LONG. Mr. President, I should perhaps state that, so far as I can determine, there is one difference between the proposal being made today and the one which was made 2 years ago. The one made 2 years ago was advanced on the theory that the Army ought to have a headstart in constructing barracks in the event war broke out, and for that reason it was contended it would be a good idea to have a surplus of empty barracks across this Nation.

Now representatives of the Army are back with the same request for the same program, but this time they attempt to justify the proposal by using the logic that it would be better to have better barracks than those which exist today and to replace the existing old barracks, because if that were done there would be a higher rate of reenlistments.

Let us face the facts. The Army is going to have to obtain its manpower by drafting our sons, just as it has been doing for many years now. Men will not be made better soldiers by furnishing them with better barracks.

Mr. DOUGLAS. Mr. President, will the Senator yield for a question?

Mr. LONG. I yield to the Senator from Illinois.

Mr. DOUGLAS. I should like to ask the Senator from Louisiana about the quality of the barracks proposed to be

replaced. Are they in a bad state of repair, are they extremely obsolete, or are they simply the kind of barracks which have not been constructed in the past few years?

Mr. LONG. I know many of the barracks are in good shape and condition. The testimony of the representatives of the Army with regard to the barracks was that they were adequate. Many are so-called permanent type barracks, and will last for a long time. Some of the barracks are what are called semipermanent barracks, which I regard as being of reasonably good construction.

Mr. DOUGLAS. Is it not true that if we were to get into a war, or have large-scale mobilization, we would undoubtedly have temporary housing for military personnel of the quonset hut type, and that undoubtedly there are in Government storage warehouses large numbers of quonset huts which have been disassembled, but which could be reassembled rather quickly?

Mr. LONG. That is entirely true. Furthermore, today there are good bases all over the United States which have been closed as a part of the so-called economy cutback program. There are a large number of bases which have been closed. As a matter of fact, the Army has closed almost all except their so-called permanent bases, which they usually describe as forts, such as Fort Benning.

Mr. DOUGLAS. So, while the Army is reducing its force by 20 percent, the Department of Defense wants to have $100 million more for permanent barracks; does it not?

Mr. LONG. That is correct. That is my understanding.

Mr. CASE. Mr. President, will the Senator yield?

Mr. LONG. I yield to the Senator from South Dakota.

Mr. CASE. I was wondering whether the Senator from Louisiana or the Senator from Illinois had seen pictures of some of the barracks it is proposed to replace and some of the bachelor officers' quarters. I have pictures of the exteriors and interiors of some of the barracks proposed to be replaced. I doubt very much that the Senator from Louisiana would have made the assurance in his response to the Senator from Illinois had he seen the pictures. Those are not good, standard barracks; they are substandard barracks. The bachelor officers' quarters involved are a disgrace. We cannot expect Wacs or other personnel who will occupy some of these bachelor officers' quarters and barracks to live in such disgraceful, insanitary facilities in which they are now requested to live.

In some cases there do not exist in the bachelor officers' quarters separate compartments in which to hang clothes. Self-respecting girls cannot be expected to live in such quarters longer than they have to. I do not think the Senator from Louisiana would give the assurance he has given if he knew the condition of the barracks and the bachelor officers' quarters which are proposed to be replaced.

All the committee has sought to do is start a program so that there will be a little more to offer to those who desire to remain in the service in the way of decent quarters.

Mr. LONG. Can the Senator from South Dakota inform me whether the barracks for 41,000 personnel are primarily for Wacs?

Mr. CASE. Some of them are. They include both enlisted personnel barracks and bachelor officers' quarters. Of course, it would not be for 41,000 because the committee has cut the program in two. They are not permanent barracks; they are substandard, mobilization-type barracks.

Mr. LONG. Will the Senator inform me how many of those barracks are for Wacs?

Mr. CASE. I would have to go through the individual projects. I cannot give that information to the Senator from Louisiana offhand, but whether they are for Wacs or men, it is a disgrace to ask persons to live under such conditions.

Mr. LONG. I have had occasion to see some of the barracks which are being closed today. I inform the Senator from South Dakota that there are many good barracks all over the Nation in bases which have been totally closed, and there are good barracks in bases which are open today. Perhaps one could find a building here and there which he might think should be eliminated; but the point is that there are adequate barracks to house the men and women who are already in the Army today.

When certain bases were closed, civic groups from the communities involved did not want the bases closed. They called upon their Representatives and Senators and made their sentiments known. The representatives of the Department of the Army gave every assurance that in transferring the additional troops to more permanent bases, they had all the barracks and other facilities they were going to need, and that they were not going to have to replace any of those facilities.

I am not complaining so far as the hard-core program is concerned, or about the barracks which the Army needs and has to have.

Mr. THYE. Mr. President, will the Senator yield?

Mr. LONG. I yield to the Senator from Minnesota?

Mr. THYE. First, I should like to announce that, unfortunately, I must leave on a 6 o'clock plane, if I am going to be present at a hearing scheduled for tomorrow in Minneapolis. Therefore, I shall have to be absent when a yea-and-nay vote is taken.

Mr. President, I ask unanimous consent to be excused for the remainder of this evening and for tomorrow's legislative session.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. THYE. I should like to speak to the amendment which the Senator from Louisiana has offered to the bill before the Senate. I believe the chairman of the subcommittee, the Senator from South Dakota [Mr. CASE], is entirely justified when he states that if ever there was a time to build and improve living quarters for the troops, this is the time to do it. I fully agree, because it is more desirable to keep a soldier in the service than it is to have a constant turnover. There is a tremendous expense involved in turnover in personnel in the military forces. I believe that ultimately there might be effected a greater saving if there were some inducement to keep the young men in the service, rather than have the service compelled to sustain a heavy turnover in personnel.

Therefore, were I present, I would vote against the amendment offered by the Senator from Lousiana, and I would support the position of the subcommittee chairman. I regret that I shall have to leave, and that I shall not be here when a yea-and-nay vote is taken on the amendment.

I thank the Senator for yielding to me.

Mr. MORSE. Mr. President, I wish to make a few brief remarks on the amendment of the Senator from Louisiana.

I observe that the Senator from Mississippi [Mr. STENNIS] has temporarily stepped out of the Chamber. Let me say that the Senator from Mississippi, the Senator from Louisiana, and I, served on the Armed Services Subcommittee on military installations, as the predecessor of the subcommittee now headed by the Senator from South Dakota [Mr. CASE]. I wish to say that I think the present subcommittee has done a very conscientious and splendid job on the bill as a whole.

However, I find myself very much in sympathy with the objectives of the amendments of the Senator from Louisiana, because when we served on the subcommittee and when we inspected a number of these facilities, we became convinced that the Army had overbuilt. We also became convinced that, rather than authorize appropriations for the building of additional facilities, we should make better use of abandoned facilities and better use of facilities needing repair. In other words, we felt we should proceed to make appropriations for the doing of some repair work.

Mr. President, I do not wish to be misunderstood, for I realize that too broad a conclusion can be drawn from a generality such as the one I am about to state. However, in my judgment the Military Establishment for too long a time has been too new-construction minded, and has had a lack of appreciation of the economy of efficient repair work. I do not know about the particular facilities to which the Senator from South Dakota has referred by way of reference to pictures. I have not seen the pictures, but I can well imagine what they will show, because when we served on the subcommittee we were deluged with pictures by the Military Establishment. The gentlemen at the Pentagon are very prone to use photographs; they seem to think that all they have to do is bring before congressional committees a few photographs of very bad apples, so to speak, and, as a result, the committees will reach the conclusion that all the apples in the barrel are rotten, whereas actually all that is needed is to remove the few bad apples and wash the film of contamination from the remaining large number of good ones.

Mr. DOUGLAS. Mr. President, will the Senator from Oregon yield to me?

Mr. MORSE. I yield.

Mr. DOUGLAS. Has the Senator from Oregon examined the pictures?

Mr. MORSE. No.

Mr. DOUGLAS. I have looked at them; and, in the words of Queen Victoria, "I am not impressed."

Mr. MORSE. Mr. President, I only wish to say this about the argument that has been made by way of the introduction of the photographs: I am not interested in photographs by sampling. If I could see photographs of all the available facilities, particularly the ones which have been abandoned, even though they never should have been abandoned in the first place, I believe I would be in a better position to pass judgment on whether a fair sampling of the available structures has been made.

But, on the basis of my years of experience on the Armed Services Committee, and after having spent a great many hours in hearings on military installations, I am willing to take notice now that a great many facilities can be repaired and brought into very fine condition by means of the expenditure of sums of money amounting to far less than the cost of new construction.

Furthermore, Mr. President, I am satisfied that in the entire matter of troop facilities the Military Establishment has overbuilt.

I wish to be entirely fair about the matter, and so I state frankly that I do not know whether the entire $45 million should be deleted. I do not know whether this item should be amended by way of providing some funds for reconditioning and repair work or whether we should reduce further the $45 million. But I am very doubtful that we can justify the $45-million item in this budget. One of the reasons why I am very doubtful is the handling of a specific problem involving my own State. Of course, Mr. President, as I make these remarks, I speak from an interest in my own State, for one of my responsibilities in serving in the Senate is to protect the legitimate interests of my State in regard to Federal legislation. At the same time, I make no derogatory comment regarding any of the projects listed in the bill under the so-called Ordnance Corps request, beginning on page 2; but I wish to direct the attention of the Senator from South Dakota [Mr. CASE] and the other members of the committee to the items on page 2. I am willing to take it for granted that the items listed in the several States, under the Ordnance Corps requests, are justified. I say that because I do not want anyone to charge that I am trying to cut off an appropriation for some other State. However, I desire to refer to the great ordnance depot at Hermiston, Oreg., covering 40 square miles, with a tremendous investment on the part of the Federal Government.

It so happened that a few days ago—on Armed Services Day—I was invited to make the speech at an armed services program at the ordnance depot at Hermiston, Oreg. While there, I inspected the depot. I wish to call this matter to the attention of my friend, the Senator from Louisiana [Mr. LONG], because he and I have inspected many, many military installations. We have inspected and we have inspected and we have inspected until I found myself inspecting them in my sleep. The Senator from Louisiana and I have gone up and down the stairs of one military installation after another, all over Europe and across North Africa, as well as in many places in the United States. I say to him and to other Senators—and I said this on Armed Services Day after I completed my tour at the great ordnance depot at Hermiston, Oreg.—that I have never seen a military installation under the American flag where a better housekeeping job was being done. I wish to take advantage of this opportunity officially to compliment the military staff in charge of that great depot for the wonderfully efficient and economical job they are doing there.

I only wonder whether that kind of efficiency and that kind of economy pay off, from the standpoint of obtaining appropriations from the Federal Government for further development of the depot, because now we are faced with a whole series of appropriation authorizations for other ordnance depots, but without a dollar of authorization being proposed for what I consider the depot that evidences the best housekeeping and the most efficient and most economical operation shown among all the military installations it has been my privilege to inspect.

Not only that, Mr. President, but to supplement and support what the Senator from Louisiana has stated, let me say that, although this depot has not been shut down, yet its program has been so decreased that now there are vacant housing facilities adjacent to the depot at Hermiston which would make the mouths of military personnel in many places in the United States water. They would be simply delighted if they could move into housing facilities such as the ones that today are standing vacant at Hermiston, adjacent to the Umatilla ordnance depot. Of course, when a facility is left vacant, we know what happens to it; it begins to deteriorate, and before long it is practically worthless. When I was there I was asked the question, "Senator, is there anything you can do to convince the Pentagon that it ought to make greater use of these facilities which are not being fully used today?" My constituents said, "We think the military should enlarge rather than reduce the mission of this depot instead of building new facilities elsewhere."

I said, "I do not know what I can do. All I can do is to point out to the military that an opportunity exists here, in my judgment, to save some money. Here is an opportunity to put into use some facilities which are not being used to full capacity."

When I returned to Washington I did just that. Nothing has been done about it by the military. The only thing that has been done in recent weeks is that, through the cooperation of the very efficient staff of the Armed Services Committee, we have had a conference with the Ordnance officials as to whether or not an administrative order which they issued effective on July 1, transferring the command control of the Umatilla Ordnance Depot to the Mount Rainier Station and eliminating direct control from Washington, D. C., would effect detrimentally the program at Umatilla. Some of us feared it would eventually mean further restrictions of the programs at the Umatilla Ordnance Depot. As a result of those hearings we were assured by General Hinrichs that such is not the plan or intention of the Ordnance Department.

Without casting any reflection on the appropriations for other ordnance depots, beginning on page 2 of the bill, let me say that I could take a group of Senators to Hermiston, Oreg., tomorrow, and show them a facility which the Army is not beginning to use to its maximum capacity. The full use of that facility would result in a great saving to the Government.

Therefore, I am very much impressed by the argument made by the Senator from Louisiana when he points out that there are a great many abandoned facilities or facilities now being only partially used, facilities which have housing upon them or available to them, which could be put to good use.

In conclusion, let me say that if the only alternative I have is to vote for or against the Long amendment, I shall vote for it. However, I should like to make a suggestion for the consideration of the chairman of the subcommittee, namely, that half the money, $22,500,000, be provided for new facilities, and that $10 million be provided to be used for repair and reconditioning of existing facilities, making a total of $32,500,000. I should like to ask the chairman of the subcommittee if in his opinion it would do me any good to reduce that proposal to writing, by way of an amendment, with the suggestion that he accept it.

Mr. CASE. Mr. President, responding to the statement of the Senator from Oregon, the suggestion he makes really should be referred to the full committee. I would not feel authorized to accept it.

Let me make one observation. It is difficult to say, without minute inspection of every particular project, whether in each instance in which a proposal is made for housing, conditions are as entirely substandard as they are in some cases about which we know. The best the committee could do was to say, "We will establish a ground rule. We will assume, on the basis of the testimony presented to us, that this entire request is only a fraction of what the military would like to have." We were impressed by the fact that the President, both in his budget message and in his message on the state of the Union, called attention to the necessity of doing something more to improve the service morale and accelerate the reenlistment rate.

Yesterday the Senator from Louisiana asked about the reenlistment rate. The reenlistment rate from July to December 1953 for the Army was 9.9 percent of the eligibles. The Army feels that that is entirely too low, and that we are not making a very good record in obtaining reenlistments.

I know that both the Senator from Oregon and the Senator from Louisiana are appreciative of the fact that when a man is trained and accustomed to using the equipment he has, at the end of his 2-year period the Government will save considerable money if he reenlists, as compared with the training of an entirely new man. It is hoped to accomplish something in that field.

It is true that these barracks and bachelor officers' quarters are something most of us would get along with during an emergency or in time of war. When I was in the service in World War I, we used community latrines, and things of that sort, and thought nothing of it. We lived in tents. But when we are trying to obtain reenlistments we must recognize the competition which must be met. Once a man receives his GI benefits he is actually paid to leave the service, because he can go to college, or obtain a loan to start a business. If we ask him to reenlist we must provide decent living quarters for him.

The first project which happens to come to my attention is at Fort Eustis, Va. We are proposing to cut in half the request with respect to this station, as we did in the case of others. I read from the justification sheet:

> This project will provide an increment of the total requirement of permanent BOQ's for officers assigned to Fort Eustis (including 60 nurses and Wacs) and those attending the transportation school. The one existing permanent 50-man BOQ was only recently completed. Of the 528 spaces provided in converted old modified emergency barracks, 492 spaces have been declared substandard. These converted barracks have community-type latrine facilities, temporary partitions, and no clothing storage space.

We cannot expect Wacs to reenlist and live in barracks where several live in a room, where there is no closet to hang their clothes, and where they must use the community type of latrine. I do not blame them. I do not blame the men, either, for not wanting to reenlist in peacetime when they can get something else. When they receive their GI benefits they can go to college and live in modern dormitories, or obtain a loan and start a business.

The Army is not getting the percentage of reenlistments it ought to get. This program is conceived as a start. We did not go as far as we were requested to go. We cut the program squarely in half. However, we thought that if we could construct a few modern barracks in places where there would be not more than two girls to a room, or where there would perhaps be a squad room for the men, and where there would be modern toilet facilities, the reenlistment rate might go up.

Lacking the time and ability, when Congress is in session, to make a visit and personal inspection at each place, we adopted the ground rule of cutting the program squarely in half.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. CASE. In a moment.

In cases in which 4 BOQ's were requested, we have cut the number to 2.

Where 2 barracks have been requested, we have cut the number to 1.

Commanding officers could use such facilities as a sort of reward for reenlistment, or for companies or groups with some outstanding record. I believe that would improve the reenlistment rate.

That is the story. It is not a question of favoritism, or of saying that one particular place has a greater need for such facilities than some other place. It is true that there are some places where the Army has shut down its operations, and there are other places where the activities have been concentrated. But, of course, closing down in one place and concentrating in another does not automatically provide the proper type of facility at the place where the concentration is made.

Mr. MORSE. Did the committee go into the question with the Army in any great detail as to the extent to which some of these facilities could be reconditioned and repaired, rather than rebuilt?

Mr. CASE. There was some discussion of that subject. I think some of them could be repaired. It seems to me that perhaps a coat of paint would doll up some of the installations. But when we contrast some of the installations shown in these pictures with the prospect of living in a modern men's dormitory, and compare the facilities for taking a bath in such a modern dormitory with those depicted in these pictures, and then ask girls to reenlist in the WAC and offer them such facilities, the condition of which cannot be remedied with a mere coat of paint, it is not surprising that the reenlistment rate is low.

Mr. MORSE. Mr. President, I have inspected a great many military installations where residential quarters could be repaired by some rebuilding and reconditioning. Bath facilities could be provided either on a room basis or on an adjoining-room basis. Of course, it would not be possible to house as many persons, but, nevertheless, much of the cost of new construction could be saved. A great deal of money on a per person basis could be saved over and above the cost of building an entirely new structure. I merely wanted to know to what extent the committee received any report from the military authorities as to the savings which might be brought about by a reconditioning and repair program in some instances. Of course, the entire amount could not be saved, but the cost could be reduced somewhat by reconditioning and repair jobs.

Mr. CASE. The difficulty of applying the formula which the Senator has suggested—and I believe it is a constructive and sincere suggestion—is that in most places we had a request for 3 BOQ's, and in those instances we recommended the minimum number, 1. Of course, it is not possible to split 1 unit.

The same situation applies with respect to barracks. The difficulty in applying the Senator's formula is that if we were to cut out 2 BOQ's, it would mean the elimination of all BOQ's on several stations. It would create the same problem with respect to barracks. If we have 3, we can cut out 1, but if we cut out 2, we get into an arithmetical difficulty.

Mr. MORSE. Does the Senator wish to make any comment on what the investigating committee found with respect to the maximum efficient use of existing Ordnance Corps facilities in respect to whether or not all the money proposed to be appropriated under the requests of the Ordnance Corps, beginning on page 2, is necessary?

Mr. CASE. I will say that several items requested with respect to Ordnance Corps facilities were changed in the House. In most cases, the changes applied to utilities or to sewerage or to sanitary facilities. The one item which is in my State was the result of a personal inspection which I made. It was given top priority, and the suggested amount, I believe, is $811,000. That base has one of the finest records with respect to keeping ammunition, because of the relatively arid climate in that particular corner of the State. A shop was needed there in which to carry on renovation during winter. In the summertime it can be done in the open. That item received the highest priority.

Mr. POTTER. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Michigan so that he may ask questions of the Senator from South Dakota, provided I do not lose the floor.

Mr. POTTER. Mr. President, I should like to ask the Senator from South Dakota whether this construction will be on a permanent basis at permanent posts?

Mr. CASE. Is the Senator referring to the housing items?

Mr. POTTER. Yes.

Mr. CASE. That is correct.

Mr. POTTER. At permanent posts?

Mr. CASE. That is correct.

Mr. POTTER. What disturbs me is the fact that on various military posts throughout the country there is to be found adequate housing that stands vacant. On bases throughout the country there is comparatively new troop housing; but when a base is closed the housing is left vacant. I do not know whether this problem should be discussed in connection with this bill, but I believe that we could better utilize various housing facilities we already have, if we put our minds to doing it.

Mr. CASE. Does the Senator from Michigan mean that on occupied stations there is idle good housing?

Mr. POTTER. Many times it is true on occupied stations, and more often on a station after it has been closed down. I will grant that many of those camps are not permanent camps.

Mr. CASE. Of course, it is impossible to transfer housing from one station to another. There may be some vacant housing on closed stations, but, according to the testimony which we heard and from the information we could get, there was not any good idle housing at any place where there was a request for improvement of housing facilities.

I regret that the committee did not have time to visit every one of these military installations. However, I may say modestly for the committee that I doubt that there is any subcommittee of the Senate, unless it is one that had

a public audience—and this subcommittee has not had any public audience—that has put in as much time in performing the task assigned to it as has this subcommittee. I mean by that not merely the work on this bill, but the work that is involved in the clearance of projects which are referred to the subcommittee.

The subcommittee has met regularly every Tuesday morning, generally beginning its meeting at 9:30 or 10 o'clock in the morning. During the hearings on this bill we met during the morning and afternoon. During many weeks we had two other sessions of the committee. The subcommittee during the session up to now, averaged at least 4½ days a week in its work. However, we had to do it here. As the Senator knows, the Senate has been busy, and votes have always been coming up, and we could not get away from Washington to inspect all these installations, as we should like to have had the opportunity to do, despite the fact that as soon as Senators go on trips through the country or overseas it is immediately suggested that they are on a junket.

The subcommittee has had the responsibility of passing on these projects, and we have tried to do the job diligently and conscientiously, and at the same time carry on with our regular work as individual Senators.

Mr. POTTER. Mr. President, will the Senator yield further?

Mr. MORSE. I yield, with the same understanding, that I do not lose the floor.

Mr. POTTER. I appreciate the fact that it is an arduous job, and that the committee has performed noble service. I also appreciate the fact that, as compared with the other branches of the service the standards of the Army have been lower than those of the other services with respect to housing.

Mr. CASE. The reenlistment rate alone shows that.

Mr. POTTER. When we visit naval bases we find beautiful housing.

Mr. CASE. All the money involved here is for the Army. It is not for the Navy or the Air Force. We are talking about the Army; the forgotten service.

Mr. POTTER. I have heard arguments made that we should spend the money for golf courses and swimming pools, as further incentives and as morale builders. Perhaps to a certain degree that is necessary, but I believe housing is probably the greatest factor with respect to the morale of the troops, and far more important than are golf courses or swimming pools.

Mr. CASE. The distinguished Senator from Michigan probably knows more about morale and the spirit of troops than any other Member of the Senate. He knows the problem of the military when there is no drive or emergency or no combat conditions, and the problem of inducing reenlistments. We feel that the men themselves should be given a little encouragement.

Of course, the Senate can cut this program if it wants to do so, but in that case we will be simply shoving the Army further into the background. It is to the Army that most of the drafted men are sent, and I believe they deserve a break.

Mr. DOUGLAS. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I shall be glad to yield to the Senator from Illinois so that he may ask questions of the Senator from South Dakota, with the understanding that I do not lose the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. DOUGLAS. I have two questions to ask the Senator from South Dakota. Is the Senator from South Dakota aware of the fact that in the current housing bill, section 222, pages 162 and 163, which passed the Senate, there is a provision for housing under FHA for men of the services, which will give to them approximately the same advantages as are given to veterans? I am informed, furthermore, that this provision is in all probability being retained by the conference committee, which is now meeting. I may say that when the Committee on Banking and Currency held its hearings on the housing bill a representative of the armed services appeared and argued for this provision, which we granted. His argument was the same as that the Senator from South Dakota is now making, namely, to stimulate reenlistments. I wondered if the Senator from South Dakota was aware of this provision.

Mr. CASE. It is my understanding that the provision in the general housing bill relates to family housing for soldiers who have dependents—wives, and children. What we are talking about is barracks for single men, or bachelor officers' quarters.

Mr. DOUGLAS. The general provision was to make it possible for men in the service to have their families with them without making a strain on the barracks.

Mr. CASE. I hope they will do so.

Mr. DOUGLAS. May I ask the Senator from South Dakota if he considers important the fact that certain barracks do not have built-in closets in which clothing can be hung? I wondered if the Senator from South Dakota had considered that there could be used portable steel lockers in which clothing and uniforms could be hung, and thus obviate the necessity of building barracks around cabinets designed for such use, at a cost of from $2,000 to $3,000 per person.

Mr. CASE. I have here a picture showing a barracks room containing a steel locker, but it is against a frame wall, where water beats in and stains the wall. The picture shows a rather bleak appearance of the room as contrasted with a good dormitory room with closets.

Mr. MORSE. Mr. President, I wish to cover two points by way of summary.

I am fully appreciative of the difficulties with which the subcommittee has been confronted. The Senator from South Dakota has spoken of the long hours the subcommittee has spent on its job. The Senator from Louisiana [Mr. LONG], the Senator from Mississippi [Mr. STENNIS], and I, in a similar capacity, sat in this building or in the Senate Office Building over a long period of time, until 12, 1, or 2 o'clock in the morning, holding hearings on exactly the same problem, although at that time we were considering a report which covered all three services, the Air Force, the Navy, and the Army. With reference to the Army, as I recall, the requests at that time were in the neighborhood of $2,300,000,000. We reduced that amount approximately 25 percent, because we found at least a 25-percent overdemand and exaggeration on the part of the Army.

As to our inspections in continental United States, there are some places which will support the pictures which the Senator from South Dakota has shown us.

Mr. LONG. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. LONG. I am sure the Senator from Oregon is familiar with the fact that when the committee meets we always have a liaison officer who reports back to the Pentagon. I can assure the Senator that if he will look at the pictures he will find the worst specimens the Army could locate in the United States.

Mr. MORSE. There is no doubt that deplorable conditions are shown by the pictures. The structures should be torn down, or they should be very thoroughly reconditioned.

But what I was about to say was that, as a result of my service on the committee, I did find that, taking the Army living facilities as a whole, they are not in such a deplorable condition as the Senator from South Dakota portrays. There is need for improvement, and I am willing to vote money for improvement and for reconditioning some of these structures.

I wish to point out two things. First, in my opinion, many very good facilities are not now being used which could very well be used. I think the reason for that is that apparently a spirit of nomadism prevails in the Pentagon Building. The gentlemen at the Pentagon Building simply have to be on the move. They do not seem to be able to stay put very long in permanent quarters. We appropriate money for them so that they may have very fine bases, but in a few years we find we are voting on how to dispose of them as surplus property, when they are still very fine bases and entirely usable. So we always have to exercise an eagle eye to see whether there is an attempt on the part of the Pentagon to build rather than to repair and to recondition. I do not think the Pentagon is willing to repair and recondition to the extent that it should be. I believe great economies could be effected if the Pentagon would recondition and modernize some of these facilities.

In the second place let me say I do not want Wacs or boys living in the type of facilities which have been pictured here this afternoon, but, on the basis of my experience, I say that they are not representative facilities. In my judgment, all the Pentagon is doing is presenting the worst cases in order to justify an expenditure which I believe to be far in excess of what we should be voting.

The next point I wish to make refers to the ordnance matter. A few minutes ago I saw General Mudge walk on to the

floor of the Senate. I do not know whether he is still here, but I want to pay my compliments to him. He does a great piece of work for the committee, as do the other professional members of the staff of the committee. I wish to commend him, because he has been of great assistance to me in gathering the information we need in our State as to the intention of the Ordnance Department concerning the great 40-square-mile ordnance depot at Hermiston, Oreg. After my conversations with him he held a conference in my behalf in the Armed Services Committee room in which the statement was made by General Hinrichs that there is no intention on the part of the Ordnance Department in any way to modify the mission of the ordnance depot, but only, insofar as the July 1 order is concerned, to change the chain of command.

In order to keep the record straight and to serve clear notice on the Ordnance Department that I intend to hold them to the statements made in the hearing, I ask unanimous consent that there be printed in the RECORD at this point, as a part of my remarks, the transcript of the record of that hearing.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

UMATILLA ORDNANCE DEPOT
UNITED STATES SENATE,
STAFF OF THE COMMITTEE
ON ARMED SERVICES,
Washington, D. C.

The staff met at 4 p. m., in room 212, Senate Office Building, Verne D. Mudge, of the committee staff, presiding.

Present: Verne D. Mudge of the committee staff.

Also present: Brig. Gen. J. H. Hinrichs, Ordnance; Col. W. J. Crow, Ordnance; and Lt. Col. L. H. Walker, General Staff.

Mr. MUDGE. This meeting will come to order.

This is an inquiry made by the staff of the Committee on Armed Services at the request of Senator WAYNE MORSE.

I have asked you gentlemen to meet with me at the request of Senator WAYNE MORSE, of Oregon, who has interested himself in the statements of two of his constituents in the State of Oregon, to the effect that certain changes are planned for the Umatilla Ordnance Depot.

(The documents referred to are as follows:)

"UNITED STATES SENATE,
"COMMITTEE ON PUBLIC WORKS,
"*July 1, 1954.*

"RECORD OF TELEPHONE CONVERSATION

"From Lee Quiring, 419 Gladys Avenue, Hermiston, Oreg.

"To Senator MORSE:

"Mr. Quiring stated that effective July 1, 1954, the assignment of Umatilla Ordnance Depot passes from the Office of Chief of Ordnance, Washington, D. C., to the Commanding Officer of Mount Rainier Ordnance Depot, Tacoma, Wash.

"He said this means that the military installation at Mount Rainier Depot has run out of missions, and this move will result in the consolidation of work in property, procurement, purchasing, and fiscal work which will all be moved from Umatilla to Mount Rainier thus causing great hardship for the area surrounding the Umatilla Ordnance Depot. Mr. Quiring feels such a move is particularly unfair since Umatilla carries on a much larger operation than the installation in Tacoma.

"Senator MORSE assured Mr. Quiring that he would check into this situation immediately with General Mudge of the Senate Armed Services Committee.

"Mr. Quiring said it was his understanding that the Commanding Officer of the Mount Rainier Ordnance Depot is a friend of a Mr. Cummings in Washington, and believes this influenced the decision."

"HERMISTON, OREG., *June 29, 1954.*

"The Honorable WAYNE MORSE,
"United States Senator, Senate Office Building, Washington, D. C.

"DEAR SENATOR: Word has come to me that soon the command of the Ordnance depot at Ordnance, Oreg., will be placed under that of the Rainier Ordnance Depot in Washington, which will mean, of course, another curtailment in the operation of the post and an increasing loss of jobs for the people in our area.

"I wish to point out that the Government owns some 40 square miles of land here and it is my understanding that Rainier is on leased property.

"I know that because of our weather conditions the open storage of vehicles, etc., is far cheaper at UOD than it would be at Rainier because of the rain. I am also satisfied that there is no ordnance depot in the United States that has any better, if as good, transportation facilities as at this post.

"Therefore I wish to urge you to look into the matter and do everything within your power to retain the independent command here, and if possible because of savings which can be made, transfer another work to this post. By the time you receive this letter you will undoubtedly have received telephone calls in connection with the problem facing us. If you can through your good offices, postpone the execution of the order, which we understand stems through the Chief of Ordnance, who was formerly commander of the Rainier Depot, until we can digest and send you the facts which would clearly point out that such a move would be wrong, it would be greatly appreciated.

"Respectfully yours,
"FRANK,
"Frank M. Swayze."

Mr. MUDGE. The Senator is very familiar with this installation, and has a high regard for the manner in which it is being operated, and is insistent that any change which is made in the present operation of the depot shall be dictated exclusively by the requirements of the national interest.

The first is an inquiry which emanated from Mr. Lee Quiring in Hermiston, Oreg.

Mr. Quiring stated that it was his understanding that the assignment of the Umatilla Ordnance Depot was to pass from the office of the Chief of Ordnance, Washington, D. C., to the commanding officer of the Mt. Rainier depot in Tacoma.

Mr. Quiring was fearful that this meant that the military installation at Mt. Rainier depot may have run out of missions, and this might be a move which would result in the consolidation of work in the Mt. Rainier depot to the detriment of the Umatilla installation.

Of course, the Senator assured Mr. Quiring that he would make immediate inquiry into the matter, and that is substantially my first question to you, gentlemen, whether you can shed any light on that problem.

General HINRICHS. I will answer it for the group. There is no change in the mission of Umatilla contemplated. The change is merely one in the chain of command.

The Umatilla depot has been a back-up storage depot for Mt. Rainier for some time in the general supply area. In addition to that, it has a separate mission as an ammunition depot, so that the only change actually is that the commanding officer at Umatilla will report to the commanding officer at Mt. Rainier. The entity of Umatilla is not to be disturbed in any way. The same organization will carry on; it will have the same mission.

Mr. MUDGE. Would it be reasonable to assume that on the basis of the situation as it now exists that this is not a move designed to shrink the operation at Umatilla and transfer it to——

General HINRICHS. That is absolutely true; yes, sir. The operation at Umatilla, as far as I can see into the future, is not to be changed.

As you know, there is a gradual diminution of the work throughout the system, but that is spread thoroughly throughout the whole depot system, and Umatilla, any change in its amount of operations, will be percentagewise the same as any other depot, whether that be up or down. In other words, there is no plan to close Umatilla at all, nothing of that nature at all.

Mr. MUDGE. And any apprehension that this was simply a device or a first step toward short circuiting or closing Umatilla, any such assumption would not be warranted?

General HINRICHS. That is absolutely correct, yes.

Mr. MUDGE. And I gather you gentlemen all concur in that?

Colonel CROW. Yes.

Mr. MUDGE. A second inquiry which prompted the Senator to direct that I consult with you gentlemen from the Ordnance Department came from Mr. F. M. Swayze, of Hermiston, Oreg., who also raised a point that there is apprehension that this will lead to a closing of Mt. Rainier. He points out that the Government owns 40 square miles of land at the Umatilla site, and that the closing of this installation would render that property surplus, whereas at least part of the Mount Rainier depot is on leased property; is that correct? My question is: Is part of the Rainier property on leased land?

General HINRICHS. I am not absolutely certain of that, but my impression is there are a few acres, very few acres, on Mt. Rainier, that is leased land.

I might point out for the record that the difference in mission between Mount Rainier and Umatilla should, in effect, guarantee the continuation of Umatilla.

Mount Rainier has no facilities for the storage of ammunition. The Umatilla depot is primarily an ammunition storage depot, and the relatively few general supplies that they have there on the account of Mount Rainier are secondary to the prime mission of ammunition storage.

Mr. MUDGE. And, in substance, the changes made are changes in the command structure and not related to the function?

General HINRICHS. That is correct. Similar changes are being made in other areas.

Colonel WALKER. I could ascertain, if you desire, specifics on leased land.

General HINRICHS. The specifics on the leased land.

Mr. MUDGE. I do not think that is particularly pertinent inasmuch as there is no plan to shift operations out of Umatilla. I think the Senator——

Colonel WALKER. That is right.

Mr. MUDGE (continuing). Was apprehensive that there might be a possibility of shifting an operation from Government-owned property to leased property, and that would not be in the public interest, in his judgment, and I believe that this information would assure him on that point.

Then, if there is nothing further to add, we will declare the meeting closed, and I will transmit this information to Senator MORSE, who can then give me any additional instructions that he may wish in case he is not satisfied that the public interest is being fully safeguarded in this particular case.

(Whereupon, at 4:15 p. m., the meeting was adjourned.)

Mr. MORSE. Mr. President, I close by saying that I think the Ordnance Department could save the taxpayers of the United States great sums of money if they would make maximum use of the ordnance facilities at Hermiston, Oreg., rather than asking for the large sum of money we find for various ordnance operations, beginning on page 2 of the report.

The Senator from South Dakota has very fairly advised me that he would not look with approval on any amendment to reduce the figure of $45 million which is contained in the bill. He leaves me, then, in such a position that, as I see it, I must wait to vote on the Long amendment. Should that amendment not be agreed to, then I shall offer an amendment providing for a reduction in this amount, and designating certain funds for reconditioning, repair, and reconstruction work, unless the Senator from Louisiana sees fit to incorporate some such amendment in his proposal.

May I ask the distinguished Senator from Louisiana if he would look with favor upon such a modification of his amendment?

Mr. LONG. Mr. President, the yeas and nays have been ordered on my amendment. Therefore, at this time I do not believe I have a right to modify it.

Mr. President, we have today a half million men in Korea. Those men are living in tents. They are living in completely inadequate facilities. I am certain all of them would be delighted to be in the very room which the Senator from South Dakota has shown us in the picture.

I have been on a majority of the Army bases and the airbases, both in the United States and overseas. I have not seen any inadequacy of barracks on the bases in the United States. In Iceland, I saw conditions that I believed were bad. I am not proposing to reduce the appropriation for Iceland housing. It is satisfactory to me to provide more housing there, although I think the number of our troops being stationed in Iceland is ridiculous. An attempt should be made to urge the Icelanders to supply their own defense, instead of having the United States supply a large number of troops to be stationed in Iceland. Nevertheless, in Iceland I saw housing which I thought was inadequate. I saw housing in England and in France which I thought was inadequate. In France there were many places where the men were living in tents, and perhaps are still living in tents.

I know that the junior Senator from Oregon will confirm my statement, since he was overseas with me, that in our travels through France and some parts of North Africa we saw men living during cold weather in tents which had only a few boards propped against their sides.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MORSE. They had been living in tents for 2 years, with no attempt having been made to supply them with temporary plywood construction, which would at least have given them a little more permanent type of housing.

Mr. LONG. That is correct. In the United States there have been tremendous cutbacks in military strength. The service is now in a position to abandon another 20 percent of the housing which it occupies.

The argument is being made that the personnel are being urged to reenlist. Senators might be interested to know that the Secretary of Defense some time ago undertook to give a rule-of-thumb estimate of how much our defense costs. He said it could be guessed that it costs $10,000 for every man in the service—about $5,000 for ammunition and equipment and another $5,000 for pay, family quarters, allowances, and items of that sort.

This Nation is taxing itself to its capacity; yet we are still finding that we are not adequately defended. Senators want better defense and are willing to fight for larger sums of money for that purpose. Senators were willing to vote more money for the Army, even though a day or two after the vote occurred a press release which I have already placed in the RECORD disclosed that the Army itself had admitted that there was $2 billion of unnecessary funds in the Army budget as it passed Congress.

Mr. President, this is one item which is not necessary. I admit, certainly, that it is always nice to have more new barracks, but this is one of the items we can do without by making the existing facilities do. The armed services have been reduced by 20 percent. Barracks and bases have been closed all over the United States, and many of them are very good barracks. I say this is one type of construction which is not needed.

Mr. SALTONSTALL. Mr. President, the yeas and nays having been ordered, I suggest the absence of a quorum.

Mr. CARLSON. Mr. President, will the Senator from Massachusetts withhold his suggestion of the absence of a quorum?

Mr. SALTONSTALL. I am glad to withhold my suggestion of the absence of a quorum. I yield to the Senator from Kansas.

Mr. CARLSON. Mr. President, I rise in support of the committee's position with regard to the pending proposal, and in opposition to the amendment offered by the Senator from Louisiana.

I have not had the privilege of visiting many military bases, forts, or posts, but I know from personal experience and personal visitations something about the maintenance, repair, and construction work at Fort Riley, Kans.

I urge that this authorization be made in its full amount. Fort Riley has been well managed and well handled. The supervision of its repair and construction of buildings under the direction of its commanding officer and staff is outstanding. I had the privilege of visiting the reconstructed and repaired barracks and would recommend that the committee visit this post. Fort Riley was formerly a cavalry post. I hope Senators on the Committee on Armed Services will have an opportunity to visit that post, to see how the old cavalry barns, good permanent stone buildings, have been rebuilt into wonderful warehouses, shops, and printing plants, at a great saving to the Federal Government. This program demonstrated that military men have imagination and ingenuity. It saved the taxpayers thousands of dollars.

When it comes to a question of barracks, I think this would be a good time to examine the old forts throughout the country. Many of the buildings are very old. It is true that they can be renovated, refurbished, or rebuilt, but now, in peacetime, it seems to me, is the time to spend some money to reconstruct some of the buildings at the old military posts. This is an opportune time, because it will mean much for the morale of the troops and at the same time will result in modernizing some of our outdated and old barracks.

Not only have barracks been rebuilt at Fort Riley, Kans., but I understand that funds are authorized in the bill to build additional barracks. This new construction will be a good investment. I regret that the committee is reducing the amount approved by the House by 50 percent. I think the bill should be passed in its full amount.

I wish to mention also the hospital at Fort Riley, Kans. It is a very old hospital, and there would be a saving to the Government if a new hospital were built at that post. Funds have been authorized, and that it is one of the projects scheduled for construction. Here again the Federal Government would save money by building a new hospital.

I urge that the full amount recommended by the committee for this item be provided.

Mr. MAYBANK. Mr. President, will the Senator from Massachusetts yield?

Mr. SALTONSTALL. I yield.

Mr. MAYBANK. As I understand, the Committee on Armed Services reduced the appropriation for the various barracks by almost 50 percent.

Mr. CASE. On single men's housing.

Mr. MAYBANK. I understand that the item for Beaufort, S. C., was reduced by 50 percent. I may say that I have the utmost confidence in the action of the committee.

Mr. CASE. That item was reduced on the same percentage base as were the others.

Mr. MAYBANK. I appreciate that. I may say to the distinguished chairman of the committee, the Senator from Massachusetts, that I had intended to offer an amendment to increase the amount. I so advised the Senator from Massachusetts the other day, when we were in the Committee on Appropriations. But the Senator explained to me the care and the diligence with which the Committee on Armed Services had examined these items, and had prorated the reduction throughout the various locations.

I simply wish to commend the Senator from South Dakota and the Senator from Massachusetts and to say that I do not intend to offer my amendment to increase the amount, but I propose to vote for the committee bill as it has been reported, with the understanding, of course, that the items not provided for

have not been entirely eliminated, but have been merely deferred as construction projects, which can be reconsidered at a later date.

Mr. SALTONSTALL. It is my understanding that the subcommittee reduced the amount for the various items by one-half. The full committee agreed to the cut on the basis that this program was a start on the rehabilitation of permanent barracks and permanent stations for single men and women.

Mr. MAYBANK. The amounts for the various bases or camps which were cut, were not cut because they were to be eliminated; they are to be reconsidered.

Mr. SALTONSTALL. They were not cut with any idea that they were going to be eliminated. They were cut because they were on permanent installations.

Mr. MAYBANK. I am glad to have that understanding from the distinguished chairman of the committee. I want it known for the RECORD, because I have received many telegrams and letters on the subject. I had intended to offer an amendment, but I think the committee has done a good job.

Mr. SALTONSTALL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	George	Millikin
Anderson	Gillette	Morse
Barrett	Green	Mundt
Bennett	Hayden	Murray
Bowring	Hickenlooper	Neely
Bricker	Hill	Pastore
Bridges	Ives	Payne
Burke	Jackson	Potter
Bush	Johnson, Colo.	Reynolds
Butler	Johnson, Tex.	Robertson
Capehart	Johnston, S. C.	Russell
Carlson	Kennedy	Saltonstall
Case	Kerr	Schoeppel
Clements	Kilgore	Smathers
Cooper	Knowland	Smith, Maine
Cordon	Kuchel	Smith, N. J.
Crippa	Langer	Sparkman
Daniel	Lehman	Stennis
Douglas	Lennon	Symington
Duff	Long	Upton
Dworshak	Magnuson	Watkins
Ervin	Malone	Welker
Ferguson	Mansfield	Williams
Flanders	Martin	Young
Frear	Maybank	
Fulbright	McCarran	

The PRESIDING OFFICER. A quorum is present.

Mr. CASE. Mr. President, I shall take only about 2 or 3 minutes, merely to advise Senators who have not had the privilege of hearing the entire debate of the issue here presented. The military services asked for an authorization of approximately $96 million for a barracks and bachelor officers' quarters replacement program. Included in that was a special item of about $8 million or $9 million for some barracks which are badly needed at West Point. Except in the case of the barracks at West Point, the committee's recommendation was that the program be cut in half. Where two barracks were recommended by the Army, the committee recommended one. Where two bachelor officers' quarters were recommended by the Army, the committee recommended one.

The committee took such action because it was felt that the rate of reenlistment, in the Army particularly, was at such a low ebb that the requests for replacement of some substandard mobilization-type housing by some permanent barracks and decent bachelor officers' quarters were justified.

It must be kept in mind that the requested housing is for Wacs as well as men. Members of the committee felt that in granting that portion of the requested program, a morale factor was involved.

The amendment offered by the Senator from Louisiana [Mr. LONG] would eliminate half of the program which the committee has recommended.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. CASE. I should like to proceed for a moment, if I may.

Mr. LONG. Would the Senator tell us how many barracks would be left within the provisions of the bill even if my amendment were agreed to? I refer now to the socalled hard core portion of the program.

Mr. CASE. The clerk advises me there would be not over $5 million worth of barracks left under the provisions of the bill, exclusive of the West Point item, if the amendment were agreed to.

The effect of the amendment would be felt primarily by the Army. The provisions relating to that branch of the service appear in the first section of the bill. Several items would be wiped out entirely.

I think the quickest way to say what I intend to say is to read from the bill, so that Senators may be informed.

Reading from page 2, for the Aberdeen Proving Ground, Md., for troop housing, research and development facilities, and training facilities, the committee reduced the amount recommended by the House of Representatives from $2,071,000 to $1,579,000. The amendment would reduce that item to $1,087,000. The committee's figure is halfway between the two.

The authorization for Redstone Arsenal, Ala., would be reduced by the amendment from $580,000 to $88,000.

For Fort Lee, Va., the bill as it passed the House provided $1,967,000. The committee's recommendation was half of that, or $983,000. The pending amendment would eliminate that authorization completely.

The authorization for New Cumberland General Depot, which is $492,000, would be eliminated entirely by the pending amendment.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. CASE. I yield to the Senator from Illinois.

Mr. DOUGLAS. I notice that there is a disciplinary barracks at New Cumberland. Is it the contention of the Senator from South Dakota that making barracks there more elaborate will promote reenlistment?

Mr. CASE. The Senator from South Dakota asked that question of representatives of the Army at the time the item was presented to the committee. If the Senator from Illinois will consult the hearings, he will find that the Senator from South Dakota received the same answer which I am going to have to give to the Senator from Illinois. That authorization is for the barracks for the personnel who look after those who are in the brig. It is not an authorization for replacement of the brig.

The next item is the Lexington Signal Depot, Ky., for which there is provided an authorization of $492,000. That amount would be entirely eliminated by the pending amendment.

The next item is $330,000 for Fort Monmouth, N. J., which would be entirely eliminated by the pending amendment.

The next item is for Sacramento Signal Depot, Calif.: Troop housing, $492,000. That amount would be entirely eliminated by this amendment.

The next item is for Fort Belvoir, Va. For that item, the House of Representatives voted $3,780,000. The committee voted to reduce the amount to $2,290,000. Under this amendment, the amount would be further reduced to $800,000.

For the item for Fort Eustis, Va., the House voted $5,479,000. The Senate committee voted to reduce that amount to $2,739,000. Under this amendment, the amount would be further reduced to $1,320,000. I point out that the committee voted to cut in half the amount voted by the House of Representatives.

Next comes the Oakland Army Base, Calif. For this item, the House of Representatives voted $1,835,000. The committee voted to reduce that amount to $785,000. This amendment would completely eliminate that amount.

Next comes the Beaumont Army Hospital, Tex. For this item, the House of Representatives voted $391,000 for troop housing. This amendment would eliminate that amount.

For troop housing at Fort Devens, Mass., the House of Representatives voted $2,297,000. The committee voted to reduce that amount to $1,314,000. This amendment would eliminate the entire amount.

For troop housing at Fort Dix, N. J., the House of Representatives voted $330,000. This amendment would eliminate the entire amount.

For troop housing at Fort Knox, Ky., the House of Representatives voted $2,028,000. The committee voted to cut that item exactly in half, to $1,014,000. This amendment would eliminate the entire amount.

For troop housing at Fort Benning, Ga., the House of Representatives voted $8,199,000. The Senate committee voted to cut that amount almost in half, to $4,264,000. The amendment would eliminate the entire amount.

In the case of the item for Fort Bragg, N. C., the House of Representatives voted $6,259,000. Under the formula we applied to all other items of this sort, the committee voted to reduce that amount to $3,470,000—or practically cutting in half the amount voted by the House of Representatives. There were several items which were not affected by the housing item. The pending amendment would reduce the amount for this item to $681,000.

Mr. DOUGLAS. Mr. President, will the Senator from South Dakota yield?

Mr. CASE. I yield.

Mr. DOUGLAS. In connection with the item for Fort Bragg, what is the meaning of the phrase "liquid and covered storage facilities?"

Mr. CASE. The reference is to fuel storage, not to the storage of beverages.

In the case of the item for Fort Campbell, Ky., the House of Representatives voted $7,066,000. The Senate committee voted to reduce that amount to $3,623,000. The pending amendment would further reduce the amount to $181,000.

For troop housing at Fort Bliss, Tex., the House of Representatives voted $13,453,000. The Senate committee voted to reduce that amount to $7,875,000. This amendment would further reduce the amount to $2,297,000.

For the item for Fort Hood, Tex., the House of Representatives voted $10,182,000. The Senate committee recommended $7,063,000. This amendment would further reduce the amount to $3,944,000.

In the case of the item for Fort Sill, Okla., the House of Representatives voted $3,692,000. The Senate committee voted to reduce that amount to $2,216,000. This amendment would further reduce the amount to $902,000.

In the case of the item for Fort Riley, Kans., the House of Representatives voted for troop housing and utilities, $7,413,000. The Senate committee voted to reduce the amount to $4,036,000. This amendment would eliminate the entire amount.

For troop housing and utilities at Fort Lewis, Wash., the House of Representatives voted $11,744,000. The Senate committee voted to reduce that amount to $6,268,000. This amendment would further reduce the amount to $793,000.

For troop housing at the Presidio of Monterey, Calif., the House of Representatives voted $330,000. This amendment would eliminate the entire amount.

For troop housing and maintenance facilities at Fort Ord, Calif., the House of Representatives voted $774,000. This amendment would reduce that amount to $444,000.

Mr. President, the committee tried to do a conscientious job in a difficult situation. Actually, my fear was that when the bill was reported to the full committee and subsequently to the Senate, there would be a concerted move to restore these amounts to the ones voted by the House of Representatives. I am pleased, on the whole, with the fact that the Senate has accepted the ground rule the committee decided to apply, namely, to cut in half almost all the items.

Mr. MAYBANK. Mr. President, will the Senator from South Dakota yield to me?

Mr. CASE. I yield.

Mr. MAYBANK. Let me say I had intended to move to restore the amounts to the ones that had been voted by the House of Representatives. I intended to make such a motion, along with the Senator from Georgia [Mr. RUSSELL]. However, after studying the matter, we believe the committee has taken the best action.

Mr. CASE. I thank the Senator from South Carolina.

Mr. YOUNG. Mr. President, will the Senator from South Dakota yield to me?

Mr. CASE. I yield.

Mr. YOUNG. I have noted the item of a jet airbase for the Bismarck-Minot area, North Dakota, and the item for a similar base in the Fargo area, North Dakota. The Air Force announced those sites in April. I wonder why Congress is now authorizing them again.

Mr. CASE. In my judgment the Air Force acted prematurely, for the bases were not authorized at all at that time. They will not be authorized until this bill or a similar measure becomes law.

The two bases to which the Senator from North Dakota refers are parts of the chain of interceptor bases which are being established across the northern part of the United States.

I anticipated a possible inquiry on this point, and I asked to have prepared a chart to show what is intended to be done. Senators may be able to see from where they are sitting this chart which shows small red planes across the map of the northern part of the United States, and shows a chain of interceptor bases, which are situated at points related to certain aircraft patrol and warning stations.

Mr. YOUNG. Mr. President, will the Senator from South Dakota yield further to me?

Mr. CASE. I yield.

Mr. YOUNG. These sites were announced first for Fargo and Bismarck. What military development necessitated changing the sites to other cities, afterwards?

Mr. CASE. The committee went into that matter at some length, both on and off the record. The committee studied the location of radar stations, which, in part, dictate the location of these bases. We cannot submit to the Senate all the considerations we studied; but we were guided by the fact that this particular line of bases follows the border across the northern part of the United States. The Air Force suggested the locations at Minot, rather than at Bismarck, and at Grand Forks, rather than at Fargo, as being more strategic positions.

Mr. YOUNG. The Air Force seemed to take the position with North Dakota people that the final decision regarding the locations would depend on local contributions. Many persons in that area believe that the sites were changed when 1 city offered $100,000 worth of land or not more than $200,000, at the outside. Has the location of the sites been influenced by such donations?

Mr. CASE. On the basis of similar questions which we asked representatives of the Air Force, both on and off the record, I would say the Air Force was not influenced by the contributions of land.

In the specific instances about which I questioned them, certain other considerations were involved. The strategic situation in relation to the radar centers was the most important. A second consideration—and offsetting to the one the Senator from North Dakota has mentioned—was the ground available and the location with reference to cities and the effect of using jet planes in proximity to cities. Some of those considerations entered very definitely into the situation.

But in no case did any Air Force officer I questioned admit that local considerations or the activities of local groups had a determining effect upon the final decision as to the site.

Mr. YOUNG. I am very happy to hear the Senator from South Dakota say that. I know of nothing in the past 20 years that has more riled the people of my State than the manner in which these sites were chosen. The impression was definitely left by the Air Force that local contributions would have much to do with the choosing of these sites.

Mr. CASE. Yes; I think the Air Force has engaged in some very bad public relations.

Mr. YOUNG. I agree, and I am glad to have the Senator's reassurance.

Mr. MORSE. Mr. President, will the Senator from South Dakota yield to me?

Mr. CASE. I yield.

Mr. MORSE. I understood the Senator from South Dakota to state that, in the view of the subcommittee and of the full committee, the amounts being recommended by the subcommittee and the full committee at this time are the best possible ones under the circumstances.

Mr. CASE. They are the best we could do, unless we personally examined each location. I say frankly that I did not know any other way to proceed than the way we did.

Mr. MORSE. The Senator from South Dakota believes, does he, that these amounts are the proper ones to be spent on these bases?

Mr. CASE. I think so. Furthermore, it should be pointed out that this bill is an authorization bill, not an appropriation bill. The final amounts will subsequently be reviewed by the Appropriations Committee.

Mr. MORSE. As I understand, however, the House figures are considerably larger.

Mr. CASE. That is correct.

Mr. MORSE. The legislative process being what it is, the chances are that when the bill comes out of conference these will not be the figures at all.

Mr. CASE. The Senator from South Dakota would not want to concede that, because on the basis of some other conferences the Senator from South Dakota finds that once in a while the Senate position can be maintained pretty well. We did it in connection with the lease-purchase bill.

Mr. MORSE. We never want to concede it, but I do not think the Senator from South Dakota wishes to dispute the fact that usually we come out of conference with a figure somewhere between the Senate figure and the House figure.

Mr. CASE. We would have some difficulty, in certain cases, in finding a figure halfway between the Senate figure and the House figure. Responding to the Senator's inquiry about cutting the amount another fourth, we cannot deal in fractions of a single barracks or BOQ building.

Mr. MORSE. No; but we can, by way of amendment, go into conference with these figures reduced by a certain percentage, with the understanding that a certain percentage will be used for repair, reconditioning, and reconstruction work; and on that basis we can negotiate in conference and come out with a figure which would save us some money in cases in which reconditioning instead of new construction would meet the need, spending the money for new construction where the case shows that what is needed is new construction.

All I seek to do is to provide the facilities required by the personnel. I do not wish to deny them facilities, but I also seek to save the taxpayers some money in providing these facilities. I am satisfied that thousands of dollars could be saved if we had some condition in the bill, by way of an amendment, which would require a certain percentage to be spent for reconditioning and repair, rather than new construction.

Mr. CASE. I suggest that that issue can be faced if the pending amendment is voted upon, and if it should be defeated, as I hope it will be.

Mr. LONG. Mr. President, the low reenlistment rate used in the argument for this item will remain low so long as there is a situation in which there is unequal sacrifice, in which some young men are required to go to Korea and fight, or fight wars in other distant parts of the world, while other young men are enabled to remain home. At one time our Army housed in these same barracks almost a completely volunteer Army. That was shortly after World War II. However, times have changed since that, and men do not freely enlist, because they know that unequal sacrifices are called for.

I point out also that about 90 percent of the manpower in the services are not skilled technicians; they are not officers, or highly qualified persons. The boys who engage in combat with the enemy in the field are young men who do not require a great amount of training to qualify them to fill out the necessary manpower to make the services operate. The cost of providing new facilities for all those men would be enormous.

This is the same item which the Senate Armed Services Committee unanimously declined to allow 2 years ago. The Senate committee agreed to take every nickel out of this item. When we depart from the policy of compelling the services to make the old barracks do while they are still usable, there is no limit to the amount of cost involved in this type of activity.

This is only the first year's increment. It is proposed to adopt a policy of replacing existing barracks at a time when the Army has reduced its manpower by 20 percent. All over the United States, bases with good housing are being closed. We have under consideration an item which I should like to eliminate because I believe it involves an unnecessary expenditure of $45 million to replace barracks which were intended to be permanent or semipermanent at the time they were built.

The PRESIDING OFFICER. The question is on agreeing, en bloc, to the amendments offered by the Senator from Louisiana. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HAYDEN (when his name was called). On this vote I have a pair with the senior Senator from Virginia [Mr. BYRD]. If present and voting he would vote "yea." If I were at liberty to vote I would vote "nay." I therefore withhold my vote.

The rollcall was concluded.

Mr. SALTONSTALL. I announce that the Senator from Minnesota [Mr. THYE] is absent by leave of the Senate.

The Senator from Maryland [Mr. BEALL], the Senator from Illinois [Mr. DIRKSEN], the Senator from New Jersey [Mr. HENDRICKSON], the Senator from Indiana [Mr. JENNER], the junior Senator from Wisconsin [Mr. MCCARTHY], the Senator from Connecticut [Mr. PURTELL], and the senior Senator from Wisconsin [Mr. WILEY] are necessarily absent.

On this vote, the Senator from New Jersey [Mr. HENDRICKSON] is paired with the Senator from Minnesota [Mr. HUMPHREY]. If present and voting, the Senator from New Jersey [Mr. HENDRICKSON] would vote "nay," and the Senator from Minnesota [Mr. HUMPHREY] would vote "yea."

If present and voting, the junior Senator from Wisconsin [Mr. MCCARTHY] and the Senator from Minnesota [Mr. THYE] would each vote "nay."

Mr. CLEMENTS. I announce that the Senator from Virginia [Mr. BYRD], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senators from Tennessee [Mr. GORE and Mr. KEFAUVER], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Arkansas [Mr. MCCLELLAN], and the Senator from Oklahoma [Mr. MONRONEY] are absent on official business.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan American Highway Congress at Caracas, Venezuela.

I announce further that on this vote the Senator from Florida [Mr. HOLLAND] is paired with the Senator from Oklahoma [Mr. MONRONEY]. If present and voting, the Senator from Florida would vote "yea," and the Senator from Oklahoma would vote "nay."

I announce also that on this vote the Senator from Minnesota [Mr. HUMPHREY] is paired with the Senator from New Jersey [Mr. HENDRICKSON]. If present and voting, the Senator from Minnesota would vote "yea," and the Senator from New Jersey would vote "nay."

The result was announced—yeas 12, nays 63, as follows:

YEAS—12

Douglas	Lennon	Murray
Frear	Long	Smathers
Fulbright	Mansfield	Sparkman
Kennedy	Morse	Williams

NAYS—63

Aiken	Ferguson	Maybank
Anderson	Flanders	McCarran
Barrett	George	Millikin
Bennett	Gillette	Mundt
Bowring	Green	Neely
Bricker	Hickenlooper	Pastore
Bridges	Hill	Payne
Burke	Ives	Potter
Bush	Jackson	Reynolds
Butler	Johnson, Colo.	Robertson
Capehart	Johnson, Tex.	Russell
Carlson	Johnston, S. C.	Saltonstall
Case	Kerr	Schoeppel
Clements	Kilgore	Smith, Maine
Cooper	Knowland	Smith, N. J.
Cordon	Kuchel	Stennis
Crippa	Langer	Symington
Daniel	Lehman	Upton
Duff	Magnuson	Watkins
Dworshak	Malone	Welker
Ervin	Martin	Young

NOT VOTING—21

Beall	Gore	Kefauver
Byrd	Hayden	McCarthy
Chavez	Hendrickson	McClellan
Dirksen	Hennings	Monroney
Eastland	Holland	Purtell
Ellender	Humphrey	Thye
Goldwater	Jenner	Wiley

So Mr. LONG's amendments were rejected en bloc.

The PRESIDING OFFICER (Mr. UPTON in the chair). The bill is open to further amendment.

Mr. LONG. Mr. President, I call up my amendment 7–8–54–B.

The PRESIDING OFFICER. The Secretary will state the amendment.

The CHIEF CLERK. At the end of the bill, it is proposed to add the following new section:

SEC. 510. (a) The Secretary of Defense shall maintain direct surveillance over the planning and construction by the military departments of all public-works projects. Such surveillance shall be maintained through a civilian official of the Department of Defense to be known as the Director of Installations, who shall be appointed by and directly responsible to the Secretary of Defense and who shall receive compensation at the rate of $14,800 a year. The Director of Installations shall, from time to time, make such reports directly to the Secretary of Defense with respect to public-works projects under construction by the military departments as he may deem necessary to keep the Secretary of Defense currently and fully informed with respect to the status, progress, and cost of, and all other pertinent matters concerning, such public works of the types constructed by the military departments. The Secretary of Defense shall provide for furnishing the Director of Installations with such engineering, clerical, stenographic, and other personnel as he may require in order adequately to perform his functions.

(b) No reorganization plan submitted under the Reorganization Act of 1949 or any other act shall provide for, and no reorganization under any such act shall have the effect of abolishing or transferring the Office of Director of Installations or the functions of such office.

Mr. LONG. Mr. President, the amendment I am offering is an effort to reenact a wise statutory provision which Congress enacted when it tried to reduce waste in the Military Establishment. That was when Congress required that there be appointed a Director of Installations in the Office of the Secretary of Defense. That was done 2 years ago.

At that time the services had been before us testifying that they needed $3,100,000,000 in authorizations for that year, and that in the next year they

would have to have $4,500,000,000 of additional authorizations. We wrote this language into the bill at that time, which created a Director of Installations, who must have had experience in the field of military construction. With that language in the bill, Mr. Lovett at that time appointed Mr. Frank Creedon. The result was that within 6 months after Mr. Creedon had been appointed, and after he had had a chance to study the problem, Mr. Lovett sent word to our committee that there would be no request for the additional $4,500,000,000 for which he had authorized the service representatives to testify, but that he could get by on the existing authorization.

Furthermore, the Director discovered that the services had enough money on hand to carry them for 2 or 3 years, and that they had enough authorizations to carry them for approximately 5 years. It was because of the work of Mr. Creedon in that capacity, in exposing and uncovering the large amounts of unnecessary expenditures involved in these programs, in finding where many economies could be effected, and that in ascertaining that many of the authorizations which had been requested were totally unnecessary, that I, as a Democrat, was strongly persuaded to go along with the economy reductions of the President of the United States—I speak now of the present President of the United States—because many of the reductions he recommended were the same that Mr. Creedon had discovered prior to the time Mr. Wilson assumed the office of Secretary of Defense.

I heard rumors that that position was to be abolished, because the services did not like the idea of having such a position in the Department of Defense. It was difficult for them to obtain the appropriations and authorizations they desired.

After a while the position was abolished in a reorganization plan which the President of the United States sent to Congress. After the position was abolished we saw another man, Mr. Floete, appointed to a similar position in the Pentagon. I do not want to criticize Mr. Floete, but he did not have the experience Mr. Creedon had had. Mr. Creedon had been in charge of construction for the atomic-bomb program at Oak Ridge, whereas Mr. Floete had had experience as a tractor dealer. He did not have the experience Mr. Creedon had had in this position, and everyone knew it.

I know the distinguished chairman of the subcommittee will say, "Well, Admiral Jelley advised Mr. Floete."

What we need, Mr. President, is a group of civilians, if we are going to have civilian control, because it is so easy for a person to be so busy that he cannot keep up with the entire program. I am urging that we reestablish the position of director of installations and require that he have the same qualifications that Congress required him to have in 1952; that he have a civilian staff in an office apart from that of the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force, where he would be surrounded by high brass, but in the office of the Secretary of Defense, where he would have the ear of the Secretary of Defense. If we place him in that position we shall find that a good, qualified man will do the kind of work Mr. Creedon did.

I do not quarrel with the judgment of the Senate. Each Senator must judge these things for himself. We have just had a yea-and-nay vote on an item which the committee unanimously recommended against 2 years ago, and the Senate, by a large majority, voted to go along and spend the funds 2 years later. We need a man who has the ability and the qualifications to understand military construction and the ways and the problems of the military. This amendment seeks to accomplish that, and to keep the service fraternity from doing what it did last time. Here was a man who had been squeezing down on the money they wanted to spend, who wanted proper economies, who recommended that $700 million in authorizations be surrendered, when $500 million of new authorizations were requested, making a net reduction of $200 million. That is what was accomplished by having a Director of Installations.

We do not need an Under Secretary who has not had the necessary experience, who does not know how the military operates, but we need a man who has an office in the Department of Defense, directly in contact with the Secretary of Defense, a man well qualified in military construction and experienced to advise the Secretary of Defense how to hold down the necessity for billions of dollars' worth of authorizations for construction.

Mr. President, I was with the Senate Armed Services Committee when the then Director of Installations discussed the progress which had been made in effecting enormous economies in the field of military construction. I am sure every member of that committee was greatly impressed at that time. Many of them told me so.

I believe the adoption of my amendment creating the position of Director of Installations, assuring him that he will have a competent staff of clerical, engineering, and stenographic aid, will bring about great economies. I point out that Mr. Creedon had only 23 persons to work with him in finding where enormous reductions could be made. I believe this is the best hope for preventing requests being made for enormous sums of money.

Other Senators know as well as I do that once we receive requests for large expenditures, the people back home are terribly disappointed if the project does not come through. It means the difference between prosperity and depression to some communities. It would be better to see that demands for unnecessary appropriations are never made in the first instance. The best way to accomplish it is by the establishment of the Office of Director of Installations. We should not let the reorganization law be used to effect waste in Government. The purpose of reorganization is to save money, not to see that money is wasted.

Mr. President, I ask for the yeas and nays on this amendment.

The yeas and nays were not ordered.

Mr. DOUGLAS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. DOUGLAS. Mr. President, with the expicit understanding that the majority will be favorable to a yea-and-nay vote on the amendment offered by the Senator from Louisiana, I now ask unanimous consent that the order for the call of the roll be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KNOWLAND. Mr. President, I ask that the yeas and nays be ordered on the amendment of the Senator from Louisiana.

The yeas and nays were ordered.

Mr. SALTONSTALL. Mr. President, I hope the amendment of the Senator from Louisiana will not be adopted. The Senator and I both agree that the gentleman who formerly held the position of Director of Installations was an excellent man. I have great commendation for what the Senator from Louisiana, as a member of the committee, did several years ago. He and the Senator from Oregon took a trip abroad. When they returned, they made an excellent report.

Now we have a new situation. A year ago there was a reorganization of the Department of Defense. In that reorganization, six assistant secretaryships were created under the Secretary, Mr. Wilson. One of the secretaries was an Assistant Secretary for Properties and Installations. He has a direct responsibility, on a higher level, than Mr. Creedon ever had, in trying to make the best possible deals and to secure the best possible arrangements for all the armed services with relation to properties and installations. The man who is now holding that position is Mr. Franklin G. Floete, of Iowa. When he appeared before our committee, in connection with the confirmation of his nomination, he was asked about his knowledge of the construction business. He stated that he had been in the construction business for 10 years; that he was not an architect; but that he understood the construction business and problems relating to construction.

The argument of the Senator from Louisiana was based mainly on the personality of Mr. Creedon. I agree with the Senator entirely in that argument, but I say that whether we have a good man or an incompetent man, the amendment of the Senator is not the cure. If Mr. Floete is incompetent, the cure is to select another person to act as Assistant Secretary of Defense for Properties and Installations.

For the reasons I have stated, I hope that the amendment offered by the Senator from Louisiana will not be adopted.

Mr. LONG. Mr. President, I desire to say a few additional words. I completely differ with the position taken by the Senator from Massachusetts that this is a matter of personalities. It is not a matter of personalities; it is a matter of qualifications. The person who passes

on requests for billions of dollars for construction funds should have qualifications in the field of heavy construction and military construction. He should understand something about the way the military operates. That is what makes for the success of a Director of Installations; not the personality of Mr. Frank Creedon. Many other persons would have done the same thing. It is important that the man be surrounded, not by high-ranking officers, patriotic and great men though they may be, who usually work with their groups to get for them what the services would like to have spent. Rather a civilian should be selected, who is surrounded by civilians, a civilian staff, to establish civilian control over the military. This is what the committee said in its report 2 years ago, when the position was created:

Because it believes that much of the waste in our military-construction program as it is now constituted results from definite lack of overall coordination and supervision, the committee recommends the establishment of the Office of Director of Installations under a civilian head responsible to the Secretary of Defense and charged with the responsibility for the efficient and economic planning and execution of a military-construction program which at the present time involves billions of dollars annually. It is not contemplated that this office will entail any operational functions, those remaining in the present military-construction agencies. The Office, however, will be expected to provide common standards and criteria for construction within the Department and to coordinate particularly the Army and Air Force programs, which are both prosecuted by the Corps of Engineers of the Army. It is the view of the committee that this Office should be staffed with a very small, select group of highly competent engineers and construction personnel.

The experience which Congress and the Nation have had with the operation of that office, under the direction of a highly qualified technical engineering personnel, has resulted in the greatest reduction of additional public construction money which the Government has ever obtained. With the experience we have had, knowing it was in this manner that it was possible to bring order out of chaos in this program, it would be well that this position should be created, so that there would not be eternal pressure to try to abolish such an office merely because the office might be very effective in determining where economies should be made.

SEVERAL SENATORS. Vote! Vote!

Mr. CASE. Mr. President, I think I can say what I desire to say in about a minute and a half.

Supplementing the remarks of the chairman of the Armed Services Committee, the distinguished Senator from Massachusetts, I may say, first of all, that the amendment would create a new position to duplicate one which is already in existence. There is now an Assistant Secretary of Defense for Properties and Installations. He has done a good job. The military made a request for $1,756,700,000. The present Assistant Secretary of Defense, after a review, reduced that amount by $550,400,000. How does one judge a man when he has done a good job? This is a cut of $550 million from a request of $1,756,700,000.

Mr. LONG. Mr. President, will the Senator yield?

Mr. CASE. Not at the moment.

Let me call attention to what the Secretary said in his appearance before the committee:

The original request consisted of some 7,500 items. Each one of those was carefully analyzed over a period of approximately 3 months. The review was made under the direct supervision of Admiral Jelley who, as you know, is a civil engineer, and he was assisted by four other civil engineers who are a part of his office.

Yesterday I placed in the RECORD a letter from the Secretary, which broke down that item in detail and showed where the saving of $550 million was accomplished. I suggest that Senators who are interested in those details could inform themselves by reading the letter.

In addition to that reduction of $550 million, the committee made further reductions, so the bill as it is now before the Senate provides for $837 million. That is less than half of the amount requested by the military.

Furthermore, provision has been made in the bill for $73 million for the Army Research Development Center in Tennessee, which was not included in the original program. So actually, because of that fact, there is now provided more than appears on the surface of the bill.

The bill as it is now presented provides for less than half of the amount requested by the military. Five hundred and fifty million dollars of that reduction was as the result of a review by the present Secretary of Defense for properties and installations.

Let us not adopt an amendment to create a new position which would duplicate a position that has already been in existence for 1 year and has brought about such good results.

Mr. LONG. Mr. President, when it is argued that the Director of Installations did not recommend the full amount which the armed services had requested, I submit that that record in one of the poorest I have ever heard. He reduced the amount from $1,500,000,000 to only $1 billion. I say that because even before there was a Director of Installations, a request had been made in 1952 by the services for $9 billion in new authorizations. Mr. Lovett said that that was such an enormous amount of money that he simply could not recommend it, and asked that it be taken back. So the armed services then requested $3,100,000,000. Of the $3,100,000,000, which was one-third of what the services had originally requested, the Director of Installations found $1 billion more of unnecessary expenditures. There was an additional authorization to be requested of $4,500,000,000 for 1953, which the services desired. What did the then Director of Installations do? He did not recommend 5 cents out of the $4,500,000,000 requested; he recommended zero.

But in this instance the request was for $1,500,000,000. What was the reduction which was made by the Under Secretary in charge of properties and installations? Five hundred million dollars.

That is not nearly the amount of paring down which these budgets could stand, if there were the highly qualified personnel to do the work.

I was very much impressed, as I believe every other member of the committee was, when the testimony of the Director of Installations was given before the committee. I ask unanimous consent that his statement may be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF FRANK R. CREEDON, SPECIAL ASSISTANT TO THE SECRETARY OF DEFENSE, BEFORE THE ARMED SERVICES COMMITTEE OF THE HOUSE, JULY 20, 1953, IN BEHALF OF MILITARY PUBLIC WORKS AUTHORIZATION BILL, H. R. 6375

Mr. Chairman and members of the Armed Services Committee, I appreciate greatly this opportunity to appear before the Armed Services Committee of the House and speak briefly in behalf of the military public works authorization bill that is before you for consideration.

The amount of the authorization proposed for fiscal year 1954 is $529,386,000, which by comparison is only 21 percent of the amount authorized for fiscal year 1953. This $529,386,000 includes about $146 million for Army, $96 million for Navy, and $288 million for Air Force. The amounts originally submitted to the office of the Secretary of Defense were $628 million by Army, $1,300,000,000 by Navy, and $2,800,000,000 by Air Force. Thus, while the total requested in this proposed bill is only 11 percent of the original submission, it should not be inferred that the other 89 percent were all unessential or undesirable projects. Generally it was a matter of their relative urgency under the criteria requiring a program capable of orderly and economical accomplishment in fiscal year 1954.

After several months of close study of our military public works construction program—authorizations, appropriations, obligation rates, and capabilities, and target dates for beneficial use—it became apparent that, with the exception of the Air Force, existing appropriations were sufficient to support an optimum rate of obligation during fiscal year 1954. However, it also became apparent that authorization does not exist for certain facilities that are more urgently needed than some that are presently authorized. Accordingly it is the objective of this proposed bill to secure authorization for those facilities which the military departments presently consider to be of such urgency that they desire to finance them out of funds now available. The use of existing appropriations for the construction of facilities included in this bill, rather than for certain facilities previously authorized, will permit the military departments to make the most prudent use of existing funds for construction purposes.

Each of the facilities in the proposed bill has been carefully reviewed and approved for inclusion therein by the office of the Secretary of Defense and the Bureau of the Budget.

The committee undoubtedly is aware that the Department of Defense intends to submit a list of existing authorizations that the military departments have proposed for rescission. Since the amount proposed for rescission ($756 million) is larger than the amount ($529 million) requested in this proposed bill, the net result will be a reduction in total authorization.

To place the existing military public works program in perspective the total authorization, appropriation, obligation, and expendi-

ture picture for all three military departments is shown below:

	(In millions)
Total authorization, fiscal year 1948 through fiscal year 1953	$11,698
Total appropriation, fiscal year 1948 through fiscal year 1953	9,063
Total obligation as of June 1, 1953	5,818
Total expenditure as of June 1, 1953	4,238
Estimated unobligated funds as of July 1, 1953	3,060

Information for each of the military departments similar to that contained in the paragraph above is shown graphically on charts attached.

The Secretary of each military department is here to present pertinent information in support of its program as contained in this proposed authorization bill.

The Secretary of Defense considers H. R. 6375 to be of such urgent importance as to merit your consideration and favorable action before the close of this session of Congress.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana [Mr. LONG]. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SALTONSTALL. I announce that the Senator from Minnesota [Mr. THYE] is absent by leave of the Senate.

The Senator from Maryland [Mr. BEALL], the Senator from Ohio [Mr. BRICKER], the Senator from New Hampshire [Mr. BRIDGES], the senior Senator from Indiana [Mr. CAPEHART], the Senator from Illinois [Mr. DIRKSEN], the Senator from New Jersey [Mr. HENDRICKSON], the Senator from New York [Mr. IVES], the junior Senator from Indiana [Mr. JENNER], the junior Senator from Wisconsin [Mr. MCCARTHY], the Senator from Connecticut [Mr. PURTELL], and the senior Senator from Wisconsin [Mr. WILEY] are necessarily absent.

If present and voting, the Senator from New Jersey [Mr. HENDRICKSON], the Senator from New York [Mr. IVES], and the junior Senator from Wisconsin [Mr. MCCARTHY] would each vote "nay."

Mr. CLEMENTS. I announce that the Senator from Virginia [Mr. BYRD], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senator from Iowa [Mr. GILLETTE], the Senators from Tennessee [Mr. GORE and Mr. KEFAUVER], the Senator from Arizona [Mr. HAYDEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Colorado [Mr. JOHNSON], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Oklahoma [Mr. MONRONEY], and the Senator from Georgia [Mr. RUSSELL] are absent on official business.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan American Highway Congress at Caracas, Venezuela.

I announce further that on this vote the Senator from Florida [Mr. HOLLAND] is paired with the Senator from Minnesota [Mr. HUMPHREY]. If present and voting, the Senator from Florida would vote "nay," and the Senator from Minnesota would vote "yea."

I announce also that, if present and voting, the Senator from Virginia [Mr. BYRD] and the Senator from Georgia [Mr. RUSSELL] would each vote "nay."

The result was announced—yeas 13, nays 54, as follows:

YEAS—13

Douglas	Long	Neely
Fulbright	Magnuson	Smathers
Kennedy	Mansfield	Sparkman
Kilgore	McCarran	
Lehman	Murray	

NAYS—54

Aiken	Ferguson	Morse
Anderson	Flanders	Mundt
Barrett	Frear	Pastore
Bennett	George	Payne
Bowring	Green	Potter
Burke	Hickenlooper	Reynolds
Bush	Jackson	Robertson
Butler	Johnson, Tex.	Saltonstall
Carlson	Johnston, S. C.	Schoeppel
Case	Kerr	Smith, Maine
Clements	Knowland	Smith, N. J.
Cooper	Kuchel	Stennis
Cordon	Langer	Symington
Crippa	Lennon	Upton
Daniel	Malone	Watkins
Duff	Martin	Welker
Dworshak	Maybank	Williams
Ervin	Millikin	Young

NOT VOTING—29

Beall	Goldwater	Johnson, Colo.
Bricker	Gore	Kefauver
Bridges	Hayden	McCarthy
Byrd	Hendrickson	McClellan
Capehart	Hennings	Monroney
Chavez	Hill	Purtell
Dirksen	Holland	Russell
Eastland	Humphrey	Thye
Ellender	Ives	Wiley
Gillette	Jenner	

So Mr. LONG's amendment was rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. MORSE. Mr. President, before I offer an amendment, I wish to make a very brief statement for the RECORD in explanation of my vote on the last amendment.

As one who worked closely with the Senator from Louisiana [Mr. LONG] in recommending the creation, in the first instance, of this special office in the Department of Defense for a kind of watchdog surveillance over military installations, I wish to say that I voted against his amendment today because, in my judgment, the job can be done, and should be done, by the Assistant Secretary of Defense, who has been given jurisdiction over the subject matter. He is a civilian. He can surround himself with civilians, as far as his immediate advisers are concerned. There is no reason in the world, Mr. President, why the same job could not be done by that Assistant Secretary of Defense as could be done by a special Director of Military Installations, assigned to the Office of the Secretary of Defense. In each instance he would be a subordinate to the Secretary of Defense, and the final responsibility rests with the Secretary of Defense.

Therefore, although I am disappointed that the Assistant Secretary of Defense did not make a recommendation for a larger cut in the request of the Military Establishment this year, I do not feel that has anything to do with the question as to which office should do the job. I think we made a step forward in the reorganization plan by creating a special Assistant Secretary of Defense to handle this work and, as was pointed out in debate by, I think, the Senator from South Dakota, if he is not performing well, then we have a personnel question, but not a question as to the jurisdiction of the office.

Mr. President, I offer an amendment which I believe will be accepted at least by the committee of conference. I think the objective of the amendment bears out the point of view which I discussed at some length this afternoon as to the need for checking the military in regard to a tendency to build new buildings when old ones can be repaired and made satisfactory for use. I found when I was a member of the Committee on Armed Services that the military avoids opportunities of reconditioning and repairing buildings if it is felt money can be obtained with which to erect new buildings. Here is a chance to save several million dollars by repairing existing facilities rather than expending many more millions for building new facilities. Here is a chance to economize without in any way injuring the military program. I believe we can save a great deal of money by doing more reconditioning and repair work on military installations. Therefore, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 2, in line 2, it is proposed to add the following:

Subject to the condition that the military will administer the authorizations for construction herein provided in accordance with a building program that will expend for rehabilitation construction at least $5,000,000 of the total $45,000,000 authorized for barracks and bachelor officers' quarters, in lieu of that amount for new construction.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon.

Mr. CASE. Mr. President, although I am not entirely sure how the amendment would be worked out in its entirety, I think the intent of the amendment is desirable, and I shall be glad to accept the amendment and take it to conference and see what we can do about it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon [Mr. MORSE].

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H. R. 9242) was passed.

REPEAL OF SECTION 16 OF THE FEDERAL RESERVE ACT

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of Calendar 1626, Senate bill 3268, to repeal the provisions of section

16 of the Federal Reserve Act relating to prohibiting the paying out by one Federal Reserve bank of the notes of another Federal Reserve bank.

The PRESIDING OFFICER. The bill will be stated by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 3268) to repeal the provisions of section 16 of the Federal Reserve Act which prohibit a Federal Reserve bank from paying out notes of another Federal Reserve bank.

Mr. BENNETT. Mr. President, the purpose of the bill is to facilitate the operation of the Federal Reserve System under the present setup.

When the system was established in 1913, it was assumed that each of the regional banks was an original bank of issue, and that the notes issued by each bank in each region were to be used to adjust the money supply in that region. Therefore, the law required that no Federal Reserve Bank could pay out the notes of any other Federal Reserve bank. That brought about quite a problem, because the notes traveled over the boundary lines of the various bank areas; and all these years each Federal Reserve bank in each district has been forced to sort out all the Federal Reserve notes that came to it and to return the notes that came to it from other districts. One bank could not reissue, for use in its own district, notes that came from another district.

Over the years, the setup of the Federal Reserve System has so changed that today there is no point in maintaining that distinction. Approximately three-quarters of a million dollars can be saved annually in the cost of transporting the notes back to the original banks of issue.

This bill will permit each Federal Reserve bank to pay out notes of other Federal Reserve banks that are fit for circulation, rather than be required to send them back to their original homes, so to speak.

I am sure there is no controversy over this bill. It is a measure that will simplify the operation of the system. As I have said, the enactment of the bill will result in saving the Government approximately three-quarters of a million dollars annually.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California that the Senate proceed to consider the bill.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 3268) to repeal the provisions of section 16 of the Federal Reserve Act which prohibit a Federal Reserve bank from paying out notes of another Federal Reserve bank.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the third paragraph of section 16 of the Federal Reserve Act, as amended, is amended by striking out the sentences thereof which read as follows: "Whenever Federal Reserve notes issued through one Federal Reserve bank shall be received by another Federal Reserve bank, they shall be promptly returned for credit or redemption to the Federal Reserve bank through which they were originally issued or, upon direction of such Federal Reserve bank, they shall be forwarded direct to the Treasurer of the United States to be retired. No Federal Reserve bank shall pay out notes issued through another under penalty of a tax of 10 percent upon the face value of notes so paid out."

MODIFICATION OF DUTY ON IMPORTATION OF WOOD DOWELS

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of Calendar 1615, House bill 2763.

The PRESIDING OFFICER. The bill will be stated by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 2763) to amend the Tariff Act of 1930, so as to modify the duty on the importation of wood dowels, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California that the Senate proceed to consider the bill.

The motion was agreed to; and the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, and was read the third time.

The PRESIDING OFFICER. The question is on the passage of the bill.

Mr. MORSE. Mr. President——

The PRESIDING OFFICER. All in favor say "Aye"; all opposed say "No."

Mr. MORSE. Mr. President——

The PRESIDING OFFICER. The "ayes" have it, and the bill is passed.

Mr. MORSE. Mr. President, I was seeking to obtain the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Oregon.

Mr. MORSE. I should like to ask the Senator from Colorado for an explanation of the bill.

Mr. MILLIKIN. Mr. President, I am told that in the Northwest there was a time when manufacturers of brooms imported their lumber under certain classifications and rates. Within the past year or two there developed a court case in which the Customs Court, in looking into that situation, classified the broomsticks in a way that carried a rate that was slightly higher than the one the folks in the broomstick business had been accustomed to pay. They wish to have the rate restored to the old rate. That is the purpose of the bill.

Mr. MORSE. I am in favor of new brooms, of course.

Mr. MILLIKIN. Yes, I understand that the Senator from Oregon wishes to sweep clean with them; and I am told he makes a good "broom" in his section.

I should say that it will be desirable to reconsider the vote by which the bill was passed, because I notice that the Senator from New Jersey [Mr. HENDRICKSON], whom I have tried to reach, has an amendment which I think could be taken to conference.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the vote by which the bill was passed be reconsidered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORSE. Mr. President, ordinarily I would have no objection to that procedure. However, we are in the closing days of the session; and when we get a ruling as fast as the announcement of the Chair that the bill had been passed, with a Member of the Senate addressing the Chair before the Chair had anywhere nearly reached the end of his announcement, I make the point of order that there has been no vote on the bill. From a parliamentary standpoint, I maintain that my addressing the Chair before there was any announcement of the vote made the announcement of the Chair relative to a vote, insofar as having any binding effect is concerned, without any force or effect in the Senate.

Mr. KNOWLAND. Mr. President, I do not agree with the Senator from Oregon. I wish to say, however, that it will be helpful, both to the Senate and the officials at the desk, as well as to the Presiding Officer, whoever he may be, if we may have order in the Senate, so that in handling legislation of this kind the Presiding Officer may be able to hear what is going on. The Senator and I have both presided. We know that frequently there is a great deal of milling around. Sometimes it is difficult to know whether a Senator is addressing the Chair, talking with his neighbor, or preparing to leave the Chamber.

Mr. MORSE. I agree with the Senator, except that in this instance there could not have been any doubt about what the Senator from Oregon was doing. One does not call out "Mr. President" when he wishes to converse with his next door neighbor. So I raise the point of order that there has been no official vote on the bill as yet.

Mr. FULBRIGHT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. FULBRIGHT. What bill is this?

Mr. MORSE. The Senator from Colorado says it is the "broomstick bill." A copy of it has not yet reached my desk, but I take his word for it.

The PRESIDING OFFICER (Mr. BENNETT in the chair). The Chair is advised that his predecessor in the chair—the switch having been made during this discussion—was about to rule that the vote had not been completed, and that therefore there was no vote.

For the benefit of the Senator from Arkansas, the clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (H. R. 2763) to amend the Tariff Act of 1930, so as to modify the duty on the importation of wood dowels, and for other purposes.

Mr. FULBRIGHT. What has that to do with broomsticks?

Mr. MILLIKIN. Mr. President, if the Senator will give me his ear for a moment, I will explain.

In the northwestern section of the country—and this is an unfortunate time to be wasting time—broomstick makers have been importing their lumber from Canada. Under the former practice such lumber took a certain tariff rate, which was satisfactory to the broomstick makers of the Northwest. A Customs Court decision reclassified the broomsticks and called them wood dowels. Ordinarily a dowel is considered as a piece of wood which is used in putting furniture together——

Mr. FULBRIGHT. I know what a dowel is.

Mr. MILLIKIN. Perhaps some other Senators do not.

I insist upon saying what a dowel is. A dowel is a piece of lumber fastened in a desk or other piece of furniture when it is not desired to use nails, screws, or bolts. That is the purpose of a dowel.

The classification as dowels resulted in some increase of duty. The people in the Northwest who make the broomsticks want the old classification and customs treatment restored, which this bill would do.

Mr. FULBRIGHT. Then the bill would make it easier to import broomsticks?

Mr. MILLIKIN. Yes. The Senator ought to be for it. Everyone else is for it.

Mr. FULBRIGHT. I congratulate the Senator. I could imagine that that was the purpose of the bill.

Mr. MILLIKIN. The junior Senator from Colorado is for it. The Senate Finance Committee is for it. The House Ways and Means Committee is for it. The House is for it. The Senator from Arkansas, who is in the wood business, is the only one who does not know what a dowel is. [Laughter.]

Mr. President, on behalf of the Senator from New Jersey [Mr. HENDRICKSON] I offer the amendment, which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment is not in order. The third reading of the bill has been ordered.

Mr. MILLIKIN. That is all right. It will be taken care of in some other way.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the third reading of the bill be rescinded, so that the bill may be open to amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment offered by the Senator from Colorado [Mr. MILLIKIN] for the Senator from New Jersey [Mr. HENDRICKSON].

The LEGISLATIVE CLERK. At the proper place in the bill it is proposed to insert the following:

Paragraph 1615 (a) of the Tariff Act of 1930 is amended by inserting before the period at the end thereof a semicolon and the following: "and articles, previously imported, with respect to which the duty was paid upon such previous importation, if (1) reimported, without having been advanced in value or improved in condition by any process of manufacture or other means, after having been exported under lease to a foreign manufacturer, and (2) reimported by or for the account of the person who imported them into, and exported them from, the United States."

SEC. 2. The amendment made by this act shall be effective as to articles entered for consumption or withdrawn from warehouse for consumption on or after the date of enactment of this act.

Mr. AIKEN. Mr. President, what is the effect of this proposed legislation on clothespins?

Mr. MILLIKIN. That is what I am about to discuss.

Mr. AIKEN. It does reduce the duty on clothespins, does it?

Mr. MILLIKIN. No—nor the duty on the things which clothespins are used to hang up.

Mr. AIKEN. I merely wanted to be assured that the proposed legislation would not ruin the clothespin business.

Mr. MILLIKIN. No. The clothespin business is all right, so far as I know.

This is another liberal amendment. It provides that if a person pays duty once, let us say, on some cloth in an automobile and sends the automobile across the border to be worked on, when it comes back he will not have to pay duty a second time on the same goods.

This amendment was submitted by the Senator from New Jersey [Mr. HENDRICKSON]. It has been pending for a long time. I have been trying to reach him to find out whether or not he is still "panting" for the amendment. I cannot reach him, but in order to save time I am assuming that he is.

I am glad to take the amendment to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Colorado [Mr. MILLIKIN] for the Senator from New Jersey [Mr. HENDRICKSON].

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H. R. 2763) was read the third time and passed.

LEGISLATIVE PROGRAM

Mr. KNOWLAND. Mr. President, for the information of the Senate, the next bill which I shall move to make the unfinished business will be left as the unfinished business until tomorrow morning at 11 o'clock, when the Senate will reconvene. Tomorrow there will be a calendar call for the consideration of measures on the calendar to which there is no objection, beginning at the point at which the previous call of the calendar was concluded. When the calendar call is completed, the Senate will then resume consideration of the unfinished business.

The PRESIDING OFFICER. What is the pleasure of the Senate?

DEVELOPMENT OF THE PRIEST RAPIDS SITE ON THE COLUMBIA RIVER, WASH.

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1668, House bill 7664.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 7664) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Public Works with an amendment, on page 4, line 12, after the word "thereto.", to insert "Power surplus to the requirements of the licensee and other non-Federal marketing agencies within the economic marketing area, as may be economically usable to the Federal system, may be made available to and may be purchased by the Bonneville Power Administrator at rates not higher than the rates charged such non-Federal marketing agencies, and under such terms and conditions as shall be mutually agreeable to the licensee and the Secretary of the Interior. The Administrator may use funds in the continuing fund, established under the provisions of section 11 of the Bonneville Project Act of August 27, 1937 (50 Stat. 731), as amended, to purchase such power. Such power may be commingled with power from Federal dams in the Columbia River system for which the Bonneville Power Administrator has been designated marketing agent and shall be sold by the Administrator in accordance with the provisions of the Bonneville Project Act at established rate schedules."

ORDER FOR RECESS TO 11 A. M. TOMORROW

Mr. KNOWLAND. Mr. President, I ask unanimous consent that when the Senate completes its labors tonight it stand in recess until 11 o'clock a. m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CALL OF THE CALENDAR TOMORROW

Mr. KNOWLAND. Mr. President, I ask unanimous consent that tomorrow, immediately following the usual morning hour, there be a call of the calendar for the consideration of measures to which there is no objection, beginning at the point where the previous call of the calendar was concluded, with the understanding that bills for which no committee reports are available to the Senate and to respective calendar committees will not be considered.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

THE FHA AND OTHER PROGRAMS

Mr. SPARKMAN. Mr. President, 20 years ago, the Democratic Party initiated many programs that have brought untold benefits to the American people.

Particularly have these programs, such as REA, farm parity, TVA, social security, guaranty of bank deposits, and

others, helped the masses of people of this Nation.

One of the greatest of these Democratic programs is the Federal Housing Administration created to make home ownership possible to the millions of low- and middle-income families.

That FHA has, overall, done a magnificent job is practically unanimously admitted today.

An article of July 1 in the American Banker tells in eloquent terms some of the achievements of FHA. I ask unanimous consent that the article be inserted following these remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JOHNSON OF DIME SAVINGS BANK SAYS FHA HAS BEEN GREATEST BOON TO HOME BUYER

The Federal Housing Administration "has been the greatest boon ever conceived to benefit the home-buying public," it is declared by George C. Johnson, president of the Dime Savings Bank of Brooklyn, which originates and holds more home mortgages than any other savings bank in America.

Mr. Johnson's comment was made as the FHA observed the 20th anniversary of the formation of that Federal agency. Pointing out that "the FHA is one of the very few Federal agencies that has cost the taxpayer nothing, and, in fact, has operated at a profit," the banker stated:

"Until establishment of the FHA in June of 1934, the purchase of a home was extremely difficult for the average family. Usually it was necessary to scrimp and save for many years to accumulate the high downpayment until then required, ranging from 35 percent to 50 percent. Then, when this money was finally accumulated, a 3- or 5-year straight mortgage was written at high interest rates. When the mortgage came due at the end of that short term, few homebuyers were able to pay it off and the mortgage had to be renewed, for which large fees were charged. Frequently unscrupulous lenders would foreclose, since such action was entirely within their rights if the mortgage was not paid when due. It was rare that the average family of moderate means was able to own its home free and clear.

"But all that was changed with the advent of the FHA. It brought with it an entirely new concept of mortgage financing, and has made homeownership possible for millions of families. Today, nearly 60 percent of the families in America either own or have substantial equities in the homes in which they live.

"This has been accomplished through low downpayments, low interest rates, and long-term self-amortizing mortgages, all of which were developed by the FHA as one of its cardinal policies.

"Foreclosure is extremely rare today," Mr. Johnson's statement continues. "During the past 20 years, the FHA has insured more than 20 million loans aggregating nearly $31 billion. Total foreclosures last year on all types of home mortgages were less than 21,500. This compares with 252,000 foreclosures in 1933, the year before the FHA was established.

"It must be remembered that the FHA does not lend money. It simply guarantees that the mortgage lender will not lose in the transaction. Because of this insurance, it is possible for lenders to write mortgages with lower downpayments and for longer terms than would be possible under most State banking laws.

"Actually, the FHA is a first-rate example of Government and business in partnership with no cost to the taxpayer. The FHA has reduced the formerly extremely high price of mortgage credit by spreading the risks over the entire Nation. Because of the approximate 40 cents per month per $1,000 of mortgage insurance which the FHA receives from the borrower, the FHA has operated at a profit through the 20 years of its existence. Early this year, the FHA announced that it had repaid to the United States Treasury the $65,500,000 advanced to set up its insurance program, plus $20,350,000 interest at 2¼ percent.

"The Dime Savings Bank of Brooklyn has supported the FHA program from its inception and today we have nearly 13,000 FHA-insured loans in our mortgage portfolio with the current balance in excess of $86 million. Relatively few of these 13,000 home buyers would have been able to embark on homeownership had it not been for the FHA. In addition, we hold more than 21,000 home-mortgage loans guaranteed by the Veterans' Administration, and these 2 types of Government-backed loans account for approximately half of the 67,600 home-mortgage loans now held by our bank.

"The home-building industry is a cornerstone in the American economy, since 1 out of every 6 persons gainfully employed depends upon that industry for his livelihood, either directly or indirectly. In turn, the FHA is a cornerstone in home building, and has been for 20 years.

"This agency must never be allowed to become a political football, nor allowed to be shoved aside into some minor position in the Federal Government. Instead, I sincerely hope that by the end of another 20 years, the FHA will have helped make homeownership possible for millions more American families."

THE ECONOMIC OUTLOOK

Mr. SPARKMAN. Mr. President, newspaper headlines this morning paint a rosy economic picture: "Employment for June up 1 Million—New Construction Sets a Record."

News reports indicate that unemployment did not rise as usual between May and June, that total employment rose from May to June by a million to 62.7 million, that the factory workweek increased, and that between May and June initial unemployment claims under State unnemployment insurance systems declined 5 percent.

Such news being in refreshing contrast to that earlier in the year, has tended to create an atmosphere of everything as rosy and that from now on we may expect recovery.

Mr. President, I am not a prophet of gloom or a prophet of doom, and without attempting to predict or forecast what is likely to occur in coming months it seems clear that some word of caution as to the meaning of these headlines is desirable. In fact there has been a startling decline in the farm sector of the economy. Only last week the Department of Agriculture announced that the farm parity ratio declined from 91 percent in May to 88 in June—the lowest point since March 1941—13 years ago.

I digress to call attention to the fact that just a few days ago it was announced that the price of steel was going up $3 a ton. That simply means that the price of farm machinery and implements which the farmer must buy is going up and the pinch is going to become tighter as between the low prices the farmer will receive for his farm products and the high prices he will have to pay for the things he must buy.

Furthermore, unemployment is still 5.1 percent of the civilian labor force. Or, in other words, unemployment in June was 3,347,000, compared to 1,562,000 a year ago. These figures are from the Bureau of the Census and do not include those thousands on involuntary part-time work. When allowance is made for the usual seasonal movements in employment, it is apparent that we did a little better than hold our own in June.

The most recent survey by the Department of Commerce and the SEC of business intentions to invest in plant and equipment indicates a continuance over the next 3 months of the recent trend toward moderately lower levels of such investment. The prospects are for further reductions in Federal Government expenditures in coming months—probably as great or greater than the normal increase in expenditures by State and local governments.

These are but some of the evidence that would cause one to be somewhat cautious in appraising the economic outlook in spite of these rosy headlines of today. A distinguished committee of private business, labor, and agricultural leaders, of the National Planning Association, has just released an appraisal of the economic outlook which points soberly to the fact that—

> Economic activity has been leveling off at a rate of production which is about $15 billion below the rate of reasonably full employment activity. * * * Unemployment is still about 5½ percent of the civilian labor force. * * * And looking at the now visible factors of demand it is difficult to see what forces of the market under present programs and policies would be likely to lift business activity to the full employment level.

This committee then goes on to point out that if at best the economy moves sidewise this will mean not stability but growing unemployment and danger of a new downturn.

So far no factors have appeared in the situation to warrant the conclusion that demand will automatically rise significantly over the next 12 months. Yet during this time we can confidently expect an increase in the labor force of over one-half million and an increase in output per man-hour of between 2 and 3 percent. The problem, therefore, is to find means of stimulating renewed growth in demand which will absorb this growing labor force at rising levels of efficiency, for if demand does not rise above present levels we can be confident that in early 1955 unemployment will be higher.

Moving sidewise is not good enough, and that is the only interpretation one can rightfully give to today's headlines.

ILLEGAL TRANSPORTATION AND EMPLOYMENT OF ALIENS

Mr. WATKINS. Mr. President, on Monday of next week the Subcommittee on Immigration and Nationality will open 3 days of hearings on S. 3660 and S. 3661.

I have prepared a statement with respect to these two bills, including some statistics on the number of illegal entrants and apprehensions, which I

should like to call to the attention of the Senate. I do not intend to make my statement at this time, but I ask unanimous consent that the statement I have prepared may be printed in the body of the RECORD at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WATKINS

On Monday of next week the Subcommittee on Immigration and Nationality will open 3 days of hearings on S. 3660 and S. 3661. These bills have acquired the title of "The Wetback Bills," and they have the effect of providing the Attorney General with much needed and, in my opinion, long overdue weapons which he has described as necessary in order to assist him in bringing to an end the continuing mass violations of our borders by aliens who enter the United States illegally in search of employment.

The first of these bills (S. 3660) would make it unlawful for any person to employ any alien when he has knowledge that the alien has not lawfully entered the country; the second (S. 3661) would authorize the seizure and forfeiture of any vehicle or vessel used in bringing in, landing, or transporting such aliens in violation of law.

It is a shocking fact that at a time when we are all concerned, and rightly so, with measures to protect our internal security, the borders of the United States are practically wide open to anyone who desires to enter the United States unlawfully. During 1953, there were over 1 million apprehensions of aliens illegally in the country, and for each apprehension it is conservatively estimated that at least 1 other border violation occurred without detection, meaning an average of over 5,000 border violations daily.

With the force available, the Immigration and Naturalization Service has done a good job, but the apprehension statistics, which I requested from the Department of Justice, demonstrate beyond dispute that the border patrol is fighting an uphill and ever enlarging battle.

I now insert at this point in the RECORD those statistics which show the steady increase in Mexican border apprehensions from 7,438 in 1940 to 899,294 in the first 11 months of this fiscal year 1954:

Border patrol apprehensions, Mexican border districts

Fiscal year:	*Apprehensions*
1940	7,438
1941	8,104
1942	8,708
1943	11,775
1944	28,173
1945	64,368
1946	92,107
1947	183,832
1948	180,074
1949	279,379
1950	459,289
1951	501,713
1952	510,716
1953	800,618
1954 (11 months)	899,294

The Mexican border, where most violations occur, is over 2,000 miles long. At the present time the Attorney General has augmented the regularly assigned border patrol force in this area for a special drive against wetbacks. Ordinarily, however, the Immigration Service assigns approximately 750 men to guard this border, and at any one time there are no less than 200 men on duty. It is apparent that any program which relies solely on enforcement against the alien migrant to close this border effectively will be extremely costly and time consuming. The Attorney General believes, and I agree, that this border can be brought under control without a tremendously large increase in the appropriation if we proscribe those activities which most directly induce and encourage this mass migration.

Not all of the contributing factors to this wholesale invasion are within our control. For example, because of the economic disparity between the United States and Mexico, countless Mexicans cross the border illegally, eager to work at wages far below those that our domestic workers are willing to accept, and yet to the wetbacks far more than they can earn at home. In addition, while braceros may enter the United States pursuant to the International Agreement with Mexico, far more workers apply for admission than can be absorbed in the legal program. Many of those turned down come anyway.

However, some of the factors are exclusively within our control, and it is at these that the instant measures are aimed. Neither the International Agreement with Mexico nor the immigration and naturalization laws permit aliens to compete for employment with our domestic workers. They provide that employers who are unable to obtain sufficient domestic workers at the prevailing wage rates may apply to the Secretary of Labor for permission to secure alien agricultural workers. If the Secretary of Labor finds a domestic labor shortage in the area of employment and that the importation of alien labor will not adversely affect the prevailing wage rates, Mexican or other alien labor may be contracted to fill the shortage. In the case of Mexican agricultural workers, a special law applies and the contracts are under Government supervision and contain employment guaranties established by the Migrant Labor Agreement with Mexico.

Since the law does not license the indiscriminate employment of foreign laborers by any person, the legislation I am sponsoring does no more than (1) fill a gap by striking at those who knowingly exploit unauthorized sources of labor, and (2) add an additional deterrent to those who actively assist such workers to enter the United States in violation of law. The Attorney General, in his recent press release announcing his intention to seek legislation such as this, reported:

"Our experience has shown that these aliens are attracted to the United States primarily because they know they can obtain employment. Under present law it is not forbidden to employ these people, even though they are here illegally. While the alien runs the risk of fine and imprisonment, the volume of traffic is so great that it has been impossible to impose criminal sanctions except in cases of repeated and flagrant violations. Most are permitted to depart voluntarily.

"It is apparent that at present there is a need for additional deterrents to the continuing growth of this traffic. The proposal would strike this problem at its source by making the knowing employment of aliens illegally in the country and any payments to them for services rendered unlawful. It is self-evident that if jobs are not offered or available, most of these people would not seek illegal entry."

With respect to the need for legislation to permit the seizure of vehicles used in transporting such aliens, Mr. Brownell had this to say:

"While section 1324 (a) (1) and (a) (2) of title 8, United States Code, makes * * * transporting (such aliens) a felony, our experience has shown that the threat of criminal prosecution alone has not proven a sufficient deterrent to many persons who engage in this illegal activity. The principal but not exclusive target of this measure is the flourishing business of transporting aliens who migrate to this country illegally from Mexico in search of employment. In some cases, transportation starts in Mexico and ends at the prearranged place of employment. In most cases, however, the aliens are contacted in Mexico, directed to report at a designated place in the United States, where they are met and transported by 'wildcat' taxicab drivers or illicit labor contractors to unscrupulous employers who have agreed in advance to employ these people.

"It is apparent that were it not for the assistance of illicit labor contractors who contact and provide the necessary transportation for alien workers to places of employment in violation of law, many aliens would not enter the United States illegally. Taking away their vehicles and vessels will effectively bring these illegal activities to a halt."

S. 3660, entitled "The Illegal Employment of Aliens Act of 1954," makes it unlawful and contrary to the public policy of the United States for any person to employ, or offer to employ, or continue to employ, or to pay or to cause to be paid any money or thing of value to any alien when the employer knows or has reasonable grounds to believe that the alien is an illegal entrant. The bill does not, however, impose criminal liability on every knowing employment of such aliens. In this respect, recognition is given to the fact that in times of emergency farmers and other employers do occasionally require and do employ all available workers no matter what the source.

For a single violation, the bill imposes no fine or penalty. It employs the injunctive processes, which in other areas have proven most effective as a means of compelling compliance with laws, such as this, which are primarily regulatory in nature. In a case of violation, the Attorney General is authorized to apply to a Federal district court for a restraining order, and upon a proper showing the court may enter a temporary or permanent injunction or other order. Only in a case of violation of a court order or, in other words, a second knowing violation of the law in the face of an injunction, could criminal contempt proceedings be instituted.

The bill not only prohibits employment of such aliens, but expressly prohibits all payments to them. This language serves a dual purpose. It will put the alien on notice that if he enters illegally and secures employment, and the employer discovers his illegal status, he can make no claim for wages. Making it unlawful to pay such aliens will remove the major inducement which initially causes them to seek unlawful entry. On the other hand, persons who continue to violate the law by knowingly employing and paying such aliens will bring themselves within the well-recognized rule of tax law that payments contrary to the public policy of the United States and prohibited may not be taken as "ordinary and necessary" business expenses for tax purposes. (See, e. g., *Commissioner* v. *Heininger* (320 U. S. 467); *Textile Mills Corp.* v. *Commissioner* (314 U. S. 326).) In this respect the law would be no different from many other cases where payments which contravene public policy are disallowed, such as certain lobbying or advertising expenses or payments made to minors in violation of the Fair Labor Standards Act.

S. 3661, entitled the "Illegal Transportation of Aliens Act of 1954," is patterned after chapter 11, title 49, United States Code, entitled "Seizure and Forfeiture of Carriages Transporting, Etc., Contraband Articles," and the recent amendment to section 1 of title VI of the act of June 15, 1917 (40 Stat. 233, as amended), which authorizes the seizure of arms and ammunitions of war and the vehicles or vessels used in exporting or attempting to export them in violation of law. Public Law 264, 83d Cong., 1st sess., 67 Stat. 577.

Sections 2 and 3 contain well-supported findings of fact, a statement of the need for this measure, and definitions. Section 4 contains the seizure and forfeiture power and includes the normal safeguards in cases where common carriers may be involved or

where the vehicle or vessel involved was in possession of a person other than the owner in violation of law. Section 5 empowers the Attorney General to designate officers and employees of the United States to carry out the provisions of the act and sets forth the duties of such officers and employees.

Section 6 insures uniformity and procedural safeguards by making the well-tested seizure and forfeiture provisions of the customs law applicable. Thus, for example, the Attorney General is authorized to remit any forfeiture where he finds that it was incurred without willful negligence or without intention to violate the law or where he finds other mitigating circumstances.

Section 7 authorizes the expenditure of appropriations as may be necessary to carry out the provisions of the act, and section 8 authorizes the Attorney General to issue such rules and regulations as may be necessary.

I hope these bills will receive prompt attention and enactment at this session of Congress. As the Attorney General said, the problem is "now nationwide. A large percentage of illegal aliens now being apprehended in the border districts and elsewhere are not interested in finding agricultural employment except, perhaps, as a stopgap measure. They are heading for our industrial centers to obtain employment in defense plants and other industries. Both in agriculture and industry, they are displacing domestic workers, adversely affecting working conditions, contributing to our increasing crime rate, and spreading communicable disease. In addition, the size of the movement may well provide an effective screen for subversives and other undesirable persons to enter or depart from the United States."

I repeat the announcement of the hearings to commence on Monday at 2 p. m. in room 457 of the Senate Office Building and request that my colleagues take an interest in these bills and participate in the hearings.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting a nomination was communicated to the Senate by Mr. Hawks, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The PRESIDING OFFICER (Mr. BENNETT in the chair) laid before the Senate a message from the President of the United States submitting the nomination of Fred M. Taylor, of Idaho, to be United States district judge for the district of Idaho, to fill a new position, which was referred to the Committee on the Judiciary.

NOTICE OF HEARING ON NOMINATION OF FRED M. TAYLOR TO BE DISTRICT JUDGE FOR THE DISTRICT OF IDAHO

Mr. LANGER. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a hearing has been scheduled for 10 a. m., Friday, July 16, 1954, in the committee room, 424 Senate Office Building, on the nomination of Fred M. Taylor, of Idaho, to be United States district judge for the district of Idaho, to fill a new position. At the indicated time all persons interested in the nomination may make such representations as may be pertinent. The subcommittee consists of myself, chairman, the Senator from Indiana [Mr. JENNER], and the Senator from Nevada [Mr. MCCARRAN].

RECESS TO 11 A. M. TOMORROW

Mr. CLEMENTS. Mr. President, in accordance with the order previously entered, I move that the Senate stand in recess until 11 o'clock a. m. tomorrow.

The motion was agreed to; and (at 7 o'clock and 35 minutes p. m.) the Senate took a recess, the recess being under the order previously entered, until tomorrow, Saturday, July 10, 1954, at 11 o'clock a. m.

NOMINATION

Executive nomination received by the Senate July 9 (legislative day of July 2), 1954:

UNITED STATES DISTRICT JUDGE

Fred M. Taylor, of Idaho, to be United States district judge for the district of Idaho, to fill a new position.

CONFIRMATIONS

Executive nominations confirmed by the Senate July 9 (legislative day of July 2), 1954:

FEDERAL COAL MINE SAFETY BOARD OF REVIEW

Charles R. Ferguson, of Pennsylvania, to be a member of the Federal Coal Mine Safety Board of Review for the term expiring July 15, 1957.

IN THE ARMY

Appointment in the Regular Army of the United States to the grades indicated under the provisions of title V of the Officer Personnel Act of 1947:

Maj. Gen. Earle Standlee, O16530, to be major general, Medical Corps.

Brig. Gen. Paul Irwin Robinson, O17802, to be brigadier general, Medical Corps.

WITHDRAWAL

Executive nomination withdrawn from the Senate July 9 (legislative day of July 2), 1954:

POSTMASTER

Leland H. Goddard to be postmaster at Key West, Fla.

SENATE

SATURDAY, JULY 10, 1954

(Legislative day of Friday, July 2, 1954)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Eternal Spirit, whom we seek in vain without unless we first find Thee within: May the hush of Thy presence fall now upon our driven lives. In a time for greatness save us from small choices and from dwarfed perspectives. Deliver us from inner cowardice which makes us unwilling to pay the price of better things. We confess that too often we have desired the coming of Thy Kingdom, but not through us. We have sought for a new order that would leave our own lives still unchanged.

As we bow before Thee, reveal to us the false pride that inflates our petty knowledge, and grant us the humility that stoops to learn Thy ways. Give us a part in bringing in a world delivered from disorder and aggression, a humanity redeemed from the darkness which now threatens the gains of a thousand years. We ask it in the Redeemer's name. Amen.

THE JOURNAL

On request of Mr. KNOWLAND, and by unanimous consent, the reading of the Journal of the proceedings of Friday, July 9, 1954, was dispensed with.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting a nomination was communicated to the Senate by Mr. Hawks, one of his secretaries.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that immediately following the quorum call there may be the customary morning hour for the transaction of routine business, under the usual 2-minute limitation on speeches.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. KNOWLAND. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Routine business is now in order.

REPORTS OF A COMMITTEE

The following reports of a committee were submitted:

By Mr. ANDERSON, from the Committee on Interior and Insular Affairs, without amendment:

H. R. 6882. A bill to amend the act of September 27, 1950, relating to construction of the Vermejo reclamation project (Rept. No. 1784).

By Mr. ANDERSON, from the Committee on Interior and Insular Affairs, with amendments:

H. R. 130. A bill to amend section 1 of the act approved June 27, 1947 (61 Stat. 189) (Rept. No. 1785).

By Mr. KUCHEL, from the Committee on Interior and Insular Affairs, without amendment:

H. R. 4213. A bill to authorize works for development and furnishing of water supplies for waterfowl management, Central Valley project, California, and for other purposes (Rept. No. 1786); and

H. R. 6975. A bill authorizing the Secretary of the Interior to convey certain lands to the Siskiyou Joint Union High School District, Siskiyou County, Calif. (Rept. No. 1787).

By Mr. KUCHEL, from the Committee on Interior and Insular Affairs, with amendments:

S. 620. A bill to provide authorization for certain uses of public lands (Rept. No. 1788); and

H. R. 2235. A bill to authorize the Secretary of the Interior to construct the Santa Maria project, Southern Pacific Basin, Calif. (Rept. No. 1789).

BILL INTRODUCED

Mr. MARTIN introduced a bill (S. 3729) to provide for the free importation of black granite for use in monuments erected on Federal property, which was read twice by its title and referred to the Committee on Finance.

DEVELOPMENT OF PRIEST RAPIDS SITE ON THE COLUMBIA RIVER, WASH.—AMENDMENT

Mr. MAGNUSON (for himself and Mr. JACKSON) submitted an amendment intended to be proposed by them, jointly, to the bill (H. R. 7664) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act, which was ordered to lie on the table and to be printed.

AMENDMENT OF ATOMIC ENERGY ACT OF 1946—AMENDMENTS

Mr. FULBRIGHT. Mr. President, I submit amendments intended to be proposed by me to the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes. I ask unanimous consent that the amendments be printed in the RECORD for the information of Senators.

The VICE PRESIDENT. The amendments will be received and printed, and will lie on the table; and, without objection, the amendments will be printed in the RECORD.

The amendments are as follows:

On page 102, between lines 14 and 15, insert the following new section:

"SEC. 271. Disposition of revenues:

"a. All revenues of the Commission from licensing, the sale or leasing of material (including byproduct energy), or the furnishing of services, from and after the date of enactment of this act, shall be deposited in the Treasury of the United States and held in a special account, and such money shall be appropriated exclusively for the purpose of promoting the national defense and national security through grants-in-aid of primary, secondary, and higher education.

"b. An Advisory Council on Education for National Security is hereby created to be composed of 12 persons to be appointed by the President with regard to their experience in the relationship of education to national defense and national security, of whom six shall be from the fields of education and research in the natural and social sciences. It shall be the function of such council to recommend to the President for submission to the Congress not later than ——— a plan for the allocation of grants-in-aid of primary, secondary, and higher education provided in subsection a. of this section."

On page 102, line 15, strike out "SEC. 271" and insert in lieu thereof "SEC. 281."

On page 102, line 19, strike out "SEC. 281" and insert in lieu thereof "SEC. 291."

On page 102, line 24, strike out "SEC. 291" and insert in lieu thereof "SEC. 301."

EXECUTIVE MESSAGE REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate a message from the President of the United States submitting the nomination of Paul W. Cress, of Perry, Okla., to be United States attorney for the western district of Oklahoma, vice Robert E. Shelton, resigned, which was referred to the Committee on the Judiciary.

IKE, THE BUILDER

Mr. CASE. Mr. President, passage of the military public works bill last night brings to four the major legislative acts which authorize significant construction programs this year with which it has been my privilege to be associated. They are:

First. The Federal Aid Highway Act of 1954, which authorizes a billion-dollar highway program for each of 2 fiscal years, and initiates several new features in Federal highway legislation.

Second. The District of Columbia Public Works and Revenue Act, which opens a new era in development of the Nation's Capital City.

Third. The Lease-Purchase Public Buildings Act of 1954, which provides a way for the Government to catch up on its office and post office building needs throughout the country.

Fourth. The military public works bill, just passed, that places new emphasis upon construction of modern defense and strategic installations, including a system of aerial navigational aids, known as TACAN, that will be immensely useful to civilian as well as military aircraft.

In addition, under the leadership of the man in the White House who never lets the litter clutter his vision of a landscape, this Congress has authorized United States participation in the long-talked-of St. Lawrence Seaway; and there are pending in the House an omnibus flood control authorization bill, and in the Senate a major Federal-aid school construction bill.

All this leads me to say, Mr. President, that when the story of our times is written, the Eisenhower administration may well go down in history as the administration of "Ike, the Builder," and leads me to suggest two other epochal construction programs, to authorize which I shall introduce proposed legislation on next week. They are:

First. A transcontinental highway, east and west; and a mid-continent highway, north and south.

Second. A modern-ship, bombproof, sea-level canal to connect Atlantic and Pacific.

The transcontinental highway should reach from New York to Portland, avoiding, but serving, the major cities and industrial centers. It should utilize, as far as possible, existing super-express highways, so as to expedite the completion date; but the entire project should be broadly conceived and designed, so as to serve the needs of the Nation in peace or war for a hundred years or more.

The midcontinent highway is hardly less important. A foundation has been laid by the study of a river road, authorized in our highway bill, designed to be an artery of traffic from the upper Mississippi to the Gulf.

The sea-level canal is needed to permit passage of our large carriers safely across the Isthmus, and to escape the certain destruction that a single small A-bomb could achieve on the outdated Panama Canal. One bomb could ruin Gatun Lake and could put the canal out of commission for 2 years.

These two programs are not beyond the capability of the United States. In a subsequent statement I shall outline ideas for their prosecution. They would, in my judgment, Mr. President, be a proper and fitting part of the construction program of "Ike, the Builder." They would express in irrefutable fashion the President's confidence and our faith in a great and growing America.

SPLIT BIDDING IN CONNECTION WITH SHIP CONSTRUCTION

Mr. LONG. Mr. President, I ask unanimous consent to have printed in the RECORD following my remarks a statement which I prepared with reference to an amendment to S. 3546, the 1954 Emergency Ship Repair Act, relating to split bidding in connection with ship construction.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LONG

On last Thursday, July 8, I proposed, and the Senate adopted, an amendment to S. 3546, the 1954 Emergency Ship Repair Act. This amendment concerns a matter which is of great interest to both the Government and to an important segment of the shipbuilding and repair industries.

It involves the practice known in the trade as split bidding. This means that separate bids are requested for work which requires drydocking and for work which does not require the use of drydocking. This splitting of the bids permits a wider area of competition and has been used with success by the Maritime Administration and other Government departments for some time.

The practice is also used almost universally, I am told, by the subsidized ship lines in those instances where they have total overhauling jobs for their vessels. In my own State the Lykes Bros. Steamship Co. uses this practice almost invariably.

The very great saving which is accompanied by the use of this practice is very well illustrated in a letter from Mr. Louis S. Rothschild, Administrator of the Maritime Commission, addressed to Senator BUTLER and dated June 4, 1954. This letter appears on page 211 of the hearings before the Subcommittee of the Interstate and Foreign Commerce Committee, held pursuant to Senate Resolution 173. See attachment No. 1.

It will be noted that on two ship repair jobs there was a saving of 52.4 percent and 47.1 percent, respectively. Presumably, Mr. Rothschild selected these instances because they were representative, and I think all Senators will agree with me that a saving of 50 percent is indeed an important economy.

Mr. Rothschild also points out in this letter that the companies, including those without drydocks, which participate in this type of work are required to hold maritime master lump-sum repair contracts. These contracts require that the repair yard have qualified workers on its payroll, that it have adequate facilities and equipment, that it

be an established and recognized company, that it have adequate and full insurance coverage, and that it be financially stable. To prove its financial stability, a financial statement is required to be put on file each year with the Government department concerned.

In the port of New Orleans I understand that there are at least 4 repair yards which have held these master repair contracts for more than 15 years. I believe, Mr. President, that these independent repair yards have proved their competence over such a long period of time and are well deserving of an opportunity to share in this program.

It would, in fact, be not only against the interest of the Government from the standpoint of the economy, but also from the standpoint of national defense if bids were not so handled that these yards could compete for the considerable amount of repair work which would be authorized under this program.

The record has been made rather completely, so far as the need for additional work by the large shipbuilding and drydock companies are concerned.

I should like to review very briefly the advantages which I believe will be gained by the use of split bidding for at least a substantial portion of the repair work to be done under S. 3546:

1. Due to the very considerable reduction in cost, the Maritime Administration will be able to rehabilitate and modernize a great many more vessels than would otherwise be possible. It may not be correct to assume that the same saving would always be achieved as in the case of the two vessels referred to by Mr. Rothschild, but if this should prove to be the case, almost twice the number of vessels would be in a state of readiness.

2. A great many more workers will be gainfully employed, and the very special difficulties which arise from the separation of skilled workers from ship repair yards is well known.

3. Every recognized and qualified ship repair company will be provided an opportunity to compete for the repair work involved. Thus, the program will not be discriminatory, and its benefits will go to all those directly concerned rather than a few large companies.

I fully recognize the difficulties being experienced by these large companies, and I desire that they benefit in a fair and reasonable manner from this program. As passed by the Senate, this bill will certainly insure that they have equal opportunity to do so.

I very much hope that the inclusion in the RECORD of these remarks will be of some assistance to the Maritime Administrator, who will be responsible for carrying out this program. In the event it should be necessary to appoint a Joint Conference Committee, assuming the adoption by the House of the bill with amendments, I also wish to call these considerations to the attention of the Senate conferees, in order that they will be well aware of the importance of this practice of split bidding.

DEPARTMENT OF COMMERCE,
MARITIME ADMINISTRATION,
Washington, D. C., June 4, 1954.

Hon. JOHN M. BUTLER,
United States Senate,
Washington, D. C.

DEAR SENATOR BUTLER: As requested at the hearing on the reserve fleet repair program, held by your subcommittee Wednesday afternoon, May 26, 1954, the following information is submitted on the actual experience of the Maritime Administration as a result of using split bids as well as all-inclusive bids in connection with two ships involved in the reactivation program of 1950–51:

All-inclusive bid

Ship	Port	Date	Rejected low bid
James Bennet Moore	New York	April–May 1951	$164,066
Harold Dosset	do	do	174,859

Split bid

Negotiated drydock work	New low bid (topside)	Total cost	Saving
			Percent
$21,364 (Brewer Drydock Co.)	$65,425 (the Turbine Engineering Corp.)	$86,789	47.1
$14,330 (Todd Shipyard Corp., New York)	$68,890 (Kane Ship Repair Co.)	83,220	52.4

At the time of these reactivations, all of the companies indicated above were holders of maritime master lump-sum repair contracts and were considered competent and responsible contractors in their respective fields.

The Maritime Administration uses both the all-inclusive bid and the split-bid procedures as the circumstances warrant. Jobs where voyage repairs involve major underwater work with minor topside items are usually handled under a single all-inclusive specification with invitations to bid limited to repair contractors having drydock facilities.

Where drydocking is not involved, all repair contractors in the area qualified to do the work are invited to bid. However, when a major reactivation is contemplated or when topside repairs constitute the major portion of the work required, invitations are sent out on a split specification basis with drydocking and underwater work negotiated and the topside work done on a bid basis.

As may be seen from the above tabulation, our actual experience indicates that the use of the split-bid basis has resulted in a substantial reduction in cost to the Government.

I trust that the above information will be satisfactory to your subcommittee.

Sincerely yours,

LOUIS S. ROTHSCHILD,
Maritime Administrator.

STATEMENT OF R. H. MORVANT, EXECUTIVE DIRECTOR, MANUFACTURERS AND REPAIRERS ASSOCIATION OF NEW ORLEANS

While the member companies of this association are not interested in merchant ship construction per se, they are, however, interested in any program which will benefit the shipbuilding and repair industry as a whole.

The Manufacturers and Repairers Association represents ship repair yards, industrial machine shops and other contractors and subcontractors affiliated with the ship-repair industry. The member companies of this association play a distinctive and important part in the efficient and continued movement of United States vessels.

The facilities of these companies enable them to perform economically and efficiently any and all types of ship repair work that does not require drydocking. It is customary for these companies to bid on work throughout the Gulf coast area and occasionally to enter national competition for ship repair work.

The ship-repair work in the gulf-coast area, which has a direct bearing on the future of each member company of this association, has deteriorated to a point where the economic stability of the ship-repair activities of the industry is in jeopardy. This condition has stemmed from a number of factors which are outlined briefly below.

During the period from 1933 to 1940, which is the period immediately preceding World War II, the ship-repair industry enjoyed an unusual distinction in that the employees in this area were content to remain in the industry, in preference to seeking employment in other trades and industries. This occurred because the ship-repair industry, while always a spasmodic one, at that time paid relatively high wages in comparison to other industries.

Further, the ship-repair industry has always paid double time for overtime, and as considerable overtime has been worked in our industry, this allowed the employees a greater take-home pay in comparison to jobs in other industries. Overtime is necessary due to the importance of sailing a ship on a determined schedule and to avoid more costly delays. In addition, our area, the South, was not as industrialized then as it is now; consequently there were less opportunities for the workers to leave the ship-repair industry.

From the period 1940 through 1945, the ship-repair industry was geared to all-out war effort. Competitive bidding during this period was eliminated, and work was allocated to each yard on the basis of the capacity of that yard to handle the job. As each job was completed, new work was immediately assigned to take up the slack in the idle facilities.

All work was performed on a negotiated price basis and composite rate schedules with fixed markups on materials and subcontracting. During this period, the ship-repair industry definitely established its importance in defense work in any national emergency.

From the period 1946 through 1948, the ship-repair industry went from the all-out war effort to the reconversion program, and from an allocated work basis to one of highly competitive bidding. During this period immediately following World War II, the existing industrial plants in the area underwent tremendous expansion programs and many new industrial plants moved into the gulf-coast area.

This gradually gave impetus to the exodus of the ship-repair workers from the ship-repair industry to more stable industries and at a higher rate of pay. Not only did they leave to become construction workers, but as the construction jobs were completed, these same workers became production and maintenance employees in the industrial plants they helped build.

From 1948 to 1950, the period immediately prior to the Korean incident, the ship-repair industry of the gulf-coast area underwent a famine as far as ship-repair work was concerned. The reconversion period came to an end, and all ships not immediately needed were then resting in the laid-up fleet. The steamship companies were operating a minimum number of ships in order to weather the economic recession period.

Immediately after the Korean incident and the acceleration of the ECA program,

numerous ships were broken out of the laid-up fleet for reactivation. The reactivation program continued from the inception of the Korean incident until the latter part of 1951. Shortly thereafter, a deactivation program began which has subsequently been completed.

We have been reliably informed that the ships now resting in the laid-up fleet will remain there until an all-out emergency exists, and from all indications this has been borne out. This leaves the ship-repair industry at the present time, and as far as the foreseeable future is concerned, with the very grave decision of maintaining their ship-repair facilities with no prospective future.

The ship-repair industry has undergone a complete industrial and economic revolution in the past 3 years which, as pointed out, leaves the ship-repair activities of the industry in doubt.

First and foremost is the shortage of skilled workers in the industry. The ship-repair worker is peculiar in that while he may carry the classification of machinist or boilermaker or pipefitter, he must be capable of tasks beyond the skill of the same type of worker in other industries.

A ship-repair worker is trained to a highly specialized degree. He is required to dismantle and repair equipment with which he is unfamiliar and place this equipment in the proper working order, even though it may necessitate the fabrication of a broken part not easily obtainable. The skill which these workers acquire enables them to enter other industries at higher rates of pay than is ordinarily paid their classifications due to their ability to use their own initiative in preference to being led.

Because these workers are of such a high caliber in their trade, it is not unusual for other industries to seek them out indiscriminately from the ship-repair industry. Once these workers are lost to the industry they are beyond recall unless we can assure them stability in employment and a secure economic status. It may be assumed by the uninitiated that the obvious answer is a higher base rate of pay. This, however, is definitely not the correct answer.

In accordance with our calculations, a vast majority of the ships now entering our ports are flying foreign flags. Repairs on foreign-flag vessels in this area are generally limited to emergency jobs only. This is because foreign-flag vessels prefer to take advantage of lower operating costs and lower maintenance and repair costs of foreign countries.

This condition is all part and parcel of the revolution in the industry. Any further appreciable increase in wages for ship-repair workers could very well decrease the amount of repairs available on foreign-flag vessels. This further points out the fact that increased rates for ship-repair workers is definitely not the answer.

From the period 1940 through 1951 the Maritime Administration contributed substantially to the stability of ship-repair work in this area. While the jobs were on a highly competitive basis, there was ample work to maintain the ship-repair facilities above the break-even point. From all indications, the foreseeable future holds very little or no Maritime Administration work.

The Maritime Administration activities at this time are virtually at a standstill. We have been reliably informed that for an indefinite period no activities are anticipated. During the last deactivation program the ships being deactivated were only partially preserved. It was the understanding that the ship-repair companies would perform the permanent job if these ships were to be laid up permanently.

In the past 4 years, as pointed out previously, the industry entered into a highly competitive period. This, coupled with close checking by the independent steamship companies, resulted in abnormally low profits for the industry. When these companies were enjoying the profits as are customary for the industry, they were able to maintain their organizations and carry a cadre of workers over a period of time without seeking assistance.

However, as a consequence of the abnormally low profits, these companies are unable to maintain their organizations and carry an appreciable work force for any length of time. These companies need assistance in holding their organizations together. To accomplish this objective they must be in a position to assure their workers steady employment and their organizations a financial break-even on their ship-repair operations.

This industry is recognized as a vital component part of the defense program. We believe these facilities and organizations should be maintained in some way to prevent the loss of manpower and the deterioration of the plants and equipment. Some program should be established to protect this industry in order that it be available in the event of an all-out emergency. Any program which is adopted in order to stimulate the ship repair industry should definitely be on a competitive split-specification basis.

We are not alone in calling attention to the critical condition of the ship repair industry. Other organizations and companies have brought this matter to the attention of interested Government agencies who have concurred in the seriousness of the situation. Numerous surveys, studies, and hearings have been conducted which have proven time and time again the rapid economic decline of the ship repair industry. The industry is in acute need of an immediate emergency program to stimulate ship repair activities in the industry. The patient has been examined enough, the diagnosis is complete. We should start treatment immediately before the patient is dead or too weak to recover.

Mr. Louis S. Rothschild, Maritime Administrator, presented to the Water Transportation Subcommittee of the Senate Committee on Interstate and Foreign Commerce the scope of a program of repair work based upon a review of the latest mobilization requirements for vessels in the National Defense reserve. This program is a good one and should give immediate relief to the ship repair industry. In adopting this program it should be clearly understood that contracts shall be awarded under the competitive split-bid procedure.

By continuing the present Maritime Administration policy of competitive split-bid procedure on ship repair work, the following shall occur:

1. An equal opportunity shall be afforded every ship repair company to obtain work;

2. More vessels can be rehabilitated at a substantial reduction in costs to the Government;

3. More workers shall be gainfully employed;

4. More vessels shall be available in case of a national emergency; and

5. Discrimination against any individual or group would be prevented.

It is to the interest of both the public and the Government that the facilities of the member companies of this association be maintained. The activities of these member companies are important to the public because, through their ship repair activities in the past, they, in common with the entire ship repair industry, have contributed substantially to the flow of commerce through their respective ports. Should these facilities deteriorate, shipping companies will be unable to obtain repairs in the various ports and therefore would not be interested in shipping from ports where they could not obtain necessary maintenance and repair jobs. This, in turn, would have a drastic effect on the local economy.

It is the desire of these member companies to remain in the ship repair business as they have since World War I. To accomplish this objective they must be in a position to assure their workers steady employment and their organizations a financial break-even on their ship repair operations. Since these organizations represent the majority of the ship repair facilities in the New Orleans area, it would be a grave mistake to permit them to fall apart.

THE CALENDAR

The VICE PRESIDENT. If there be no further routine business, under the previous order, the call of the calendar is in order.

The measures previously ordered to be included in the calendar call will be called first.

APPOINTMENT OF CERTAIN OFFICERS OF THE REGULAR NAVY AND MARINE CORPS—BILL ORDERED TO FOOT OF CALENDAR

The bill (H. R. 6725) to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps was announced as first in order.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. SCHOEPPEL. Mr. President, reserving the right to object, may we have an explanation of the bill?

The VICE PRESIDENT. An explanation is requested.

Mr. SCHOEPPEL. Mr. President, under the circumstances I ask that the bill be placed at the foot of the calendar, so that those responsible for it may be on the floor at the time when it is reached.

The VICE PRESIDENT. Without objection, the bill will be placed at the foot of the calendar.

IDENTITY OF CERTAIN COMMUNIST-INFILTRATED ORGANIZATIONS—BILL PASSED OVER

The bill (S. 3706) to amend the Subversive Activities Control Act of 1950 to provide for the determination of the identity of certain Communists-infiltrated organizations, and for other purposes, was announced as next in order.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. LEHMAN. Mr. President, reserving the right to object—and I shall object—let me say this bill is highly complex. It affects many millions of persons. It directly affects between 15 and 20 million men and women in organized labor. It also affects many other groups of our population.

I have not had an opportunity of studying this legislation and I am therefore not sure what position I shall ultimately take regarding the bill. The bill, however, is of such great importance and is so technical and complex and so difficult to understand, that I am sure it should not have a place on the consent calendar. I very much hope that ample time will be given to the Members of the Senate to study the bill carefully and to consult with others regarding it, before it is brought up for consideration and action in the Senate. The bill may have very widespread effects.

Therefore, Mr. President, I object.

The VICE PRESIDENT. Objection being heard, the bill will be passed over.

GERASIMOS GIANNATOS

The bill (S. 120) for the relief of Gerasimos Giannatos was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Gerasimos Giannatos shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota officer to deduct one number from the appropriate quota for the first year that such quota is available.

OTMAR SPRAH

The bill (S. 231) for the relief of Otmar Sprah was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Otmar Sprah shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon the payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

HUGO KERN

The bill (S. 232) for the relief of Hugo Kern was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationalty Act, Hugo Kern shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon the payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

FREDERICK WIESINGER

The bill (S. 808) for the relief of Frederick Wiesinger was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Frederick Wiesinger shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the appropriate quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

JAN E. TOMCZYCKI

The bill (S. 810) for the relief of Jan E. Tomczycki was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Jan E. Tomczycki shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence of such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

ALICE MASARYK

The bill (S. 1212) for the relief of Alice Masaryk was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That for the purposes of the Immigration and Nationality Act, Alice Masaryk shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

Mr. LEHMAN. Mr. President, I should like to make a brief statement with regard to the bill just passed. I am very happy that the bill has been approved. I have known Alice Masaryk for more than 50 years. She is the daughter of the first President of Czechoslovakia, Thomas G. Masaryk, who was a great patriot, a great leader, and a great democrat. She is the sister of my very close friend, the former Prime Minister in exile of Czechoslovakia, later Foreign Minister of his splendid Republic, who was murdered or driven to his death because of criminal Communist pressure and action. He was a great man, as was his father—patriotic, loyal, and an ever vigorous fighter for freedom. I had the honor of being decorated by him on behalf of his government, the very afternoon he left for Czechoslovakia, from which he never returned.

I am very happy indeed that this fine woman will now be able to become a citizen of the United States and I heartily welcome her.

APPOINTMENT OF CERTAIN OFFICERS OF THE REGULAR NAVY AND MARINE CORPS

Mr. SALTONSTALL. Mr. President, I am informed that Calendar No. 1652, House bill 6725, which was called first, was placed at the foot of the calendar. I was conducting a hearing in the Committee on Appropriations and was notified to come immediately to the Chamber. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate proceeded to consider the bill (H. R. 6725) to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps.

Mr. SMATHERS. Mr. President, will the Senator yield so that I may ask him a question?

Mr. SALTONSTALL. I yield.

Mr. SMATHERS. I ask the Senator from Massachusetts whether or not the senior Senator from Colorado [Mr. JOHNSON] has talked with him about an amendment to the bill.

Mr. SALTONSTALL. He has not, but I know what his amendment is, and I have been approached on the subject.

Mr. SMATHERS. If it is satisfactory to the Senator from Massachusetts, if he will accept the amendment I will offer it in the name of the Senator from Colorado, so that prompt action may be taken on the bill.

Mr. SALTONSTALL. I will accept it, but I should like to make a brief statement concerning the bill and the amendment.

This bill is to provide a 1-year extension of the present authority whereby Navy and Marine Corps reservists are permitted to transfer to regular status. It affects some 400 naval officers. If the bill is not passed promptly those young men will be put back 24 months in their integration into the service. Therefore it is very important to pass the bill promptly.

The amendment of the Senator from Colorado has nothing to do with the bill itself. The amendment of the Senator from Colorado would make it possible for officers toward whom an injustice was done during World War II to receive the promotions which they feel they deserve.

The Senate has twice passed a bill on this subject, once this year, in April, and once a year ago. Those bills have been held up in the House.

I have no objection to taking this amendment to conference in order, if possible, to draft language similar to the language which the Senate has previously approved.

Let me say to my colleague from Florida, and through him to the Senator from Colorado, that the principle of the pending bill is very important to the young officers affected by it, because, as I say, if the bill is not passed, some four hundred will lose their rights to promotion for 24 months.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. SALTONSTALL. Let me conclude, and then I shall be glad to yield.

I shall be glad to take the first part of the amendment of the Senator from Colorado to conference. The other part of the amendment concerns two men, Commander Rawlins and Commander Shanahan. Those cases have been before this body for a good many years in one form or another. Yesterday for the first time I saw a letter from the present Chief of Naval Operations, Admiral Carney, who believes an injustice was done to Commander Rawlins. I also saw a statement attributed to—and I say that so as to be factual—Admiral Denfeld, former Chief of Naval Operations, and the former head of personnel in the Navy. He also favors Commander Rawlins. For that reason, I believe his case should be given very thoughtful study, and I am glad to take the amendment to conference.

I do not know so much about Commander Shanahan's case; in fact, I do not know anything about it; but I am willing to take those two cases to conference, together with the general principle involved in the amendment of the Senator from Colorado, and try to devise suitable language. If the bill should be held up in conference, the promotion rights of some 400 naval officers would be affected. We do not wish that result. We shall do our best to see what can be done.

With that statement, I am glad to accept the amendment. I now yield to the Senator from Oregon.

Mr. MORSE. Mr. President, I think the Senator from Massachusetts is being very fair about this matter. I think the amendment should go to conference. I wish to reinforce his statement that the promotions provided for in the bill, so far as the 400 or more Navy and Marine Corps officers are concerned, certainly should be made at a very early date.

The Senator from Massachusetts did not mention—but I think it should be mentioned—that, in addition to the particular marines he has in mind, there are also involved a small number of Korean war prisoners who are entitled to promotion. There is a moral commitment and a moral obligation in regard to those Americans who served in the Korean war and who were taken prisoner. They would have been eligible for promotion to higher ranks if they had not been taken prisoner. As I understand, the military authorities seek to do justice to them by including them—and they are relatively a small number—within the number covered by the bill. Therefore, I am glad to join with the Senator from Massachusetts in his point of view that the bill should be passed today, because time is of the essence. We ought to do justice to the particular officers covered by the terms of the bill.

Let me say a word as to the amendment of the Senator from Colorado [Mr. JOHNSON]. I am delighted that the Senator from Massachusetts is willing to take the amendment to conference, to see if some adjustment of these cases cannot be made in conference. I am very familiar with the Rawlins case. Like the Senator from Massachusetts, I am not particularly familiar with the second case, the Shanahan case, though I recall that there was some discussion of it while I was still a member of the Armed Services Committee.

The Rawlins case is an old case. It is a case in which a majority of the Armed Services Committee have felt for some years an injustice was done by the military. The military has been on notice in that respect for a long time.

In my judgment, the military has been very uncooperative with regard to this case. I think the evidence is clearly against the officials at the Pentagon. As a member of the Armed Services Committee, I very reluctantly came to the opinion that there is prejudice in the Pentagon against Commander Rawlins because of what he has done to protect his rights since the injustice was done to him by the military. I have tried to get the officials at the Pentagon to see that in dealing with such a case as this we should look at the point of the injustice in the first instance. Human beings react differently. It is true that Commander Rawlins has made a fight to protect his rights. He has appealed to Members of Congress with regard to this injustice. I do not need to tell Senators that such action is not looked upon with favor at the Pentagon.

When one talks, as I have, with many of these officials in the Pentagon, it is very interesting to note that in the conversation they always get around to the point of speaking about what Rawlins had done to protect his rights. I have always said, "I am not interested in what he did to protect his rights. I am interested in what you have to say as to whether or not an injustice was done to him when he did not receive a promotion."

The Senator from Massachusetts states that he was not aware of the Carney letter. I have been aware of the Carney point of view for many years, because I remember we discussed it several times in the Committee on Armed Services, where the representation was made that Admiral Carney believed that this man should have been promoted. That is very strong evidence bearing upon whether or not an injustice had been done, because Commander Rawlins served under Admiral Carney, and it is my understanding that Carney has an exceptionally high regard for the qualifications of this officer.

I did not know of the Denfeld statement. That is news to me. However, I am glad to learn that Admiral Denfeld also shares Admiral Carney's point of view.

I wish to say that the Pentagon ought to learn a lesson from this case. I am glad the Senator from Massachusetts is willing to take the amendment to conference, because twice now the Senate by legislation has sought to do justice in this case, and we have not been able to get such legislation through the House, although we have gotten it through the Senate.

The Pentagon, in my judgment, has been stalling on the case. I hope that as a result of the action today we can get a satisfactory solution worked out in conference, so that at long last justice will be done to these men, if I am right in my contention that an injustice was done in the first instance.

Mr. SALTONSTALL. Mr. President, I thank the Senator from Oregon for his contribution. The letter I was referring to is a new letter from Admiral Carney, written within a month or so, since he was appointed Chief of Naval Operations.

The VICE PRESIDENT. The time of the Senator from Massachusetts has expired.

Mr. JOHNSON of Colorado. I shall not take more than 5 minutes. All I want to say is that I thank the Senator from Massachusetts for his very fair attitude toward this very difficult matter and the attempt to do justice to Commander Rawlins.

I ask unanimous consent to have printed in the RECORD at this point a statement I have prepared dealing with the proposed amendment which the Senator from Massachusetts has agreed to take to conference. I ask that the statement be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT ON PROPOSED AMENDMENT TO H. R. 6725

We in America have come to accept as axiomatic the principle that "justice delayed is justice denied." The amendment that I offer has for its aim a single purpose—justice, justice now already 5 years overdue, justice the denial of which led directly to the useless destruction of the honorable lifetime careers in the Regular Navy of at least two capable officers.

In considering this amendment, let us recall the case of Admiral Rickover, only 1 year ago. Had the Armed Services Committee of the Senate, under its distinguished fairminded leader Senator SALTONSTALL, not taken appropriate vigorous action to compel the Navy Department to promote Rickover at the 11th hour from captain to rear admiral, Rickover would today be on the retired list of the Navy. The promotion was forced through, despite bitter, blind resistance within the Navy Department; a great man consequently was saved for the Navy solely by senatorial action.

The amendment I offer has nothing to do with the Rickover case except insofar as it is made necessary by the same blind resistance within the Navy Department that characterized their position on Admiral Rickover. My amendment at this late date would rectify and redress two fully established and

proven cases of injustice of wartime nonpromotion to captain in the Regular Navy—the cases of Comdr. Edward K. Shanahan and Comdr. Edward W. Rawlins. Both these officers were on the active list of the Regular Navy throughout World War II and for many years prior and subsequent thereto—Shanahan had nearly 27 years and Rawlins nearly 31 years continuous honorable efficient service. Both established the existence of injustice long before their untimely retirement as commanders. Both retired because justice in the form of timely promotion to captain which they had earned and for which they proved they were well fitted was denied them.

In addition to affording long-overdue direct redress to Commanders Shanahan and Rawlins for the injustices established in their cases, my amendment would afford an avenue of relief to any other career officer having a case comparable to the Shanahan-Rawlins cases. This feature of my amendment embraces a concept of legislation that has three times passed the Senate—once in 1949, once in 1951, and once in 1954—but which each time has hit some snag on the House side, although in 1950 the House Armed Services Committee did favorably report with amendments the Senate bill of 1949.

The concept of direct legislative relief and redress for Commander Shanahan finds most powerful support in the decision of the Navy's own Board for the Correction of Naval Records dated June 14, 1949, which the Navy Department then blithely and callously chose to reject. That decision reads as follows:

"(a) That the Secretary of the Navy initiate such action as may be necessary to completely rectify the established injustice, by effecting the promotion of Commander Shanahan to the rank of captain, United States Navy, with appropriate adjustment of lineal position.

"(b) It is contemplated by the Board that the above remedy should be accomplished by executive appointment of the President or, as an alternative by act of Congress; and in either case upon the recommendation of the Secretary of the Navy."

A quirk of existing law embedded in the old Naval Appropriation Act for fiscal year 1883 bars the President from appointing a retired officer of the Navy to a higher grade or rank. Oddly enough, no such bar exists in the case of the Army or Air Force, nor I believe even of the Marine Corps.

The concept of direct legislative relief and redress for Commander Rawlins does not come from the Board for the Correction of Naval Records. Why not? For the very simple reason that on January 14, 1949, the Navy Department declined even to grant Commander Rawlins a hearing before that Board. And this at the very time the Shanahan case was and for 13 months had been before that Board. Can anything be more inconsistent and absurdly unfair? As an American citizen Commander Rawlins then had only one recourse left to him—the American Congress. In support of direct legislative relief and redress for Commander Rawlins, officers of the highest rank in the Navy have testified either in person or by letter before the Armed Services Committees of the Senate or House or both; they include: Adm. Robt. B. Carney, United States Navy, present Chief of Naval Operations; Adm. Louis Denfeld, United States Navy (retired), former Chief of Naval Operations; Adm. Thos. C. Hart, United States Navy (retired), former United States Senator and former Commander in Chief, United States Asiatic Fleet; Vice Adm. F. C. Denebrink, United States Navy; Rear Adm. E. E. Stone, United States Navy; Rear Adm. (then captain) Ralph E. Wilson, United States Navy; Rear Adm. W. S. Parr, United States Navy (retired).

In addition, at least four other vice admirals in official communications (letters or fitness reports) to the Navy Department while Commander Rawlins was still on the active list recommended him emphatically for promotion to captain, United States Navy.

Furthermore in the 81st Congress on June 23, 1949, the Senate Armed Services Committee in Report No. 562, stated in part as follows:

"In the specific case of Commander Rawlins, there was evidence that he was an officer of excellent abilities with a long and favorable record in the Navy. * * * Evidence was submitted to the committee both in verbal testimony and in the form of letters to the committee by highly placed officials of the Navy Department, including many former superiors of Rawlins, to the effect that they felt an injustice had been done. There was complete unanimity among even the official representatives of the Navy Department that Commander Rawlins was and is qualified to perform the duties of captain. * * * It was the opinion [of the committee] that the case presented in behalf of Commander Rawlins had considerable merit." (From report by Senator LYNDON JOHNSON, of Texas.) And the House Armed Services Committee Report No. 3012 (81st Cong.), dated August 29, 1950, contains these significant sentences:

"There is ample evidence in the record that Commander Rawlins may have suffered due to an administrative error. It appears that a letter was missing from his file [i. e., in the Navy Department] which would have refuted a detrimental statement concerning him."

Here we have two cases of established, unequivocally proven injustice that wrongfully cost two able officers their life careers in the Navy. Congress and Congress alone can redress these wrongs to a measurable degree. Even Congress cannot fully compensate these two officers for the destruction of their life careers and the humiliation unnecessarily visited upon them and their families. But we can at least do what my amendment provides and thus in part discharge a duty that rests upon our shoulders. Let us do it now, Mr. President. Let us remember that these injustices are more than 10 years old and have a legislative history of over 5 years. Let us approve this amendment with the thought in mind that "justice delayed is justice denied."

Mr. JOHNSON of Colorado. Mr. President, I should like to ask the Senator from Massachusetts whether the letter he was referring to might be the letter that was written by Admiral Carney to the Honorable LESLIE C. ARENDS, House of Representatives, under date of June 14, 1954.

Mr. SALTONSTALL. That is correct.

Mr. JOHNSON of Colorado. Has that letter been made a part of the RECORD?

Mr. SALTONSTALL. It has not been made a part of the RECORD.

Mr. JOHNSON of Colorado. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a letter with respect to this matter which was written by Admiral Carney to the Honorable LESLIE C. ARENDS, House of Representatives, Washington, D. C., under date of June 14, 1954.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CHIEF OF NAVAL OPERATIONS,
Washington, D. C., June 14, 1954.

The Honorable LESLIE C. ARENDS,
House of Representatives,
Washington, D. C.

MY DEAR LES: Commander Rawlins informs me that the subcommittee, of which you are chairman, has scheduled hearings on S. 1063 for 10 a. m. Thursday the 17th. This bill is related to Commander Rawlins' efforts to redress what he considers to have been an injustice in his case.

Ed Rawlins has asked me to appear or, if that is not possible, to address a letter to you on the subject. The days are all too short for the accomplishment of the things for which I am responsible and for that reason I would hope that it would not be necessary for me to attend. However, I would like to give you some background concerning my interest in Rawlins' case.

Owing to circumstances which would be Rawlins' responsibility to explain, he was not promoted to the rank of captain with his contemporaries and classmates. When he first endeavored to obtain relief legislation, he called on me to express my views because of the fact that he had worked directly under my supervision during the early part of the war and because I was in a position to give some evaluation of his services during the latter part of the war. In the course of interrogation by congressional committees, and in personal letters relating to the case, I expressed the opinion that Rawlins' performance during the war was such that he did not deserve to be singled out from all of his classmates for denial of promotion. I have seen other correspondence from his superiors which lends support to Rawlins' contention that there was a miscarriage of administrative justice in his case.

The Navy Department has consistently taken a position opposing legislation that has been introduced in favor of promoting Commander Rawlins on the retired list (and other advantages). My own personal position remains unchanged from that indicated in committee records and my earlier personal letters on this subject.

I am not officially aware of the position which the Navy Department will take with respect to S. 1063, nor with particular respect to Commander Rawlins' case, but in discussing the matter with the Secretary of the Navy, I have said that my earlier conclusions were arrived at after the most careful consideration and that I still support them even though the Secretary of the Navy may, on the basis of his own considered judgment, consider Commander Rawlins' claim to be not valid.

I am writing this by way of informing you and your subcommittee that I personally adhere to my earlier conclusions with respect to that aspect which relates to promotion to the rank of captain on the retired list. I would not be prepared to support the proposal which was made at one time providing for promotion to the rank of rear admiral. With respect to any matters concerning arrears in pay, I would have no recommendation to make.

In view of the fact that my own convictions in Commander Rawlins' case were reached several years ago and were predicated on personal knowledge and careful consideration, I would be unable to abandon them, regardless of any later position which might be adopted by the Navy Department per se. Inasmuch as these earlier and still continuing convictions may be at variance with the policies or determinations of the Secretary of the Navy, I am furnishing him with a copy of this letter.

I would be very grateful if you found it not necessary for me to personally attend the hearings on S. 1063 and I trust that this letter, and certain documentation which Commander Rawlins can furnish you, will suffice insofar as I am concerned.

Cordially and respectfully,

ROBT. B. CARNEY,
Admiral, United States Navy.

The VICE PRESIDENT. The bill is open to further amendment.

Mr. SMATHERS. Mr. President, has the amendment which has been offered by the Senator from Colorado been adopted?

The VICE PRESIDENT. The amendment has not been offered.

Mr. SALTONSTALL. Mr. President, I simply wish to say if the Senator from Colorado will yield me a minute or two——

Mr. JOHNSON of Colorado. I am glad to yield.

Mr. SALTONSTALL. The Senate has already twice passed the first part of the amendment offered by the Senator from Colorado, perhaps in a slightly different form. The second part of the amendment concerns two specific cases, the case of Commander Rawlins and the case of Commander Shanahan. The Committee on Armed Services—and I believe the Senator from Oregon [Mr. MORSE] will support me in this statement—believed that those two cases properly come within the provisions of the bill the Senate has already twice passed, but which the House has never acted on. Therefore, it is perfectly proper, particularly in view of Admiral Carney's support, to take these two individual cases to conference along with the general amendment, to determine whether we cannot work out an appropriate provision in conference. If we cannot do that without holding up for some period of time this very important bill for the benefit of a great many young naval officers, we shall have to pursue some other course, but the young naval officers who are affected will lose their rights, as I understand, for 24 months if this bill does not become law fairly soon.

Mr. JOHNSON of Colorado. I am sure the Senator from Massachusetts will use diligence and will do everything in his power to have the amendment written into the bill. I am sure of that. I know the Senator well enough to be sure that he will not simply make a gesture and then abandon the amendment. I know he will not do that.

Mr. SALTONSTALL. We shall earnestly try to have the amendment retained in the bill.

Mr. JOHNSON of Colorado. I wish to say further that the amendment proposed by me has been checked with the Legislative Counsel, and the staff of the Legislative Counsel have gone into it very thoroughly from the technical standpoint and otherwise. Therefore the amendment is in good technical condition.

The VICE PRESIDENT. Does the Senator from Colorado desire to offer his amendment?

Mr. JOHNSON of Colorado. Yes; I offer the amendment.

The VICE PRESIDENT. Without objection, the amendment will be printed in the RECORD at this point, without being read.

The amendment offered by Mr. JOHNSON of Colorado is as follows:

It is proposed to insert in the bill two new sections, as follows:

"SEC. 3. (a) The Board for the Correction of Naval Records shall, and is hereby empowered to, have jurisdiction to review the case of nonpromotion of any officer holding the rank of commander in the Regular Navy, active or retired, or lieutenant colonel in the Regular Marine Corps, active or retired, that occurred under the wartime 'panel system' of promotion in the Regular Navy or Regular Marine Corps between January 1, 1942, and August 7, 1947, both dates inclusive, and to recommend appropriate advancement in grade or rank if there was, in the opinion of the Board, any error, administrative delay, oversight, or injustice that caused the officer concerned to fail of an advancement in grade or rank which would otherwise have been made: *Provided*, That such officer shall, within 6 months of the date of approval of this act, request the Board to conduct such review. All qualifications required by law are deemed to have been met, and no others shall be required in any case decided in such officer's favor by the Board. The words 'commander' and 'lieutenant colonel' as used in this subsection shall include any retired officer who held such rank at the time of his retirement and who was, or may hereafter be, advanced to a higher grade or rank on the retired list solely by virtue of his holding a combat award or citation.

"(b) With reference to any case of the nature envisaged in subsection (a) of this section relating to an officer of the Regular Navy, active or retired, holding rank below that of commander, or relating to an officer of the Regular Marine Corps, active or retired, holding rank below lieutenant colonel, the Board for the Correction of Naval Records or such other appropriate special board or boards in the discretion of the Secretary of the Navy as may be appointed or designated by him shall function for the purposes and under the same rules as envisaged herein for commanders and lieutenant colonels.

"(c) The President is authorized and requested to submit to the Senate for confirmation of promotion to a higher grade the name of any officer so recommended by the aforementioned Board or special board(s). Any advancement within grade recommended by the said Board or special board(s) shall be effected forthwith by the Secretary of the Navy in accordance with such recommendation.

"(d) The aforementioned Board or special board(s) shall consider all matters of record and receive new matter introduced in writing and/or by personal appearance of the officer concerned at his own request in order to determine whether or not any error, oversight, administrative delay, or injustice substantially prejudiced the interests of the officer concerned and caused a failure of advancement otherwise due. Upon the determination by the said Board or special board that an error, oversight, administrative delay, or injustice occurred that substantially prejudiced the interests of the officer concerned, the said Board or special board shall consider, determine, and recommend to the President the grade or rank to which the officer so prejudiced should be advanced and the date of commission which should be issued to satisfy the inequity or injustice found to exist: *Provided*, That no advancement to a grade higher than that of captain in the Navy or colonel in the Marine Corps, exclusive of advancement to a higher grade solely by virtue of a combat award or citation, shall be recommended by the said Board or special board; any recommendation by the said Board or special board for appropriate advancement within grade shall be made to the Secretary of the Navy; and *Provided further*, That no officer who is on the retired list on the date of approval of this act shall be placed on active duty by the operation of this act.

"(e) Notwithstanding any other provision of law, the pay and allowances of any officer promoted or otherwise advanced in accordance with the provisions of this act shall be based upon the grade or rank to which advanced and shall be computed from the same date on which pay and allowances for that grade or rank did in fact commence for the officer who would have been next junior to the officer so advanced had the latter, while on the active list, been advanced in normal course and without undue delay.

"SEC. 4. Notwithstanding the provisions of this or any other act, the President of the United States is authorized and requested, by and with the advice and consent of the Senate—

"(a) to promote any retired officer of the Regular Navy holding the permanent grade or rank of commander, who, while on the active list—

"(1) failed of promotion between January 1, 1942, and August 7, 1947; and

"(2) appealed his case to the Board for the Correction of Naval Records; and

"(3) was finally recommended by that Board for promotion to captain, United States Navy, together with appropriate adjustment of lineal position to that which he presumably would 'now enjoy had the established injustice not occurred.'

to the grade of captain, United States Navy (retired). The date of rank to be assigned to such officer shall be that which the Secretary of the Navy shall determine the Board for the Correction of Naval Records intended, at the time of its decision, should be assigned;

"(b) to promote any retired officer of the Regular Navy holding the permanent grade or rank of commander, who, while on the active list—

"(1) was denied promotion to captain between January 1, 1942, and August 7, 1947; and

"(2) was denied a hearing before the Board for the Correction of Naval Records; and

"(3) completed 27 years continuous, honorable, active commissioned service exclusively in the Regular Navy in the calendar year 1951 without having once had an unsatisfactory fitness report, or had disciplinary action taken against him; and

"(4) was promoted successively within the top 20 percent of his Naval Academy class without loss of numbers through the grades of ensign to commander, inclusive; and

"(5) holds one or more wartime awards; and

"(6) had his case heard before two committees of Congress in 1949–50; and

"(7) was recommended for promotion to captain, United States Navy, by six or more flag officers of the Regular Navy, including Adm. Robert B. Carney and Adm. Louis Denfeld (whether by fitness report, official letter to the Navy Department, or by testimony before or letter to the chairman of the Committee or of a Subcommittee on Armed Services of the Senate or House),

to the grade of captain, United States Navy (retired). The date of rank to be assigned such officer shall be that which he would hold if he had been promoted to the grade of captain, United States Navy, simultaneously with the officer who was originally next junior to him on the then (May 31, 1943) existing list of temporary commanders of the Regular Navy.

"(c) Any retired officer promoted in pursuance to this section shall be entitled to receive pay and allowances based upon the grade of captain and recomputed in accordance with subsection (e) of the preceding section of this act. All qualifications for promotion required by law are deemed to have been met, and no others shall be required in such officer's case."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Colorado [Mr. JOHNSON].

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. SALTONSTALL. Mr. President, I thank the Senate for its courtesy in permitting me to take this matter up at this time.

WILLY VOOS AND HIS WIFE, ALMA VOOS

The bill (S. 2387) for the relief of Willy Voos and his wife, Alma Voos, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of sections 203 (a) (2) and 205 of the Immigration and Nationality Act, Willy Voos and his wife, Alma Voos, shall be held and considered to be the parents of Mrs. Irmhild Micek, a citizen of the United States.

PAUL LEWERENZ AND MARGARETA EHRHARD LEWERENZ

The bill (S. 2510) for the relief of Paul Lewerenz and Margareta Ehrhard Lewerenz was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Paul Lewerenz and his wife, Margareta Ehrhard Lewerenz, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct two numbers from the appropriate quota for the first year that such quota is available.

GLICERIO M. EBUNA

The bill (S. 2542) for the relief of Glicerio M. Ebuna was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Glicerio M. Ebuna shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee.

NADEEM TANNOUS AND MRS. JAMILE TANNOUS

The bill (S. 2635) for the relief of Nadeem Tannous and Mrs. Jamile Tannous was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Nadeem Tannous and Mrs. Jamile Tannous shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

AZIZOLLAH AZORDEGAN

The bill (S. 2798) for the relief of Azizollah Azordegan was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Azizollah Azordegan shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

IDA REISSMULLER AND JOHNNY DAMON EUGENE REISSMULLER

The bill (S. 2958) for the relief of Ida Reissmuller and Johnny Damon Eugene Reissmuller was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, notwithstanding the provisions of section 212 (a) (9) of the Immigration and Nationality Act, Ida Reissmuller, the fiancee of Sgt. Howard E. Quinton, a citizen of the United States, and her minor child, Johnny Damon Eugene Reissmuller, shall be eligible for visas as nonimmigrant temporary visitors for a period of 3 months, if the administrative authorities find (1) that the said Ida Reissmuller is coming to the United States with a bona fide intention of being married to the said Sgt. Howard E. Quinton, and (2) that they are otherwise admissible under the Immigration and Nationality Act. In the event the marriage between the above-named persons does not occur within 3 months after the entry of the said Ida Reissmuller and the minor child, Johnny Damon Eugene Reissmuller, they shall be required to depart from the United States and upon failure to do so shall be deported in accordance with the provisions of the Immigration and Nationality Act. In the event that the marriage between the above-named persons shall occur within 3 months after the entry of the said Ida Reissmuller and her minor child, Johnny Damon Eugene Reissmuller, the Attorney General is authorized and directed to record the lawful admission for permanent residence of the said Ida Reissmuller and her minor child, Johnny Damon Eugene Reissmuller as of the date of the payment by them of the required visa fees.

KANG CHAY WON

The bill S. (3306) for the relief of Kang Chay Won was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, Kang Chay Won shall be held and considered to be the natural-born alien child of Harry Yam Won, a citizen of the United States.

HILDEGARD H. NELSON

The bill (H. R. 733) for the relief of Hildegard H. Nelson was considered, ordered to a third reading, read the third time, and passed.

MIHAI HANDRABURA

The bill (H. R. 734) for the relief of Mihai Handrabura was considered, ordered to a third reading, read the third time, and passed.

MR. AND MRS. ZYGMUNT SOWINSKI

The bill (H. R. 944) for the relief of Mr. and Mrs. Zygmunt Sowinski was considered, ordered to a third reading, read the third time, and passed.

MRS. SUHULA ADATA

The bill (H. R. 1115) for the relief of Mrs. Suhula Adata was considered, ordered to a third reading, read the third time, and passed.

SUGAKO NAKAI

The bill (H. R. 1762) for the relief of Sugako Nakai was considered, ordered to a third reading, read the third time, and passed.

IGOR SHWABE

The bill (H. R. 2899) for the relief of Igor Shwabe was considered, ordered to a third reading, read the third time, and passed.

JULIA N. EMMANUEL

The bill (H. R. 3333) for the relief of Julia N. Emmanuel was considered, ordered to a third reading, read the third time, and passed.

PETER M. LEAMING

The bill (H. R. 3624) for the relief of Peter M. Leaming was considered, ordered to a third reading, read the third time, and passed.

JOSEPH CERNY

The bill (H. R. 6650) for the relief of Joseph Cerny was considered, ordered to a third reading, read the third time, and passed.

ERNA WHITE

The bill (H. R. 6998) for the relief of Erna White was considered, ordered to a third reading, read the third time, and passed.

KURT FORSELL

The bill (H. R. 7500) for the relief of Kurt Forsell was considered, ordered to a third reading, read the third time, and passed.

HANNA WERNER AND HER CHILD, HANNA ELIZABETH WERNER

The bill (H. R. 7802) for the relief of Hanna Werner and her child, Hanna Elizabeth Werner was considered, ordered to a third reading, read the third time, and passed.

CASIMERO RIVERA GUTIERREZ AND OTHERS

The Senate proceeded to consider the bill (S. 328) for the relief of Casimero Rivera Gutierrez, Teresa Gutierrez, Susana Rivera Gutierrez, Martha Aguilera Gutierrez, and Armando Casimero Gutierrez, which had been reported from

the Committee on the Judiciary with an amendment, in line 9, after the word "fees", to strike out "and head taxes", so as to make the bill read:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws Casimero Rivera Gutierrez, Teresa Gutierrez, Susana Rivera Gutierrez, Martha Aguilera Gutierrez, and Armando Casimero Gutierrez, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ANNI WOLF AND HER MINOR SON

The Senate proceeded to consider the bill (S. 771) for the relief of Anni Wolf and her minor son, which had been reported from the Committee on the Judiciary with an amendment, to strike out all after the enacting clause, and insert:

That, in the administration of the Immigration and Nationality Act, Anni Wolf, the fiancee of John A. Vink, a citizen of the United States, and her minor son, Alfred Wolf, shall be eligible for visas as nonimmigrant temporary visitors for a period of 3 months: *Provided*, That the administrative authorities find that the said Anni Wolf is coming to the United States with a bona fide intention of being married to the said John A. Vink and that they are found otherwise admissible under the immigration laws. In the event the marriage between the abovenamed persons does not occur within 3 months after the entry of the said Anni Wolf and her minor son, they shall be required to depart from the United States and upon failure to do so shall be deported in accordance with the provisions of sections 242 and 243 of the Immigration and Nationality Act. In the event that the marriage between the above persons shall occur within 3 months after the entry of the said Anni Wolf and her minor son, the Attorney General is authorized and directed to record the lawful admission for permanent residence of the said Anni Wolf and her minor son as of the date of the payment by them of the required visa fees.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DEMITRIOUS VASILIOUS KARAVOGEORGE

The Senate proceeded to consider the bill (S. 966) for the relief of Demitrious Vasilious Karavogeorge which had been reported from the Committee on the Judiciary with an amendment, in line 7, after the word "fee", to strike out "and head taxes", so as to make the bill read:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Demitrious Vasilious Karavogeorge shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct an appropriate number from the first available appropriate quota.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MARTIN GENUTH

The Senate proceeded to consider the bill (S. 2456) for the relief of Martin Genuth which had been reported from the Committee on the Judiciary with an amendment, to strike out all after the enacting clause and insert:

That the Attorney General is authorized and directed to discontinue any deportation proceedings and to cancel any outstanding order and warrant of deportation, warrant of arrest, and bond, which may have been issued in the case of Martin Genuth. From and after the date of enactment of this act, the said Martin Genuth shall not again be subject to deportation by reason of the same facts upon which such deportation proceedings were commenced or any such warrants and order have been issued.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ELISA ALBERTINA CIOCCIO RIGAZZI OR ELISA CIOCCIO

The Senate proceeded to consider the bill (S. 2504) for the relief of Elisa Albertina Cioccio Rigazzi or Elisa Cioccio which had been reported from the Committee on the Judiciary with an amendment, in line 7, after the word "fee", to strike out "and head tax", so as to make the bill read:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Elisa Albertina Cioccio Rigazzi or Elisa Cioccio shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JEANNETTE KALKER AND ABRAHAM BENJAMIN KALKER

The Senate proceeded to consider the bill (S. 2512) for the relief of Jeannette Kalker and Abraham Benjamin Kalker, which had been reported from the Committee on the Judiciary with an amendment, to strike out all after the enacting clause and insert:

That, for the purposes of sections 203 (a) (3) and 205 of the Immigration and Nationality Act, the minor children, Jeannette Kalker and Abraham Benjamin Kalker, shall be held and considered to be the natural-born alien children of Mr. Abraham Benjamin Konijn, a lawful permanent resident of the United States, and his wife.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DOMENICO PERI

The Senate proceeded to consider the bill (S. 2587) for the relief of Domenico Peri, which had been reported from the Committee on the Judiciary with an amendment, in line 7, after the word "act", to insert a colon and "*Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act", so as to make the bill read:

Be it enacted, etc., That, notwithstanding the provisions of section 212 (a) (9) of the Immigration and Nationality Act, Domenico Peri may be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of such act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MRS. HELEN STRYK

The Senate proceeded to consider the bill (S. 3085) for the relief of Mrs. Helen Stryk, which had been reported from the Committee on the Judiciary with an amendment, in line 7, after the word "act", to insert a colon and "*Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act", so as to make the bill read:

Be it enacted, etc., That, notwithstanding the provisions of section 212 (a) (6) of the Immigration and Nationality Act, Mrs. Helen Stryk may be admitted to the United States for permanent residence if she is found otherwise admissible under the provisions of such act: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

URHO PAAVO PATOKOSKI AND HIS FAMILY

The Senate proceeded to consider the bill (S. 673) for the relief of Urho Paavo Patokoski and his family which had been reported from the Committee on the Judiciary with amendments, on page 1, line 9, after the word "fees", to strike out "and head taxes"; and on page 2, line 2, after the word "deduct", to strike out "one number" and insert "the required numbers"; so as to make the bill read:

Be it enacted, etc., That, for the purposes of the immigration and nationalization laws, Urho Paavo Patokoski; his wife, Toino Esteri; and their three minor sons, Timo Matti Juhani, Paavo Esa Antero, and Pekka Jouko Kalevi, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to each such alien as provided for in this act, the Secretary

of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota for the first year that such quota is available.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JAMES I. SMITH

The Senate proceeded to consider the bill (H. R. 1673) for the relief of James I. Smith which had been reported from the Committee on the Judiciary with amendments, in line 7, after the word "that", to strike out "act." and insert "act:", and in line 9, after the word "justice", to strike out "have" and insert "has."

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ADMINISTRATIVE WORKWEEK AND PAY PERIODS FOR EMPLOYEES IN THE POSTAL FIELD SERVICES—BILL PASSED OVER

The bill (S. 190) to establish a basic administrative workweek and pay periods of 2 administrative workweeks for postmasters, officers, and employees in the postal field service, and for other purposes, was announced as next in order.

Mr. SCHOEPPEL. Mr. President, I think I shall object unless there is included in this bill the amendments which are shown by the report submitted on page 4 headed "Basic Administrative Workweek and Methods of Payment." I note that this bill provides for an expenditure of approximately $11 million a year. I do not know whether this is a type of bill which should be passed on a call of the calendar, but I feel that on behalf of the calendar committee I should raise this objection. I ask that the bill go to the next regular calendar call so that we may have an opportunity to consider it and also to consider whether the amendment to which I have referred should be incorporated in the measure.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator from Kansas yield?

Mr. SCHOEPPEL. I yield.

Mr. JOHNSTON of South Carolina. Mr. President, this bill happens to be one which I introduced and which was reported unanimously by the committee. As I understand, the Senator from Kansas asks that it go to the next call of the calendar in order that it may be further studied. Is that correct?

Mr. SCHOEPPEL. Yes.

The PRESIDING OFFICER (Mr. BARRETT in the chair). The bill will be passed to the next call of the calendar.

REIMBURSEMENT OF POSTMASTERS OF DISCONTINUED POST OFFICES—BILL PASSED OVER

The bill (S. 3028) to require the Postmaster General to reimburse postmasters of discontinued post offices for equipment owned by the postmaster was announced as next in order.

Mr. SMATHERS. Mr. President, I ask that this bill go over to the next call of the calendar, and not as being objected to, so that we may have time to study it further.

The PRESIDING OFFICER. Without objection, the bill will be passed over.

PROMOTION OF SAFETY ON THE GREAT LAKES

The bill (S. 3464) to amend the Communications Act of 1934 in order to make certain provision for the carrying out of the Agreement for the Promotion of Safety on the Great Lakes by Means of Radio was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 3 of the Communications Act of 1934, as amended, is amended by inserting after paragraph (dd) the following:

"(ee) 'Great Lakes Agreement' means the Agreement for the Promotion of Safety on the Great Lakes by Means of Radio in force and the regulations referred to therein."

SEC. 2. (a) The first sentence of section 4 (f) (3) of such act is amended to read as follows: "The Commission shall fix a reasonable rate of extra compensation for overtime services of engineers in charge and radio engineers of the Field Engineering and Monitoring Bureau of the Federal Communications Commission, who may be required to remain on duty between the hours of 5 o'clock postmeridian and 8 o'clock antemeridian or on Sundays or holidays to perform services in connection with the inspection of ship radio equipment and apparatus for the purposes of part II of title III of this act or the Great Lakes Agreement, on the basis of one-half day's additional pay for each 2 hours or fraction thereof of at least 1 hour that the overtime exceeds beyond 5 o'clock postmeridian (but not to exceed 2½ days' pay for the full period from 5 o'clock postmeridian to 8 o'clock antemeridian) and 2 additional days' pay for Sunday or holiday duty."

(b) The last proviso of such section 4 (f) (3) is amended by striking out "inspectors" wherever it appears therein and inserting in lieu thereof "engineers."

SEC. 3. Title V of such act is amended by inserting after section 506 a new section reading as follows:

"VIOLATION OF GREAT LAKES AGREEMENT

"SEC. 507. (a) Any vessel of the United States that is navigated in violation of the provisions of the Great Lakes Agreement or the rules and regulations of the Commission made in pursuance thereof and any vessel of a foreign country that is so navigated on waters under the jurisdiction of the United States shall forfeit to the United States the sum of $500 recoverable by way of suit or libel. Each day during which such navigation occurs shall constitute a separate offense.

"(b) Every willful failure on the part of the master of a vessel of the United States to enforce or to comply with the provisions of the Great Lakes Agreement or the rules and regulations of the Commission made in pursuance thereof shall cause him to forfeit to the United States the sum of $100."

SEC. 4. Section 504 (b) of such act is amended by deleting "title III, part II" and inserting in lieu thereof "part II of title III and section 507."

SEC. 5. Section 602 (e) of such act is amended to read as follows:

"(e) The act entitled 'An act to require apparatus and operators for radio communication on certain ocean steamers,' approved June 24, 1910, as amended, is hereby repealed."

SEC. 6. This act shall take effect on November 13, 1954.

RECONVEYANCE OF CERTAIN LANDS TO S. J. CARVER

The bill (H. R. 7158) authorizing the United States Government to reconvey certain lands to S. J. Carver was announced as next in order.

Mr. JOHNSON of Texas. Mr. President, I should like to make a statement with reference to this bill.

This bill is a simple one, and its passage will not cost the Federal Government any money. On the contrary, it will enable the Government to get back part of the money spent in acquiring title to the lands for Lavon Dam and Reservoir in Collin County, Tex.

The bill authorizes the Secretary of the Army to sell at fair market price to Mr. S. J. Carver some 17 acres of land which he formerly owned. These 17 acres are part of a tract of approximately 137 acres acquired by the United States from Mr. Carver in 1950 in connection with Lavon Dam and Reservoir.

The Department of the Army has now officially stated that essential operation and management of the reservoir will not be adversely affected if these 17 acres are reconveyed to the former owner.

I believe, therefore, that enactment of this bill is clearly in the public interest. I urge that favorable consideration be given it.

Mr. MORSE. Mr. President, I should like to have an explanation from a member of the committee as to the matter of financial arrangements involved in this proposed legislation. It completely meets the Morse formula, but I think that for the sake of the RECORD there should be a statement regarding that feature of the measure.

Mr. BUSH. Mr. President, the committee amended the bill as it was introduced to provide for the transaction in accordance with the Morse formula as to fair market value.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill (H. R. 7158) was considered, ordered to a third reading, read the third time, and passed.

DESIGNATION OF LAKE TEXARKANA

The joint resolution (H. J. Res. 459) to designate the lake to be formed by the completion of the Texarkana Dam and Reservoir on Sulphur River, about 9 miles southwest from Texarkana, Tex., as Lake Texarkana was announced as next in order.

Mr. JOHNSON of Texas. Mr. President, I should like to make a statement with reference to this joint resolution.

Mr. President, this resolution would simply make official the name by which a Texas lake is going to be known in any event.

The resolution provides that the lake to be formed by the completion of Texarkana Dam and Reservoir on Sulphur River, about 9 miles southwest of Tex-

arkana, Tex., shall be known as Lake Texarkana.

That is the proper and fitting designation for this lake. Civic leaders of the city of Texarkana led the effort to bring about creation of this lake. Texarkana is by far the largest municipality in that area, and the lake therefore inevitably will be generally called by the name Lake Texarkana.

Neither the Department of the Army, assigned responsibility by the Department of Defense to prepare a report on the resolution, nor the Board of Geographic Names of the Interior Department has voiced any objection to enactment of the resolution.

In view of these facts, I urge the passage of the joint resolution.

The PRESIDING OFFICER. Is there objection to the consideration of the joint resolution?

There being no objection, the joint resolution (H. J. Res. 459) was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 8647) to amend Revised Statute 4426 was announced as next in order.

Mr. SMATHERS. Mr. President, I ask that this bill be passed over.

The PRESIDING OFFICER. The bill will be passed over.

AMENDMENT OF HELIUM ACT AND REPEAL OF SECTION 3 OF THE ACT APPROVED OCTOBER 31, 1951

The Senate proceeded to consider the bill (H. R. 8713) to amend section 1 (d) of the Helium Act (50 U. S. C., sec. 161 (d)), and to repeal section 3 (13) of the act entitled "An act to amend or repeal certain Government property laws, and for other purposes," approved October 31, 1951 (65 Stat. 701).

Mr. SMATHERS. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from Florida.

The LEGISLATIVE CLERK. On page 1, line 8, it is proposed to insert, after the word "helium", the words "not needed for Government use."

Mr. SCHOEPPEL. Mr. President, I should like to ask the distinguished Senator from Florida if his amendment has been cleared with the committee?

Mr. SMATHERS. It has been cleared with the committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Florida [Mr. SMATHERS].

The amendment was agreed to.

Mr. SMATHERS. Mr. President, I ask unanimous consent to have a statement placed in the RECORD to accompany the amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR SMATHERS

This bill is virtually identical to the Senate bill 3198, which is Calendar No. 1548 and to the passage of which the minority calendar committee objected at an earlier call of the calendar.

The bill has, however, been improved in the House by the addition of the words "not valuable for helium production" following the restoration of the language authorizing the Secretary of the Interior to dispose of certain helium properties. In order to effect a complete restoration of the language to its original status, a further amendment is required.

The House committee in its report dealt with this question but concluded that it was unnecessary to add the words which are proposed in the amendment I have submitted because they assumed that the Federal Property and Administrative Services Act of 1949 would take care of this situation.

Out of an abundance of caution, and because in my judgment it is possible that the standard of the Federal Property Act may not apply to a disposal by the Secretary of the Interior, I propose to add the words "not needed for Government use" after the language permitting the Secretary to dispose of "oil, gas, and byproducts of helium operations."

Since the Secretary of the Interior is given the authority to dispose of these properties at his discretion and the General Services Administrator would not have any responsibility for disposal under the Federal Property Act until and unless the Secretary of the Interior found that such properties were excess under the standards of the Federal Property Act, I think it is both necessary and desirable to add this restrictive language to the bill.

The most that can be said against the amendment is that it is unnecessary. All are agreed that such a standard should control disposal of such properties. In view of this situation I do not anticipate any objection by anyone to the addition of this language which restores the original authority to the Secretary of the Interior.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading and passage of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The PRESIDING OFFICER. Without objection, Senate bill S. 3198, which is identical with House bill 8713, is indefinitely postponed.

COMMENDATION OF STATES HAVING LEGISLATION REGARDING DISCARDED REFRIGERATION UNITS

The resolution (S. Res. 272) to commend States having legislation to prevent discarded refrigerating units from becoming a menace to children and to urge consideration of similar legislation by other States was announced as next in order.

Mr. LONG. Mr. President, may we have an explanation of the resolution?

Mrs. BOWRING. Mr. President, your committee's Subcommittee on Business and Consumer Interests held hearings on April 27, 1954, on S. 2876 and S. 2891. These bills, in substance, would have provided imprisonment and fines for any person introducing or delivering for introduction into interstate commerce a refrigerating unit unless it were equipped with a latch which would enable it to be opened from the inside.

Testimony adduced at those hearings indicated that during the 6-year period, 1948–53, there has been a total of nearly 50 cases in which 1 to 5 children have crawled into a discarded icebox or refrigerator and suffocated. At least 79 children, ranging in age from 2 to 12 years, with the average age being 5 years, have died in these incidents.

There are more than 50 million iceboxes, refrigerators, freezers, and other such airtight cabinets in use today, and they are being discarded at the rate of approximately 2 million to 3 million a year. Experience has shown that these refrigerators and other airtight containers, when once discarded, constitute attractive nuisances and inviting places for games by small children. In the light of these tragic facts, your committee cannot remain impassive.

Some opponents of S. 2876 and S. 2891 based their opposition to those measures, at least in part, upon the ground that the bulk of new refrigerating units would not become obsolete for 15 or 20 years. Your committee was not impressed with this argument. Our responsibility to the small children of the Nation is a continuing one, and if there existed today an invention that would make such refrigerating units, when discarded, harmless to children, your committee would have recommended passage of legislation of the general nature of either S. 2876 or S. 2891.

However, testimony adduced at the hearings has failed to establish the existence of a device which would provide a proper seal for a modern refrigerator door and which would also allow the door to be opened easily by a small child. Obviously, such a device would have to be set in motion by the slightest touch because a child in the dark becomes frantic. Even the simplest type of a latch might present an insuperable obstacle to small tots who, as experience has demonstrated, lock themselves up in a bathroom and have to be rescued by the police or firemen.

Manufacturers of refrigerating units have assured your committee's Subcommittee on Business and Consumer Interests that their laboratories are exerting continued efforts and will intensify their efforts to invent some adequate type of safety device. Furthermore, they have stated that when such a device is invented, it will be made available upon reasonable terms to the whole industry. The subcommittee will keep abreast of the progress of such inventions, with a view to compelling adoption of such throughout the industry. In fact, if such an invention is not developed within the reasonably near future, it may be necessary for your committee to consider legislation that would authorize funds to be spent by appropriate agencies of the Government to do what the industry would then have shown its incompetency to accomplish.

Some opponents of S. 2876 and S. 2891 have pointed out the fact that a number of States and municipalities have enacted legislation of ordinances making it a crime for anyone to discard a refrigerating unit without removing the door

thereof or taking some similar effective precaution. Civic groups have cooperated by bringing to the attention of the public the dangers of discarded refrigerating units. Some groups have conducted campaigns to call to the attention of homeowners that they have a discarded icebox in their yards and to encourage them to make them harmless to children.

State and local laws do have an advantage that Federal legislation would lack. If properly enforced, that can have an immediate effect in reducing the death of children. Furthermore, they can bridge the 15-year gap where Federal legislation would be largely ineffective. The Congress cannot and does not wish to usurp State police powers. It cannot enact legislation making it a crime to discard a refrigerating unit without removing the door thereof. The Congress can reach this problem through its power over interstate commerce. Whenever it is feasible, the Congress can and should enact legislation banning from such commerce a refrigerating unit that can become a menace to children. This would, in 15 to 20 years, remove almost completely this modern hazard to the lives of our children. In the meantime, State safety laws upon this subject are imperative. Even if legislation of the type embodied in S. 2876 and S. 2891 were feasible now, this resolution would still be needed to call to the attention of State governors and legislators that Federal legislation in this matter is inadequate without an exercise of the equally important State police powers.

Under existing conditions, enactment of Federal legislation of the type contained in S. 2876 and S. 2891 would result in banning from interstate commerce a useful and necessary product until discovery or invention of a device which would provide a proper seal while allowing a door of a refrigerating unit to be opened easily from the inside.

Accordingly, the only present solution is to call these varying, effective areas of Federal and State jurisdiction to the attention of the governors and legislators of the States and urge the consideration of appropriate legislation and ordinances by the States and municipalities which may not be aware of the deficiencies of Federal legislation upon the subject. This resolution would provide this solution and your committee recommends unanimously that the resolution be adopted.

Mr. LONG. Mr. President, will the Senator yield?

Mrs. BOWRING. I yield.

Mr. LONG. Is it to be understood that the proposal will not have the effect of Federal law, but is merely a suggestion to the States that they should pass such legislation?

Mrs. BOWRING. It is proposed that the States should consider such legislation.

Mr. LONG. It occurs to me that it might be well for Congress to pass legislation involving the manufacture of such refrigerators, so as to make certain that in the future there will not be these hazards.

Mrs. BOWRING. The report states that that will be done when such an invention exists, but up until this time none has been developed to accomplish that purpose.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to as follows:

Whereas, during the 6-year period 1948–1953, there has been a total of nearly 50 cases in which 1 to 5 children have crawled into a discarded icebox or refrigerator and suffocated; and

Whereas at least 79 children—ranging in age from 2 to 12 years, with the average age being 5 years—have died in these incidents; and

Whereas there are more than 50 million iceboxes, refrigerators, freezers, and other such airtight cabinets in use today, and they are being discarded at the rate of approximately 2 million to 3 million a year; and

Whereas, once discarded, these refrigerators and other airtight containers constitute attractive nuisances and inviting places for games by small children; and

Whereas bills have been introduced in the Senate of the United States, such as S. 2876 and S. 2891, that would provide imprisonment and fines for any person to introduce or deliver for introduction into interstate commerce any such refrigerating unit unless it is equipped with a latch which would enable it to be opened from the inside; and

Whereas testimony given in the hearings before the Subcommittee on Business and Consumer Interests of the Senate Committee on Interstate and Foreign Commerce, held on April 27, 1954, has failed to establish the existence of a device which would provide a proper seal for a modern refrigerator door and which would, also, allow the door to be opened easily by a small child; and

Whereas enactment of legislation pending in the Senate would result in banning from interstate commerce a useful and necessary product until discovery or invention of a device which would provide a proper seal while allowing a door to be opened easily from the inside; and

Whereas manufacturers of refrigerating units have assured the subcommittee that their laboratories are exerting continued efforts and will intensify their efforts to invent such a safety device and will make it available, when invented, upon reasonable terms to the whole industry; and

Whereas it would seem wise for the Congress to await the invention of one or more such safety devices before enacting legislation upon this subject of the kind pending before the Senate; and

Whereas several States or subdivisions thereof have enacted legislation under their police powers making it a crime for anyone to discard a refrigerating unit without removing the door thereof or taking some similar effective precaution; and

Whereas such laws and ordinances, when properly enforced, can be immediately effective in reducing the deaths of children through these causes; and

Whereas several States have also encouraged civic groups to bring to the attention of the public and to remove the dangers of discarded refrigerating units: Now, therefore, be it

Resolved, That the Senate commends those States and municipalities which have taken steps by legislation or ordinance to prevent discarded refrigerating units from becoming a menace to children, and those civic groups which have cooperated in making those laws or ordinances effective; and be it further

Resolved, That the Senate respectfully urges the governors and the legislatures of those States which have not enacted similar legislation to consider the advisability of doing so at the earliest opportunity; and be it further

Resolved, That the Secretary of the Senate is directed to transmit a copy of this resolution to the governor and legislature of each State.

The preamble was agreed to.

ADDITIONAL RIGHTS AND BENEFITS FOR CERTAIN OFFICERS OF THE COAST AND GEODETIC SURVEY

The bill (S. 2389) to amend the act of December 3, 1942, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 2 of the act of December 3, 1942 (56 Stat. 1038; 33 U. S. C. 855a), is amended to read as follows:

"Commissioned officers of the Coast and Geodetic Survey who, in time of war or national emergency declared by the President, are assigned to duty on projects for the military departments in areas determined by the Secretary of Defense to be of immediate military hazard, shall, while on such duty, be entitled to the rights and benefits provided by law for officers of the Coast and Geodetic Survey who are actually transferred to the service of the military departments: *Provided*, That the benefits of this section shall be applicable also to commissioned officers of the Coast and Georetic Survey serving in the Philippine Islands on December 7, 1941."

AMENDMENT OF DEFINITION OF "AIRMAN" IN THE CIVIL AERONAUTICS ACT OF 1938—BILL PASSED OVER

The bill (H. R. 7395) to amend the definition of "airman" in the Civil Aeronautics Act of 1938, and for other purposes, was announced as next in order.

Mr. SMATHERS. By request, I ask that the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

CONSTRUCTION OF FRYINGPAN-ARKANSAS PROJECT, COLORADO

The Senate proceeded to consider the bill (S. 964) to authorize the construction, operation, and maintenance by the Secretary of the Interior of the Fryingpan-Arkansas project, Colorado, which had been reported from the Committee on Interior and Insular Affairs with amendments, on page 2, line 16, after the word "project", to strike out the comma and "and in accordance, also, with recommendations lettered E to K, inclusive, set forth on pages 25 and 26 of that document"; after line 18, to strike out:

SEC. 2. The Secretary of the Interior may appoint the two representatives of the United States to the Commission referred to in paragraph 17, page No. 23, Senate Document No. 106, 82d Congress, 2d session, and may adopt modifications of the operating principles therein referred to upon the recommendations of the Commission: *Provided*, That such recommendations are made and adopted by said Commission in conformity

to the provisions of paragraph 17 of said operating principles set forth on page 23 of Senate Document No. 106, 82d Congress, 2d session.

On page 3, after line 4, to insert:

SEC. 2. (a) Contracts to repay that portion of the cost of the Fryingpan-Arkansas project which is allocated to irrigation and assigned to be repaid by irrigation water users (exclusive of such portion of said cost as may be derived from temporary water supply contracts or from other sources) shall be entered into pursuant to subsection (d), section 9, of the Reclamation Project Act of 1939 (53 Stat. 1187) and may provide that the general repayment obligation shall be spread in annual installments, which may be varied as to any required annual payment in the light of economic factors affecting the ability of the contracting organization to pay and of water supply and water requirement conditions, but in number and amounts satisfactory to the Secretary, over a period of not more than 70 years, which period shall be inclusive of any permissible development period, for any project contract unit or for any irrigation block, if the project contract unit be divided into two or more irrigation blocks.

(b) Notwithstanding any provision of law to the contrary, net revenues derived from the sale of commercial power and from the furnishing of water for municipal, domestic, and industrial use shall first be applied to the amortization, with interest, of those portions of the actual cost of construction of the project which are allocated, respectively, to commercial power and to municipal, domestic, and industrial water supply and shall thereafter be applied to amortization of that portion of said actual cost which is allocated to irrigation but which is beyond the ability of the irrigation water users to return during the period hereinbefore specified. The interest rate on the unamortized balance of the commercial power and the municipal, domestic, and industrial water supply allocations shall be equal to the average rate (which rate shall be certified by the Secretary of the Treasury) paid by the United States on its long-term loans outstanding on the date of this act.

(c) No part of the specific municipal water-supply systems described in Senate Document No. 106, 82d Congress, shall be constructed by the Secretary in the absence of evidence satisfactory to him that it would be infeasible for the communities involved to construct such works themselves, singly or jointly. In the event it is determined that such facilities are to be constructed by the Secretary, a contract providing, among other things, for payment of the actual cost thereof with interest and repayment period as hereinbefore provided, and as rapidly as is consistent with the contracting parties' ability to pay, and for assumption by the contracting party or parties of the care, operation, maintenance, and replacement of the works shall be a condition precedent thereto.

(d) No contract for a supplemental water supply for irrigation under this act shall contain any restrictions respecting the right to receive such supply based upon ownership of irrigable lands, nor shall the excess land provisions of the Federal reclamation laws be applicable to lands served by the Fryingpan-Arkansas project which now have an irrigation supply from sources other than a Federal reclamation project.

On page 5, after line 11, to insert:

SEC. 3. The Fryingpan-Arkansas project shall be operated under the direction of the Secretary of the Interior in accordance with the operating principles set forth on pages 20–23 of Senate Document No. 106, 82d Congress. The Secretary may appoint the two representatives of the United States to the Commission referred to in paragraph 17 of said principles and may adopt modification thereof upon the recommendation of the Commission: *Provided*, That such recommendations are made and adopted by said Commission in conformity to the provisions of paragraph 17 of said operating principles.

On page 5, line 23, to change the section number from "3" to "4"; on page 6, line 8, to change the section number from "4" to "5"; in line 14, to change the section number from "5" to "6"; on page 7, after line 15, to insert:

SEC. 7. (a) The use of water diverted from the Colorado River to the Arkansas River Basin through works constructed under authority of this act shall be subject to and controlled by the Colorado River compact, the upper Colorado River Basin compact, the Boulder Canyon Project Act, and the Mexican Water Treaty (treaty series 994), as hereinbefore provided, and shall be included within and shall in no way increase the total quantity of water to the use of which the State of Colorado is entitled and limited under said compacts, statute, and treaty, and every contract entered into under this act for the storage, use, and delivery of such water shall so recite.

(b) All works constructed under authority of this act, and all officers, employees, permittees, licensees, and contractees of the United States and of the State of Colorado acting pursuant thereto, and all users and appropriators of water of the Colorado River system diverted or delivered through the works constructed under authority of this act and any enlargements or additions thereto shall observe and be subject to said compacts, statute, and treaty, as hereinbefore provided, in the diversion, delivery, and use of water of the Colorado system, and such condition and covenant shall attach as a matter of law whether or not set out or referred to in the instrument evidencing such permit, license, or contract and shall be deemed to be for the benefit of and be available to the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming and the users of water therein or thereunder by way of suit, defense, or otherwise in any litigation respecting the waters of the Colorado River system.

(c) None of the waters of the Colorado River system shall be exported from the natural basin of that system by means of works constructed under authority of this act, or extensions and enlargements of such works, to the Arkansas River Basin for consumptive use outside of the State of Colorado, and no such waters shall be made available for consumptive use in any State not a party to the Colorado River compact by exchange or substitution or, as far as the same is controllable through the operation of works herein or hereafter authorized, by use of return flow.

(d) No right or claim of right to the use of the waters of the Colorado River system shall be aided or prejudiced by this act, and the Congress does not, by its enactment, construe or interpret any provision of the Colorado River compact, the upper Colorado River Basin compact, the Boulder Canyon Project Act, or the Mexican Water Treaty or subject the United States to, or approve or disapprove any interpretation of, said compacts, statute, or treaty, anything in this act to the contrary notwithstanding.

On page 9, line 15, to change the section number from "6" to "8", and in line 18, after the word "act", to strike out "and, in addition thereto, such further sums as may be necessary for the continued investigation, as set forth in Recommendation M, page 26, Senate Document No. 106, 82d Congress, 2d session, of a comprehensive plan of development of the upper Arkansas River Basin", so as to make the bill read:

Be it enacted, etc., That, for the purpose of supplying water for irrigation, municipal, domestic, and industrial uses, generating and transmitting hydroelectric power and energy, controlling floods, providing for the preservation and propagation of fish and wildlife and preserving and improving recreational opportunities, and for other useful and beneficial purposes, the Secretary of the Interior, acting pursuant to the Federal reclamation laws, act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof or supplementary thereto, as far as those laws are not inconsistent with the provisions of this act, and subject to the apportionments of the use of water fixed in the Colorado River compact and the upper Colorado River Basin compact and to the terms of the Boulder Canyon Project Act, and to the terms of the United States-Mexico Water Treaty of 1944 (treaty series 994), is hereby authorized to construct, operate, and maintain the Fryingpan-Arkansas project, Colorado, in substantial accordance with the engineering plans therefor set forth in Senate Document No. 106, 82d Congress, 2d session, but with such modifications of, omissions from, or additions to the works therein described as the Secretary may, from time to time, find necessary or proper for accomplishing the objectives of the project.

SEC. 2. (a) Contracts to repay that portion of the cost of the Fryingpan-Arkansas project which is allocated to irrigation and assigned to be repaid by irrigation water users (exclusive of such portion of said cost as may be derived from temporary water supply contracts or from other sources) shall be entered into pursuant to subsection (d), section 9, of the Reclamation Project Act of 1939 (53 Stat. 1187) and may provide that the general repayment obligation shall be spread in annual installments, which may be varied as to any required annual payment in the light of economic factors affecting the ability of the contracting organization to pay and of water supply and water requirement conditions, but in number and amounts satisfactory to the Secretary, over a period of not more than 70 years, which period shall be inclusive of any permissible development period, for any project contract unit or for any irrigation block, if the project contract unit be divided into two or more irrigation blocks.

(b) Notwithstanding any provision of law to the contrary, net revenues derived from the sale of commercial power and from the furnishing of water for municipal, domestic, and industrial use shall first be applied to the amortization, with interest, of those portions of the actual cost of construction of the project which are allocated, respectively, to commercial power and to municipal, domestic, and industrial water supply and shall thereafter be applied to amortization of that portion of said actual cost which is allocated to irrigation but which is beyond the ability of the irrigation water users to return during the period hereinbefore specified. The interest rate on the unamortized balance of the commercial power and the municipal, domestic, and industrial water supply allocations shall be equal to the average rate (which rate shall be certified by the Secretary of the Treasury) paid by the United States on its long-term loans outstanding on the date of this act.

(c) No part of the specific municipal water-supply systems described in Senate Document No. 106, 82d Congress, shall be constructed by the Secretary in the absence of evidence satisfactory to him that it would be infeasible for the communities involved to construct such works themselves, singly or jointly. In the event it is determined that such facilities are to be constructed by the Secretary, a contract providing, among other

things, for payment of the actual cost thereof with interest and repayment period as hereinbefore provided, and as rapidly as is consistent with the contracting parties' ability to pay, and for assumption by the contracting party or parties of the care, operation, maintenance, and replacement of the works shall be a condition precedent thereto.

(d) No contract for a supplemental water supply for irrigation under this act shall contain any restrictions respecting the right to receive such supply based upon ownership of irrigable lands, nor shall the excess-land provisions of the Federal reclamation laws be applicable to lands served by the Fryingpan-Arkansas project which now have an irrigation supply from sources other than a Federal reclamation project.

SEC. 3. The Fryingpan-Arkansas project shall be operated under the direction of the Secretary of the Interior in accordance with the operating principles set forth on pages 20–23 of Senate Document No. 106, 82d Congress. The Secretary may appoint the two representatives of the United States to the Commission referred to in paragraph 17 of said principles and may adopt modification thereof upon the recommendation of the Commission: *Provided*, That such recommendations are made and adopted by said Commission in conformity to the provisions of paragraph 17 of said operating principles.

SEC. 4. Any and all benefits and rights of western Colorado water users in and to water stored in the Green Mountain Reservoir, Colorado-Big Thompson project, as described, set forth and defined in Senate Document No. 80, 75th Congress, 1st session, shall not be impaired, prejudiced, abrogated, nullified, or diminished in any manner whatever by reason of the authorization, construction, operation, and maintenance of the Fryingpan-Arkansas project authorized by this act.

SEC. 5. Any provision of law to the contrary notwithstanding, the project herein authorized shall be operated in such a manner that those in eastern Colorado using project water imported from the Colorado River Basin for domestic purposes shall have preference over those claiming or using the water for any other purpose.

SEC. 6. The Secretary is authorized to plan, construct, operate, and maintain public recreational facilities on lands withdrawn or acquired for the development of the Fryingpan-Arkansas project, to conserve the scenery, the natural, historic, and archeologic objects, and the wildlife on said lands, and to provide for public use and enjoyment of the same and of the water areas created by these projects by such means as are consistent with the primary purposes of said project and to mitigate losses of and improve conditions for the propagation of fish and wildlife in connection with the development of the Fryingpan-Arkansas project. The Secretary is authorized to acquire lands and to withdraw public lands from entry or other disposition under the public land laws for the construction, operation, and maintenance of recreational facilities in connection with the said project, and to dispose of them to Federal, State, and local governmental agencies by lease, transfer, exchange, or conveyance, upon such terms and conditions as will best promote their development and operation in the public interest. The costs, including the operation and maintenance costs of all said undertakings shall be nonreimbursable and nonreturnable under the reclamation laws, and funds appropriated for carrying out the authorization contained in section 1 of this act shall, without prejudice to the availability of other appropriated moneys for the same purpose, also be available for carrying out the investigations and programs authorized in this section.

SEC. 7. (a) The use of water diverted from the Colorado River to the Arkansas River Basin through works constructed under authority of this act shall be subject to and controlled by the Colorado River compact, the upper Colorado River Basin compact, the Boulder Canyon Project Act, and the Mexican Water Treaty (treaty series 994), as hereinbefore provided, and shall be included within and shall in no way increase the total quantity of water to the use of which the State of Colorado is entitled and limited under said compacts, statute, and treaty, and every contract entered into under this act for the storage, use, and delivery of such water shall so recite.

(b) All works constructed under authority of this act, and all officers, employees, permittees, licensees, and contractees of the United States and of the State of Colorado acting pursuant thereto, and all users and appropriators of water of the Colorado River system diverted or delivered through the works constructed under authority of this act and any enlargements or additions thereto shall observe and be subject to said compacts, statute, and treaty, as hereinbefore provided, in the diversion, delivery, and use of water of the Colorado system, and such condition and covenant shall attach as a matter of law whether or not set out or referred to in the instrument evidencing such permit, license, or contract and shall be deemed to be for the benefit of and be available to the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming and the users of water therein or thereunder by way of suit, defense, or otherwise in any litigation respecting the waters of the Colorado River system.

(c) None of the waters of the Colorado River system shall be exported from the natural basin of that system by means of works constructed under authority of this act, or extensions and enlargements of such works, to the Arkansas River Basin for consumptive use outside of the State of Colorado, and no such waters shall be made available for consumptive use in any State not a party to the Colorado River compact by exchange or substitution or, as far as the same is controllable through the operation of works herein or hereafter authorized, by use of return flow.

(d) No right or claim of right to the use of the waters of the Colorado River system shall be aided or prejudiced by this act, and the Congress does not, by its enactment, construe or interpret any provision of the Colorado River compact, the upper Colorado River Basin compact, the Boulder Canyon Project Act, or the Mexican Water Treaty or subject the United States to, or approve or disapprove any intepretation of, said compacts, statute, or treaty, anything in this act to the contrary notwithstanding.

SEC. 8. There are hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the purposes of this act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MRS. WILLIAM A. CURRAN—BILL REFERRED TO THE COMMITTEE ON THE JUDICIARY

The bill (S. 2634) for the relief of Mrs. William A. Curran was announced as next in order.

Mr. SMATHERS. Over.

The PRESIDING OFFICER. The bill will be passed over.

Mr. McCARRAN subsequently said: Mr. President, I ask that the Senate revert for a moment to Calendar No. 1768, Senate bill 2634, for the relief of Mrs. William A. Curran, which bill appears to have been objected to. I have read the report on the bill and also the bill. This is a claims bill and, being a claims bill, it should have gone to the one committee in the Senate which has jurisdiction over claims, which is the Committee on the Judiciary. I do not understand why the bill should have been reported from any other committee. The bill was objected to, but I understand there is a movement on foot to take the bill up again. It is a claims bill and, strictly speaking, it should have gone to the Committee on the Judiciary.

Mr. President, I ask unanimous consent that the bill be referred to the Committee on the Judiciary.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the bill will be referred to the Committee on the Judiciary.

CONTROL OF OUTBREAKS OF INSECT PESTS OR PLANT DISEASES

The bill (S. 3697) to amend the act of April 6, 1937, as amended, to include cooperation with the Government of Canada or Mexico or local Canadian or Mexican authorities for the control of incipient or emergency outbreaks of insect pests or plant diseases was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 1 of the act of April 6, 1937, as amended (7 U. S. C. 148), is further amended by adding at the end thereof the following: "The Secretary of Agriculture is further authorized to cooperate with the Governments of Canada or Mexico or local Canadian or Mexican authorities in carrying out in such countries necessary operations or measures to control incipient or emergency outbreaks of insect pests or plant diseases, when such operations or measures are necessary to protect the agriculture of the United States. In performing the operations or measures authorized under this act, the cooperating foreign country, State, or local agency shall be responsible for the authority necessary to carry out the operations or measures on all lands and properties within the foreign country or State other than those owned or controlled by the Federal Government and for such other facilities and means as in the discretion of the Secretary of Agriculture are necessary."

CORRECTION OF ERRORS IN PUBLIC LAW 368, 83D CONGRESS

The bill (H. R. 9561) to correct typographical errors in Public Law 368, 83d Congress, was considered, ordered to a third reading, read the third time, and passed.

LOAN OR GIFT OF WORKS OF ART AND OTHER MATERIAL

The Senate proceeded to consider the bill (H. R. 9006) to amend the act of May 22, 1896, as amended, concerning the loan or gift of works of art and other material, which had been reported from the Committee on Armed Services,

with amendments, to strike out all after the enacting clause, and insert:

That (a) the Secretary of the Army is authorized to transfer to the Australian War Memorial in Canberra, Australia, without compensation, 28 German war paintings depicting Australian troops which are now the property of the United States in custody of the Secretary of the Army.

(b) Nothing contained in this act shall authorize the expenditure of any funds of the United States to defray any cost of transportation or handling incident to such transfer.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to authorize the Secretary of the Army to donate 28 paintings to the Australian War Memorial."

RECONVEYANCE OF CERTAIN LANDS TO GOVERNMENT GRANTORS

The bill (H. R. 6422) to authorize the Secretary of the Army to convey to the Government grantors certain lands erroneously conveyed by them to the United States, was announced as next in order.

Mr. MORSE. Mr. President, it is my understanding that in this bill all that is sought to be done is to correct an erroneous conveyance previously made by the Army. The Federal Government, in fact, has no legal right, from the standpoint of equity, in the property. A mistake was made. It is now sought to correct the mistake by giving to the true owners of the property a clear title to it.

Mr. SALTONSTALL. Mr. President, what the Senator from Oregon has said is correct.

Mr. IVES. The Senator from Massachusetts has said exactly what I had intended to say.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

TALENT DIVISION OF THE ROGUE RIVER BASIN RECLAMATION PROJECT, OREGON—BILL PASSED OVER

The bill (S. 3134) to authorize the Secretary of the Interior to construct, operate, and maintain the Talent Division of the Rogue River Basin reclamation project, Oregon, was announced as next in order.

Mr. SMATHERS. Mr. President, may we have an explanation of the bill?

Mr. CORDON. Mr. President, did the Senator from Florida desire an explanation of the bill?

Mr. SMATHERS. Yes. Actually, it is the opinion of the calendar committee that neither this bill nor the next bill is properly calendar business. It was the intention of members of the calendar committee to object. If the Senator from Oregon desires to make an explanation, well and good, but I do not see the urgent nature of the bill.

Mr. CORDON. I shall be happy to make an explanation. I know of no outstanding urgency. The only urgency is the need for water, so that the people can irrigate their lands.

Mr. SMATHERS. I may say that it is the opinion of the calendar committee, on this side of the aisle, that this is not a bill which should be considered on the call of the calendar. Therefore, I ask that it go over.

Mr. MORSE. Mr. President, will the Senator withhold his request, so that I may make a brief comment?

Mr. SMATHERS. I shall be happy to do so.

Mr. MORSE. So far as this particular bill is concerned, it is a very sound one. I hope it can be taken up by motion at a very early date. Certainly the people in the area concerned need, very much, the water which will be provided by the improvement in this irrigation district. I hope there can be an early vote on the bill.

The PRESIDING OFFICER. The bill will be passed over.

COUGAR DAM AND RESERVOIR, OREG.—BILL PASSED OVER

The bill (H. R. 7815) to provide for the construction, operation, and maintenance of the Cougar Dam and Reservoir on the South Fork McKenzie River, Oreg., with participation for power by the city of Eugene, Oreg., was announced as next in order.

Mr. MORSE. Mr. President, I am surprised that this bill is on the calendar. I was of the opinion that it would not be placed on the calendar until the minority views on the bill, which I had been asked to prepare, had been submitted. The day before yesterday I spoke to the chairman of the Committee on Public Works, as I did again yesterday, pointing out that I had been at work on the minority views concerning the Niagara bill, a bill which had been acted on by the Committee on Public Works at least 2, or perhaps 3, weeks before action was taken on the Cougar Dam bill.

Only last week did I complete my work on the minority views relating to the Niagara bill. It is now in circulation among the other minority members of the committee. I am now at work on the minority views concerning the Cougar Dam bill. Certainly, I do not intend to consent to the passage of the Cougar Dam bill on the consent calendar at any time, because I think it is a measure which calls for a very detailed and thorough discussion of the whole power policy of the Government. I am disappointed that the bill has been placed on the calendar before I have had an opportunity to complete my work on the minority views. I had said to the chairman of the committee that I would be ready by the first part of next week.

I object.

Mr. BUSH. Mr. President, if the Senator from Oregon will permit me to say so, I wish to observe, in that connection, that at my request his office was notified yesterday that the report would be filed on the Cougar Dam bill.

The PRESIDING OFFICER. Does the Senator from Connecticut withhold his objection?

Mr. BUSH. I have no objection.

Mr. MORSE. The Senator from Connecticut has made a very interesting comment. I do not know what notification to my office yesterday that the bill would be reported yesterday has to do with what I think was a very clear understanding that the bill would not be reported until there had been an opportunity for the minority members of the committee to submit minority views.

The PRESIDING OFFICER. Will the Senator from Oregon withhold his objection, so that the Senator from Connecticut may make a statement?

Mr. MORSE. I thought he had yielded to me.

The PRESIDING OFFICER. The question is, Does the Senator from Oregon withhold his objection, so that the Senator from Connecticut may make a statement?

Mr. MORSE. By all means.

Mr. BUSH. I thank the Senator. I simply wish to say that the office of the Senator from Oregon was notified, I should say 2 or 3 days ago, that it was the intention of the committee to report the bill. There was no understanding that the report should be withheld pending the submission of minority views, which the Senator from Oregon desired to make. I do not think anything wrong has been done by following that procedure.

Mr. MARTIN. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. First, I wish to answer directly the Senator from Connecticut; then I will yield.

I am perfectly willing to let the records of the Committee on Public Works speak for themselves. When the Cougar Dam bill was finally acted upon after a rather prolonged discussion in the committee, I obtained permission from the committee to have a reasonable time in which to prepare minority views on the bill, before the bill was reported to the Senate.

The Senator from Connecticut may have given notice to my office 2 or 3 days ago, but he gave no notice to me personally. Giving notice to my office certainly cannot speed up the preparation of the minority views, when it is considered that I have been working as hard as I have been on the minority views concerning another proposed piece of power legislation which was approved by the Committee on Public Works quite some time ago.

In my judgment, there is good reason to believe that one of the reasons why the Niagara bill is not before the Senate now is that there are those in the Senate who are seeking to get some of the other power bills acted upon as bellwethers before the Niagara bill is brought before the Senate.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Connecticut.

Mr. BUSH. The purpose in notifying the office of the Senator from Oregon was so that he would know it was the intention of the committee to report the bill. It gave the Senator an opportunity, if he wished, to object to our reporting the bill. He offered no objection. Therefore, I see nothing wrong in the premises.

Mr. MORSE. I knew nothing about the notice; but I wish to say I have very little cooperation from the staff of the committee, anyway. However, I did go to the chairman of the Committee on Public Works, with whom I do my business on the Public Works Committee, day before yesterday, and told him of my situation with regard to the preparation of minority views on the Cougar Dam bill.

Mr. MARTIN. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Pennsylvania.

Mr. MARTIN. The Senator from Oregon spoke to me about the bill a couple of days ago, and I told him I felt there was no reason why he should not have more time in which to file his minority views, and that, while the bill was on the calendar, it would not be acted upon, because it would take unanimous consent. So I think we are talking now without any objective, because, of course, the bill could not be considered unless there was unanimous consent, and it was the intention of the Public Works Committee to give the Senator ample time in which to file his minority views. The majority leader will not be asked to bring the bill up until the Senator from Oregon does have time to file the minority views.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. MORSE. I wish to thank the Senator from Pennsylvania for his comment. I object to the consideration of the bill.

The PRESIDING OFFICER. The bill will be passed over.

INVESTIGATION OF CRITICAL RAW MATERIALS — RESOLUTION REFERRED TO COMMITTEE ON RULES AND ADMINISTRATION

The resolution (S. Res. 271) providing for an investigation of critical raw materials by the Committee on Interior and Insular Affairs was announced as next in order.

Mr. SMATHERS. Mr. President, I ask unanimous consent that the resolution be referred to the Committee on Rules and Administration.

The PRESIDING OFFICER. Without objection, the resolution will be referred to the Committee on Rules and Administration.

ELECTION OF DELEGATES REPRESENTING DISTRICT OF COLUMBIA TO NATIONAL POLITICAL CONVENTIONS

The Senate proceeded to consider the bill (S. 1611) to regulate the election of delegates representing the District of Columbia to national political conventions, and for other purposes, which had been reported from the Committee on the District of Columbia with amendments.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. SCHOEPPEL. Mr. President, I should like to ask whether the committee action on the bill was unanimous.

Mr. CASE. Mr. President, if I may respond to the inquiry of the Senator from Kansas, I should like to say it was unanimous. There was no objection to the bill raised at the hearings or in committee. The bill was previously reported unanimously in an earlier session of the Senate, and, in fact, it passed the Senate once previously.

The PRESIDING OFFICER. The clerk will state the amendments.

Mr. CASE. Mr. President, there are several committee amendments. I ask that they be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, the committee amendments will be considered and agreed to en bloc.

The amendments agreed to en bloc are as follows:

On page 2, line 8, after the word "District", to insert "and who does not claim voting residence in any State or Territory"; in line 20, after the words "by the", to strike out "President of the United States" and insert "Commissioners of the District of Columbia"; in line 22, after the words "by the", to strike out "President" and insert "Commissioners"; on page 3, line 14, after the words "of the", to strike out "1-year" and insert "3-year"; in line 16, after the word "the", to insert "Federal or"; in line 20, after the word "of", to strike out "$15" and insert "$25"; on page 7, line 1, after the word "in", to strike out "June" and insert "April"; on page 8, after line 3, to strike out:

"(2) signed by not less than 100 voters of the same political party as the nominee registered under section 7."

And insert:

"(2) signed by not less than 100 voters, registered under section 7, and of the same political party as the nominee."

In line 13, after the word "nomination", to insert "and is a voter registered under section 7"; on page 11, line 2, after "SEC. 11.", to insert "(a)"; in line 5, after the word "in", to strike out "June" and insert "April"; after line 9, to insert:

"(b) Candidates receiving the highest number of votes in said election shall be declared the winners.

"(c) In the case of a tie, the candidates receiving the tie vote shall cast lots before the Board at 12 o'clock noon on a date to be set by the Board, but not sooner than 10 days following the primary, and the one to whom the lot shall fall shall be declared the winner. If any candidate or candidates, receiving a tie vote, fail to appear before 12 o'clock noon on said day, the Board shall cast lots for him or them. For the purpose of casting lots any candidate may appear in person, or by proxy appointed in writing."

On page 14, line 3, after the word "campaign", to insert "covered by this act", and in line 13, after the word "expended", to insert "in connection with said election."

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That national committeemen and national committeewomen of political parties and delegates and alternates from the District of Columbia to all conventions of political parties nominating candidates for the Presidency and the Vice Presidency of the United States shall be elected as provided in this act.

DEFINITIONS

SEC. 2. For the purposes of this act—

(1) The term "District" means the District of Columbia.

(2) The term "qualified elector" means a citizen of the United States (A) who has been domiciled in the District continuously since the beginning of the 1-year period ending on the day of the next election or, if such period has not begun, is domiciled in the District and who does not claim voting residence in any State or Territory; (B) who is, or will be on the day of the next election, 21 years old; (C) who has never been convicted of a felony in the United States, or if he has been so convicted, has been pardoned; and (D) who is not mentally incompetent as adjudged by a court of competent jurisdiction.

(3) The term "Board" means the Board of Elections for the District of Columbia provided for by section 3.

CREATION OF BOARD OF ELECTIONS

SEC. 3. There is hereby created a Board of Elections for the District of Columbia, to be composed of three members appointed by the Commissioners of the District of Columbia. The first terms of offices on the Board shall expire, as designated by the Commissioners, one at the close of December 31 of each of the first 3 years which begin after the date of enactment of this act. Subsequent terms of each such office shall be 3 years beginning January 1 following the expiration of the preceding term of such office. Any person appointed to fill a vacant office shall be appointed only for the unexpired term of such office. Until his successor is appointed and has qualified, a member may continue to serve even though the term of the office to which he was appointed has expired.

QUALIFICATIONS AND COMPENSATION OF MEMBERS

SEC. 4. (a) No person shall be a member of the Board unless he qualifies as an elector and resides in the District. No person may be appointed to the Board unless he has been domiciled in the District continuously since the beginning of the 3-year period ending on the day he is appointed. Members of the Board shall hold no other office or employment in the Federal or District Government. Not more than two members shall be members of the same political party.

(b) Each member of the Board shall be paid compensation at the rate of $25 per day while performing duties under this act. Except as provided in subsection (a) no person shall be ineligible to serve or to receive compensation as a member of the Board because he occupies another office or position or because he receives compensation (including retirement compensation) from another source. The right to another office or position or to compensation from another source otherwise secured to such a person under the laws of the United States shall not be abridged by the fact of his service or receipt of compensation as a member of the Board, if such service does not interfere with the discharge of his duties in such other office or position.

FUNCTIONS OF BOARD

SEC. 5. (a) The Board shall—

(1) maintain a permanent registry, keeping it accurate and current;

(2) conduct registrations and elections;

(3) print, distribute, and count ballots, or provide and operate suitable voting machines;

(4) divide the District into appropriate voting precincts, each of which shall contain at least 350 registered persons;

(5) operate polling places;

(6) certify nominees and the results of elections; and

(7) perform such other duties as are imposed upon it by this act.

(b) The Board, and persons authorized by it, may administer oaths to persons executing affidavits pursuant to sections 7 and 8. It may provide for the administering of such other oaths as it considers appropriate to require in the performance of its functions.

(c) The Board may prescribe such regulations as it considers necessary to carry out the purposes of this act.

(d) The Board may employ necessary personnel.

BOARD TO BE INDEPENDENT AGENCY

SEC. 6. (a) In the performance of its duties, the Board shall not be subject to the direction of any nonjudicial officer of the District.

(b) The officers and agencies of the District government shall furnish to the Board, upon request of the Board, as are available such space and facilities in public buildings in the District to be used as registration or polling places, and such records, information, services, personnel, offices, and equipment, and such other assistance and facilities, as may be necessary to enable the Board properly to perform its functions.

REGISTRATION

SEC. 7. (a) No person shall vote in any election in the District unless he is a qualified elector and, except as provided in subsection (e), is registered in the District.

(b) No person shall be registered unless—

(1) he is a qualified elector;

(2) he has been domiciled in the District continuously since the beginning of the 9-month period ending on the day he offers to register;

(3) except as prevented by physical disability, he can read and write the English language, as shown by his ability to read and complete the affidavit prescribed by paragraph (4); and

(4) he executes a registration affidavit, completed in his own handwriting (unless prevented by physical disability) and on the form prescribed by the Board pursuant to subsection (c), showing his political affiliation, and that he meets each of the requirements specified in section 2 (2) for a qualified elector as well as the requirement of paragraph (2) of this subsection.

(c) In administering the provisions of subsection (b) (4), the Board shall prepare and use a registration affidavit form in which each request for information is readily understandable and can be satisfied by a concise answer or mark. With respect to each requirement named in or imposed by such subsection, the Board may make such requests for specific information as in its judgment may be necessary or appropriate to show whether a person seeking to register meets such requirement.

(d) The registry shall be kept open except during the 60-day period ending on the first Tuesday in April of each presidential election year, and except as provided by the Board in the case of a special election. While the registry is open, any person may apply for registration or change his registration.

(e) If a person is not permitted to register, such person, or any qualified candidate, may appeal to the Board, but not later than 3 days after the registry is closed for the next election. The Board shall decide within 7 days after the appeal is perfected whether the challenged elector is entitled to register. If the appeal is denied, the appellant may, within 3 days after such denial, appeal to the municipal court for the District of Columbia. The decision of such court shall be final and not appealable. If the appeal is upheld by either the Board or the court, the challenged elector shall be allowed to register immediately. If the appeal is pending on election day, the challenged elector may cast a ballot marked "challenged", as provided in section 10 (e).

NOMINATIONS

SEC. 8. (a) Candidates participating in an election held pursuant to this act shall be the persons registered under section 7 who have been nominated by a petition—

(1) prepared and presented to the Board in accordance with rules prescribed by the Board, but not later than 60 days before the date of the election; and

(2) signed by not less than 100 voters, registered under section 7, and of the same political party as the nominee.

(b) No person shall hold the office of committeeman, committeewoman, delegate, or alternate unless he has been a bona fide domiciliary of the District of Columbia for 3 years previous to his nomination and is a voter registered under section 7.

EXEMPTION FROM HATCH ACT

SEC. 9. The last sentence of section 9 (a) of the act entitled "An act to prevent pernicious political activities," approved August 2, 1939, as amended (5 U. S. C., sec. 118i), is amended to read as follows: "The provisions of the second sentence of this subsection shall not apply (1) to the employees of the Alaska Railroad, residing in municipalities on the line of the railroad, in respect to activities involving the municipality in which they reside, or (2) to any qualified elector of the District of Columbia, in respect to taking an active part in the nomination or election of national committeemen and national committeewomen of political parties and of delegates and alternates representing the District of Columbia at national political conventions."

METHOD OF VOTING

SEC. 10. (a) Voting in all elections shall be secret. Voting may be by paper ballot or voting machine.

(b) The ballot of a person who is registered as a resident of the District shall be valid only if cast in the voting precinct where the residence shown on his registration is located.

(c) There shall be no absentee voting.

(d) Each qualified candidate may have a watcher at each polling place, provided the watcher presents proper credentials signed by the candidate. No one shall interfere with the opportunity of a watcher to observe the conduct of the election at that polling place and the counting of votes. Watchers may challenge prospective voters who are believed to be unqualified to vote.

(e) If the official in charge of the polling place, after hearing both parties to any such challenge or acting on his own initiative with respect to a prospective voter, reasonably believes the prospective voter is unqualified to vote, he shall allow the voter to cast a paper ballot marked "challenged." Ballots so cast shall be segregated, and no such ballot shall be counted until the challenge has been removed as provided in subsection (f).

(f) If a person has been permitted to vote only by challenged ballot, such person, or any qualified candidate, may appeal to the Board within 3 days after election day. The Board shall decide within 7 days after the appeal is perfected whether the voter was qualified to vote. If the Board decides that the voter was qualified to vote, the word "challenged" shall be stricken from the voter's ballot and the ballot shall be treated as if it had not been challenged.

(g) If a voter is physically unable to mark his ballot or operate the voting machine, the official in charge of the voting place may enter the voting booth with him and vote as directed. Upon the request of any such voter, a second election official may enter the voting booth to assist in the voting. The officials shall tell no one how the voter voted. The official in charge of the voting place shall make a return of all such voters, giving their names and disabilities.

(h) No person shall vote more than once in any election nor in an election held by a political party other than that to which he has declared himself to be a member.

(i) Copies of the regulations of the Board with respect to voting shall be made available to prospective voters at each polling place.

ELECTIONS

SEC. 11. (a) The election of national committeemen and national committeewomen of political parties and of delegates and alternates to national political conventions shall be held on the first Tuesday in April of each presidential election year. Any such election shall be conducted by the Board in conformity with the provisions of this act. Polls shall be open from 8 a. m. to 8 p. m. on election days.

(b) Candidates receiving the highest number of votes in said election shall be declared the winners.

(c) In the case of a tie, the candidates receiving the tie vote shall cast lots before the Board at 12 o'clock noon on a date to be set by the Board, but not sooner than 10 days following the primary, and the one to whom the lot shall fall shall be declared the winner. If any candidate or candidates, receiving a tie vote, fail to appear before 12 o'clock noon on said day, the Board shall cast lots for him or them. For the purpose of casting lots any candidate may appear in person, or by proxy appointed in writing.

RECOUNTS AND CONTESTS

SEC. 12. (a) If, within 7 days after the Board certifies the results of an election, any qualified candidate at such election petitions the Board to have the votes cast at such election recounted in one or more voting precincts, the Board shall order such recount. In each such case, the petitioner shall deposit a fee of $5 for each precinct petitioned to be recounted. If the cost of the recount is less than $5 per precinct, the difference shall be refunded. If the result of the election is changed as a result of the recount, the entire amount deposited by the petitioner shall be refunded. Such recounts shall be conducted in the manner prescribed by the Board by regulation.

(b) After the Board certifies the results of an election, any person who voted in the election may petition the United States District Court for the District of Columbia to review such election. In response to such a petition, the court may set aside the results so certified and declare the true results of the election, or void the election. To determine the true results of an election the court may order a recount or take other appropriate action, whether or not a recount has been conducted or requested pursuant to subsection (a). The court shall void an election only for fraud, mistake, or other defect, serious enough to vitiate the election as a fair expression of the will of the registered qualified electors voting therein. If the court voids an election it may order a special election, which shall be conducted in such manner (comparable to that prescribed for regular elections), and at such time, as the Board shall prescribe. The decision of such court shall be final and not appealable.

INTERFERENCE WITH REGISTRATION OR VOTING

SEC. 13. (a) No one shall interfere with the registration or voting of another person, except as it may be reasonably necessary in the performance of a duty imposed by law. No person performing such a duty shall interfere with the registration or voting of another person because of his race, color, sex, or religious belief, or his want of property to perform a military duty on election day or income.

(b) No registered voter shall be required which would prevent him from voting, except in time of war or public danger or unless he is away from the District in military service. No registered voter may be arrested while voting or going to vote except for a

breach of the peace then committed or for treason or felony.

EXPENDITURES

SEC. 14. (a) There is hereby authorized to be appropriated, out of the funds of the District of Columbia, such amounts as may be necessary to carry out the purposes of this act.

(b) Subject to the penalties provided in this act, a candidate for national committeeman, national committwoman, delegate, or alternate, in his campaign for election, shall not make expenditures in excess of $2,500.

(c) No independent committee or party committee shall receive contributions aggregating more than $100,000, or make expenditures aggregating more than $100,000 for any campaign covered by this act.

(d) No person shall, directly or indirectly, make contribution in an aggregate amount in excess of $5,000 in connection with any campaign for election of any national committeeman, national committeewoman, delegate, or alternate.

(e) Every candidate and independent committee or party committee shall, within 10 days after the election, file with the Board of Elections an itemized statement, subscribed and sworn to, setting forth all moneys received and expended in connection with said election, the names of persons from whom received and to whom paid, and the purpose for which it was expended. Such statement shall set forth any unpaid debts and obligations incurred by the candidate or independent committee or party committee with regard to such election, and specify the balance, if any, of election funds remaining in his or their hands.

PENALTIES

SEC. 15. Any person who shall register, or attempt to register, under the provisions of this act and make any false representations as to his place of residence or his voting privilege in any other part of the United States, or be guilty of bribery or intimidation of any voter at the elections herein provided for, or, being registered, shall vote or attempt to vote more than once in any election so held, or shall purloin or secrete any of the votes cast in such elections, or, if employed in the counting of votes in such elections, make a false report in regard thereto or attempt to vote in an election held by a political party other than that to which he has declared himself to be affiliated, and every candidate, person, or official of any political committee who shall make any expenditure or contribution in violation of this act, shall upon conviction thereof be fined not more than $500 or be imprisoned not more than 90 days, or both.

REVISION AND EQUALIZATION OF REAL-ESTATE VALUES IN THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (H. R. 7128) to amend the act entitled "An act to provide an immediate revision and equalization of real-estate values in the District of Columbia," which had been reported from the Committee on the District of Columbia with amendments, on page 2, after line 2, to strike out:

The Commissioners of the District of Columbia shall appoint six discreet persons, who shall be conversant with real-estate values in the District of Columbia, as a permanent board of assistant assessors. Such appointees shall have been bona fide residents of the District of Columbia for a period of at least 5 years, except that two of such appointees may be persons who have been bona fide residents of the District of Columbia metropolitan area for a period of at least 5 years.

And in lieu thereof to insert the following:

The Commissioners of the District of Columbia shall appoint as a permanent board of assistant assessors such persons as are conversant with real-estate values in the District of Columbia and who have been bona fide residents of the District for a period of at least 5 years, except that two of such appointees may be persons who have been bona fide residents of the District of Columbia metropolitan area for a period of at least 5 years.

And on page 3, after line 2, to insert:

SEC. 2. Where any provisions of this act, or any amendment made by this act, refers to an office or agency abolished by Reorganization Plan No. 5 of 1952, such reference shall be deemed to be to the office, agency, or officer designated by the Commissioners to perform the functions of the office or agency so abolished.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. SCHOEPPEL. Mr. President, I am substituting today on the calendar committee for the distinguished Senator from Kentucky [Mr. COOPER] and the distinguished Senator from New Jersey [Mr. HENDRICKSON]. I note that there are a number of District of Columbia bills on the calendar. The staff of the calendar committee, however, did not have the opportunity to go over them. I should like to ask, respecting the bills shown on the bottom of page 15 and all of page 16 of the calendar, whether the committee action was unanimous with respect to those measures.

Mr. CASE. Mr. President, I shall be glad to respond to that inquiry. The action of the committee was unanimous on all of the bills with the exception of calendar 1794, which is Senate bill 880, to amend the license law of the District of Columbia. All the bills were considered by subcommittees at open hearings. They were reported to the full committee yesterday. There was a good attendance of the committee yesterday. Most of the time there was much more than a quorum present, and all the time there was at least a quorum present. The bills were all reported unanimously with the one exception I have mentioned.

Mr. SCHOEPPEL. I thank the Senator from South Dakota.

The PRESIDING OFFICER. The question is on agreeing to the amendments reported by the committee.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

FEES CHARGED FOR SERVICES RENDERED BY THE RECORDER OF DEEDS FOR THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (S. 3518) to amend the laws relating to fees charged for services rendered by the Office of the Recorder of Deeds for the District of Columbia, which had been reported from the Committee on the District of Columbia with amendments, on page 2, after line 14, to insert:

(c) Nothing in this section shall be construed as authorizing the Commissioners to modify any provision of the District of Columbia Business Corporation Act, approved June 8, 1954.

And on page 4, after line 4, to insert:

SEC. 5. Clause (p) of section 2 of the District of Columbia Business Corporation Act (68 Stat. 180) is amended by adding thereto the following sentence: "It shall be the duty of the Recorder of Deeds and of any other officer or agency of the Government of the District of Columbia to perform any function delegated to such officer or agency by the Commissioners pursuant to this act."

So as to make the bill read:

Be it enacted, etc., That (a) notwithstanding the provisions of section 552 of subchapter 4 of chapter 16 of the act approved March 3, 1901, as amended (sec. 45–708, D. C. Code, 1951 edition); section 12 of the act approved July 2, 1940, as amended and supplemented by the act approved June 19, 1948 (secs. 45–712 and 45–712a, D. C. Code, 1951 edition), or any other act of Congress, the Commissioners of the District of Columbia may, from time to time, increase or decrease the fees authorized to be charged for filing, recording, and indexing or for making a certified copy of any instrument; for searching records; for taking acknowledgments; for recording plats; for filing affidavits; for filing certificates of incorporation and amendments of certificates; for recording liens, assignments of liens, or releases of liens on motor vehicles or trailers; or for any other service rendered by the office of the Recorder of Deeds.

(b) The fees for services rendered by the office of the Recorder of Deeds shall be fixed at such rates, computed on such bases and in such manner as may, in the judgment of the Commissioners, be necessary to defray the approximate cost of operating the office of the Recorder of Deeds.

(c) Nothing in this section shall be construed as authorizing the Commissioners to modify any provision of the District of Columbia Business Corporation Act, approved June 8, 1954.

SEC. 2. Section 548 of the Code of Laws for the District of Columbia, as amended by the act approved June 9, 1952 (66 Stat. 129; sec. 45–701, D. C. Code, 1951 edition), is amended by adding at the end thereof the following: "All of the duties and functions of the Recorder of Deeds and of officers and employees in his office shall be performed subject to the supervision and control of the Commissioners of the District."

SEC. 3. Section 549 of the Code of Laws for the District of Columbia, as amended by the act approved June 9, 1952 (sec. 45–702, D. C. Code, 1951 edition), is amended by striking "The Recorder of Deeds is authorized to appoint a deputy recorder" and inserting in lieu thereof "The Commissioners of the District of Columbia are authorized to appoint a deputy recorder of deeds."

SEC. 4. (a) So much of the first sentence of the act approved March 3, 1925 (43 Stat. 1102, ch. 416), as amended by the act approved June 9, 1952 (66 Stat. 129; sec. 45–703, D. C. Code, 1951 edition), as read: "That the Recorder of Deeds is authorized to appoint a second deputy recorder" is amended to read "The Commissioners of the District of Columbia are authorized to appoint a second deputy recorder of deeds."

(b) The third sentence of such act approved March 3, 1925, as amended by such act approved June 9, 1952, is amended to read: "The Commissioners of the District of Columbia shall appoint all employees in the office of the Recorder of Deeds, except the

Recorder, in accordance with civil-service laws and fix the compensation of all employees in such office in accordance with the Classification Act of 1949, as amended, and the said Commissioners may delegate to any officer subordinate to them the function of appointing any of the employees in such office other than the Recorder."

SEC. 5. Clause (p) of section 2 of the District of Columbia Business Corporation Act (69 Stat. 180) is amended by adding thereto the following sentence: "It shall be the duty of the Recorder of Deeds and of any other officer or agency of the Government of the District of Columbia to perform any function delegated to such officer or agency by the Commissioners pursuant to this act."

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

REGISTRATION OF BIRTHS IN THE DISTRICT OF COLUMBIA

The bill (S. 3558) to amend the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes," was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the first section of the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes," approved March 1, 1907 (34 Stat. 1010; title 6, ch. 3, D. C. Code, 1951 edition), is amended (a) by inserting "(a)" immediately after the word "That" where it first appears in said act; and (b) by adding a new subsection "(b)" to said first section, to read as follows:

"(b) The Commissioners of the District of Columbia are hereby authorized and empowered to adopt rules and regulations governing the filing of reports of births and the issuance of delayed birth registration certificates in those cases where certificates of birth have not been recorded pursuant to subsection (a) of this section."

AVAILABILITY OF PSYCHIATRIC AND PSYCHOLOGICAL SERVICE TO JUDGES OF THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (H. R. 9077) to amend section 405 of the District of Columbia Law Enforcement Act of 1953, to make available to the judges of such District the psychiatric and psychological service provided for in such section, which had been reported from the Committee on the District of Columbia with an amendment, to strike out all after the enacting clause and insert:

That section 405 of the District of Columbia Law Enforcement Act of 1953 is amended by striking "(1) The probation officers" and inserting in lieu thereof "(1) In criminal cases, the judges of the district court and the probation officers."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CONSTRUCTION OF CERTAIN HIGHWAY-RAILROAD GRADE SEPARATIONS IN THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (H. R. 6080) to authorize the appropriation of funds for the construction of certain highway-railroad grade separations in the District of Columbia, and for other purposes, which had been reported from the Committee on the District of Columbia with amendments, on page 1, line 7, after the word "Columbia", to insert "for credit to the highway fund", and in line 9, after the word "appropriated", to strike out "not to exceed $475,000" and insert "the sum of $200,000."

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILL PASSED OVER

The bill (S. 3655) to provide that the Metropolitan Police force shall keep arrest books which are open to the public was announced as next in order.

Mr. SMATHERS. Over.

The PRESIDING OFFICER. The bill will be passed over.

CONTROL OF DANGEROUS WEAPONS IN THE DISTRICT OF COLUMBIA

The bill (S. 2686) to amend the act entitled "An act to control the possession, sale, transfer, and use of pistols and other dangerous weapons in the District of Columbia" was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 1 of the act of Congress entitled "An act to control the possession, sale, transfer, and use of pistols and other dangerous weapons in the District of Columbia, to provide penalties, to prescribe rules of evidence, and for other purposes," approved July 8, 1932 (sec. 22–3201, D. C. Code, 1951 edition), is hereby amended by inserting "robbery," immediately before the word "larceny" in the definition of "crime of violence."

PROTECTION OF LIFE AND PROPERTY IN AND ON BUILDINGS AND GROUNDS OF CERTAIN INSTITUTIONS

The bill (S. 2687) to authorize the Commissioners of the District of Columbia to designate employees of the District to protect life and property in and on the buildings and grounds of certain institutions was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:
